The Group's revenue from the sale of electricity accounts for 37% of the Group's consolidated revenue and is material to the Group. This matter is significant to the audit because the revenue recognized depends on the electric consumption captured, the rates applied across different customers, and the systems involved in the billing process. Electric consumption captured is based on the meter readings taken on various dates for the different types of customers (i.e., industrial, commercial, and residential customers) within the franchise areas of operations of the distribution utilities.

The Group's disclosures related to this matter are provided in Notes 3 and 21 to the consolidated financial statements.

Audit Response

We obtained an understanding and evaluated the design and tested the controls over the billing and revenue process which includes the capture and accumulation of meter data in the billing system and calculation of billed amounts, and uploading of billed amounts from the billing system to the financial reporting system. We performed a test calculation of the rates using the Energy Regulatory Commission-approved rates and formulae, then compared them with the rates used in billing statements.

Recoverability of Certain Segments of Property, Plant and Equipment

Based on the assessment of the Group as of December 31, 2019, certain segments of property, plant and equipment totaling ₱3.55 billion, may be impaired. We considered the recoverability of certain segments of property, plant and equipment as a key audit matter because of the amount involved and significant management assumptions and judgment involved which include future electricity generation levels and costs as well as external inputs such as fuel prices, electricity prices and discount rates.

The disclosure about the recoverability of certain segments of property, plant and equipment are included in Note 12 to the consolidated financial statements.

Audit Response

We involved our internal specialist in assessing the methodology and the assumptions used by the Group in estimating value-in-use. We compared the significant assumptions, such as future electricity generation levels and costs, fuel prices and electricity prices against historical data and industry outlook. Our internal specialist reviewed the discount rates by performing an independent testing on the derivation of the discount rates using market-based parameters. We performed sensitivity analyses to understand the impact of reasonable changes in the key assumptions. We also reviewed the Group's disclosures about those assumptions to which the outcome of the impairment testing is most sensitive.

Consolidation Process

Aboitiz Power Corporation owns a significant number of domestic and foreign entities at varying equity interests. We considered the consolidation process as a key audit matter because it required significant auditor attention, particularly on the following areas: (a) fair value adjustments arising from business combinations, (b) numerous intercompany transactions, (c) alignment of accounting policies of the investees with the Group's policy on property, plant and equipment and investment properties, (d) translation of investees' foreign-currency-denominated financial information to the Group's functional currency and (e) other equity adjustments.

The Group's disclosure on the basis of consolidation is in Note 3 to the consolidated financial statements.

Audit Response

We obtained an understanding of the consolidation process and the related controls, the Group's process for identifying related parties and related party transactions, as well as the reconciliation of intercompany balances. We also checked the entities included in the consolidation. We reviewed the eliminating entries recorded, including fair value adjustments. In addition, we reviewed the currency translation adjustments, as well as the alignment of accounting policies on property, plant and equipment and investment properties.

Other Information

Management is responsible for the other information. The other information comprises the information included in the SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2019, but does not include the consolidated financial statements and our auditor's report thereon. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2019 are expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

ABOITIZ POWER CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in Thousands, Except Earnings per Share and Exchange Rate Data and When Otherwise Indicated)

1. Corporate Information

Aboitiz Power Corporation (the Company) was incorporated in the Philippines and registered with the Securities and Exchange Commission on February 13, 1998. The Company is a publicly-listed holding company of the entities engaged in power generation, retail electricity supply and power distribution in the Aboitiz Group. As of December 31, 2019, Aboitiz Equity Ventures, Inc. (AEV, also incorporated in the Philippines) owns 76.98% of the Company. The ultimate parent of the Company is Aboitiz & Company, Inc. (ACO).

The Company's registered office address is 32nd Street, Bonifacio Global City, Taguig City, Metro Manila.

The consolidated financial statements of the Group were approved and authorized for issue in accordance with a resolution by the Board of Directors (BOD) of the Company on March 6, 2020.

2. Group Information

The consolidated financial statements comprise the financial statements of the Company, subsidiaries controlled by the Company and a joint operation that is subject to joint control (collectively referred to as "the Group"; see Note 11). The following are the subsidiaries as of December 31 of each year:

	Nature of Business	Percentage of Ownership

3. **Summary of Significant Accounting Policies**

Basis of Preparation

The accompanying consolidated financial statements have been prepared on a historical cost basis, except for derivative financial instruments, financial assets at FVTPL and investment properties which are measured at fair value. The consolidated financial statements are presented in Philippine peso which is the Company's functional currency and all values are rounded to the nearest thousand except for earnings per share and exchange rates and as otherwise indicated.

The consolidated financial statements provide comparative information in respect of the previous periods.

Statement of Compliance

The consolidated financial statements are prepared in compliance with Philippine Financial Reporting Standards (PFRSs).

Basis of Consolidation

The consolidated financial statements comprise the financial statements of the Company, its subsidiaries and joint operation that are subject to joint control as at December 31 of each year. The Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and
- The Group's voting rights and potential voting rights.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the date the Group gains control until the date the Group ceases to control the subsidiary.

The financial statements of the subsidiaries are prepared for the same reporting year as the Company using consistent accounting policies.

Profit or loss and each component of other comprehensive income are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets, liabilities, equity, income, expenses, cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognizes the assets (including goodwill) and liabilities of the subsidiary;
- Derecognizes the carrying amount of any non-controlling interest;
- Derecognizes the cumulative translation differences recorded in equity;
- Recognizes the fair value of the consideration received;
- Recognizes the fair value of any investment retained;
- Recognizes any surplus or deficit in profit or loss; and
- Reclassifies the parent's share of components previously recognized in other comprehensive income to profit or loss or retained earnings, as appropriate.

Transactions with Non-controlling Interests

Non-controlling interests represent the portion of profit or loss and net assets in the subsidiaries not held by the Group and are presented separately in the consolidated statement of income and within equity in the consolidated balance sheet, separately from the equity attributable to equity holders of the parent. Transactions with non-controlling interests are accounted for as equity transactions. On acquisitions of non-controlling interests, the difference between the consideration and the book value of the share of the net assets acquired is reflected as being a transaction between owners and recognized directly in equity. Gain or loss on disposals of non-controlling interest is also recognized directly in equity.

Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year, except for the new and revised standards and Philippine Interpretations which were applied starting January 1, 2019. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

The Group applied PFRS 16 *Leases* for the first time. The nature and effect of the changes as a result of adoption of this new accounting standard is described below. Several other amendments and interpretations apply for the first time in 2019, but did not have any significant impact on the Group's consolidated financial statements:

- PFRS 16, *Leases*

PFRS 16 was issued in January 2016 and it replaces Philippine Accounting Standard (PAS) 17, *Leases*, IFRIC 4, *Determining whether an Arrangement contains a Lease*, SIC-15, *Operating Leases-Incentives* and SIC-27, *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*. PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under PAS 17.

Lessor accounting under PFRS 16 is substantially unchanged from PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases. Therefore, PFRS 16 did not have an impact for leases where the Group is the lessor.

The Group adopted PFRS 16 using the modified retrospective method of adoption with the date of initial application of January 1, 2019. Under this method, the standard is applied retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application without restating comparative information. The Group has elected to apply PFRS 16 transition relief to contracts that were previously identified as leases applying PAS 17 and IFRIC 4. The Group will therefore not apply PFRS 16 to contracts that were not previously identified as containing a lease applying PAS 17 and IFRIC 4.

The Group has elected to use the exemption proposed by the standard on the lease contracts for which the lease terms end within 12 months from the date of initial application. Lease payments on short term leases are recognized as expense on a straight-line basis over the lease term.

The effects of adoption on the consolidated financial statements are as follows:

	As at January 1, 2019
Increase (decrease) in consolidated balance sheet:	
Property, plant and equipment	P3,170,656
Investments in and advances in associates and joint ventures	(18,691)
Other current and noncurrent assets	(1,133,294)
Total Assets	P2,018,671
Lease liabilities	P49,190,986
Finance lease obligation	(46,894,355)
Retained earnings	(237,890)
Non-controlling interests	(40,070)
Total Liabilities and Equity	P2,018,671

Based on the above, as at January 1, 2019:

- Property, plant and equipment were recognized amounting to P3.17 billion representing the amount of right-of-use assets set up on transition date.
- Adjustment to investment in and advances in associates and joint ventures amounting to P18.69 million pertaining to share of the Group in the transition made by its associates and joint ventures.
- Additional lease liabilities of P49.19 billion were recognized, which includes the reclass of finance lease obligation amounting to P46.89 billion previously recognized.
- Prepayments of P1.13 billion related to previous operating leases under PAS 17 were derecognized.
- The net effect of these adjustments had been adjusted to retained earnings and non-controlling interest amounting to P237.89 million and P40.07 million, respectively.

Prior to adoption of PFRS 16, the Group classified each of its leases (as lessee) at the inception date as either a finance lease or an operating lease. A lease was classified as a finance lease if it transferred substantially all of the risks and rewards incidental to ownership of the leased asset to the Group; otherwise it was classified as an operating lease. Finance leases were capitalized at the commencement of the lease at the inception date fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments were apportioned between interest (recognized as finance costs) and reduction of the lease liability. In an operating lease, the leased property was not capitalized and the lease payments were recognized as rent expense in the consolidated statement of income on a straight-line basis over the lease term. Any prepaid rent was recognized under "Other current assets" or "Other noncurrent assets."

Upon adoption of PFRS 16, the Group applied a single recognition and measurement approach for all leases, except for short-term leases. The standard provides specific transition requirements and practical expedients, which have been applied by the Group.

Leases previously classified as finance leases

The Group did not change the initial carrying amounts of recognized assets and liabilities at the date of initial application for leases previously classified as finance leases (i.e., the right-of-use assets and lease liabilities equal the lease assets and liabilities recognized under PAS 17). The requirements of PFRS 16 was applied to these leases from January 1, 2019. The Group reclassified amounts recognized under finance lease obligation to lease liabilities.

Leases previously accounted for as operating leases

The Group recognized right-of-use assets and lease liabilities for those leases previously classified as operating leases, except for short-term leases. The right-of-use assets for most leases were recognized based on the carrying amount as if the standard had always been applied, apart from the use of incremental borrowing rate at the date of initial application. In some leases, the right-of-use assets were recognized based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognized. Lease liabilities were recognized based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application.

The Group also applied the following practical expedients provided by the standard:

- Use of a single discount rate to a portfolio of leases with reasonably similar characteristics,
- Apply the short-term leases exemptions to leases with lease term that ends within 12 months of the date of initial application,
- Exclusion of initial direct costs from the measurement of the right-of-use asset at the date of initial application,
- Use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

The lease liabilities as at January 1, 2019 can be reconciled to the operating lease commitments as of December 31, 2018 as follows:

Operating lease commitments as at December 31, 2018	P7,651,372
Incremental borrowing rate as at January 1, 2019	7.04% to 9.75%
Discounted operating lease commitments at January 1, 2019	2,310,811
Less commitments relating to short-term leases	(14,180)
Add commitments to leases previously classified as finance leases	46,894,355
Lease liabilities as at January 1, 2019	P49,190,986

- *Amendments to PFRS 9, Prepayment Features with Negative Compensation*

Under PFRS 9, a debt instrument can be measured at amortized cost or at fair value through other comprehensive income, provided that the contractual cash flows are 'solely payments of principal and interest on the principal amount outstanding' (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to PFRS 9 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract.

This amendment does not have an impact on the consolidated financial statements.

- Amendments to PAS 19, *Employee Benefits, Plan Amendment, Curtailment or Settlement*

The amendments to PAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event
- Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognized in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognized in other comprehensive income.

Since the Group's current practice is in line with these amendments, these amendments do not have any effect on its consolidated financial statements.

- Amendments to PAS 28, *Long-term Interests in Associates and Joint Ventures*

The amendments clarify that an entity applies PFRS 9 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). This clarification is relevant because it implies that the expected credit loss model in PFRS 9 applies to such long-term interests. The amendments also clarified that, in applying PFRS 9, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognized as adjustments to the net investment in the associate or joint venture that arise from applying PAS 28, *Investments In Associates and Joint Ventures*.

Since the Group does not have such long-term interests in its associate and joint venture, the amendments do not have an impact on its consolidated financial statements.

- Philippine Interpretation IFRIC-23, *Uncertainty over Income Tax Treatments*

The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12, *Income Taxes*, and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

An entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed. The entity shall assume that the taxation authority will examine amounts that it has a right to examine and have full knowledge of all related information when making those examinations. If an entity concludes that it is not probable that the taxation authority will accept an uncertain tax treatment, it shall reflect the effect of the uncertainty for each uncertain tax treatment using the method the entity expects to better predict the resolution of the uncertainty.

Upon adoption of the Interpretation, the Group has assessed whether it has any uncertain tax position. The Group applies significant judgement in identifying uncertainties over its income tax treatments. The Group determined, based on its assessment, that it is probable that its uncertain tax treatments (including those for the subsidiaries) will be accepted by the taxation authorities. Accordingly, the interpretation did not have an impact on the consolidated financial statements.

- *Annual Improvements to PFRSs 2015-2017 Cycle*
 - *Amendments to PFRS 3, Business Combinations, and PFRS 11, Joint Arrangements, Previously Held Interest in a Joint Operation*

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in PFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

These amendments are currently not applicable to the Group but may apply to future transactions.

o Amendments to PAS 12, *Income Tax Consequences of Payments on Financial Instruments Classified as Equity*

The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognizes the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events.

These amendments are not relevant to the Group because dividends declared by the Group do not give rise to tax obligations under the current tax laws.

o Amendments to PAS 23, *Income Tax Consequences of Borrowing Costs, Borrowing Costs Eligible for Capitalization*

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments.

Since the Group's current practice is in line with these amendments, these amendments do not have any effect on its consolidated financial statements.

New Standards and Interpretation Issued and Effective after December 31, 2019

The Group will adopt the standards enumerated below when these become effective. Except as otherwise indicated, the Group does not expect the adoption of these new and amended PFRSs, PAS and Philippine Interpretations to have significant impact on its consolidated financial statements.

Effective beginning on or after January 1, 2020

• Amendments to PFRS 3, *Definition of a Business*

The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

These amendments will apply on future business combinations of the Group.

- Amendments to PAS 1, *Presentation of Financial Statements*, and PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material*

The amendments refine the definition of material in PAS 1 and align the definitions used across PFRSs and other pronouncements. They are intended to improve the understanding of the existing requirements rather than to significantly impact an entity's materiality judgements.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

Effective beginning on or after January 1, 2021

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

PFRS 17 is effective for reporting periods beginning on or after January 1, 2021, with comparative figures required. Early application is permitted.

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3, *Business Combinations*. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

Summary of Significant Accounting Policies

Business Combination and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non-controlling interest in the acquiree pertaining to instruments that represent present ownership interests and entitle the holders to a proportionate share of the net assets in the event of liquidation either at fair value or at the proportionate share of the acquiree's identifiable net assets. All other components of non-controlling interest are measured at fair value unless another measurement basis is required by PFRS. Acquisition-related costs incurred are expensed and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss.

Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or liability, will be recognized in accordance with PAS 39 either in profit or loss or as a change to other comprehensive income. If the contingent consideration is classified as equity, it should not be remeasured until it is finally settled within equity.

Goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interest over the net identifiable assets acquired and liabilities assumed. If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognized as "bargain purchase gain" in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units (CGUs) that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Impairment of goodwill

Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is reviewed for impairment, annually or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired.

For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Impairment is determined by assessing the recoverable amount of the cash-generating unit or group of cash-generating units, to which the goodwill relates. Where the recoverable amount of the cash-generating unit or group of cash-generating units is less than the carrying amount, an impairment loss is recognized.

Common control business combination

Business combination of entities under common control is accounted for similar to pooling of interest method, which is scoped out of PFRS 3. Under the pooling of interest method, any excess of acquisition cost over the net asset value of the acquired entity is recorded in equity.

Current versus Noncurrent Classification

The Group presents assets and liabilities in the consolidated balance sheet based on current/noncurrent classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after reporting period

All other assets are classified as noncurrent.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period or
- There is no unconditional right to defer settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as noncurrent.

Deferred income tax assets and liabilities are classified as non-current assets and liabilities.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

The Group's valuation team (the Team) determines the policies and procedures for fair value measurement of its investment properties. External valuers (the Valuers) are involved in the periodic valuation of these assets. The respective subsidiary's Team decides the selection of the external valuers after discussion with and approval by its Chief Financial Officer (CFO). Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. The Team also determines, after discussions with the chosen Valuers, which valuation techniques and inputs to use for each case.

At each reporting date, the Team analyses the movements in the values of the investment properties which are required to be re-measured or re-assessed in accordance with the subsidiaries' accounting policies. The team, in coordination with the Valuers, also compares each of the changes in the fair value of each property with relevant external sources to determine whether the change is reasonable.

On the re-appraisal year, the Team and Valuers present the valuation results and the major assumptions used in the valuation to its CFO.

Investments in Associates and Joint Ventures

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The considerations made in determining significant influence or joint control are similar to those necessary to determine control over subsidiaries.

The Group's investments in its associates and joint ventures are accounted for using the equity method.

Under the equity method, the investment in an associate or a joint venture is initially recognized at cost. The carrying amount of the investment is adjusted to recognize changes in the Group's share of net assets of the associate or joint venture since the acquisition date. Goodwill relating to the associate or joint venture is included in the carrying amount of the investment and is neither amortized nor individually tested for impairment.

The consolidated statement of income reflects the Group's share of the results of operations of the associate or joint venture. Any change in other comprehensive income of those investees is presented as part of the Group's other comprehensive income. In addition, when there has been a change recognized directly in the equity of the associate or joint venture, the Group recognizes its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealized gains and losses resulting from transactions between the Group and the associate or joint venture are eliminated to the extent of the interest in the associate or joint venture.

The aggregate of the Group's share of profit or loss of an associate and a joint venture is shown on the face of the consolidated statement of income outside operating profit and represents profit or loss after tax and non-controlling interests in the subsidiaries of the associate or joint venture.

The financial statements of the associate or joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognize an impairment loss on its investment in its associate or joint venture. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate or joint

venture is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value and recognizes the loss in the consolidated statement of income.

Upon loss of significant influence over the associate or joint control over the joint venture, the Group measures and recognizes any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognized in profit or loss.

Interest in Joint Operations

A joint arrangement is classified as a joint operation if the parties with joint control have rights to the assets and obligations for the liabilities of the arrangement. For interest in joint operations, the Group recognizes:

- assets, including its share of any assets held jointly;
- liabilities, including its share of any liabilities incurred jointly;
- revenue from the sale of its share of the output arising from the joint operation;
- share of the revenue from the sale of the output by the joint operation; and
- expenses, including its share of any expenses incurred jointly.

The accounting and measurement for each of these items is in accordance with the applicable PFRS.

Foreign Currency Translation

Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Transactions in foreign currencies are initially recorded in the functional currency at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the balance sheet date. All differences are taken to the consolidated statement of income. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

The functional currency of its subsidiaries; Therma Mariveles Group, Therma Dinginin Group, and LHC, and its associate; STEAG State Power, Inc. (STEAG), is the United States (US) Dollar. As at the balance sheet date, the assets and liabilities of these entities are translated into the presentation currency of the Group (the Philippine peso) at the rate of exchange ruling at the balance sheet date and their statement of income and statement of comprehensive income are translated at the weighted average exchange rates for the year. The exchange differences arising on the translation are taken directly to other comprehensive income. Upon disposal of the subsidiary and associate, the deferred cumulative amount recognized in other comprehensive income relating to that particular entity is recognized in the consolidated statement of income.

Cash and Cash Equivalents

Cash and cash equivalents in the consolidated balance sheet consist of cash on hand and with banks, and short-term, highly liquid investments that are readily convertible to known amounts of cash and subject to insignificant risk of changes in value. They are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of any outstanding bank overdrafts.

Inventories

Materials and supplies are valued at the lower of cost and net realizable value (NRV). Cost is composed of purchase costs determined on weighted average method. NRV is the current replacement cost. An allowance for inventory obsolescence is provided for slow-moving, defective or damaged goods based on analyses and physical inspection.

Financial Instruments - Classification and Measurement in Accordance with PFRS 9 (applicable in 2019 and 2018)

Classification of financial assets

Financial assets are classified in their entirety based on the contractual cash flows characteristics of the financial assets and the Group's business model for managing the financial assets. The Group classifies its financial assets into the following measurement categories:

- financial assets measured at amortized cost
- financial assets measured at fair value through profit or loss
- financial assets measured at fair value through other comprehensive income, where cumulative gains or losses previously recognized are reclassified to profit or loss
- financial assets measured at fair value through other comprehensive income, where cumulative gains or losses previously recognized are not reclassified to profit or loss

Contractual cash flows characteristics

If the financial asset is held within a business model whose objective is to hold assets to collect contractual cash flows or within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, the Group assesses whether the cash flows from the financial asset represent solely payments of principal and interest (SPPI) on the principal amount outstanding.

In making this assessment, the Group determines whether the contractual cash flows are consistent with a basic lending arrangement, i.e., interest includes consideration only for the time value of money, credit risk and other basic lending risks and costs associated with holding the financial asset for a particular period of time. In addition, interest can include a profit margin that is consistent with a basic lending arrangement. The assessment as to whether the cash flows meet the test is made in the currency in which the financial asset is denominated. Any other contractual terms that introduce exposure to risks or volatility in the contractual cash flows that is unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are solely payments of principal and interest on the principal amount outstanding.

Business model

The Group's business model is determined at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. The Group's business model does not depend on management's intentions for an individual instrument.

The Group's business model refers to how it manages its financial assets in order to generate cash flows. The Group's business model determines whether cash flows will result from collecting contractual cash flows, selling financial assets or both. Relevant factors considered by the Group in

determining the business model for a group of financial assets include how the performance of the business model and the financial assets held within that business model are evaluated and reported to the Group's key management personnel, the risks that affect the performance of the business model (and the financial assets held within that business model) and how these risks are managed and how managers of the business are compensated.

Financial assets at amortized cost

A financial asset is measured at amortized cost if (i) it is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and (ii) the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI on the principal amount outstanding. These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at amortized cost using the EIR method, less any impairment in value. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an integral part of the EIR. The amortization is included in 'Interest income' in the consolidated statement of income and is calculated by applying the EIR to the gross carrying amount of the financial asset, except for (i) purchased or originated credit-impaired financial assets and (ii) financial assets that have subsequently become credit-impaired, where, in both cases, the EIR is applied to the amortized cost of the financial asset. Losses arising from impairment are recognized in 'Provision for credit and impairment losses' in the consolidated statement of income.

