PRESS RELEASE

TSI U1 to undergo maintenance activity

The 150-MW Unit 1 of the 300-MW Davao baseload power plant of Therma South Inc. (TSI), a subsidiary of Aboitiz Power Corporation, will undergo a maintenance outage starting August 22, 2016, for preventive maintenance activities.

“This maintenance activity is necessary to review Unit 1 and to implement some corrective measures as needed which should be similar in nature to the coverage of work done in the recently planned outage of Unit 2 from June 18 to July 13,” said Sebastian R. Lacson, TSI President, and COO.

The maintenance activity is estimated to last until September 7.

“We are confident that after this outage, TSI should be better equipped to reliably meet the needs of our customers. As always, we will try our best to keep the duration of this interruption to a minimum,” added Lacson.

Originally scheduled to start August 6, the Unit 1 maintenance schedule was moved to August 22 to better adjust to the grid situation.

TSI is coordinating with its customers – electric cooperatives and distribution utilities in Mindanao – in order to implement measures to mitigate the impact of the maintenance activity.