The Group's debt financial assets as of December 31, 2019 and 2018 consist of cash in banks, including restricted cash, cash equivalents, and trade and other receivables and the Power Sector Assets and Liabilities Management Corporation (PSALM) deferred adjustment - net of current portion included in "Other noncurrent assets" in the consolidated balance sheets. The Group assessed that the contractual cash flows of its debt financial assets are SPPI and are expected to be held to collect all contractual cash flows until their maturity. As a result, the Group concluded these debt financial assets to be measured at amortized cost.

Financial assets at FVOCI

A financial asset is measured at FVOCI if (i) it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and (ii) its contractual terms give rise on specified dates to cash flows that are SPPI on the principal amount outstanding. These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income within a separate component of equity. Impairment losses or reversals, interest income and foreign exchange gains and losses are recognized in profit and loss until the financial asset is derecognized. Upon derecognition, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss. This reflects the gain or loss that would have been recognized in profit or loss upon derecognition if the financial asset had been measured at amortized cost. Impairment is measured based on the expected credit loss (ECL) model.

The Group may also make an irrevocable election to measure at FVOCI on initial recognition investments in equity instruments that are neither held for trading nor contingent consideration recognized in a business combination in accordance with PFRS 3. Amounts recognized in OCI are not subsequently transferred to profit or loss. However, the Group may transfer the cumulative gain or loss within equity. Dividends on such investments are recognized in profit or loss, unless the dividend clearly represents a recovery of part of the cost of the investment.

Dividends are recognized in profit or loss only when:

- the Group's right to receive payment of the dividend is established
- it is probable that the economic benefits associated with the dividend will flow to the Group; and
- the amount of the dividend can be measured reliably.

The Group does not have any financial asset at FVOCI as of December 31, 2019 and 2018.

Financial assets at FVTPL

Financial assets at FVTPL are measured at fair value in the consolidated balance sheet with changes in fair value being recognized in the consolidated statement of income. Included in this classification are equity investments held for trading and debt instruments with contractual terms that do not represent solely payments of principal and interest. Financial assets held at FVTPL are initially recognized at fair value, with transaction costs recognized in the consolidated statement of income as incurred.

Additionally, even if the asset meets the amortized cost or the FVOCI criteria, the Group may choose at initial recognition to designate the financial asset at FVTPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) that would otherwise arise from measuring financial assets on a different basis.

Trading gains or losses are calculated based on the results arising from trading activities of the Group, including all gains and losses from changes in fair value for financial assets and financial liabilities at FVTPL, and the gains or losses from disposal of financial investments.

The Group's investments in quoted equity securities and in unquoted equity shares are measured at FVTPL as of December 31, 2019 and 2018.

Classification of financial liabilities

Financial liabilities are measured at amortized cost, except for the following:

- financial liabilities measured at fair value through profit or loss;
- financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the Group retains continuing involvement;
- financial guarantee contracts;
- commitments to provide a loan at a below-market interest rate; and
- contingent consideration recognized by an acquirer in accordance with PFRS 3.

A financial liability may be designated at fair value through profit or loss if it eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) or:

- if a host contract contains one or more embedded derivatives; or
- if a group of financial liabilities or financial assets and liabilities is managed and its performance evaluated on a fair value basis in accordance with a documented risk management or investment strategy.

Where a financial liability is designated at fair value through profit or loss, the movement in fair value attributable to changes in the Group's own credit quality is calculated by determining the changes in credit spreads above observable market interest rates and is presented separately in other comprehensive income.

The Group's financial liabilities measured at amortized cost as of December 31, 2019 and 2018 include trade and other payables (excluding taxes and fees, output value-added tax (VAT) and unearned revenue), customers' deposits, short-term loans, lease liabilities, long-term obligation on power distribution system, long-term debts, other noncurrent liabilities and lease liabilities (see Note 33).

Reclassifications of financial instruments

The Group reclassifies its financial assets when, and only when, there is a change in the business model for managing the financial assets. Reclassifications shall be applied prospectively by the Group and any previously recognized gains, losses or interest shall not be restated. The Group does not reclassify its financial liabilities.

The Group does not reclassify its financial assets when:

- A financial asset that was previously a designated and effective hedging instrument in a cash flow hedge or net investment hedge no longer qualifies as such;
- A financial asset becomes a designated and effective hedging instrument in a cash flow hedge or net investment hedge; and
- There is a change in measurement on credit exposures measured at fair value through profit or loss.

Financial Instruments - Initial Recognition and Subsequent Measurement in Accordance with PAS 39 (applicable in 2017)

Date of recognition

The Group recognizes a financial asset or a financial liability in the consolidated balance sheet on the date when it becomes a party to the contractual provisions of the instrument. All regular way purchases and sales of financial assets are recognized on trade date, which is the date that the Group commits to purchase the asset. Regular way purchases or sales of financial assets are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace. Derivatives are recognized on a trade date basis.

Initial recognition of financial instruments

All financial assets and financial liabilities are recognized initially at fair value. Except for financial assets at fair value through profit or loss (FVPL), the initial measurement of financial assets includes transaction costs. The Group classifies its financial assets in the following categories: financial assets at FVPL, loans and receivables, held-to-maturity (HTM) investments and AFS investments. For financial liabilities, the Group also classifies them into financial liabilities at FVPL and other financial liabilities. The classification depends on the purpose for which the investments were acquired and whether they are quoted in an active market. The Group determines the classification of its financial assets at initial recognition and, where allowed and appropriate, re-evaluates such designation at every balance sheet date.

'Day 1' difference

Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (a 'Day 1' difference) in the consolidated statement of income unless it qualifies for recognition as some other type of asset. In cases where use is made of data which is not observable, the difference between the transaction price and model value is only recognized in the consolidated statement of income when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the 'Day 1' difference amount.

(a) Financial assets or financial liabilities at FVPL

Financial assets and liabilities at FVPL include financial assets and liabilities held for trading purposes and financial assets and liabilities designated upon initial recognition as at FVPL. Financial assets and liabilities are classified as held for trading if they are acquired for the purpose of selling and repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated and considered as hedging instruments in an effective hedge.

Financial assets and liabilities may be designated at initial recognition as at FVPL if the following criteria are met: (i) the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities, or recognizing gains or losses on them on a different basis; (ii) the assets and liabilities are part of a group of financial assets, liabilities or both, which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk managing strategy; or (iii) the financial instruments contains an embedded derivative that would need to be recorded separately, unless the embedded derivative does not significantly modify the cash flow or it is clear, with little or no analysis, that it would not be separately recorded.

Where a contract contains one or more embedded derivatives, the entire hybrid contract may be designated as financial asset or financial liability at FVPL, except where the embedded derivative does not significantly modify the cash flows or it is clear that separation of the embedded derivative is prohibited.

Financial assets and liabilities at FVPL are recorded at the consolidated balance sheet at fair value. Subsequent changes in fair value are recognized in the consolidated statement of income. Interest earned or incurred is recorded as interest income or expense, respectively, while dividend income is recorded as other income when the right to receive payments has been established.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These are not entered into with the intention of immediate or short-term resale and are not classified or designated as AFS investments or financial assets at FVPL. Loans and receivables are carried at amortized cost less allowance for impairment. Amortization is determined using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that

are integral to the effective interest rate. Gains and losses are recognized in the consolidated statement of income when the loans and receivables are derecognized or impaired, as well as through the amortization process.

(c) HTM investments

HTM investments are quoted non-derivative financial assets which carry fixed or determinable payments and fixed maturities and which the Group has the positive intention and ability to hold to maturity. After initial measurement, HTM investments are measured at amortized cost using the effective interest method. This method uses an effective interest rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are integral to the effective interest rate. Where the Group sells other than an insignificant amount of HTM investments, the entire category would be tainted and would have to be reclassified as AFS investments. Gains and losses are recognized in the consolidated statement of income when the investments are derecognized or impaired, as well as through the amortization process.

(d) AFS investments

AFS investments are non-derivative financial assets that are either designated as AFS or not classified in any of the other categories. They are purchased and held indefinitely, and may be sold in response to liquidity requirements or changes in market conditions. Quoted AFS investments are measured at fair value with gains or losses being recognized as other comprehensive income, until the investments are derecognized or until the investments are determined to be impaired at which time, the accumulated gains or losses previously reported in other comprehensive income are included in the consolidated statement of income. Unquoted AFS investments are carried at cost, net of impairment. Interest earned or paid on the investments is reported as interest income or expense using the effective interest rate. Dividends earned on investments are recognized in the consolidated statement of income when the right of payment has been established.

(e) Other financial liabilities

This category pertains to issued financial liabilities or their components that are neither held for trading nor designated as at FVPL upon the inception of the liability and contain contractual obligations to deliver cash or another financial asset to the holder or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares. The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

Other financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable financing costs. Deferred financing costs are amortized, using the effective interest rate method, over the term of the related long-term liability. After initial recognition, interest-bearing loans and other borrowings are subsequently measured at amortized cost using the effective interest rate method.

Gains and losses are recognized in the consolidated statement of income when liabilities are derecognized, as well as through amortization process.

Derivative financial instruments

Initial recognition and subsequent measurement

Derivative financial instruments, including embedded derivatives, are initially recognized at fair value on the date in which a derivative transaction is entered into or bifurcated, and are subsequently remeasured at FVTPL, unless designated as effective hedge. Changes in fair value of derivative instruments not accounted as hedges are recognized immediately in the consolidated statement of income. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

The Group assesses whether embedded derivatives are required to be separated from host contracts when the Group first becomes party to the contract. An embedded derivative is separated from the host financial or non-financial contract and accounted for as a separate derivative if all of the following conditions are met:

- the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics of the host contract;
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- the hybrid or combined instrument is not recognized as at FVPL.

Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

Embedded derivatives that are bifurcated from the host contracts are accounted for either as financial assets or financial liabilities at FVPL. The Group uses derivative financial instruments, such as foreign currency forward, interest rate swap (IRS) and commodity swap contracts to hedge its foreign currency risks, interest rate risks and commodity price risks, respectively.

For the purpose of hedge accounting, the Group's hedges are classified as cash flow hedges. Hedges are classified as cash flow hedge when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognized firm commitment.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

Under PAS 39, the documentation includes identification of the hedging instrument, the hedge item or transaction, the nature of the risk being hedged and how the Group will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting period for which they were designated.

Under PFRS 9, the documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Company actually hedges and the quantity of the hedging instrument that the Company actually uses to hedge that quantity of hedged item.

The Group's hedges that meet all the qualifying criteria for hedge accounting are accounted for, as described below:

Cash flow hedge

The effective portion of the gain or loss on the hedging instrument is recognized in the cumulative translation adjustment, while any ineffective portion is recognized immediately in the consolidated statement of income. The cumulative translation adjustment is adjusted to the lower of the cumulative gain or loss on the hedging instrument and the cumulative change in fair value of the hedged item.

The Group uses foreign currency forward contracts as hedges of its exposure to foreign currency risk in forecast transactions, IRS contracts to manage its floating interest rate exposure on its loans and commodity swap contracts for its exposure to volatility in the commodity prices. The ineffective portion relating to these contracts are recognized in other operating income or expenses as realized gain or loss on derivative instruments.

The Group designated all of the foreign currency forward, IRS and commodity swap contracts as hedging instrument. The amounts accumulated in other comprehensive income are accounted for, depending on the nature of the underlying hedged transaction. If the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is removed from the separate component of equity and included in the initial cost or other carrying amount of the hedged asset or liability. This is not a reclassification adjustment and will not be recognized in other comprehensive income for the period. This also applies where the hedged forecast transaction of a non-financial asset or non-financial liability subsequently becomes a firm commitment for which fair value hedge accounting is applied.

For any other cash flow hedges, the amount accumulated in other comprehensive income is reclassified to profit or loss as a reclassification adjustment in the same period or periods during which the hedged cash flows affect profit or loss.

If cash flow hedge accounting is discontinued, the amount that has been accumulated in other comprehensive must remain in accumulated other comprehensive income if the hedged future cash flows are still expected to occur. Otherwise, the amount will be immediately reclassified to profit or loss as a reclassification adjustment. After discontinuation, once the hedged cash flow occurs, any amount remaining in accumulated other comprehensive must be accounted for depending on the nature of the underlying transaction as described above.

Derecognition of Financial Assets and Liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when, and only when:

- the rights to receive cash flows from the asset expires;
- the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the Group has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group retains the contractual rights to receive the cash flows of a financial asset but assumes a contractual obligation to pay those cash flows to one or more entities, the Group treats the transaction as a transfer of a financial asset if the Group:

- has no obligation to pay amounts to the eventual recipients unless it collects equivalent amounts from the original asset;
- is prohibited by the terms of the transfer contract from selling or pledging the original asset other than as security to the eventual recipients for the obligation to pay them cash flows; and
- has an obligation to remit any cash flows it collects on behalf of the eventual recipients without material delay.

In transactions where the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset and it retains control over the financial asset, the financial asset is recognized to the extent of the Group's continuing involvement in the financial asset. The extent of the Group's continuing involvement in the transferred asset is the extent to which it is exposed to changes in the value of the transferred asset. When the Group's continuing involvement takes the form of guaranteeing the transferred asset, the extent of the Group's continuing involvement is the lower of (i) the amount of the asset and (ii) the maximum amount of the consideration received that the Group could be required to repay ('the guarantee amount'). When the Group's continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the extent of the Group's continuing involvement is the amount of the transferred asset that the Group may repurchase. However, in the case of a written put option on an asset that is measured at fair value, the extent of the Group's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price. When the Group's continuing involvement takes the form of a cash-settled option or similar provision on the transferred asset, the extent of the Group's continuing involvement is measured in the same way as that which results from non-cash settled options.

Modification of contractual cash flows

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset, the Group recalculates the gross carrying amount of the financial asset as the present value of the renegotiated or modified contractual cash flows discounted at the original EIR (or credit-adjusted EIR for purchased or originated credit-impaired financial assets) and recognizes a modification gain or loss in the consolidated statement of income.

When the modification of a financial asset results in the derecognition of the existing financial asset and the subsequent recognition of the modified financial asset, the modified asset is considered a 'new' financial asset. Accordingly the date of the modification shall be treated as the date of initial recognition of that financial asset when applying the impairment requirements to the modified financial asset.

Financial liabilities

A financial liability (or a part of a financial liability) is derecognized when the obligation under the liability is discharged, cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability or a part of it are substantially modified, such an exchange or modification is treated as a derecognition of the original financial liability and the recognition of a new financial liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of income.

Impairment of Financial Assets in Accordance with PFRS 9 (applicable in 2019 and 2018)
PFRS 9 introduces the single, forward-looking "expected loss" impairment model, replacing the "incurred loss" impairment model under PAS 39.

The Group recognizes ECL for the following financial assets that are not measured at FVTPL:

- debt instruments that are measured at amortized cost and FVOCI;
- loan commitments; and
- financial guarantee contracts.

No ECL is recognized on equity investments.

ECLs are measured in a way that reflects the following:

- an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and
- reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

Financial assets migrate through the following three stages based on the change in credit quality since initial recognition:

Stage 1: 12-month ECL

For credit exposures where there have not been significant increases in credit risk since initial recognition and that are not credit-impaired upon origination, the portion of lifetime ECLs that represent the ECLs that result from default events that are possible within the 12-months after the balance sheet date are recognized.

Stage 2: Lifetime ECL - not credit-impaired

For credit exposures where there have been significant increases in credit risk since initial recognition on an individual or collective basis but are not credit-impaired, lifetime ECLs representing the ECLs that result from all possible default events over the expected life of the financial asset are recognized.

Stage 3: Lifetime ECL - credit-impaired

Financial assets are credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of those financial assets have occurred. For these credit exposures, lifetime ECLs are recognized and interest revenue is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset.

Loss allowances are recognized based on 12-month ECL for debt investment securities that are assessed to have low credit risk at the reporting date. A financial asset is considered to have low credit risk if:

- the financial instrument has a low risk of default
- the borrower has a strong capacity to meet its contractual cash flow obligations in the near term
- adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

The Group considers a debt investment security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade', or when the exposure is less than 30 days past due.

Determining the stage for impairment

At each balance sheet date, the Company assesses whether there has been a significant increase in credit risk for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Company considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analysis.

The simplified approach, where changes in credit risk are not tracked and loss allowances are measured at amounts equal to lifetime ECL, is applied to 'Trade receivables'. The Company has established a provision matrix for customer segments that is based on historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Impairment of Financial Assets in Accordance with PAS 39 (applicable in 2017)

The Group assesses at each balance sheet date whether a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if and only if, there is an objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Loans and receivables

For loans and receivables carried at amortized cost, the Group first assesses individually whether objective evidence of impairment exists for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If there is objective evidence that

an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the consolidated statement of income. Interest income continues to be accrued on the reduced carrying amount based on the original EIR of the financial asset. Loans and receivables together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been transferred to the Group. If, in a subsequent period, the amount of the impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or decreased by adjusting the allowance account. Any subsequent reversal of an impairment loss is recognized in the consolidated statement of income, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

Assets carried at cost

If there is objective evidence that an impairment loss on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such an unquoted equity instrument has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

AFS investments

For AFS investments, the Group assesses at each balance sheet date whether there is objective evidence that an investment or group of investments is impaired.

In the case of equity investments classified as AFS, objective evidence of impairment would include a significant or prolonged decline in the fair value of the investments below its cost. Where there is evidence of impairment, the cumulative loss (measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the consolidated statement of income) is removed from other comprehensive income and recognized in the consolidated statement of income. Impairment losses on equity investments are not reversed through the consolidated statement of income. Increases in fair value after impairment are recognized directly in other comprehensive income.

In the case of debt instruments classified as AFS, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on rate of interest used to discount future cash flows for measuring impairment loss. Such accrual is recorded as part of "Interest income" in the consolidated statement of income. If, in subsequent period, the fair value of a debt instrument increased and the increase can be objectively related to an event occurring after the impairment loss was recognized in the consolidated statement of income, the impairment loss is reversed through the consolidated statement of income.

Financial Guarantee Contracts and Loan Commitments

Financial guarantees are contracts issued by the Group that require it to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Financial guarantees are initially recognized in the consolidated financial statements at fair value. Subsequently, these are measured at the higher of:

- the amount of the loss allowance determined in accordance with the ECL model and
- the amount initially recognized less, when appropriate, the cumulative amount of income recognized in accordance with the principles of PFRS 15.

Loan commitments provided by the Group are measured as the amount of the loss allowance. The Group has not provided any commitment to provide loans that can be settled net in cash or by delivering or issuing another financial instrument or that are issued at below-market interest rates.

For loan commitments and financial guarantee contracts, the loss allowance is recognized as a provision. However, for financial instruments that include both a loan and an undrawn commitment (i.e. loan commitment) component where the Group cannot separately identify the expected credit losses on the loan commitment component from those on the loan component, the expected credit losses on the loan commitment should be recognized together with the loss allowance for the loan. To the extent that the combined expected credit losses exceed the gross carrying amount of the financial asset, the expected credit losses should be recognized as a provision.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements whereby the related assets and liabilities are presented gross in the consolidated balance sheet.

Classification of financial instruments between liability and equity

A financial instrument is classified as liability if it provides for a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Group; or
- satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Group does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as income or expense. Distributions to holders of financial instruments classified as equity are charged directly to equity net of any related income tax benefits.

The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

Property held for sale

The Group classifies non-current assets as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Non-current assets classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

The criteria for held for sale classification is regarded as met only when the sale is highly probable and the asset is available for immediate sale in its present condition. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the plan to sell the asset and the sale expected to be completed within one year from the date of the classification. Property, plant and equipment and intangible assets are not depreciated or amortized once classified as held for sale.

Property, Plant and Equipment

Except for land, property, plant and equipment are stated at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment in value. The initial cost of property, plant and equipment comprises its purchase price, including import duties, if any, and nonrefundable taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Such cost includes the cost of replacing parts of such property, plant and equipment when that cost is incurred if the recognition criteria are met. Cost also include decommissioning liability relating to the decommissioning of power plant equipment, if any. Repairs and maintenance costs are recognized in the consolidated statement of income as incurred.

Land is stated at cost less any accumulated impairment in value.

Depreciation is computed using the straight-line method over the estimated useful lives of the assets as follows:

Category	Estimated Useful Life (in years)
Buildings, warehouses and improvements	10-50
Power plant equipment	2-50
Transmission, distribution and substation equipment:	
Power transformers	30
Poles and wires	20-40
Other components	12-30
Transportation equipment	5-10
Office furniture, fixtures and equipment	2-20
Electrical equipment	5-25
Meters and laboratory equipment	25
Steam field assets	20-25
Tools and others	2-20

Leasehold improvements are amortized over the shorter of the lease terms and the lives of the improvements.

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying values may not be recoverable.

Fully depreciated assets are retained in the accounts until these are no longer in use. When assets are retired or otherwise disposed of, both the cost and related accumulated depreciation and amortization and any allowance for impairment losses are removed from the accounts, and any resulting gain or loss is credited or charged to current operations. An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated statement of income in the year the asset is derecognized.

The assets' residual values, useful lives and depreciation method are reviewed, and adjusted if appropriate, at each financial year-end.

When each major inspection is performed, its cost is recognized in the carrying amount of the property, plant and equipment as a replacement if the recognition criteria are satisfied.

Construction in progress represents structures under construction and is stated at cost. This includes cost of construction and other direct costs. Borrowing costs that are directly attributable to the construction of property, plant and equipment are capitalized during the construction period.

Leases (prior to adoption of PFRS 16)

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

A reassessment is made after inception of the lease only if one of the following applies:

- (a) there is a change in contractual terms, other than a renewal or extension of the arrangement;
- (b) a renewal option is exercised or extension granted, unless the term of the renewal or extension was initially included in the lease term;
- (c) there is a change in the determination of whether fulfillment is dependent on a specific asset; or
- (d) there is a substantial change to the asset.

Where a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gives rise to the reassessment for scenarios (a), (c) or (d) above, and at the date of renewal or extension period for scenario (b).

Finance lease

Finance leases, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Obligations arising from plant assets under finance lease agreement are classified in the consolidated balance sheet as lease liabilities.

Lease payments are apportioned between financing charges and reduction of the lease liabilities so as to achieve a constant rate of interest on the remaining balance of the liability. Financing charges are recognized in profit or loss.

Capitalized leased assets are depreciated over the estimated useful life of the assets when there is reasonable certainty that the Group will obtain ownership by the end of the lease term.

Operating lease

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating lease. Operating lease payments are recognized as an expense in the consolidated statement of income on a straight-line basis over the lease term.

Leases (upon adoption of PFRS 16)

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The Group recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

Category	Number of years
Land	10-50
Building	2-50
Power plant	20-25
Equipment and others	2-20

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

Lease liabilities

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the

lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

Group as a lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the consolidated statement of income due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

Service Concession Arrangements

Public-to-private service concession arrangements where: (a) the grantor controls or regulates what services the entities in the Group must provide with the infrastructure, to whom it must provide them, and at what price; and (b) the grantor controls-through ownership, beneficial entitlement or otherwise-any significant residual interest in the infrastructure at the end of the term of the arrangement, are accounted for under the provisions of Philippine Interpretation IFRIC 12, *Service Concession Arrangements*. Infrastructures used in a public-to-private service concession arrangement for its entire useful life (whole-of-life assets) are within the scope of this Interpretation if the conditions in (a) are met.

This interpretation applies to both: (a) infrastructure that the entities in the Group constructs or acquires from a third party for the purpose of the service arrangement; and (b) existing infrastructure to which the grantor gives the entity in the Group access for the purpose of the service arrangement.

Infrastructures within the scope of this Interpretation are not recognized as property, plant and equipment of the Group. Under the terms of contractual arrangements within the scope of this Interpretation, an entity acts as a service provider. An entity constructs or upgrades infrastructure (construction or upgrade services) used to provide a public service and operates and maintains that infrastructure (operation services) for a specified period of time.

An entity recognizes and measures revenue in accordance with PFRS 15 (PAS 18 in 2017), for the services it performs. If an entity performs more than one service (i.e. construction or upgrade services and operation services) under a single contract or arrangement, consideration received or receivable shall be allocated by reference to the relative fair values of the services delivered, when the amounts are separately identifiable.

When an entity provides construction or upgrades services, the consideration received or receivable by the entity is recognized at its fair value. An entity accounts for revenue and costs relating to construction or upgrade services in accordance with PFRS 15 (PAS 18 in 2017). Revenue from construction contracts is recognized based on the percentage-of-completion method, measured by reference to the percentage of costs incurred to date to estimated total costs for each contract. The applicable entities account for revenue and costs relating to operation services in accordance with PFRS 15 (PAS 18 in 2017).

An entity recognizes a financial asset to the extent that it has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction services. An entity recognizes an intangible asset to the extent that it receives a right (a license) to charge users of the public service.

When the applicable entities have contractual obligations it must fulfill as a condition of its license (a) to maintain the infrastructure to a specified level of serviceability or (b) to restore the infrastructure to a specified condition before it is handed over to the grantor at the end of the service arrangement, it recognizes and measures these contractual obligations in accordance with PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, i.e., at the best estimate of the expenditure that would be required to settle the present obligation at the balance sheet date.

Borrowing cost attributable to the construction of the asset if the consideration received or receivable is an intangible asset, is capitalized during the construction phase. In all other cases, borrowing costs are expensed as incurred.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is fair value as at the date of the acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the consolidated statement of income in the year in which the expenditure is incurred.

Software and licenses

Software and licenses are initially recognized at cost. Following initial recognition, the software and licenses are carried at cost less accumulated amortization and any accumulated impairment in value.

The software and licenses is amortized on a straight-line basis over its estimated useful economic life of three to five years and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization commences when the software development costs is available for use. The amortization period and the amortization method for the software development costs are reviewed at each financial year-end. Changes in the estimated useful life is

accounted for by changing the amortization period or method, as appropriate, and treating them as changes in accounting estimates. The amortization expense is recognized in the consolidated statement of income in the expense category consistent with the function of the software development costs.

Service concession right

The Group's intangible asset - service concession right pertains mainly to its right to charge users of the public service in connection with the service concession and related arrangements. This is recognized initially at the fair value which consists of the cost of construction services and the fair value of future fixed fee payments in exchange for the license or right. Following initial recognition, the intangible asset is carried at cost less accumulated amortization and any accumulated impairment losses.

The intangible asset - service concession right is amortized using the straight-line method over the estimated economic useful life which is the service concession period, and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The estimated economic useful life is ranging from 18 to 25 years. The amortization period and the amortization method are reviewed at least at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense is recognized in the consolidated statement of income in the expense category consistent with the function of the intangible asset.

Franchise

The Group's franchise pertains to VECO's franchise to distribute electricity within an area granted by the Philippine Legislature, acquired in the business combination in 2013. The franchise is initially recognized at its fair value at the date of acquisition. Following initial recognition, the franchise is carried at cost less accumulated amortization and any accumulated impairment losses. The Group's franchise is amortized using the straight-line method over the estimated economic useful life, and assessed for impairment whenever there is an indication that the franchise may be impaired. The estimated economic useful life of the franchise is 40 years. The amortization period and amortization method for franchise are reviewed at least at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the franchise are accounted for by changing the amortization period or method, as appropriate, and treated as a change in accounting estimates. The amortization expense on franchise is recognized in the consolidated statement of income in the expense category consistent with its function.

Intangible assets - customer contracts

The Group's intangible assets - customer contracts pertain to contracts entered by subsidiaries relating to the provision of utility services to locators within an industrial zone.

These are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.

The intangible assets - customer contracts are amortized using the straight-line method over the remaining life of the contract, and assessed for impairment whenever there is an indication that the intangible assets may be impaired. The amortization period and method are reviewed at least at each financial year end.

The amortization expense is recognized in the consolidated statement of income in the expense category consistent with the function of the intangible asset.

Project development costs

Project development costs include power plant projects in the development phase which meet the "identifiability" requirement under PAS 38, *Intangible Assets*, as they are separable and susceptible to individual sale and are carried at acquisition cost. These assets are transferred to "Property, plant and equipment" when construction of each power plant commences. During the period of development, the asset is tested for impairment annually.

Research and Development Expenditure

The Group's policy is to record research expenses in the consolidated statement of income in the period when they are incurred.

Development costs are recognized as an intangible asset on the consolidated balance sheet if the Group can identify them separately and show the technical viability of the asset, its intention and capacity to use or sell it, and how it will generate probable future economic benefits.

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized over the period of expected future benefit. During the period of development, the asset is tested for impairment annually.

Investment Properties

Investment properties, which pertain to land and buildings, are measured initially at cost, including transaction costs. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met; and excludes the costs of day-to-day servicing of an investment property. Subsequent to initial recognition, investment properties are carried at fair value, which reflects market conditions at the balance sheet date. Gains or losses arising from changes in fair values of investment properties are included in the consolidated statement of income in the year in which they arise.

Investment properties are derecognized when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in the consolidated statement of income in the year of retirement or disposal.

Transfers are made to investment property when, and only when, there is a change in use, evidenced by ending of owner-occupation, commencement of an operating lease to another party or ending of construction or development with a view to sale. For a transfer from investment property to owner-occupied property or inventories, the deemed cost of property for subsequent

accounting is its fair value at the date of change in use. If the property occupied by the Group as an owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use. For a transfer from inventories to investment property, any difference between the fair value of the property at that date and its previous carrying amount is recognized in the consolidated statement of income. When the Group completes the construction or development of a self-constructed investment property, any difference between the fair value of the property at that date and its previous carrying amount is recognized in the consolidated statement of income.

Impairment of Non-financial Assets

Property, plant and equipment, intangible assets, investment and advances and other current and noncurrent assets excluding restricted cash and PSALM deferred adjustment

The Group assesses at each balance sheet date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognized in the consolidated statement of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each balance sheet date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of income unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Decommissioning Liability

The decommissioning liability arose from the Group's obligation, under their contracts, to decommission, abandon and perform surface rehabilitation at the end of the useful lives of the steam field assets, or the end of the lease term, or upon abandonment of the plant. A corresponding asset is recognized as part of property, plant and equipment. Decommissioning costs are provided at the present value of expected costs to settle the obligation using estimated cash flows. The cash flows are discounted at a current pre-tax rate that reflects the risks specific to the decommissioning liability. The unwinding of the discount is expensed as incurred and recognized in the consolidated statement of income under "Interest expense" account. The estimated future costs of decommissioning are reviewed annually and adjusted prospectively.

Changes in the estimated future costs or in the discount rate applied are added or deducted from the cost of property, plant and equipment. The amount deducted from the cost of property, plant and equipment, shall not exceed its carrying amount.

If the decrease in the liability exceeds the carrying amount of the property, plant and equipment, the excess shall be recognized immediately in the consolidated statement of income.

Capital Stock and Additional Paid-in Capital

Capital stock is measured at par value for all shares issued. When the Company issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued. Capital stock includes common stock and preferred stock.

When the shares are sold at premium, the difference between the proceeds and the par value is credited to the "Paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case the shares are issued to extinguish or settle the liability of the Company, the shares shall be measured either at the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Direct costs incurred related to equity issuance, such as underwriting, accounting and legal fees, printing costs and taxes are debited to the "Paid-in capital" account. If additional paid-in capital is not sufficient, the excess is charged against equity.

Retained Earnings

The amount included in retained earnings includes accumulated earnings of the Company and reduced by dividends on capital stock. Dividends on capital stock are recognized as a liability and deducted from equity when they are approved by the BOD. Dividends for the year that are approved after the financial reporting date are dealt with as an event after the financial reporting date. Retained earnings may also include effect of changes in accounting policy as may be required by the transition provisions of new and amended standards.

Revenue Recognition

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group assesses its revenue arrangements against specific criteria in order to determine if it is acting as a principal or an agent.

The following specific recognition criteria must also be met before revenue is recognized:

Sale of power

For power generation and ancillary services where capacity and energy dispatched are separately identified, these two obligations are to be combined as one performance obligation since these are not distinct within the context of the contract as the buyer cannot benefit from the contracted capacity alone without the corresponding energy and the buyer cannot obtain energy without contracting a capacity. The combined performance obligation qualifies as a series of distinct goods or services that are substantially the same and have the same pattern of transfer.

Revenue from power generation and ancillary services is recognized in the period actual capacity is delivered. Revenue is recognized over time since the customer simultaneously receives and consumes the benefits as the seller supplies power.

Under PAS 18, revenue from power generation is recognized in the period actual capacity is generated. Under PFRS 15, the Group has concluded that revenue should be recognized over time since the customer simultaneously receives and consumes the benefit as the seller supplies power.

In contracts with fixed capacity payments which are determined at contract inception, the fixed capacity payments for the entire contract period is determined at day 1 and is recognized over time. Specifically, on contracts where capacity payments are fixed but escalates throughout the contract period without any reference to market indices, the fixed escalation is recognized on a straight-line basis over the contract period.

Some contracts with customers provide unspecified quantity of energy, includes provisional Energy Regulatory Commission (ERC) rates, and volume and prompt payment discounts that give rise to variable consideration. Under PFRS 15, the variable consideration is estimated at contract inception and constrained until the associated uncertainty is subsequently resolved. The application of constraint on variable consideration resulted in the same revenue recognition under PAS 18.

Power distribution and retail supply also qualify as a series of distinct goods or services that are substantially the same and have the same pattern of transfer accounted for as one performance obligation. Revenue is recognized over time and based on amounts billed.

Technical, management and other fees

Technical, management and other fees are recognized when the related services are rendered.

Interest income

Interest is recognized as it accrues taking into account the effective interest method.

Other income

Revenue is recognized when non-utility operating income and surcharges are earned.

Costs and Expenses

Costs and expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Expenses are recognized when incurred.

Pension Benefits

The Group has defined benefit pension plans which require contributions to be made to separately administered funds. The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the consolidated statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to consolidated statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Group's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

Borrowing Costs

Borrowing costs are capitalized if they are directly attributable to the acquisition, construction or production of a qualifying asset. To the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalization on that asset shall be determined as the actual borrowing costs incurred on that borrowing during the period less any investment income on the temporary investment of those borrowings. To the extent that funds are borrowed generally, the amount of borrowing costs eligible for capitalization shall be determined by applying a capitalization rate to the expenditures on that asset. The capitalization rate shall be the weighted average of the borrowing costs applicable to the borrowings of the Group that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset. The amount of borrowing costs capitalized during a period shall not exceed the amount of borrowing costs incurred during that period.

Taxes

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as of the balance sheet date.

Current income tax relating to items recognized directly in equity is recognized in the consolidated statement of comprehensive income and not in the consolidated statement of income.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax

Deferred income tax is provided using the balance sheet liability method on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward benefits of unused tax credits and unused tax losses can be utilized except:

- where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred income tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred income tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the balance sheet date.

Income tax relating to items recognized directly in other comprehensive income is also recognized in other comprehensive income and not in the consolidated statement of income.

Deferred income tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

VAT

Revenues, expenses, and assets are recognized net of the amount of VAT, if applicable.

For its VAT-registered activities, when VAT from sales of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the statement of financial position. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the consolidated balance sheet up to the extent of the recoverable amount.

For its non-VAT registered activities, the amount of VAT passed on from its purchases of goods or service is recognized as part of the cost of goods/asset acquired or as part of the expense item, as applicable.

Input VAT, which is presented as part of "Other current assets" and/or "Other noncurrent assets" in the consolidated balance sheet, is recognized as an asset and will be used to offset the Group's current output VAT liabilities and/or applied for claim for tax credit certificates. Input VAT is stated at its estimated NRV.

Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the consolidated statement of income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

Contingencies

Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but disclosed when an inflow of economic benefits is probable.

Events After the Reporting Period

Post year-end events that provide additional information about the Group's position at balance sheet date (adjusting events) are reflected in the consolidated financial statements. Post year-end events that are not adjusting events are disclosed when material.

Earnings Per Common Share

Basic earnings per common share are computed by dividing consolidated net income for the year attributable to the equity holders of the Company by the weighted average number of common shares issued and outstanding during the year, after giving retroactive effect for any stock dividends declared and stock rights exercised during the year.

Diluted earnings per share amounts are calculated by dividing the consolidated net income for the year attributable to the equity holders of the parent by the weighted average number of common shares outstanding during the year plus the weighted average number of common shares that would be issued for outstanding common stock equivalents. The Group does not have dilutive potential common shares.

Operating Segments

For management purposes, the Group is organized into two major operating segments (power generation and power distribution) according to the nature of the services provided, with each segment representing a significant business segment. The Group's identified operating segments are consistent with the segments reported to the BOD which is the Group's Chief Operating Decision Maker (CODM). Financial information on the operating segment is presented in Note 31.

4. **Significant Accounting Judgments, Estimates and Assumptions**

The Group's consolidated financial statements prepared in accordance with PFRSs require management to make judgment, estimates and assumptions that affect amount reported in the financial statements and related notes. The judgment, estimates and assumptions used in the financial statements are based upon management's evaluation of relevant facts and circumstances as of the date of the Group's consolidated financial statements. Actual results could differ from such estimates. Judgments, estimates and assumptions are continually evaluated and are based on historical experiences and other factors, including expectations of future events that are believed to be reasonable under circumstances. The following items are those matters which the Group assess to have significant risk arising from judgements and estimation uncertainties:

Judgments

In the process of applying the Group's accounting policies, management has made judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

Determining functional currency

Based on the economic substance of the underlying circumstances relevant to the companies in the Group, the functional currency of the companies in the Group has been determined to be the Philippine Peso except for certain subsidiaries and an associate whose functional currency is the US Dollar. The Philippine Peso is the currency of the primary economic environment in which companies in the Group operates and it is the currency that mainly influences the sale of power and

services and the costs of power and of providing the services. The functional currency of the Group's subsidiaries and associates is the Philippine Peso except for Therma Mariveles Group, Therma Dinginin Group, and LHC (subsidiaries), and STEAG (associate) whose functional currency is the US Dollar.

Service concession arrangements - Group as Operators

Based on management's judgment, the provisions of Philippine Interpretation IFRIC 12 apply to SEZ's Distribution Management Service Agreement (DMSA) with Subic Bay Metropolitan Authority (SBMA); MEZ's Built-Operate-Transfer agreement with Mactan Cebu International Airport Authority (MCIAA) and LHC's Power Purchase Agreement (PPA) with the National Power Corporation (NPC). SEZ, MEZ and LHC's service concession agreements were accounted for under the intangible asset model.

The Company's associate, STEAG, has also determined that the provisions of Philippine Interpretation IFRIC 12 apply to its PPA with NPC. STEAG's service concession agreement was accounted for under the financial asset model. Refer to the accounting policy on service concession arrangements for the discussion of intangible asset and financial asset models.

Determining fair value of customers' deposits

In applying PFRS 9 on transformer and lines and poles deposits, the Group has made a judgment that the timing and related amounts of future cash flows relating to such deposits cannot be reasonably and reliably estimated for purposes of establishing their fair values using alternative valuation techniques since the expected timing of customers' refund or claim for these deposits cannot be reasonably estimated. These customers' deposits, which are therefore stated at cost, amounted to ₱6.52 billion and ₱6.01 billion as of December 31, 2019 and 2018, respectively (see Note 18).

Finance lease - Group as the lessee, applicable under Philippine Interpretation IFRIC 4 and PAS 17 (see Note 3 application of transition relief)

In accounting for its Independent Power Producer (IPP) Administration Agreement with PSALM, the Group's management has made a judgment that the IPP Administration Agreement of TLI is an arrangement that contains a lease. The Group's management has made a judgment that TLI has substantially acquired all the risks and rewards incidental to ownership of the power plant principally by virtue of its right to control the capacity of power plant and its right to receive the transfer of the power plant at the end of the IPP Administration Agreement for no consideration. Accordingly, the Group accounted for the agreement as a finance lease and recognized the power plant and lease liability at the present value of the agreed monthly payments to PSALM (see Note 35).

The power plant is depreciated over its estimated useful life, as there is reasonable certainty that the Group will obtain ownership by the end of the lease term. As of December 31, 2019 and 2018, the carrying value of the power plant amounted to ₱33.58 billion and ₱34.67 billion, respectively (see Notes 12 and 35). The carrying value of the lease liability related to this contract amounted to ₱42.07 billion and ₱46.89 billion as of December 31, 2019 and 2018, respectively (see Note 35).

Nonconsolidation of Manila-Oslo Renewable Enterprise, Inc. (MORE) and its investees, ATI and GNPowder Dinginin Ltd. Co. (GNPD)

The Group has 83.33% interest in MORE which has a 60% ownership interest in SN Aboitiz Power-Magat, Inc. (SNAP M), SN Aboitiz Power-Benguet, Inc. (SNAP B), SN Aboitiz Power-RES, Inc. (SNAP RES), and SN Aboitiz Power-Generation, Inc.

The Group has 72.5% interest in GNPD.

The Group does not consolidate MORE and GNPD since it does not have the ability to direct the relevant activities which most significantly affect the returns of MORE and its investees, and GNPD. This is a result of partnership and shareholders' agreements which, among others, stipulate the management and operation of MORE and GNPD. Management of MORE and GNPD are vested in their respective BOD or "Management Committee" and the affirmative vote of the other shareholders or partners is required for the approval of certain company actions which include financial and operating undertakings (see Note 10).

Determining a joint operation

The Group has 50% interest in Pagbilao Energy Corporation (PEC). The Group assessed that the joint arrangement is a joint operation as the financial and operating activities of the operation are jointly controlled by the participating shareholders and are primarily designed for the provision of output to the shareholders.

Classification of financial instruments

The Group exercises judgment in classifying a financial instrument, or its component parts, on initial recognition as either a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definition of a financial asset, a financial liability or an equity instrument. The substance of a financial instrument, rather than its legal form, governs its classification in the consolidated balance sheet.

Contractual cash flows assessment

For each financial asset, the Group assesses the contractual terms to identify whether the instrument is consistent with the concept of SPPI.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortization of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Group applies judgment and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVTPL.

Evaluation of business model in managing financial instruments

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed; and
- The expected frequency, value and timing of sales are also important aspects of the Group's assessment.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realized in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Identifying performance obligations under PFRS 15 in 2019 and 2018

The Group identifies performance obligations by considering whether the promised goods or services in the contract are distinct goods or services. A good or service is distinct when the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Group's promise to transfer the good or service to the customer is separately identifiable from the other promises in the contract.

The Group assesses performance obligations as a series of distinct goods and services that are substantially the same and have the same pattern of transfer if i) each distinct good or services in the series are transferred over time and ii) the same method of progress will be used (i.e., units of delivery) to measure the entity's progress towards complete satisfaction of the performance obligation.

For power generation and ancillary services where capacity and energy dispatched are separately identified, these two obligations are to be combined as one performance obligation since these are not distinct within the context of the contract as the buyer cannot benefit from the contracted capacity alone without the corresponding energy and the buyer cannot obtain energy without contracting a capacity.

The combined performance obligation qualifies as a series of distinct goods or services that are substantially the same and have the same pattern of transfer since the delivery of energy every month are distinct services which are all recognized over time and have the same measure of progress.

Power distribution and retail supply also qualify as a series of distinct goods or services which is accounted for as one performance obligation since the delivery of energy every month are distinct services which are recognized over time and have the same measure of progress.

Revenue recognition under PFRS 15 in 2019 and 2018

The Group recognizes revenue when it satisfies an identified performance obligation by transferring a promised good or service to a customer. A good or service is considered to be transferred when the customer obtains control. The Group determines, at contract inception, whether it will transfer control of a promised good or service over time. If the Group does not satisfy a performance obligation over time, the performance obligation is satisfied at a point in time.

The Group's revenue from power generation, power distribution, ancillary services and retail supply are to be recognized over time, since customers simultaneously receives and consumes the benefits as the Group supplies power.

Identifying methods for measuring progress of revenue recognized over time under PFRS 15 in 2019 and 2018

The Group determines the appropriate method of measuring progress which is either through the use of input or output methods. Input method recognizes revenue on the basis of the entity's efforts or inputs to the satisfaction of a performance obligation while output method recognizes revenue on the basis of direct measurements of the value to the customer of the goods or services transferred to date.

For power generation and ancillary services, the Group determined that the output method is the best method in measuring progress since actual electricity is supplied to customers. The Group recognizes revenue based on:

For power generation and ancillary services:

- a. For the variable energy payment, actual kilowatt hours consumed which are billed on a monthly basis.
- b. For fixed capacity payments, the Group allocates the transaction price on a straight-line basis over the contract term. The allocated fixed payments are also billed on a monthly basis.

For power distribution and retail supply, the Group uses the actual kilowatt hours consumed, which are also billed on a monthly basis.

Determining method to estimate variable consideration and assessing the constraint under PFRS 15 in 2019 and 2018

The Group includes some or all the amounts of variable consideration estimated but only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved. The Group considers both the likelihood and magnitude of the revenue reversal in evaluating the extent of variable consideration the Group will subject to constraint. Factors such as i) highly susceptibility to factors outside the Group's influence, ii) timing of resolution of the uncertainty, and iii) having a large number and broad range of possible considerations amount are considered.

Some contracts with customers provide unspecified quantity of energy, provisional ERC rates, and volume and prompt payment discounts that give rise to variable consideration. In estimating the variable consideration, the Group applies the expected value method in estimating the variable consideration given the large number of customer contracts that have similar characteristics and the range of possible outcomes.

Before including any amount of variable consideration in the transaction price, the Group considers whether the amount of variable consideration is constrained. The Group determined that the estimates of variable consideration are to be fully constrained based on its historical experience (i.e., volume and prompt payment discounts), the range of possible outcomes (i.e., unspecified quantity of energy), and the unpredictability of other factors outside the Group's influence (i.e., provisional ERC rates).

Allocation of variable consideration under PFRS 15 in 2019 and 2018

Variable consideration may be attributable to the entire contract or to a specific part of the contract. For power generation, power distribution, ancillary services and retail supply revenue streams which are considered as series of distinct goods or services that are substantially the same and have the same pattern of transfer, the Group allocates the variable amount that is no longer subject to constraint to the satisfied portion (i.e., month) which forms part of the single performance obligation, and forms part of the monthly billing of the Group.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Acquisition accounting

The Group accounts for acquired businesses using the acquisition method of accounting which requires that the assets acquired and the liabilities assumed be recorded at the date of acquisition at their respective fair values.

The application of the acquisition method requires certain estimates and assumptions especially concerning the determination of the fair values of acquired intangible assets and property, plant and equipment as well as liabilities assumed at the date of the acquisition. Moreover, the useful lives of the acquired intangible assets and property, plant and equipment have to be determined.

The judgments made in the context of the purchase price allocation can materially impact the Group's future results of operations. Accordingly, for significant acquisitions, the Group obtains assistance from third party valuation specialists. The valuations are based on information available at the acquisition date (see Note 9).

Estimating allowance for impairment losses on investments and advances

Investments and advances are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. There were no impairment indicators in 2019 and 2018 based on management's assessment. The carrying amounts of the investments and advances amounted to P60.88 billion and P34.33 billion as of December 31, 2019 and 2018, respectively (see Note 10).

Impairment of goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires an estimation of the value in use of the cash-generating units to which the goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the cash-generating unit and also to choose a suitable discount rate in order to calculate the present value of those cash flows. The carrying amount of goodwill as of December 31, 2019

and 2018 amounted to P40.88 billion and P40.22 billion, respectively. Goodwill impairment recognized in 2018 amounted to P45.93 million (see Note 13). No impairment of goodwill was recognized in 2019 and 2017.

Estimating useful lives of property, plant and equipment

The Group estimates the useful lives of property, plant and equipment based on the period over which assets are expected to be available for use. The estimated useful lives of property, plant and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, the estimation of the useful lives of property, plant and equipment is based on collective assessment of internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in the factors and circumstances mentioned above. As of December 31, 2019 and 2018, the net book values of property, plant and equipment, excluding land and construction in progress, amounted to P204.07 billion and P170.37 billion, respectively (see Note 12).

Estimating residual value of property, plant and equipment

The residual value of the Group's property, plant and equipment is estimated based on the amount that would be obtained from disposal of the asset, after deducting estimated costs of disposal, if the asset is already of the age and in the condition expected at the end of its useful life. Such estimation is based on the prevailing price of property, plant and equipment of similar age and condition. The estimated residual value of each asset is reviewed periodically and updated if expectations differ from previous estimates due to changes in the prevailing price of a property, plant and equipment of similar age and condition. As of December 31, 2019 and 2018, the aggregate net book values of property, plant and equipment, excluding land and construction in progress, amounted to P204.07 billion and P170.37 billion, respectively (see Note 12).

Estimating useful lives of intangible asset - franchise

The Group estimates the useful life of VECO distribution franchise based on the period over which the asset is estimated to be available for use over 40 years, which consist of the 15 years remaining contract period from the date of business combination and an expected probable renewal covering another 25 years. As of December 31, 2019 and 2018, the carrying value of the franchise amounted to P2.57 billion and P2.65 billion, respectively (see Note 13).

Estimating useful lives of intangible asset - service concession rights

The Group estimates the useful lives of intangible asset arising from service concessions based on the period over which the asset is expected to be available for use which is 18 to 25 years. The Group has not included any renewal period on the basis of uncertainty, as of balance sheet date, of the probability of securing renewal contracts at the end of the original contract term. As of December 31, 2019 and 2018, the aggregate net book values of intangible asset - service concession rights amounted to P2.41 billion and P2.79 billion, respectively (see Note 13).

Assessing impairment of nonfinancial assets

The Group assesses whether there are any indicators of impairment for nonfinancial assets at each balance sheet date. These nonfinancial assets (property, plant and equipment, intangible assets (excluding goodwill), and other current and noncurrent assets) are tested for impairment when there are indicators that the carrying amounts may not be recoverable.

Determining the recoverable amount of non-financial assets, which requires the determination of future cash flows expected to be generated from the continued use and ultimate disposition of such assets, requires the Group to make estimates and assumptions that can materially affect its consolidated financial statements. Future events could cause the Group to conclude that the property, plant and equipment, intangible assets (excluding goodwill), and other current and noncurrent assets are impaired. Any resulting impairment loss could have a material adverse impact on the consolidated balance sheet and consolidated statement of income.

As of December 31, 2019 and 2018, the aggregate net book values of these assets amounted to ₱228.70 billion and ₱228.45 billion, respectively (see Notes 8, 12, 13 and 14). Impairment losses recognized on these non-financial assets in 2019, 2018 and 2017 amounted to nil, ₱740.3 million and ₱3.13 billion, respectively (see Notes 12, 13 and 14).

Measurement of expected credit losses under PFRS 9 in 2019 and 2018

ECLs are derived from unbiased and probability-weighted estimates of expected loss, and are measured as follows:

- *Financial assets that are not credit-impaired at the reporting date:* as the present value of all cash shortfalls over the expected life of the financial asset discounted by the effective interest rate. The cash shortfall is the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive.
- *Financial assets that are credit-impaired at the reporting date:* as the difference between the gross carrying amount and the present value of estimated future cash flows discounted by the effective interest rate.
- *Financial guarantee contracts:* as the expected payments to reimburse the holder less any amounts that the Group expects to recover.

The Group leverages existing risk management indicators (e.g. internal credit risk classification and restructuring triggers), credit risk rating changes and reasonable and supportable information which allows the Group to identify whether the credit risk of financial assets has significantly increased.

Inputs, assumptions and estimation techniques under PFRS 9 in 2019 and 2018

The ECL is measured on either a 12-month or lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD), defined as follows:

- *Probability of default*
The PD represents the likelihood of a borrower defaulting on its financial obligation, either over the next 12 months, or over the remaining life of the obligation. PD estimates are estimates at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. If a counterparty or exposure migrates between rating classes, then this will lead to a change in the estimate of the associated PD. PDs are estimated considering the contractual maturities of exposures. The 12-months and lifetime PD represent the expected point-in-time probability of a default over the next 12 months and remaining lifetime of the financial instrument, respectively, based on conditions existing at the balance sheet date and future economic conditions that affect credit risk.

- *Loss given default*
Loss Given Default represents the Group's expectation of the extent of loss on a defaulted exposure, taking into account the mitigating effect of collateral, its expected value when realized and the time value of money. LGD varies by type of counterparty, type of seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of EAD.
- *Exposure at default*
EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months or over the remaining lifetime.

The ECL is determined by projecting the PD, LGD, and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e. the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the reporting date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

The lifetime PD is developed by applying a maturity profile to the current 12-month PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis. The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by customer segment.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. LGDs are typically set at product level due to the limited differentiation in recoveries achieved across different borrowers. These LGD's are influenced by collection strategies including contracted debt sales and price.

The assumptions underlying the ECL calculation such as how the maturity profile of the PDs change are monitored and reviewed on a quarterly basis.

Simplified approach for trade receivables under PFRS 9 in 2019 and 2018

The Group uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for various customer segments that have similar loss patterns (i.e., by geography, customer segment and coverage by letters of credit).

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the industrial segment, the historical default rates are adjusted. At every balance sheet date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

There have been no significant changes in estimation techniques or significant assumptions made during the reporting period.

Incorporation of forward-looking information under PFRS 9 in 2019 and 2018

The Group incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL.

The Group has identified and documented key drivers of credit risk and credit losses of each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

The macro-economic variables include the following key indicators for the Philippines: unemployment rates, inflation rates, gross domestic product growth and net personal income growth.

Predicted relationship between the key indicators and default and loss rates on various portfolios of financial assets have been developed based on analyzing historical data over the past 5 years. The methodologies and assumptions including any forecasts of future economic conditions are reviewed regularly.

The Group has not identified any uncertain event that it has assessed to be relevant to the risk of default occurring but where it is not able to estimate the impact on ECL due to lack of reasonable and supportable information.

An increase in the Group's allowance for expected credit losses of trade and other receivables will increase the Group's recorded expenses and decrease current assets. As of December 31, 2019 and 2018, allowance for expected credit losses amounted to ₱1.97 billion and ₱1.75 billion, respectively. Trade and other receivables, net of allowance for ECL, amounted to ₱21.75 billion and ₱21.72 billion as of December 31, 2019 and 2018, respectively (see Note 6).

Estimating allowance for inventory obsolescence

The Group estimates the allowance for inventory obsolescence based on the age of inventories. The amounts and timing of recorded expenses for any period would differ if different judgments or different estimates are made. An increase in allowance for inventory obsolescence would increase recorded expenses and decrease current assets. As of December 31, 2019 and 2018, allowance for inventory obsolescence amounted to ₱88.2 million and ₱34.2 million, respectively. The carrying amount of the inventories amounted to ₱6.63 billion and ₱6.69 billion as of December 31, 2019 and 2018, respectively (see Note 7).

Estimating the incremental borrowing rate (IBR)

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its IBR to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates. The carrying amount of the lease liabilities amounted to ₱44.79 billion and ₱46.89 billion as of December 31, 2019 and 2018, respectively, (see Note 35).

Estimating decommissioning liability

Under the Geothermal Resource Service Contract (GRSC), the Group has a legal obligation to decommission, abandon and perform surface rehabilitation on its steam field asset at the end of its useful life. The Group also has a legal obligation under its land lease agreements to decommission the power plants at the end of its lease term. The Group recognizes the present value of the obligation to decommission the plant, abandon and perform surface rehabilitation of the steam field asset and capitalizes the present value of these costs as part of the balance of the related property, plant and equipment, which are being depreciated and amortized on a straight-line basis over the useful life of the related asset.

These costs are accrued based on in-house estimates, which incorporates estimates of the amount of obligations and interest rates, if appropriate. Assumptions used to compute the provision are reviewed and updated annually. Each year, the provision is increased to reflect the accretion of discount and to accrue an estimate for the effects of inflation, with charges being recognized as accretion expense, included under "interest expense" in the consolidated statement of income.

Changes in the decommissioning liability that result from a change in the current best estimate of cash flow required to settle the obligation or a change in the discount rate are added to (or deducted from) the amount recognized as the related asset and the periodic unwinding of the discount on the liability is recognized in the consolidated statement of income as it occurs.

While the Group has made its best estimate in establishing the decommissioning provision, because of potential changes in technology as well as safety and environmental requirements, plus the actual time scale to complete decommissioning activities, the ultimate provision requirements could either increase or decrease significantly from the Group's current estimates.

The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances.

Decommissioning liability amounted to ₱3.57 billion and ₱3.68 billion as of December 31, 2019 and 2018, respectively, (see Note 19).

Recognition of deferred income tax assets

The Group reviews the carrying amounts of deferred income tax assets at each balance sheet date and reduces deferred income tax assets to the extent that it is no longer probable that sufficient income will be available to allow all or part of the deferred income tax assets to be utilized. The

Group recognize deferred taxes based on enacted or substantially enacted tax rates for renewable of 10% and for non-renewable of 30%. The Group has deferred income tax assets amounting to ₱4.36 billion and ₱4.27 billion as of December 31, 2019 and 2018, respectively (see Note 29).

The Group did not recognize deferred income tax assets on Minimum Corporate Income Tax (MCIT) amounting to ₱67.7 million and ₱58.3 million as of December 31, 2019 and 2018, respectively, and Net Operating Loss Carryover (NOLCO) amounting to ₱7.80 billion and ₱5.44 billion as of December 31, 2019 and 2018, respectively, since management expects that it will not generate sufficient taxable income in the future that will be available to allow all of the deferred income tax assets to be utilized (see Note 29).

Pension benefits

The cost of defined benefit pension plans, as well as the present value of the pension obligation, are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future inflation rates for the specific country.

Further details about the assumptions used are provided in Note 27.

Net benefit expense amounted to ₱182.3 million in 2019, ₱195.7 million in 2018, and ₱219.4 million in 2017. The net pension assets as of December 31, 2019 and 2018 amounted to ₱68.2 million and ₱127.0 million, respectively. Net pension liabilities as of December 31, 2019 and 2018 amounted to ₱426.0 million and ₱244.9 million, respectively.

Fair value of financial instruments

Where the fair value of financial assets and financial liabilities recorded in the consolidated balance sheet cannot be derived from active markets, their fair value is determined using valuation techniques which include the discounted cash flow model and other generally accepted market valuation model. The inputs for these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. The judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. The fair values of the Group's financial instruments are presented under Note 34.

Legal contingencies

The estimate of probable costs for the resolution of possible claims has been developed in consultation with outside counsels handling the Group's defense in these matters and is based upon an analysis of potential results. No provision for probable losses arising from legal contingencies was recognized in the Group's consolidated financial statements for the years ended December 31, 2019, 2018 and 2017.

5. Cash and Cash Equivalents

	2019	2018
Cash on hand and in banks	₱14,177,919	₱11,426,051
Short-term deposits	23,256,010	34,916,990
	₱37,433,929	₱46,343,041

Cash in banks earn interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods depending on the immediate cash requirements of the Group and earn interest at the respective short-term deposits rates. Interest income earned from cash and cash equivalents amounted to ₱1.29 billion in 2019, ₱880.1 million in 2018, and ₱907.6 million in 2017.

6. Trade and Other Receivables

	2019	2018
Trade receivables - net of allowance for expected credit losses of ₱1.97 billion and ₱1.75 billion in 2019 and 2018, respectively (Notes 32 and 33)	₱12,958,429	₱12,810,034
Others:		
Dividends receivable (Note 10)	1,199,068	665,783
Advances to contractors	63,339	148,300
Accrued revenue	3,462,523	3,476,120
Non-trade receivable	2,450,311	2,872,224
Interest receivable	48,666	91,992
PSALM deferred adjustment (Note 40k)	1,042,861	1,042,861
Others	522,225	614,462
	₱21,747,422	₱21,721,776

Trade and other receivables are non-interest bearing and are generally on 10 - 30 days' term.

For terms and conditions relating to related party receivables, refer to Note 32.

Advances to contractors refer to non-interest bearing advance payments made for project mobilization which are offset against progress billings to be made by the contractors.

Accrued revenue relates to accrual of power sales of the Power Generation segment.

Non-trade receivable relates mostly to receivable of GMCP from NGCP related to the sale of transmission assets in 2019 and advances to partners in GMCP which are subject to offset against any cash dividends declared by GMCP and due to the partners in 2018.

The rollforward analysis of allowance for expected credit losses as of December 31, 2019 and 2018, which pertains to trade receivables, is presented below:

	2019	2018
January 1	P1,749,991	P1,774,838
Transition adjustment and translation effect	-	86,936
Provision (see Note 24)	87,086	235,818
Write-off	(89,496)	(347,601)
Effect of changes in foreign exchange rate	225,939	-
December 31	<u>P1,973,520</u>	<u>P1,749,991</u>

7. Inventories

	2019	2018
Fuel	P2,514,447	P3,521,390
Plant spare parts and supplies	2,507,832	2,245,805
Transmission and distribution supplies	1,492,222	915,168
Other parts and supplies	117,528	8,090
	<u>P6,632,029</u>	<u>P6,690,453</u>

Inventories are carried at lower of cost and NRV as of December 31, 2019 and 2018.

The cost of inventories recognized as part of cost of generated power in the consolidated statements of income amounted to P29.39 billion in 2019, P29.42 billion in 2018, and P22.32 billion in 2017 (see Note 23). The cost of inventories recognized as part of operations and maintenance in the consolidated statements of income amounted to P353.70 million in 2019, P286.71 million in 2018, and P412.1 million in 2017 (see Note 25). Write-down on inventories to arrive at NRV amounted to P54.0 million and nil in 2019 and 2018, respectively.

8. Other Current Assets

	2019	2018
Restricted cash (Note 17)	P4,449,716	P5,289,145
input VAT	2,049,496	2,673,822
Prepaid tax	1,854,792	2,171,352
Advances to National Grid Corporation of the Philippines (NGCP)	1,727,028	1,725,176
Prepaid expenses	610,426	722,066
Prepaid rent (Note 35)	-	93,894
Others	391,947	530,480
	<u>P11,083,405</u>	<u>P13,205,935</u>

Restricted cash represents proceeds from sale of power under the control of trustees of TVI and TSI's lenders as per loan agreement (see Note 17). The asset will be used to pay the current portion of loans payable and interest payments in the following period.

Advances to NGCP pertain to TVI's cost of construction and installation of substation and transmission facilities which are subject for reimbursement after completion of the project.

Prepaid expenses mainly include prepayments for insurance.

9. Business Combination

Step-acquisition of Sacasun

In 2014, ARI and SunEdison Inc. (SEI), entered into a joint framework agreement to develop solar photovoltaic projects in the Philippines. Pursuant to their agreement, SEI, the ultimate parent company of SunE Solar B.V. (SunE BV) and Sunedison Philippines Helios B.V. (Helios BV), and ARI invested in MHSCI and Sacasun for the 59-MWp solar project in San Carlos City, Negros Occidental.

On December 27, 2017, API completed its acquisition of 100% equity interest in Helios BV from SunE BV. The transaction resulted in API owning all the issued and outstanding shares of Helios BV, which owns a 40% equity interest in each of MHSCI and Sacasun. MHSCI owns 25% of Sacasun. This increased the Company's indirect ownership interest in MHSCI and SACASUN to 100%.

The transaction was accounted for as a business combination achieved in stages. The purchase price allocation in the step-acquisition of Sacasun was finalized in 2018. The fair value of the previously-held interest as at the date of acquisition is P330.9 million. The resulting bargain purchase gain of P328.7 million and the loss on remeasurement of previously held interest of P18.5 million are included in other income as "Bargain purchase gain" in the 2017 consolidated statement of income (see Note 28). The bargain purchase gain is mainly due to the purchase price reflecting the ongoing difficulty of SEI as confirmed by its bankruptcy declaration which affected its ability to fulfill loan obligations.

10. Investments and Advances

	2019	2018
Acquisition cost:		
Balance at beginning of the year	P30,559,245	P28,140,556
Additions during the year	27,591,092	2,498,905
Redemptions during the year	(5,340)	(80,216)
Balance at end of year	58,144,997	30,559,245
Accumulated equity in net earnings:		
Balance at beginning of the year	3,867,849	3,666,971
Transition adjustment (see Note 3)	(18,691)	-
Share in net earnings	3,813,962	4,356,825
Dividends received or receivable	(4,317,956)	(4,155,947)
Balance at end of year	3,345,164	3,867,849
Share in net unrealized valuation gain on FVOCI investment of an associate	101,727	101,727
Share in actuarial gain (loss) on defined benefit plans of associates and joint ventures	(14,299)	29,729
Share in cumulative translation adjustments of associates and joint ventures	(153,485)	321,139
	(66,057)	452,595
	61,424,104	34,879,689
Less allowance for impairment losses	568,125	568,125
Investments at equity	60,855,979	34,311,564
Advances	22,562	22,562
	P60,878,541	P34,334,126

As of December 31, 2019 and 2018, the undistributed earnings of the associates and joint ventures included in the Group's retained earnings amounting to P3.35 billion and P3.87 billion, respectively, are not available for distribution to the stockholders unless declared by the investees (see Note 20).

2019

In 2019, the Group, through TPI and ATI, made capital contributions to GNPD amounting to US\$81.45 million (P4.21 billion).

In 2019, AEV Aviation, Inc. (AAI) redeemed 5,340 redeemable preferred shares (RPS) held by the Company for P5.34 million.

Acquisition of ATI

On May 2, 2019, the Company completed its acquisition of a 49% voting stake and a 60% economic stake in ATI, AC Energy's thermal platform in the Philippines. The transaction is valued at \$572.9 million (P29.79 billion).

AA Thermal has interests in GMCP, the owner and operator of an operating 2x316 MW coal plant in Mariveles, Bataan, and in GNPD, the developer and owner of a 2x668 MW supercritical coal plant project in Mariveles, Bataan, which is currently under construction.

The completion of the transaction increases the Company's economic interests in GMCP, and GNPD to 78.3%, and 75.0%, respectively.

2018

In 2018, the Group, through TPI, made capital contributions to GNPD amounting to US\$47.0 million (P2.50 billion).

In 2018, AEV Aviation, Inc. (AAI) redeemed 80,216 RPS held by the Company for P80.2 million.

The Group's associates and joint ventures and the corresponding equity ownership are as follows:

	Nature of Business	Percentage of Ownership		
		2019	2018	2017
MORE ¹	Holding company	83.33	83.33	83.33

¹ Joint ventures

² GNPD change in ownership based on the Partnership Agreement and in 2019 due to ATI acquisition.

³ Economic interest

^{*} No commercial operations as of December 31, 2019.

The principal place of business and country of incorporation of the Group's associates and joint ventures are in the Philippines.

All ownership percentages presented in the table above are direct ownership of the Group except for GNPD and SFELAPCO. As of December 31, 2019, ATI has an indirect ownership in GNPD of 50% while the Group's direct ownership in GNPD is 42.50% resulting to the Group's effective ownership in GNPD of 72.50%. PEVI has direct ownership in SFELAPCO of 54.83% while the Group's direct ownership in SFELAPCO is 20.29% resulting to the Group's effective ownership in SFELAPCO of 43.78%.

The carrying values of investments, which are accounted for under the equity method are as follows:

*Amounts are based on appraised values which are adjusted to historical amounts upon equity take-up of the Group. Using cost method in accounting for property, plant and equipment net income amounted to P374.8 million, P952.8 million and P745.1 million in 2019, 2018, and 2017, respectively, for SFELAPCO.
 **The financial information of insignificant associates and joint ventures is indicated under "Others".

11. Joint Operation

Name of Joint Operation	Nature of Business	Percentage of Ownership		
		2019	2018	2017
PEC	Power generation	50.00	50.00	50.00

*PEC's principal place of business and country of incorporation is the Philippines.

On May 15, 2014, the Group entered into a shareholders' agreement with TPEC Holdings Corporation (TPEC) for the development, construction and operation of the 400 MW Pagbilao Unit III in Pagbilao, Quezon through PEC. TPI and TPEC both agreed to provide their respective capital contributions and subscribe to common shares such that each stockholder owns 50% of the issued and outstanding shares of stock of PEC.

The financial and operating activities of the operation are jointly controlled by the participating shareholders and are primarily designed for the provision of output to the shareholders.

The Group's share of assets, liabilities, revenue, expenses and cash flows of joint operations are included in the consolidated financial statements on a line-by-line basis.

12. Property, Plant and Equipment

In 2019 and 2018, the Group has determined that an impairment test has to be performed on certain segments of its property, plant and equipment amounting to ₱3.55 billion and ₱5.44 billion, respectively. In performing an impairment test calculation, the Group determined the recoverable amount of the relevant property, plant and equipment through value in use (VIU). VIU is derived based on financial budgets prepared by senior management covering the project's entire life. Pre-tax discount rate of 9.83% in 2019 and 13.00% - 16.14% in 2018 was used.

The calculation of value in use of these property, plant and equipment are most sensitive to the following assumptions:

- Discount rate - Discount rate reflects the management's estimate of risks applicable to these projects. The benchmark used by the management to assess operating performance and to evaluate future investment proposals. In determining appropriate discount rates, consideration has been given to various market information, including, but not limited to, government bond yield, bank lending rates and market risk premium.
- Material price inflation - Estimates are obtained from published indices from which the materials are sourced, as well as data relating to specific commodities. Forecast figures are used if data is publicly available, otherwise past actual material price movements are used as an indicator of future price movement.
- Growth rate - The long-term rate used to extrapolate future cash flows excludes expansions and potential improvements in the future. Management also recognized the possibility of new entrants, which may have significant impact on existing growth rate assumptions. Management however, believes that new entrants will not have a significant adverse impact on the forecasts included in the financial budget.

The impairment test calculation has not resulted to any recognition of an impairment loss in 2019 and 2018.

In 2019 and 2018, movements to power plant equipment and steam field assets includes adjustment in the decommissioning liability due to the change in accounting estimate amounting to ₱321.9 million and ₱560.0 million, respectively (see Note 19).

In 2019 and 2018, additions to "Construction in progress" include capitalized borrowing costs, net of interest income earned from short-term deposits amounted to ₱890.0 million and ₱2.51 billion, respectively (see Note 17). The rate used to determine the amount of borrowing costs eligible for capitalization ranged from 5.7% to 9.4% and 4.9% to 9.4% which are the effective interest rate of the specific borrowings in 2019 and 2018, respectively.

Property, plant and equipment with carrying amounts of ₱124.00 billion and ₱126.90 billion as of December 31, 2019 and 2018, respectively, are used to secure the Group's long-term debts (see Note 17).

Fully depreciated property and equipment with gross carrying amount of ₱5.91 billion and ₱5.00 billion as of December 31, 2019 and 2018, respectively, are still in use.

A significant portion of the Group's property, plant and equipment relates to various projects under "Construction in progress" as of December 31, 2019 and 2018, as shown below:

Project Company	Estimated Cost to Complete (in millions)		% of Completion	
	2019	2018	2019	2018
TVI	₱114	₱7,246	99.7%	81%

As of December 31, 2018, the Group classifies its transmission assets as property held for sale as an ongoing negotiation for the sale of these assets with NGCP which is expected to be consummated in 2019. The property held for sale was recorded at its recoverable amount of ₱675.8 million (see Note 28). In 2019, the Deed of Sale was signed and executed.

13. Intangible Assets

	2019	2018
Goodwill	₱40,876,082	₱40,224,411
Service concession rights	2,406,320	2,789,610
Franchise	2,571,772	2,648,732
Project development costs	622,491	388,468
Customer contracts	—	8,582
Software and licenses	235,836	105,691
	₱46,712,501	₱46,165,494

The table below shows the rolforward of intangible assets:

December 31, 2019

	Service concession rights	Franchise	Project development costs	Customer contracts	Software and licenses	Total
Cost:						
Balances at beginning of year	₱5,478,607	₱3,078,431	₱388,468	₱60,068	₱107,338	₱9,312,912

Impairment Testing of Goodwill

Goodwill acquired through business combinations have been attributed to individual CGUs.

The carrying amount of goodwill follows:

	2019	2018
GMCP	P39,996,797	P39,345,126
LEZ	467,586	467,586
HI	220,228	220,228
BEZ	191,471	191,471
	P40,876,082	P40,224,411

The recoverable amounts of the investments have been determined based on a value-in-use calculation using cash flow projections based on financial budgets approved by senior management covering a five-year period.

Key assumptions used in value-in-use calculation for December 31, 2019 and 2018

The following describes each key assumption on which management has based its cash flow projections to undertake impairment testing of goodwill.

Discount rates and growth rates

The discount rates applied to cash flow projections are from 9.87% to 11.81% in 2019 and 10.63% to 14.80% in 2018, and cash flows beyond the five-year period are extrapolated using a zero percent growth rate.

Revenue assumptions

Revenue assumptions are based on the expected electricity to be sold. In 2019, revenue growth of 10% in year 1, 0% in year 2 and 4% in the next three years was applied for LEZ; 4% in year 1, -6% in year 2, 1% in year 3, -3% in year 4 and -2% in year 5 for BEZ; 0% in year 1, 2% in year 2, 7% in year 3, 3% in year 4 and 10% in year 5 for GMCP; and -6% in year 1, 16% in year 2, 15% in year 3, 12% in year 4, and 5% in year 5 was applied for HI.

In 2018, revenue growth of 6% in year 1, 4% for the next two years, 3% in year 4 and 5% in year 5 was applied for LEZ; 9% in year 1, 5% in year 2 and 2% in the next three years to BEZ; 4% in year 1, 0% in year 2, 2% in year 3, 7% in year 4 and 3% in year 5 for GMCP; and 45% in year 1, -1% in year 2, 0% in year 3, 11% in year 4, and -4% in year 5 was applied for HI.

Materials price inflation

In 2019, the assumption used to determine the value assigned to the materials price inflation is 3.30% in 2020, decreases to 3.20% in 2021 and settles at 3.00% for the next 3 years until 2024. The starting point of 2020 is consistent with external information sources. The starting point of 2020 is consistent with external information sources.

In 2018, the assumption used to determine the value assigned to the materials price inflation is 3.47% in 2019, decreases to 3.37% in 2020 and 3.10% in 2021. It then settles at 3.00% for the next 2 years until 2023.

Foreign exchange rates

In 2019, the assumption used to determine foreign exchange rate is a weakening Philippine peso which starts at a rate of ₱54.70 to a dollar in 2020 and depreciates annually at an average of 2.67% until 2024. In 2018, the assumption used to determine foreign exchange rate is a steady Philippine peso at a rate of ₱55.00 to a dollar from 2019 until 2023.

Based on the impairment testing, no impairment of goodwill was recognized in 2019. In 2018, an impairment loss on goodwill amounting to ₱45.9 million on the investment in BEZ was recognized. No impairment of goodwill was recognized in 2017.

With regard to the assessment of value-in-use, management believes that no reasonably possible change in any of the above key assumptions would cause the carrying value of the goodwill to materially exceed its recoverable amount.

Service Concession Rights

Service concession arrangements entered into by the Group are as follows:

- a. On November 24, 1996, LHC entered into a PPA with NPC, its sole customer, for the construction and operation of a 70-megawatt hydroelectric power generating facility (the Power Station) in Bakun River in Benguet and Ilocos Sur Provinces on a build-operate-transfer scheme. Under the PPA, LHC shall deliver to NPC all electricity generated over a cooperation period of 25 years until February 5, 2026.

On the Transfer Date, as defined in the PPA, LHC shall transfer to NPC, free from any lien or encumbrance, all its rights, title and interest in and to the Power Station and all such data as operating manuals, operation summaries/transfer notes, design drawings and other information as may reasonably be required by NPC to enable it to operate the Power Station.

Since NPC controls the ownership of any significant residual interest of the Power Station at the end of the PPA, the PPA is accounted for under the intangible asset model as LHC has the right to charge users for the public service under the service concession arrangement.

The Power Station is treated as intangible asset and is amortized over a period of 25 years, which is the service concession period, in accordance with Philippine Interpretation IFRIC 12. The intangible asset with a carrying value of ₱1.62 billion and ₱1.97 billion as of December 31, 2019 and 2018, respectively, was used as collateral to secure LHC's long-term debt (see Note 17).

- b. On May 15, 2003, the SBMA, AEV and DLP entered into a DMSA for the privatization of the SBMA Power Distribution System (PDS) on a rehabilitate-operate-and-transfer arrangement; and to develop, construct, lease, lease out, operate and maintain property, structures and machineries in the Subic Bay Freeport Zone (SBFZ).

Under the terms of the DMSA, SEZ was created to undertake the rehabilitation, operation and maintenance of the PDS (the Project), including the provision of electric power service to the customers within the Subic Bay Freeport Secured Areas of the SBFZ as well as the collection of the relevant fees from them for its services and the payment by SBMA of the service fees throughout the service period pursuant to the terms of the DMSA. The DMSA shall be effective for 25-year period commencing on the turnover date.

For and in consideration of the services and expenditures of SEZ for it to undertake the rehabilitation, operation, management and maintenance of the Project, it shall be paid by the SBMA the service fees in such amount equivalent to all the earnings of the Project, provided, however, that SEZ shall remit the amount of ₱40.0 million to the SBMA at the start of every 12-month period throughout the service period regardless of the total amount of all earnings of the Project. The said remittances may be reduced by the outstanding power receivables from SBMA, including streetlights power consumption and maintenance, for the immediate preceding year.

Since SBMA controls ownership of the equipment at the end of the agreement, the PDS are treated as intangible assets and are amortized over a period of 25 years up to year 2028, in accordance with Philippine Interpretation IFRIC 12.

The carrying value of the intangible asset arising from the service concession arrangement amounted to ₱700.3 million and ₱720.3 million as of December 31, 2019 and 2018, respectively.

- c. The transmission and distribution equipment of MEZ are located within Mactan Export Processing Zone (MEPZ) II. Since MCIAA controls ownership of the equipment at the end of the agreement, the equipment are treated as intangible assets and are amortized over a period of 21 years up to year 2028, in accordance with Philippine Interpretation IFRIC 12.

The carrying amount of the intangible asset arising from the service concession arrangement amounted to ₱84.5 million and ₱97.2 million as of December 31, 2019 and 2018, respectively.

Customer Contracts

Customer contracts pertain to agreements between LEZ and the locators within Lima Technology Center relating to the provision of utility services to the locators. These contracts are treated as intangible assets and are amortized over a period of 5.25 years since 2014.

The amortization of intangible assets is included in "Depreciation and amortization" under "Operating Expenses" in the consolidated statements of income.

14. Other Noncurrent Assets

	2019	2018
Restricted cash	₱4,672,031	₱-
Input VAT and tax credit receivable, net of impairment loss of ₱9.9 million and ₱253.2 million in 2019 and 2018 (see Note 28)	4,434,349	5,276,346
PSALM deferred adjustment - net of current portion (see Notes 6 and 40k)	2,140,219	3,183,089
Prepaid rent - net of current portion (see Note 35)	-	1,051,102
Advances to contractors and projects	553,280	464,139
Refundable deposits	326,850	375,014
Investment properties	132,300	3,300
Prepaid taxes	879,439	159,942
Others	380,844	147,247
	₱13,519,312	₱10,660,179

Restricted cash pertains to the amount drawn by TVI on June 11, 2019 on the performance securities under its Engineering, Procurement and Construction agreement with the contractors. The contractors have disputed the draw on the securities in dispute resolution proceedings.

15. Trade and Other Payables

	2019	2018
Trade payables (see Note 33)	P9,947,733	P8,999,633
Output VAT	3,022,048	2,768,254
Amounts due to contractors and other third parties	1,159,984	1,735,685
PSALM deferred adjustment (see Note 40k)	1,042,861	1,042,861
Accrued expenses:		
Interest	2,350,811	2,101,531
Materials and supplies cost	470,588	82,098
Taxes and fees	1,246,863	1,196,611
Energy fees and fuel purchase	937,988	413,141
Claims conversion costs	102,808	239,377
Insurance	18,437	17,764
Dividends payable	94,976	59,834
Unearned revenues	37,425	38,765
Customers' deposit	19,360	6,633
Nontrade	1,270,946	2,725,289
Others	653,292	373,812
	P22,376,120	P21,801,288

Trade payables are non-interest bearing and generally on 30-day terms.

Accrued taxes and fees represent accrual of real property tax, transfer tax and other fees.

Amounts due to contractors and other third parties include liabilities arising from the power plant construction (see Note 12).

Nontrade payables include amounts due to PSALM pertaining to Generation Rate Adjustment Mechanism (GRAM) and Incremental Currency Exchange Rate Adjustment (ICERA) and universal charges.

Others include withholding taxes and other accrued expenses and are generally payable within 12 months from the balance sheet date.

16. Short-term Loans

	Interest Rate	2019	2018
Peso loans - financial institutions - unsecured	2.68% - 4.95% in 2019 5.00% - 6.75% in 2018	₱9,727,800	₱10,915,600
Temporary advances (see Note 32)		607,620	630,960
		₱10,335,420	₱11,546,560

The bank loans are unsecured short-term notes payable obtained from local banks. These loans are covered by the respective borrower's existing credit lines with the banks and are not subject to any significant covenants and warranties.

Interest expense on short-term loans amounted to ₱797.6 million in 2019, ₱374.6 million in 2018, and ₱131.2 million in 2017 (see Note 33).

17. Long-term Debts

	Annual Interest Rate	2019	2018
Company:			
Bonds due 2024	7.51%	₱7,700,000	₱7,700,000
Bonds due 2026	5.28%	7,250,000	-
Bonds due 2021	5.21%	6,600,000	6,600,000
Bonds due 2026	6.10%	3,400,000	3,400,000
Bonds due 2027	5.34%	3,000,000	3,000,000
Bonds due 2025	8.51%	2,500,000	2,500,000

		₱167,585,311	₱149,360,287

*London Interbank Offered Rate (LIBOR)

Interest expense and other financing costs on long-term debt amounted to P8.65 billion in 2019, P6.86 billion in 2018, and P6.33 billion in 2017 (see Note 33).

Company

In September 2014, the Company issued a total of P10.00 billion bonds, broken down into a P6.60 billion 7-year bond due 2021 at an annual fixed rate equivalent to 5.21% and a P3.40 billion 12-year bond due 2026 at an annual fixed rate equivalent to 6.10%. The bonds have been rated PRS Aaa by PhilRatings.

In July 2017, the Company issued a P3.00 billion 10-year bond due 2027 at an annual fixed rate equivalent to 5.34%. The bonds have been rated PRS Aaa by PhilRatings.

In October 2018, the Company issued a total of P10.20 billion bonds, broken down into a P7.70 billion 5.25-year bond due 2024 at an annual fixed rate equivalent to 7.51% and a P2.50 billion 7-year bond due 2025 at an annual fixed rate equivalent to 8.51%. The bonds have been rated PRS Aaa by PhilRatings.

In October 2019, the Company issued P7.25 billion 7-year bond due 2026 at a fixed rate of 5.28% p.a. The bonds have been rated PRS Aaa by PhilRatings.

The principal amount of the bonds shall be payable on a lump sum basis on the respective maturity date at its face value. These bonds may be redeemed in advance by the Company based on stipulated early redemption option dates and on agreed early redemption price.

In April 2019, the Company executed and availed a US\$300,000,000 syndicated bridge loan facility loan agreement with DBS Bank Ltd., Mizuho Bank, Ltd., MUFG Bank, Ltd., and Standard Chartered Bank as lead arrangers and bookrunners to finance the AA Thermal, Inc. acquisition. The loan bears a floating interest based on credit spread over applicable LIBOR plus 1.2% margin. The loan will mature on the 5th anniversary of the first utilization date.

In November 2019, the Company obtained a P5.0 billion 7-year long term loan from the BDO Unibank, Inc. at a fixed rate of 5.28% p.a.

GMCP

On August 29, 2017, GMCP entered into a Notes Facility Agreement (NFA) with local banks with BDO Capital and Investment Corporation as Lead Arranger, with the maximum principal amount of \$800.0 million, the proceeds of which will be used to refinance GMCP's existing loan obligation and for other general corporate purposes.

On September 29, 2017, \$600.0 million was drawn from the NFA, out of which \$462.4 million was used to prepay the outstanding loans. In February 2018, the remaining principal amount of \$200.0 million was drawn from the NFA.

GMCP also has an existing facility agreement with BDO to finance the GMCP's working capital requirements.

Loans payable consist of the following dollar denominated loans as of December 31, 2019 and 2018:

	2019	2018	Interest Rate Per Annum	Payment Schedule
<i>NFA</i> Fixed Rate Loan	\$448,164	\$483,450	(i) Fixed rates of 2.5514% and 3.4049% plus 1.45% margin for the first seven-year period and (ii) Fixed Rate Loan Benchmark plus 1.45% margin for the subsequent five-year period	24 semi-annual payments starting from the first Interest Payment Date
LIBOR Loan	267,450	288,450	Six-month LIBOR plus 1.70% margin	24 semi-annual payments starting from the first Interest Payment Date
<i>Working Capital</i> BDO	20,000	15,000	LIBOR plus 1.7% applicable margin	Payable within three months
Total borrowings	735,614	785,900		
Less unamortized portion of deferred financing costs	(4,017)	(4,049)		
	731,597	782,851		
Less current portion	63,583	70,229		
Loans payable - net of current portion	\$668,014	\$712,622		

TVI

On June 18, 2015, TVI entered into an omnibus agreement with local banks for a project loan facility with an aggregate principal amount of ₱31.97 billion. As of December 31, 2019 and 2018, ₱31.52 billion has been drawn from the loan facility.

The loan is available in two tranches, as follows:

- Tranche A, in the amount of ₱25.60 billion, with interest rate fixed for the first eight years and will be repriced and fixed for another seven years.
- Tranche B, in the amount of ₱5.9 billion, with a fixed interest rate for fifteen years.

70% of the principal amount of the loan is payable in 20 equal semi-annual installments, with the remaining 30% payable in full on the final maturity date. TVI may prepay the loan in part or in full beginning on the end of the fourth year from the initial advance or on the project completion date, whichever is earlier. Any prepayment shall be subject to a certain percentage of prepayment penalty on the principal to be prepaid.

The loan is secured by a mortgage of all its assets with carrying amount of ₱50.81 billion as of December 31, 2019, and a pledge of TVI's shares of stock held by its shareholders.

TSI

On October 14, 2013, TSI entered into an omnibus agreement with local banks for a project loan facility with an aggregate principal amount of ₱24.00 billion, which was fully drawn in 2014.

On October 28, 2015, TSI entered into an additional loan agreement with principal amount of ₱1.68 billion, which was fully drawn in 2016.

The loan is secured by a mortgage of all its assets with carrying amount of ₱36.41 billion as of December 31, 2019, and a pledge of TSI's shares of stock held by the Company and TPI.

Interest rate ranging from 4.50% - 5.15% is fixed for the first seven years and will be repriced and fixed for another five years. In 2018, upon release of AP guarantee, interest was increased by 0.5%.

Fifty percent of the principal amount of the loan is payable at semi-annual installments within 12 years with a two-year grace period, with the remaining 50% payable in full on the final maturity date.

TSI may prepay the loan in part or in full beginning on the end of the third year from the initial advance or on the project completion date, whichever is earlier. Any prepayment shall be subject to a certain percentage of prepayment penalty on the principal to be prepaid.

APRI

On February 29, 2016, APRI entered into an omnibus agreement with BPI, Asian Development Bank (ADB) and Credit Guarantee and Investment Facility (CGIF). This has been certified to have met the requirements of the Climate Bond Standard. The loan proceeds were used for return of equity to shareholders and to fund necessary operating and capital expenditures.

The loan is available in two tranches, as follows:

- a. The Notes Facility Agreement, in the amount of ₱10.7 billion, with interest rate already fixed for ten years. 41.6% of the principal amount is payable in ten equal semi-annual installments and the balance payable in another ten semi-annual installments
- b. The ADB Facility Agreement, in the amount of ₱1.8 billion, with interest rate fixed for five years and principal repayments made in ten equal semi-annual installments.

The loan is secured by mortgage of its assets with carrying amount of ₱25.15 billion as of December 31, 2019, and pledge of APRI's shares of stock held by shareholders and assignment of Project Agreements and Project Accounts.

Hedcor Bukidnon

On September 22, 2015, Hedcor Bukidnon entered into an omnibus agreement with local banks for a project loan facility with an aggregate principal amount of up to ₱10.00 billion. As of December 31, 2019, ₱9.33 billion has been drawn from the loan facility based on the agreed schedule.

The term of the loan is 15 years, and the first principal repayment will take place 42 months after the financial close, or six months after project completion. Principal repayments shall be made in equal semi-annual installments, with a balloon payment not to exceed 30% of the loan amount. Interest rate on the loan is computed at the time of each drawdown, as designated under the agreement.

The loan is secured by an assignment of trade receivables amounting to ₱263.47 million, a pledge of all issued share capital of Hedcor Bukidnon, and corporate suretyship from AP to guarantee the debt service until (a) project completion and (b) receipt of Feed-In-Tariff payments or contracting power supply agreements equivalent to at least the break-even capacity.

TPVI

On December 26, 2019, the TPVI was granted a loan with an aggregate amount of P1.30 billion by the Philippine National Bank (PNB). The loan is payable for 15 years, with a grace period of 3 years. The mode of repayment is sculpted with balloon payment of 70%. The Company will pay PNB an interest of 5.0593% for the first 8 years, with the rate being expected to go up to 5.25% for the rest of the term due to: (1) continued inflation, and; (2) liquidity tightness due to funds held and additional borrowings by the Bureau of Treasury. The interest is payable semi-annually, every 30th of June and 31st of December.

Hedcor Sibulan

On November 17, 2016, Hedcor Sibulan entered into a NFA with various institutions with Metrobank - Trust Banking Group as the Notes Facility Agent, for a loan facility with an aggregate principal amount of up to P4.10 billion to return equity to shareholders, and for other general corporate purposes.

The unsecured notes were issued in ten tranches with interest payable semi-annually at annual fixed rates ranging from 4.05% - 5.42% with principal maturity as follows:

Tranche	Maturity Date	Principal Amount
1	Fifteen months from issue date	96.8 million
2	Two (2) years from issue date	96.8 million
3	Three (3) years from issue date	84.0 million
4	Four (4) years from issue date	84.0 million
5	Five (5) years from issue date	284.0 million
6 (Series A&B)	Six (6) years from issue date	388.4 million
7 (Series A&B)	Seven (7) years from issue date	445.8 million
8	Eight (8) years from issue date	451.4 million
9	Nine (9) years from issue date	508.1 million
10 (Series A&B)	Ten (10) years from issue date	1,660.7 million

Prior to maturity date, Hedcor Sibulan may redeem in whole or in part the relevant outstanding notes on any interest payment date plus a one percent prepayment penalty.

HI

On August 6, 2013, HI availed of a ten-year P900 million loan from a local bank. This loan is subject to a semi-annual principal payment with annual interest fixed at 5.25% for the first 5 years. For the remaining five years, interest rate will be repriced and fixed on the fifth anniversary from the drawdown date. The debt is secured by a pledge of HI's shares of stock held by ARI.

On December 14, 2018, HI entered into a Notes Facility Agreement with a local bank to borrow P1.39 billion, which will mature on August 31, 2033, to finance the rehabilitation and/or expansion of the Bineng hydropower plant, refinance its short-term loans and for other general corporate purposes. This loan is subject to a semi-annual principal payment with annual interest fixed at 7.8747% for the first 5 years. For the next five years, interest rate will be repriced and fixed one banking day prior to August 31, 2023. For the remaining five years, interest rate will be repriced and fixed one banking day prior to August 31, 2028. The debt is secured by a continuing suretyship from ARI.

VECO

On December 20, 2013, VECO availed of a ₱2.00 billion loan from the NFA it signed on December 17, 2013 with Land Bank of the Philippines (LBP). The unsecured notes were issued in ten tranches of ₱200 million with interest payable semi-annually at annual fixed rates ranging from 3.50% - 4.81% and principal amortized as follows:

Tranche	Maturity Date	Principal Repayment Amount
A, B	December 20, 2014 and 2015	₱200M balloon payment on maturity date
C	December 20, 2016	₱1M each on first 2 years; ₱198M on maturity date
D	December 20, 2017	₱1M each on first 3 years; ₱197M on maturity date
E	December 20, 2018	₱1M each on first 4 years; ₱196M on maturity date
F	December 20, 2019	₱1M each on first 5 years; ₱195M on maturity date
G	December 20, 2020	₱1M each on first 6 years; ₱194M on maturity date
H	December 20, 2021	₱1M each on first 7 years; ₱193M on maturity date
I	December 20, 2022	₱1M each on first 8 years; ₱192M on maturity date
J	December 20, 2023	₱1M each on first 9 years; ₱191M on maturity date

Prior to maturity date, VECO may redeem in whole or in part the relevant outstanding notes on any interest payment date without premium or penalty. If it redeems the notes on a date other than an interest payment date, then a certain percentage of prepayment penalty on the principal amount to be prepaid shall be imposed.

LHC

On April 24, 2012, LHC entered into an omnibus agreement with Philippine National Bank and Banco De Oro to borrow US\$43.1 million with maturity on April 26, 2022 and payable in 20 semi-annual installments. Interest is repriced and paid semi-annually. Annual interest rate ranges from 2.00% to 2.75%.

Intangible asset arising from service concession arrangement with carrying value of ₱1.62 billion as of December 31, 2019, was used as collateral to secure LHC's long-term debt (see Note 13).

DLP

On December 20, 2013, DLP availed of a ₱1.50 billion loan from the NFA it signed on December 17, 2013 with LBP. The unsecured notes were issued in ten tranches of ₱150 million with interest payable semi-annually at annual fixed rates ranging from 3.50% to 4.81% and principal amortized as follows:

Tranche	Maturity Date	Principal Repayment Amount
A, B	December 20, 2014 and 2015	₱150M balloon payment on maturity date
C	December 20, 2016	₱0.75M each on first 2 years; ₱148.5M on maturity date
D	December 20, 2017	₱0.75M each on first 3 years; ₱147.8M on maturity date
E	December 20, 2018	₱0.75M each on first 4 years; ₱147M on maturity date
F	December 20, 2019	₱0.75M each on first 5 years; ₱146.2M on maturity date
G	December 20, 2020	₱0.75M each on first 6 years; ₱145.5M on maturity date
H	December 20, 2021	₱0.75M each on first 7 years; ₱144.8M on maturity date
I	December 20, 2022	₱0.75M each on first 8 years; ₱144M on maturity date
J	December 20, 2023	₱0.75M each on first 9 years; ₱143.2M on maturity date

Prior to maturity date, DLP may redeem in whole or in part the relevant outstanding notes on any interest payment date without premium or penalty. If it redeems the notes on a date other than an interest payment date, then a certain percentage of prepayment penalty on the principal amount to be prepaid shall be imposed.

SEZ

On July 7, 2011, SEZ issued P565.0 million worth of fixed rate notes to Metropolitan Bank and Trust Company. Interest on the notes is subject to quarterly payment at 5% annual fixed interest rate. Principal is payable annually over 10 years at an equal amortization of P56.5 million.

CLP

On December 20, 2013, CLP availed of a P300 million loan from the NFA it signed on December 17, 2013 with LBP. The unsecured notes were issued in ten tranches of P30.0 million with interest payable semi-annually at annual fixed rates ranging from 3.50% - 4.81% and principal amortized as follows:

Tranche	Maturity Date	Principal Repayment Amount
A, B	December 20, 2014 and 2015	P30M balloon payment on maturity date
C	December 20, 2016	P0.15M each on first 2 years; P29.7M on maturity date
D	December 20, 2017	P0.15M each on first 3 years; P29.6M on maturity date
E	December 20, 2018	P0.15M each on first 4 years; P29.4M on maturity date
F	December 20, 2019	P0.15M each on first 5 years; P29.2M on maturity date
G	December 20, 2020	P0.15M each on first 6 years; P29.1M on maturity date
H	December 20, 2021	P0.15M each on first 7 years; P29.0M on maturity date
I	December 20, 2022	P0.15M each on first 8 years; P28.8M on maturity date
J	December 20, 2023	P0.15M each on first 9 years; P28.62M on maturity date

Prior to maturity date, CLP may redeem in whole or in part the relevant outstanding notes on any interest payment date without premium or penalty. If it redeems the notes on a date other than an interest payment date, then a certain percentage of prepayment penalty on the principal amount to be prepaid shall be imposed.

Long-term debt of Joint Operation (see Note 11)

This pertains to TPI's share of the outstanding project debt of its joint operation.

In May 2014, PEC entered into an omnibus agreement with various local banks for a loan facility in the aggregate principal amount of up to P33.31 billion with maturity period of 15 years.

The loan facility is subject to a semi-annual interest payment with annual fixed interest ranging from 5.50% - 8.31%. The loans may be voluntarily prepaid in full or in part commencing on and from the third year of the date of initial drawdown with a prepayment penalty.

The loans are secured by a mortgage of substantially all its assets with carrying amount of P38.70 billion as of December 31, 2019, and a pledge of the shares of stock held by the joint operators.

Loan covenants

The loan agreements on long-term debt of the Group provide for certain restrictions with respect to, among others, mergers or consolidations or other material changes in their ownership, corporate set-up or management, investment and guaranties, incurrence of additional debt, disposition of mortgage of assets, payment of dividends, and maintenance of financial ratios at certain levels.

These restrictions and requirements were complied with by the Group as of December 31, 2019 and 2018.

18. Customers' Deposits

	2019	2018
Lines and poles	₱1,149,552	₱1,101,664
Transformers	1,077,175	1,044,037
Bill and load	4,294,742	3,862,663
	<u>₱6,521,469</u>	<u>₱6,008,364</u>

Transformers and lines and poles deposits are obtained from certain customers principally as cash bond for their proper maintenance and care of the said facilities while under their exclusive use and responsibility.

Effective April 1, 2010, the Amended Distribution Services and Open Access Rules (Amended DSOAR), increased the refund rate from 25% to 75% of the gross distribution revenue generated from the extension lines and facilities until such amounts are fully refunded.

Bill deposit serves to guarantee payment of bills by a customer which is estimated to equal one month's consumption or bill of the customer.

Both the Magna Carta and Distribution Services and Open Access Rules (DSOAR) also provide that residential and non-residential customers, respectively, must pay a bill deposit to guarantee payment of bills equivalent to their estimated monthly billing. The amount of deposit shall be adjusted after one year to approximate the actual average monthly bills. A customer who has paid his electric bills on or before due date for three consecutive years, may apply for the full refund of the bill deposit, together with the accrued interests, prior to the termination of his service; otherwise, bill deposits and accrued interests shall be refunded within one month from termination of service, provided all bills have been paid.

In cases where the customer has previously received the refund of his bill deposit pursuant to Article 7 of the Magna Carta, and later defaults in the payment of his monthly bills, the customer shall be required to post another bill deposit with the distribution utility and lose his right to avail of the right to refund his bill deposit in the future until termination of service. Failure to pay the required bill deposit shall be a ground for disconnection of electric service.

Interest expense on customers' deposits amounted to ₱4.3 million in 2019, ₱2.1 million in 2018, ₱3.2 million in 2017 (see Note 33).

The Group classified customers' deposit under noncurrent liabilities due to the expected long-term nature of these deposits. The portion of customers' deposit to be refunded amounted to ₱19.4 million and ₱6.6 million as of December 31, 2019 and 2018, respectively, and are presented as part of "Trade and other payables" (see Note 15).

19. Decommissioning liability

Decommissioning liability includes the estimated costs to decommission, abandon and perform surface rehabilitation on the steam field assets at the end of their useful lives, and the best estimate of the expenditure required to settle the obligation to decommission power plant at the end of its lease term (see Note 12).

	2019	2018
Balances at beginning of year	P3,678,810	P2,959,060
Change in accounting estimate (see Note 12)	(321,948)	559,996
Accretion of decommissioning liability (see Note 33)	210,630	159,754
	P3,567,492	P3,678,810

The actual dismantling and removal cost could vary substantially from the above estimate because of new regulatory requirements, changes in technology, increased cost of labor, materials, and equipment or actual time required to complete all dismantling and removal activities. Adjustment, if any, to the estimated amount will be recognized prospectively as they become known and reliably estimable.

20. Equity

a. Paid-in Capital (number of shares in disclosed figures)

	2019	2018
Capital Stock		
Authorized - P1 par value		
Common shares - 16,000,000,000 shares		
Preferred shares - 1,000,000,000 shares		
Issued		
Common shares - 7,358,604,307 shares	P7,358,604	P7,358,604
Additional Paid-in Capital	12,588,894	12,588,894
	P19,947,498	P19,947,498

On May 25, 2007, the Company listed with the PSE its 7,187,664,000 common shares with a par value of P1.00 to cover the initial public offering (IPO) of 1,787,664,000 common shares at an issue price of P5.80 per share. On March 17, 2008, the Company listed an additional 170,940,307 common shares, which it issued pursuant to a share swap agreement at the IPO price of P5.80 per share. The total proceeds from the issuance of new shares amounted to P10.37 billion. The Company incurred transaction costs incidental to the initial public offering amounting to P412.4 million, which is charged against "Additional paid-in capital" in the consolidated balance sheet.

As of December 31, 2019, 2018 and 2017, the Company has 631, 629 and 628 shareholders, respectively.

Preferred shares are non-voting, non-participating, non-convertible, redeemable, cumulative, and may be issued from time to time by the BOD in one or more series. The BOD is authorized to issue from time to time before issuance thereof, the number of shares in each series, and all

the designations, relative rights, preferences, privileges and limitations of the shares of each series. Preferred shares redeemed by the Company may be reissued. Holders thereof are entitled to receive dividends payable out of the unrestricted retained earnings of the Company at a rate based on the offer price that is either fixed or floating from the date of the issuance to final redemption. In either case, the rate of dividend, whether fixed or floating, shall be referenced, or be a discount or premium, to market-determined benchmark as the BOD may determine at the time of issuance with due notice to the SEC.

In the event of any liquidation or dissolution or winding up of the Company, the holders of the preferred stock shall be entitled to be paid in full the offer price of their shares before any payment in liquidation is made upon the common stock.

There are no preferred shares issued and outstanding as of December 31, 2019 and 2018.

b. Retained Earnings

As of December 31, 2019, the Company has an appropriated retained earnings amounting to with regard to the development and construction of power plants. The BOD has approved the appropriation of ₱13.16 billion and ₱20.90 billion on November 24, 2016 and November 27, 2014, respectively.

On March 7, 2017, the BOD approved the declaration of regular cash dividends of ₱1.36 a share (₱10.01 billion) to all stockholders of record as of March 21, 2017. These dividends were paid on April 10, 2017.

On March 8, 2018, the BOD approved the declaration of regular cash dividends of ₱1.39 a share (₱10.23 billion) to all stockholders of record as of March 22, 2018. These dividends were paid on April 12, 2018.

On March 7, 2019, the BOD approved the declaration of regular cash dividends of ₱1.47 a share (₱10.82 billion) to all stockholders of record as of March 21, 2019. These dividends were paid on April 5, 2019.

On March 7, 2019, the BOD also approved the following:

- Appropriation of ₱11.90 billion retained earnings for the equity infusions into GNPD to fund the construction of GNPD units 1 & 2, which is expected to have full commercial operations by end of 2020.
- Reversal of ₱12.30 billion retained earnings appropriation that was set up in 2014 for the equity requirements of the 300 MW Davao Coal and 14 MW Sabangan Hydro projects.

To comply with the requirements of Section 43 of the Corporation Code, on March 6, 2020, the BOD approved the declaration of regular cash dividends of ₱1.18 a share (₱8.68 billion) to all stockholders of record as of March 20, 2020. The cash dividends are payable on April 3, 2020.

- c. The balance of retained earnings includes the accumulated equity in net earnings of subsidiaries, associates and joint arrangement amounting to ₱57.57 billion and ₱52.77 billion as at December 31, 2019 and 2018, respectively. Such amounts are not available for distribution until such time that the Company receives the dividends from the respective subsidiaries, associates and joint arrangement (see Note 10).

21. Sale of Power

Sale from Distribution of Power

- a. The Uniform Rate Filing Requirements on the rate unbundling released by the Energy Regulatory Commission (ERC) on October 30, 2001, specified that the billing for sale and distribution of power and electricity will have the following components: Generation Charge, Transmission Charge, System Loss Charge, Distribution Charge, Supply Charge, Metering Charge, the Currency Exchange Rate Adjustment and Interclass and Lifeline Subsidies. National and local franchise taxes, the Power Act Reduction (for residential customers) and the Universal Charge are also separately indicated in the customer's billing statements.
- b. Pursuant to Section 43(f) of Republic Act (R.A.) No. 9136, otherwise known as the Electric Power Industry Reform Act of 2001 (EPIRA), and Rule 15, section 5(a) of its Implementing Rules and Regulations (IRR), the ERC promulgated the Distribution Wheeling Rates Guidelines on December 10, 2004. These were subsequently updated and released on July 26, 2006 as the Rules for Setting Distribution Wheeling Rates (RDWR) for Privately Owned Utilities entering Performance Based Regulation (PBR).

Details of the PBR regulatory period and the date of implementation of the approved rates are as follows:

	CLP	DLP	VECO	SEZ
Current regulatory period	April 1, 2009 to March 31, 2013	July 1, 2010 to June 30, 2014	July 1, 2010 to June 30, 2014	October 1, 2011 to September 30, 2015
Date of implementation of approved distribution supply and metering charges	May 1, 2009	August 1, 2010	August 1, 2010	November 26, 2011

The reset process for the Third Regulatory Period to adjust the previously approved distribution supply and metering charges were deferred due to the changes on PBR rules.

Through ERC Resolution No. 25 Series of 2016 dated July 12, 2016, the ERC adopted the Resolution Modifying the RDWR. Based on this Resolution, the Fourth Regulatory Period shall be as follows:

- (i) CLP: April 1, 2017 to March 31, 2021
- (ii) DLP and VECO: July 1, 2018 to June 30, 2022
- (iii) SEZ: October 1, 2019 to September 30, 2023

The reset process for the Fourth Regulatory Period has not started for all private DUs as the above-mentioned ERC rules have not been published, which is a condition for their effectivity. Total sale from distribution of power amounted to ₱46.12 billion, ₱44.88 billion, and ₱43.53 billion in 2019, 2018 and 2017, respectively.

Sale from Generation of Power and Retail Electricity

- a. Energy Trading through the Philippine Wholesale Electricity Spot Market (WESM)
Certain subsidiaries are trading participants and direct members under the generator sector of the WESM. These companies are allowed to access the WESM Market Management System through its Market Participant Interface (MPI). The MPI is the facility that allows the trading participants to submit and cancel bids and offers, and to view market results and reports. Under

its price determination methodology as approved by the ERC, locational marginal price method is used in computing prices for energy bought and sold in the market on a per node, per hour basis. In the case of bilateral power supply contracts, however, the involved trading participants settle directly with their contracting parties.

Total sale of power to WESM amounted to ₱6.37 billion, ₱6.77 billion and ₱3.80 billion in 2019, 2018 and 2017, respectively.

b. Power Supply Agreements

i. *Power Supply Contracts assumed under Asset Purchase Agreement (APA) and IPP Administration Agreement*

Revenue recognition for customers under the power supply contracts assumed under the APA and IPP Administration Agreements are billed based on the contract price which is calculated based on the pricing structure approved by the ERC. Rates are calculated based on the time-of-use pricing schedule with corresponding adjustments using the GRAM and the ICERA.

ii. *Power Purchase/Supply Agreement and Energy Supply Agreement (PPA/PSA and ESA)*
Certain subsidiaries have negotiated contracts with NPC, Private Distribution Utilities, Electric Cooperatives and Commercial and Industrial Consumers referred to as PPA/PSA or ESA. These contracts provide a tariff that allows these companies to charge for capacity fees, fixed operating fees and energy fees.

iii. *Feed-in-Tariff (FIT)*
Certain subsidiaries were issued a FIT Certificate of Compliance from the ERC which entitles them to avail the FIT rate. These subsidiaries also signed agreements with the National Transmission Corporation (NTC), the FIT administrator. These agreements enumerate the rights and obligations under the FIT rules and FIT-All guidelines, in respect to the full payment of the actual energy generation of the generator, at a price equivalent to the applicable FIT rate, for the entire duration of its FIT eligibility period.

Total sale of power under power supply agreements amounted to ₱46.78 billion in 2019, ₱55.08 billion in 2018, and ₱53.61 billion in 2017.

c. Retail Electricity Supply Agreements (see Note 40i)

Certain subsidiaries have negotiated contracts with contestable customers. These contracts provide supply and delivery of electricity where capacity fees, fixed operating fees and energy fees are at fixed price/kwh or time of use.

Total sale of power under retail electricity supply agreements amounted to ₱22.81 billion, ₱24.22 billion, and ₱18.07 billion in 2019, 2018 and 2017, respectively.

22. Purchased Power

Distribution

The Group's distribution utilities entered into contracts with NPC/PSALM and generation companies for the purchase of electricity, and into Transmission Service Agreements with NGCP for the transmission of electricity.

To avail of opportunities in the competitive electricity market, some of the Group's distribution utilities registered as direct participants of the WESM.

Total purchased power amounted to ₱22.38 billion, ₱24.18 billion, ₱22.47 billion in 2019, 2018 and 2017, respectively.

Generation

Purchased power takes place during periods when power generated from power plants are not sufficient to meet customers' required power as stated in the power supply contracts. Insufficient supply of generated energy results from the shutdowns due to scheduled maintenance or an emergency situation. The Group purchases power from WESM to ensure uninterrupted supply of power and meet the requirements in the power supply contracts.

The Group entered into Replacement Power Contracts with certain related parties (see Note 32). Under these contracts, the Group supplies power to counterparties when additional power is needed. Correspondingly, when faced with energy shortfalls, the Group purchases power from counterparties.

Total purchased power amounted to ₱7.60 billion, ₱4.87 billion, ₱6.63 billion in 2019, 2018 and 2017, respectively.

Retail Electricity Supply

AESI pays PSALM monthly generation payments using the formula specified in the IPP Administration Agreement. In October 2019, a compromise agreement with PSALM was effected, which includes the termination of supply and ₱125.0 million payment of AESI as termination fee.

The Group also purchases from WESM in order to supply its contestable customers.

Total purchased power amounted to ₱6.43 billion, ₱7.55 billion, ₱6.29 billion in 2019, 2018 and 2017, respectively.

23. Cost of Generated Power

	2019	2018	2017
Fuel costs (see Note 7)	₱29,394,773	₱29,423,013	₱22,324,825
Steam supply costs (see Note 36a)	5,008,607	5,227,807	4,981,187
Energy fees	694,696	646,317	668,558
Ancillary charges	360,095	355,260	547,291
Wheeling expenses	68,535	21,821	35,895
	₱35,526,706	₱35,674,218	₱28,557,756

24. General and Administrative

	2019	2018	2017
Personnel costs (see Note 26)	₱2,641,365	₱2,647,636	₱2,609,400
Taxes and licenses	1,680,928	1,496,779	1,033,227
Outside services (see Note 32)	1,031,326	1,132,345	1,087,347
Professional fees (see Note 32)	814,149	608,107	256,779
Repairs and maintenance	306,316	420,524	377,788
Corporate social responsibility (CSR) (see Note 40)	299,595	308,918	331,027
Transportation and travel (see Note 32)	206,861	230,658	195,016
Insurance	205,998	209,590	226,712
Information technology and communication	181,746	108,332	106,213
Training	156,027	70,080	80,482
Provision for expected credit losses of trade receivables (see Note 6)	87,086	235,818	77,708
Rent (see Notes 32 and 35)	44,916	224,758	95,974
Entertainment, amusement and recreation	40,916	39,689	23,862
Advertisements	33,798	41,768	53,583
Guard services	25,570	2,960	10,463
Freight and handling	4,264	2,343	5,245
Gasoline and oil	1,020	1,631	1,339
Supervision and regulatory fees	584	797	2,413
Market service and administrative fees	-	30,818	23,075
Others	392,901	374,961	624,615
	₱8,155,366	₱8,188,512	₱7,222,268

"Others" include host community-related expenses, provision for probable losses, claims conversion costs and utilities expenses.

25. Operations and Maintenance

	2019	2018	2017
Repairs and maintenance	₱2,076,988	₱1,659,288	₱1,262,634
Personnel costs (see Note 26)	1,586,624	1,781,283	1,482,775
Taxes and licenses	1,167,990	861,626	1,052,800
Outside services	944,561	684,074	808,436
Insurance	787,983	752,425	789,210
Materials and supplies (see Note 7)	275,814	201,903	339,734
Transportation and travel	104,858	37,444	69,795
Fuel and lube oil (see Note 7)	77,880	84,806	72,412
Rent (see Note 35)	11,980	171,989	204,818
Others	331,694	290,351	366,574
	₱7,366,372	₱6,525,189	₱6,449,188

"Others" include environmental, health and safety expenses, and transmission charges.

26. Personnel Costs

	2019	2018	2017
Salaries and wages	₱3,105,859	₱3,798,218	₱2,978,818
Employee benefits (see Note 27)	1,122,130	630,701	1,113,357
	₱4,227,989	₱4,428,919	₱4,092,175

27. Pension Benefit Plans

Under the existing regulatory framework, RA 7641, otherwise known as *The Retirement Pay Law*, requires a provision for retirement pay to qualified private sector employees in the absence of any retirement plan in the entity. It further states that the employees' retirement benefits under any collective bargaining and other agreements shall not be less than those provided under the law. The law does not require minimum funding of the plan.

The Company and its subsidiaries have funded, non-contributory, defined retirement benefit plans ("Plan") covering all regular and full-time employees and requiring contributions to be made to separately administered funds. The retirement benefit fund ("Fund") of each subsidiary is in the form of a trust being maintained and managed by AEV, under the supervision of the Board of Trustees (BOT) of the Plan. The BOT, whose members are also corporate officers, is responsible for the investment of the Fund assets. Taking into account the Plan's objectives, benefit obligations and risk capacity, the BOT periodically defines the investment strategy in the form of a long-term target structure.

The following tables summarize the components of net benefit expense recognized in the consolidated statements of income and the funded status and amounts recognized in the consolidated balance sheets for the respective plans.

Net benefit expense (recognized as part of personnel costs under operations and maintenance and general and administrative expenses):

	2019	2018	2017
Current service cost	P179,269	P189,906	P193,346
Net interest cost	5,012	15,379	10,730
Past service cost	(1,975)	(9,564)	15,319
	P182,306	P195,721	P219,395

Remeasurement effects to be recognized in other comprehensive income:

	2019	2018	2017
Actuarial gain (losses) due to:			
Changes in financial assumptions	(P145,431)	P61,493	(P4,455)
Changes in demographic assumptions	31,693	34,416	182,355
Return on assets excluding amount included in net interest cost	(18,050)	(96,856)	27,498
Experience adjustments	(82,122)	15,705	(252,957)
	(P213,910)	P14,758	(P47,559)

Net pension assets

	2019	2018
Fair value of plan assets	P342,117	P1,150,771
Present value of the defined benefit obligation	(273,908)	(1,023,794)
	P68,209	P126,977

Net pension liabilities

	2019	2018
Present value of the defined benefit obligation	P2,138,190	P1,153,382
Fair value of plan assets	(1,712,143)	(908,525)
	P426,047	P244,857

Changes in the present value of the defined benefit obligation are as follows:

	2019	2018
At January 1	₱2,177,176	₱2,331,322
Net benefit expense:		
Current service cost	179,269	189,906
Net interest cost	129,804	119,262
Past service cost	(1,975)	(9,564)
	307,098	299,604
Benefits paid	(271,204)	(330,546)
Transfers and others	3,168	(11,590)
Remeasurements in other comprehensive income:		
Actuarial loss (gain) due to:		
Experience adjustments	₱82,122	(₱15,705)
Changes in demographic assumptions	(31,693)	(34,416)
Changes in financial assumptions	145,431	(61,493)
	195,860	(111,614)
At December 31	₱2,412,098	₱2,177,176

Changes in the fair value of plan assets are as follows:

	2019	2018
At January 1	₱2,059,296	₱2,026,494
Contribution by employer	156,252	367,917
Interest income included in net interest cost	124,792	103,883
Fund transfer from affiliates	3,174	(11,596)
Return on assets excluding amount included in net interest cost	(18,050)	(96,856)
Benefits paid	(271,204)	(330,546)
At December 31	₱2,054,260	₱2,059,296

Changes in net pension liability recognized in the consolidated balance sheets are as follows:

	2019	2018
At January 1	₱117,880	₱304,828
Retirement expense during the year	182,306	195,721
Transfers and others	(6)	6
Contribution to retirement fund	(156,252)	(367,917)
Actuarial loss (gain) recognized during the year	213,910	(14,758)
At December 31	₱357,838	₱117,880

The fair value of plan assets by each class as at the end of the reporting period are as follows:

	2019	2018
Cash and fixed-income investments:	₱473,840	₱1,470,918
Financial assets at FVOCI	715,814	-
Financial assets at amortized cost	394,522	-
Equity instruments:		
Financial Institution	31,551	39,582
Power	145,155	103,193
Holding	147,253	178,538
Others	146,125	267,065
	1,580,420	588,378
Fair value of plan assets	₱2,054,260	₱2,059,296

All equity instruments held have quoted prices in active market. The remaining plan assets do not have quoted market prices in active market.

The plan assets are diverse and do not have any concentration risk.

The BOT reviews the performance of the plans on a regular basis. It assesses whether the retirement plans will achieve investment returns which, together with contributions, will be sufficient to pay retirement benefits as they fall due. The Group also reviews the solvency position of the different member companies on an annual basis and estimates, through the actuary, the expected contribution to the Retirement plan in the subsequent year.

The principal assumptions used as of December 31, 2019, 2018 and 2017 in determining pension benefit obligations for the Group's plans are shown below:

	2019	2018	2017
Discount rates	4.36%-6.00%	4.87%-8.18%	3.48%-5.21%
Salary increase rates	6.00%	7.00%	6.00%

The sensitivity analysis below has been determined based on reasonably possible changes of each significant assumption on the defined benefit obligation as of December 31, 2019, assuming if all other assumptions were held constant:

	Increase (decrease) in basis points	Effect on defined benefit obligation
Discount rates	100	(₱28,519)
	(100)	235,579
Future salary increases	100	290,709
	(100)	(5,115)

The Group's defined benefit pension plans are funded by the Company and its subsidiaries.

The Group expects to contribute P161.08 million to the defined benefit plans in 2020. The average durations of the defined benefit obligation as of December 31, 2019 and 2018 are 7.0 to 22.02 years and 7.78 to 28.76 years, respectively.

28. Other Income (Expense) - net

	2019	2018	2017
Net foreign exchange gains (loss)	P1,130,743	(P2,055,085)	P203,083
Surcharges	536,856	508,492	435,428
Non-utility operating income	170,640	142,363	145,948
Unrealized fair valuation gain on investment property	126,842	-	-
Rental income	67,854	42,290	39,704
Bargain purchase gain (see Note 9)	-	-	310,198
Write off of project costs and other assets	(31,431)	(50,922)	(79,881)
<i>(Forward)</i>			
Losses on disposal of property, plant and equipment	(P304,631)	(P292,799)	(P86,193)
Reversal of (impairment) losses on property, plant and equipment, goodwill and other assets	245,489	(847,619)	(3,233,036)
Others - net	1,541,025	1,260,969	560,749
	P3,483,387	(P1,292,311)	(P1,704,000)

Included in "Net foreign exchange gain (losses)" are the net gains and losses relating to currency forward transactions (see Note 34).

Reversal of (impairment) losses on property, plant and equipment, goodwill and other assets includes the following:

- The income from the 2019 recovery of a certain Aseagas asset previously impaired in 2017 amounting to P245.5 million.
- The P486.5 million net book value of the Bajada Power Plant which was fully impaired when it ceased operations in 2018 and the loss of P282.3 million from recognizing the recoverable amount of transmission assets which were classified as property held for sale.
- The P2.64 billion impairment loss of Aseagas biomass plant which temporarily ceased its operation due to unavailability of the supply of organic effluent wastewater from source and in January 2018, Aseagas decided to make the plant shutdown permanently. In the year ending December 31, 2017, the recoverable amount of Aseagas' property, plant and equipment was determined based on their fair value less costs of disposal. The fair value of the property, plant and equipment was based on valuation performed by an accredited independent appraiser (see Note 12).

"Others" include reversal of APRI and TLI's liability to PSALM pertaining to GRAM and ICERA of P924.0 million in 2019 and income arising from the proceeds from claims of liquidating damages from contractor due to the delay of the completion of PEC's power plant amounting to P340.7 million in 2018. "Others" also include non-recurring items like sale of scrap and sludge oil, and reversal of provisions.

29. Income Tax

The provision for income tax account consists of:

	2019	2018	2017
Current:			
Corporate income tax	P3,460,636	P3,713,410	P3,772,375
Final tax	221,149	143,714	119,833
	3,681,785	3,857,124	3,892,208
Deferred	(466,287)	(931,501)	(33,810)
	P3,215,498	P2,925,623	P3,858,398

Reconciliation between the statutory income tax rate and the Group's effective income tax rates follows:

	2019	2018	2017
Statutory income tax rate	30.00%	30.00%	30.00%
Tax effects of:			
Nondeductible interest expense	6.43	5.77	6.42
Nondeductible depreciation expense	1.42	1.18	1.22
Deductible lease payments	(11.53)	(9.57)	(9.89)
Income under income tax holiday (ITH)	(7.41)	(11.90)	(9.29)
Nontaxable share in net earnings of associates and joint ventures	(4.89)	(4.61)	(5.25)
Interest income subjected to final tax at lower rates - net	(1.57)	(0.89)	(0.78)
Others	1.30	0.34	1.94
	13.75%	10.32%	14.37%

Deferred income taxes of the companies in the Group that are in deferred income tax assets and liabilities position consist of the following at December 31:

	2019	2018
Net deferred income tax assets:		
Allowances for impairment and probable losses	P329,278	P325,356
Net income from commissioning	1,536,161	1,562,631
Difference between the carrying amount of nonmonetary assets and related tax base	(1,299,507)	(1,673,699)
Unrealized foreign exchange loss	372,732	1,324,958
Net operating loss carryover (NOLCO)	1,298,227	189,267
Pension asset (liability):		
Unamortized contributions for past service	34,923	96,333
Recognized in other comprehensive income	20,662	127,234
Recognized in statements of income	25,609	(80,907)
Unamortized streetlight donations capitalized	(685)	(822)
Unamortized customs duties and taxes capitalized	(47,626)	(50,281)
Net provision for rehabilitation and restoration costs	427,114	393,397
Others	89,422	20,228
Net deferred income tax assets	P2,786,310	P2,233,695

	2019	2018
Net deferred income tax liabilities:		
Unamortized franchise	P771,532	P794,620
Fair value adjustments of property, plant and equipment	137,740	144,117
Unrealized foreign exchange gains	2,749	4,004
Unamortized customs duties and taxes capitalized	5,618	9,008
Pension asset (liability):		
Recognized in other comprehensive income	147,884	127,798
Recognized in statements of income	(168,678)	(149,723)
Unamortized past service cost	(35,972)	(42,743)
Allowances for impairment and probable losses	(22,934)	(33,738)
Others	10,532	4,947
Net deferred income tax liabilities	P848,471	P858,290

In computing for deferred income tax assets and liabilities, the rates used were 30% and 10%, which are the rates expected to apply to taxable income in the years in which the deferred income tax assets and liabilities are expected to be recovered or settled and considering the tax rate for renewable energy (RE) developers as allowed by the Renewable Energy Act of 2008 (see Note 40).

No deferred income tax assets were recognized on the Group's NOLCO and MCIT amounting to P7.80 billion and P67.7 million, respectively, as of December 31, 2019 and P5.44 billion and P58.3 million, respectively, as of December 31, 2018, since management expects that it will not generate sufficient taxable income in the future that will be available to allow all of the deferred income tax assets to be utilized.

There are no income tax consequences to the Group attaching to the payment of dividends to its shareholders.

30. Earnings Per Common Share

Earnings per common share amounts were computed as follows:

	2019	2018	2017
a. Net income attributable to equity holders of the parent	₱17,322,677	₱21,707,603	₱20,416,442
b. Weighted average number of common shares issued and outstanding	7,358,604,307	7,358,604,307	7,358,604,307
Earnings per common share (a/b)	₱2.35	₱2.95	₱2.77

There are no dilutive potential common shares for the years ended December 31, 2019, 2018 and 2017.

31. Operating Segment Information

Operating segments are components of the Group that engage in business activities from which they may earn revenues and incur expenses, whose operating results are regularly reviewed by the Group's CODM to make decisions about how resources are to be allocated to the segment and assess their performances, and for which discrete financial information is available.

For purposes of management reporting, the Group's operating businesses are organized and managed separately according to services provided, with each segment representing a strategic business segment. The Group's identified operating segments, which are consistent with the segments reported to the BOD, which is the Group's CODM, are as follows:

- "Power Generation" segment, which is engaged in the generation and supply of power to various customers under power supply contracts, ancillary service procurement agreements and for trading in WESM;
- "Power Distribution" segment, which is engaged in the distribution and sale of electricity to the end-users; and
- "Parent Company and Others", which includes the operations of the Company, retail electricity sales to various off takers that are considered to be eligible contestable customers (see Note 40i) and electricity related services of the Group such as installation of electrical equipment.

The power generation segment's revenue from contracts with customers is mainly from power supply contracts. Set out below is the disaggregation of the Group's revenue from contracts with customers:

2019

	Power Generation	Power Distribution	Parent and Others	Total
Revenue from power supply contracts	₱46,783,955	-	-	₱46,783,955
Revenue from distribution services	-	46,120,403	-	46,120,403
Revenue from retail electricity sales	-	-	22,805,450	22,805,450
Revenue from non-power supply contracts	9,111,632	-	-	9,111,632
Revenue from technical and management services	-	-	813,717	813,717
	₱55,895,587	₱46,120,403	₱23,619,167	₱125,635,157

2018

	Power Generation	Power Distribution	Parent and Others	Total
Revenue from power supply contracts	₱54,237,387	₱-	₱-	₱54,237,387
Revenue from distribution services	-	44,880,546	-	44,880,546
Revenue from retail electricity sales	-	-	24,216,767	24,216,767
Revenue from non-power supply contracts	7,617,298	-	-	7,617,298
Revenue from technical and management services	-	-	620,086	620,086
	₱61,854,685	₱44,880,546	₱24,836,853	₱131,572,084

The revenue from contracts with customers is consistent with the revenue with external customers presented in Segment information.

The Group has only one geographical segment as all of its assets are located in the Philippines. The Group operates and derives principally all of its revenue from domestic operations. Thus, geographical business information is not required.

Management monitors the operating results of its segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment revenue and segment expenses are measured in accordance with PFRS. The presentation and classification of segment revenue and segment expenses are consistent with the consolidated statement of income. Interest expense and financing charges, depreciation and amortization expense and income taxes are managed on a per segment basis.

The Group has inter-segment revenues in the form of management fees as well as inter-segment sales of electricity which are eliminated in consolidation. The transfers are accounted for at competitive market prices on an arm's-length transaction basis.

Segment assets do not include deferred income tax assets, pension asset and other noncurrent assets. Segment liabilities do not include deferred income tax liabilities, income tax payable and pension liability. Capital expenditures consist of additions of property, plant and equipment and intangible asset - service concession rights. Adjustments as shown below include items not presented as part of segment assets and liabilities.

Revenue is recognized to the extent that it is probable that economic benefits will flow to the Group, and that the revenue can be reliably measured. Sale of power to Manila Electric Company

(MERALCO) accounted for 22%, 22%, and 24% of the power generation revenues of the Group in 2018, 2018, and 2017 respectively.

Financial information on the operations of the various business segments are summarized as follows:

2019

	Power Generation	Power Distribution	Parent Company/ Others	Eliminations and Adjustments	Consolidated

32. Related Party Disclosures

Parties are considered to be related if one party has the ability to control, directly or indirectly, the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Related parties may be individuals or corporate entities.

The sales to and purchases from related parties are made on terms equivalent to those that prevail in arm's length transactions.

The Group enters into transactions with its parent, associates, joint ventures and other related parties, principally consisting of the following:

- a. The Company provides services to certain associates and joint ventures such as technical and legal assistance for various projects and other services.
- b. Energy fees are billed by the Group to related parties and the Group also purchased power from associates and joint ventures, arising from the following:
 - PPA/PSA or ESA (Note 21)
 - Replacement power contracts (Note 22)
- c. AEV provides human resources, internal audit, legal, treasury and corporate finance services, among others, to the Group and shares with the member companies the business expertise of its highly qualified professionals. Transactions are priced based on agreed rates, and billed costs are always benchmarked to third party rates. Service level agreements are in place to ensure quality of service. This arrangement enables the Group to maximize efficiencies and realize cost synergies. These transactions result to professional and technical fees paid by the Group to AEV (see Note 24).

- d. Aviation services are rendered by AAI, an associate, to the Group.
- e. Lease of commercial office units by the Group from Cebu Praedia Development Corporation (CPDC) and Aboitizland, Inc. and subsidiaries. CPDC and Aboitizland, Inc. are subsidiaries of AEV.
- f. Aboitiz Construction, Inc. (ACI), a wholly owned subsidiary of ACO, rendered its services to the Group for various construction projects.
- g. LEZ entered into a Concession Agreement with Lima Land, Inc. (LLI) for which it is entitled to the exclusive right to distribute and supply electricity to LLI's locators.
- h. Interest-bearing advances from AEV availed by the Group. The annual interest rates are determined on arm's length basis.
- i. Cash deposits with Union Bank of the Philippines (UBP) earn interest at prevailing market rates (see Note 5). UBP is an associate of AEV.
- j. The Company obtained Standby Letter of Credit (SBLC) and is acting as surety for the benefit of certain associates and joint ventures in connection with loans and credit accommodations. The Company provided SBLC for STEAG, CEDC, and SNAP B in the amount of P958.3 million in 2019, P1.02 billion in 2018 and P1.04 billion in 2017.

The above transactions are settled in cash.

The consolidated balance sheets and consolidated statements of income include the following significant account balances resulting from the above transactions with related parties:

- a. Revenue - Technical, management and other fees

The Company's Fund is in the form of a trust being maintained and managed by AEV. In 2019 and 2018, other than contributions to the Fund, no transactions occurred between the Company or any of its direct subsidiaries and the Fund.

Compensation of BOD and key management personnel of the Group follows:

	2019	2018	2017
Short-term benefits	₱456,844	₱439,859	₱461,779
Post-employment benefits	30,616	25,998	28,518
	₱487,460	₱465,857	₱490,297

33. Financial Risk Management Objectives and Policies

The Group's principal financial instruments comprise cash and cash equivalents and long-term debts. The main purpose of these financial instruments is to raise finances for the Group's operations. The Group has various other financial instruments such as trade and other receivables, investments in equity securities, short-term loans, trade and other payables, lease liabilities, long-term obligation on power distribution system and customers' deposits, which generally arise directly from its operations.

The Group also enters into derivative transactions, particularly foreign currency forwards, to economically hedge its foreign currency risk from foreign currency denominated liabilities and purchases (see Note 34).

Risk Management Structure

The BOD is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Group.

Financial risk committee

The Financial Risk Committee has the overall responsibility for the development of risk strategies, principles, frameworks, policies and limits. It establishes a forum of discussion of the Group's approach to risk issues in order to make relevant decisions.

Treasury service group

The Treasury Service Group is responsible for the comprehensive monitoring, evaluating and analyzing of the Group's risks in line with the policies and limits.

The main risks arising from the Group's financial instruments are interest rate risk, credit risk, liquidity risk, commodity price risk and foreign exchange risk.

Liquidity risk

Liquidity risk is the risk of not meeting obligations as they become due because of the inability to liquidate assets or obtain adequate funding. The Group maintains sufficient cash and cash equivalents to finance its operations. Any excess cash is invested in short-term money market placements. These placements are maintained to meet maturing obligations and pay any dividend declarations.

In managing its long-term financial requirements, the Group's policy is that not more than 25% of long-term borrowings should mature in any twelve-month period. 6.97% and 6.08% of the Group's debt will mature in less than one year as of December 31, 2019 and 2018 respectively. For its short-term funding, the Group's policy is to ensure that there are sufficient working capital inflows to match repayments of short-term debt.

The financial assets that will be principally used to settle the financial liabilities presented in the following table are from cash and cash equivalents and trade and other receivables that have contractual undiscounted cash flows amounting to ₱37.50 billion and ₱23.90 billion, respectively, as of December 31, 2019 and ₱46.34 billion and ₱24.90 billion, respectively, as of December 31, 2018 (see Notes 5 and 6). Cash and cash equivalents can be withdrawn anytime while trade and other receivables are expected to be collected/realized within one year.

The following tables summarize the maturity profile of the Group's financial liabilities as of December 31, 2019 and 2018 based on contractual undiscounted payments:

December 31, 2019

	Total Carrying Value	Contractual undiscounted payments				
		Total	On demand	<1 year	1 to 5 years	> 5 years

Market risk

The risk of loss, immediate or over time, due to adverse fluctuations in the price or market value of instruments, products, and transactions in the Group's overall portfolio (whether on or off-balance sheet) is market risk. These are influenced by foreign and domestic interest rates, foreign exchange rates and gross domestic product growth.

Interest rate risk

The Group's exposure to market risk for changes in interest rates relates primarily to its long-term debt obligations. To manage this risk, the Group determines the mix of its debt portfolio as a function of the level of current interest rates, the required tenor of the loan, and the general use of the proceeds of its various fund raising activities. As of December 31, 2019, 16% of the Group's long-term debt had annual floating interest rates ranging from 3.09% to 4.81%, and 84% have annual fixed interest rates ranging from 4.05% to 9.00%. As of December 31, 2018, 10% of the Group's long-term debt had annual floating interest rates ranging from 2.94% to 4.31%, and 90% have annual fixed interest rates ranging from 4.11% to 9.00%.

The following tables set out the carrying amounts, by maturity, of the Group's financial instruments that are exposed to cash flow interest rate risk:

As of December 31, 2019

	<1 year	1-5 years	>5 years	Total
Floating rate - long-term debt	₱1,887,609	₱23,257,354	₱4,183,912	₱29,328,875

As of December 31, 2018

	<1 year	1-5 years	>5 years	Total
Floating rate - long-term debt	₱2,134,417	₱9,816,871	₱4,303,409	₱16,254,697

Interest on financial instruments classified as floating rate is repriced at intervals of less than one year. Interest on financial instruments classified as fixed rate is fixed until the maturity of the instrument. The other financial instruments of the Group that are not included in the above tables are non-interest bearing and are therefore not subject to interest rate risk. The Group's derivative assets and liabilities are subject to fair value interest rate risk (see Note 34).

The following table demonstrates the sensitivity to a reasonable possible change in interest rates, with all other variables held constant, of the Group's income before tax (through the impact on floating rate borrowings):

	Increase (decrease) in basis points	Effect on income before tax
December 2019	200	(₱586,577)
	(100)	293,289
December 2018	200	(₱325,094)
	(100)	162,547

There is no other impact on the Group's equity other than those already affecting the consolidated statements of income.

The interest expense and other finance charges recognized according to source are as follows:

	2019	2018	2017
Short-term loans and long-term debt (see Notes 16 and 17)	₱9,443,882	₱7,237,217	₱6,458,347
Lease liabilities (see Note 35)	4,350,043	4,659,794	4,757,379
Customers' deposits (see Note 18)	4,353	2,143	3,230
Other long-term obligations (see Notes 13 and 19)	249,368	183,004	28,824
	₱14,047,646	₱12,082,158	₱11,247,780

Commodity Price Risk

Commodity price risk of the Group arises from transactions on the world commodity markets to secure the supply of fuel, particularly coal, which is necessary for the generation of electricity.

The Group's objective is to minimize the impact of commodity price fluctuations and this exposure is hedged in accordance with the Group's commodity price risk management strategy.

Based on a 36-month forecast of the required coal supply, the Group hedges the purchase price of coal using commodity swap contracts. The commodity swap contracts do not result in physical delivery of coal, but are designated as cash flow hedges to offset the effect of price changes in coal.

Foreign exchange risk

The foreign exchange risk of the Group pertains significantly to its foreign currency denominated obligations. To manage its foreign exchange risk, stabilize cash flows and improve investment and cash flow planning, the Group enters into foreign currency forward contracts aimed at reducing and/or managing the adverse impact of changes in foreign exchange rates on financial performance and cash flows. Foreign currency denominated borrowings account for 32% and 31% of total consolidated borrowings as of December 31, 2019 and 2018, respectively.

Presented below are the Group's foreign currency denominated financial assets and liabilities as of December 31, 2019 and 2018, translated to Philippine Peso:

	December 31, 2019		December 31, 2018	
	US Dollar	Philippine Peso equivalent ¹	US Dollar	Philippine Peso equivalent ²
Financial assets:				
Cash and cash equivalents	\$43,352	₱2,195,129	\$227,911	₱11,983,534
Trade and other receivables	18,725	948,140	26,591	1,398,184
Advances to associates	-	-	592	31,127
Total financial assets	62,077	3,143,269	255,094	13,412,845
Financial liabilities:				
Short-term loans	12,000	607,620	12,000	630,960
Trade and other payables	13,439	680,493	2,934	154,294
Long-term debt	300,000	15,190,500	-	-
Lease liabilities	443,002	22,431,406	479,512	25,212,741
Total financial liabilities:	768,441	38,910,019	494,446	25,997,995
Total net financial liabilities	(\$706,364)	(₱35,766,750)	(\$239,352)	(₱12,585,150)

¹US\$1 = ₱50.64

²US\$1 = ₱52.58

The following table demonstrates the sensitivity to a reasonable possible change in the US dollar exchange rates, with all other variables held constant, of the Group's income before tax as of December 31:

	Increase (decrease) in US Dollar	Effect on income before tax
2019		
US Dollar denominated accounts	US Dollar strengthens by 5%	(₱1,788,338)
US Dollar denominated accounts	US Dollar weakens by 5%	1,788,338
2018		
US Dollar denominated accounts	US Dollar strengthens by 5%	(₱629,257)
US Dollar denominated accounts	US Dollar weakens by 5%	629,257

The increase in US Dollar rate represents the depreciation of the Philippine Peso while the decrease in US Dollar rate represents appreciation of the Philippine Peso.

The following table presents LHC's and GMCP's foreign currency denominated assets and liabilities:

	2019		2018	
	Philippine Peso	US Dollar Equivalent ¹	Philippine Peso	US Dollar Equivalent ²
Financial assets:				
Cash and cash equivalents	₱718,508	\$14,190	₱1,212,747	\$23,065
Trade and other receivables	461,052	9,105	801,466	15,243
	1,179,560	23,295	2,014,213	38,308
Financial liabilities:				
Trade and other payables	842,075	16,630	608,306	11,569
Net foreign currency denominated assets	₱337,485	\$6,665	₱1,405,907	\$26,739

¹US\$1 = ₱50.64

²US\$1 = ₱52.58

The following tables demonstrate the sensitivity to a reasonable possible change in the US dollar exchange rate in relation to Philippine peso, with all variables held constant, of the Group's income before tax as of December 31:

	Effect on income before tax
2019	
U.S. dollar appreciates against Philippine peso by 5.0%	(\$333)
U.S. dollar depreciates against Philippine peso by 5.0%	333
2018	
U.S. dollar appreciates against Philippine peso by 5.0%	(\$1,337)
U.S. dollar depreciates against Philippine peso by 5.0%	1,337

There is no other impact on the Group's equity other than those already affecting the consolidated statements of comprehensive income.

Credit risk

For its cash investments (including restricted portion), financial assets at FVTPL and receivables, the Group's credit risk pertains to possible default by the counterparty, with a maximum exposure equal to the carrying amount of these investments. With respect to cash investments and financial assets at FVTPL, the risk is mitigated by the short-term and/or liquid nature of its cash investments mainly in bank deposits and placements, which are placed with financial institutions and entities of high credit standing. With respect to receivables, credit risk is controlled by the application of credit approval, limit and monitoring procedures. It is the Group's policy to only enter into transactions with credit-worthy parties to mitigate any significant concentration of credit risk. The Group ensures that sales are made to customers with appropriate credit history and it has internal mechanisms to monitor the granting of credit and management of credit exposures.

Concentration risk

Credit risk concentration of the Group's receivables according to the customer category as of December 31, 2019 and 2018 is summarized in the following table:

	2019	2018
Power distribution:		
Industrial	P5,554,969	P4,973,567
Residential	1,825,217	1,676,936
Commercial	437,994	778,623
City street lighting	111,570	30,006
Power generation:		
Power supply contracts	1,481,760	4,567,682
Spot market	5,520,439	2,533,211
	P14,931,949	P14,560,025

The above receivables were provided with allowance for ECL amounting to P1.97 billion in 2019 and P1.75 billion in 2018 (see Note 6).

Maximum exposure to credit risk after collateral and other credit enhancements

The maximum exposure of the Group's financial instruments is equivalent to the carrying values as reflected in the consolidated balance sheets and related notes, except that the credit risk associated with the receivables from customers is mitigated because some of these receivables have collaterals.

Maximum exposure to credit risk for collateralized loans is shown below:

	2019			2018		
	Carrying Value	Financial Effect of Collateral in Mitigating Credit Risk	Maximum Exposure to Credit Risk	Carrying Value	Financial Effect of Collateral in Mitigating Credit Risk	Maximum Exposure to Credit Risk
Trade receivables:						
Power distribution	P7,639,069	P7,639,069	P-	P7,619,514	P7,619,514	P-

Financial effect of collateral in mitigating credit risk is equivalent to the fair value of the collateral or the carrying value of the loan, whichever is lower.

Credit quality

The credit quality per class of financial assets is as follows:

December 31, 2019

	Neither past due nor impaired			Past due or individually impaired	Total
	High Grade	Standard	Sub-standard		
Cash and cash equivalents:					
Cash on hand and in banks	₱14,177,919	P-	P-	P-	₱14,177,919

Loss allowance	-	23,821	1,949,699	1,973,520
Carrying amount	₱57,571,121	₱12,958,429	₱-	₱70,529,550

	2018			Total
	Stage 1 12-month ECL	Stage 2 Lifetime ECL	Stage 3 Lifetime ECL	
High grade	₱64,101,115	₱10,170,338	₱-	₱74,271,453
Standard grade	-	8,857	-	8,857
Substandard grade	-	162	-	162
Default	20,171	2,879,856	1,500,812	4,400,839
Gross carrying amount	64,121,286	13,059,213	1,500,812	78,681,311
Loss allowance	-	249,179	1,500,812	1,749,991
Carrying amount	₱64,121,286	₱12,810,034	₱-	₱76,931,320

High grade - pertain to receivables from customers with good favorable credit standing and have no history of default.

Standard grade - pertain to those customers with history of sliding beyond the credit terms but pay a week after being past due.

Sub-standard grade - pertain to those customers with payment habits that normally extend beyond the approved credit terms, and has high probability of being impaired.

Trade and other receivables that are individually determined to be impaired at the balance sheet date relate to debtors that are in significant financial difficulties and have defaulted on payments and accounts under dispute and legal proceedings.

The Group evaluated its cash and cash equivalents and restricted cash as high quality financial assets since these are placed in financial institutions of high credit standing.

With respect to other receivables, investments in equity securities and derivative assets, the Group evaluates the counterparty's external credit rating in establishing credit quality.

The tables below show the Group's aging analysis of financial assets:

December 31, 2019

	Total	Neither past due nor impaired	Past due but not impaired			Individually impaired
			Less than 30 days	31 days to 60 days	Over 60 days

Capital Management

Capital includes equity attributable to the equity holders of the parent. The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

The Group monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. The Group's policy is to keep the gearing ratio at 70% or below. The Group determines net debt as the sum of interest-bearing short-term loans, long-term loans, and lease liabilities less cash and short-term deposits (including restricted cash).

Gearing ratios of the Group as of December 31, 2019 and 2018 are as follows:

	2019	2018
Short-term loans	P10,335,420	P11,546,560
Long-term debt	222,761,266	204,952,046
Cash and cash equivalents	(37,433,929)	(46,343,041)
Restricted cash	(9,121,747)	(5,289,145)
Net debt (a)	186,541,010	164,866,420
Equity	133,643,011	136,576,667
Equity and net debt (b)	320,184,021	301,443,087
Gearing ratio (a/b)	58.26%	54.69%

Part of the Group's capital management is to ensure that it meets financial covenants attached to long-term borrowings. Breaches in meeting the financial covenants would permit the banks to immediately call loans and borrowings. The Group is in compliance with the financial covenants attached to its long-term debt as of December 31, 2019 and 2018 (see Note 17).

Certain entities within the Group that are registered with the BOI are required to raise a minimum amount of capital in order to avail of their registration incentives. As of December 31, 2019 and 2018, these entities have complied with the requirement as applicable (see Note 37).

No changes were made in the objectives, policies or processes during the years ended December 31, 2019 and 2018.

34. Financial Instruments

Fair Value of Financial Instruments

Fair value is defined as the amount at which the financial instrument could be sold in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

A financial instrument is regarded as quoted in an active market if quoted prices are readily available from an exchange, dealer, broker, pricing services or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. For a financial instrument with an active market, the quoted market price is used as its fair value. On the other hand, if transactions are no longer regularly occurring even if prices might be available and the only observed transactions are forced transactions or distressed sales, then the market is considered inactive. For a financial instrument with no active market, its fair value is determined using a valuation technique (e.g. discounted cash flow approach) that incorporates all factors that market participants would consider in setting a price.

Set out below is a comparison by category of carrying amounts and fair values of the Group's financial instruments whose fair values are different from their carrying amounts.

	2019		2018	
	Carrying Amounts	Fair Values	Carrying Amounts	Fair Values
Financial Asset				
PSALM deferred adjustment	₱3,183,080	₱2,846,279	₱4,225,950	₱3,889,099
Financial Liabilities				
Lease liabilities	₱44,789,644	₱38,495,450	₱46,894,355	₱40,495,647
Long-term debt - fixed rate	148,642,748	152,786,437	141,802,994	138,103,091
PSALM deferred adjustment	3,183,080	2,846,279	4,225,950	3,889,099
Long-term obligation on power distribution system	199,350	320,194	213,496	297,790
	₱196,814,822	₱194,448,360	₱193,136,795	₱182,785,627

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, trade and other receivables, short-term loans and trade and other payables. The carrying amounts of cash and cash equivalents, trade and other receivables, short-term loans and trade and other payables approximate fair value due to the relatively short-term maturity of these financial instruments.

Fixed-rate borrowings. The fair value of fixed rate interest-bearing loans is based on the discounted value of future cash flows using the applicable rates for similar types of loans. Interest-bearing loans were discounted using credit-adjusted interest rates ranging from 3.47% to 6.52% in 2019 and 3.15% to 7.53% in 2018.

Floating-rate borrowings. Since repricing of the variable-rate interest bearing loan is done on a quarterly basis, the carrying value approximates the fair value.

Lease liabilities. The fair value of lease liabilities was calculated by discounting future cash flows using discount rates of 3.10% to 4.13% for dollar payments and 6.68% to 7.04% for peso payments in 2019 and 2.33% to 2.73% for dollar payments and 5.26% to 6.67% for peso payments in 2018.

Long-term obligation on PDS and PSALM deferred adjustment. The fair value of the long-term obligations on power distribution system and PSALM deferred adjustment is calculated by discounting expected future cash flows at prevailing market rates. Discount rates used in discounting the obligation ranges from 4.32% to 7.49% in 2018 and 2.70% to 4.66% in 2017.

Customers' deposits. The fair value of bill deposits approximates the carrying values as these deposits earn interest at the prevailing market interest rate in accordance with regulatory guidelines. The timing and related amounts of future cash flows relating to transformer and lines and poles deposits cannot be reasonably and reliably estimated for purposes of establishing their fair values using an alternative valuation technique.

Financial assets at FVTPL. These equity securities are carried at fair value.

Derivative financial instruments. The fair value of forward contracts is calculated by reference to prevailing interest rate differential and spot exchange rate as of valuation date, taking into account its remaining term to maturity. The fair value of the embedded prepayment options is determined using Binomial Option Pricing Model which allows for the specification of points in time until option expiry date. This valuation incorporates inputs such as interest rates and volatility. The fair value of the IRS and interest rate cap are determined by generally accepted valuation techniques with reference to observable market data such as interest rates.

The Group entered into an IRS agreement to fully hedge its floating rate exposure on its foreign currency-denominated loan and par forward contracts to hedge the floating rate exposure on foreign-currency denominated payments.

The Group also entered into deliverable and non-deliverable short-term forward contracts with counterparty banks to manage its foreign currency risks associated with foreign currency-denominated liabilities, purchases and highly probable forecasted purchases.

The Group also entered into commodity swap contracts to hedge the price volatility of its forecasted coal purchases.

IRS

In August 2012, LHC entered into an IRS agreement effective October 31, 2012 to fully hedge its floating rate exposure on its US Dollar-denominated loan. Under the IRS agreement, LHC, on a semi-annual basis, pays a fixed rate of 1.505% per annum and receives variable interest at 6-month LIBOR plus margin. The interest payments and receipts are based on the outstanding USD notional amount simultaneous with the interest payments on the hedged loan. Similar with the hedged loan, the IRS has amortizing notional amounts which cover a period up to final maturity. LHC designated the swap as a cash flow hedge.

As of December 31, 2019, the outstanding notional amount and derivative asset as a result of the swap amounted to \$11.2 million and ₱2.2 million, respectively. As of December 31, 2018, the outstanding notional amount and derivative asset as a result of the swap amounted to \$16.6 million and ₱19.6 million, respectively.

GMCP has an IRS agreement to hedge the variability in the interest cash flows on the entire amount of its Onshore - Tranche B loans. Under the swap agreement, GMCP pays a fixed rate of 4.37% and receives 6-month LIBOR, semi-annually from January 29, 2010 until March 29, 2021. GMCP designated the swap as a cash flow hedge. On September 29, 2017, the IRS agreement was terminated following the prepayment of the loan (see Note 17). As a result of the termination, the outstanding value of the derivative liability amounting to \$4.5 million was derecognized in cumulative translation adjustments.

On September 29, 2017, GMCP entered into an IRS agreement to hedge the variability in the interest cash flows on the entire amount of its LIBOR Loan (see Note 17), which bears interest based on six-month US LIBOR. Under the swap agreement, GMCP pays a fixed rate of 2.18% and receives six-month US LIBOR, semi-annually from March 29, 2018 until September 27, 2024. The IRS settlement dates coincide with the semi-annual interest payment dates of the NFA. GMCP designated the swap as a cash flow hedge.

As of December 31, 2019, the outstanding notional amount and derivative liability as a result of the swap amounted to \$267.5 million and ₱252.3 million, respectively. As of December 31, 2018, the outstanding notional amount and derivative asset as a result of the swap amounted to \$288.5 million and ₱272.2 million, respectively.

In September 2019, the Company entered into an interest rate swap agreement effective September 30, 2019 to hedge \$150 million of its floating rate exposure on its loan (see Note 17). Under the interest rate swap agreement, the Company, on a quarterly basis, pays a fixed rate of 1.449300% per annum and received variable interest at 3-month LIBOR, subject to a floor of 0%. The interest payments and receipts are based on the outstanding USD notional amount simultaneous with the interest payments on the hedged loan. Similar with the hedged loan, the interest rate swap has amortizing notional amounts which cover a period up to April 30, 2024. The Company designated the swap as a cash flow hedge.

As of December 31, 2019, the outstanding notional amount and fair value of the swap amounted to ₱7.60 billion and ₱80.1 million, respectively.

Foreign currency forward contracts

On November 26, 2015, Hedcor Bukidnon entered into a deliverable forward contract to manage its foreign currency risks associated with its Euro denominated purchases. As of December 31, 2018 and 2017, the outstanding sell U.S. Dollar buy Euro forward contract has an aggregate notional of €1.0 million and €2.5 million, respectively. The maturity of the derivatives begins on December 21, 2015 until April 25, 2018.

On November 26, 2015, Hedcor Bukidnon also entered into a non-deliverable forward contract to manage its exposure to exchange rate fluctuations associated with US dollar denominated purchases. As of December 31, 2018 and 2017, the contract has an aggregate notional amount of \$1.2 million and US\$2.6 million, respectively. The contracts were fully settled in January 2019.

Hedcor Bukidnon designated these foreign currency hedging transactions as cash flow hedges.

TLI entered into forward contracts to hedge the foreign currency risk arising from forecasted US dollar denominated coal purchases. These forecasted transactions are highly probable, and they comprise about 20% of the TLI's total expected coal purchases. The forward contracts were designated as cash flow hedges. As of December 31, 2019, the aggregate notional amount of the forward contracts is ₱13.09 billion.

In 2015, TVI entered into par forward contracts to hedge the foreign currency risk arising from the forecasted US Dollar denominated payments under the Engineering Procurement Construction (EPC) contract related to the construction of a power plant. As of December 31, 2019 and 2018, the aggregate notional amount of the par forward contracts is \$16.8 million (₱0.9 billion) and \$25.2 million (₱1.3 billion), respectively.

In 2014, the Group's Joint Operation entered into par forward contracts to hedge the foreign currency risk arising from the forecasted US Dollar denominated payments under the EPC contract related to the construction of a power plant. The par forward contracts were designated as cash flow hedges. As of December 31, 2017, the aggregate notional amount of the par forward contracts is ₱254.3 million, these were fully settled in 2018.

The Company enters into short-term forward contracts with counterparty banks to manage foreign currency risks associated with foreign currency-denominated liabilities and purchases. As of December 31, 2017, the aggregate notional amount of the par forward contract is US\$39.0 million, these were fully settled in 2018.

Commodity swap contracts

In 2018, TLI entered into commodity swap contracts to hedge the price volatility of forecasted coal purchases. The commodity swaps do not result in physical delivery of coal, but are designated as cash flow hedges to offset the effect of price changes in coal. TLI hedges approximately 30% of its expected coal purchases considered to be highly probable. There is an economic relationship between the hedged items and the hedging instruments as the terms of the foreign currency forward and commodity swap contracts match the terms of the expected highly probable forecasted transactions.

There is an economic relationship between the hedged items and the hedging instruments as the terms of the foreign currency forward, IRS and commodity swap contracts match the terms of the expected highly probable foreign currency denominated forecasted purchases and floating rate loans. The Group has established a hedge ration of 1:1 for the hedging relationships as the underlying risk of the foreign currency forward, IRS and commodity swap contracts are identical to the hedged risk components. To test the hedge effectiveness, the Group uses the hypothetical derivative technique and compares the changes in the fair value of the hedging instruments against the changes in fair value of the hedged items attributable to the hedged risks.

The hedge ineffectiveness can arise from:

- Different reference prices linked to the hedged risk of the hedged items and hedging instruments
- Differences in the timing of the cash flows of the hedged items and the hedging instruments
- The counterparties' credit risk differently impacting the fair value movements of the hedging instruments and hedged items
- Changes to the forecasted amount of cash flows of hedged items and hedging instruments

The Group is holding the following hedging instruments designated as cash flow hedges:

December 31, 2019

Derivative liability	(40,311)	(154,829)	(235,351)	(8,141)

The movements in fair value changes of all derivative instruments for the year ended December 31, 2019 and 2018 are as follows:

	2019	2018
At beginning of year	₱132,902	₱294,364
Net changes in fair value of derivatives designated as cash flow hedges	(2,515,732)	(125,642)
Net changes in fair value of derivatives not designated as accounting hedges	(3,889)	(72,252)
Fair value of settled instruments	722	36,432
At end of year	(₱2,385,997)	₱132,902

The net gains and losses from the net fair value changes of derivatives not designated as accounting hedges are included under "Net foreign exchange gain (losses)" in Note 28.

The changes in the fair value of derivatives designated as cash flow hedges were deferred in equity under "Cumulative translation adjustments."

The net movement of changes to Cumulative translation adjustment is as follows:

	2019	2018
Balance at beginning of year (net of tax)	₱261,378	₱139,879
Changes in fair value recorded in equity	(2,495,146)	203,751
	(2,233,768)	343,630
Transfer to construction in progress	-	(77,180)
Changes in fair value transferred to profit or loss	(8,218)	(7,579)
Balance at end of year before deferred tax effect	(2,241,986)	258,871
Deferred tax effect	(15,303)	2,507
Balance at end of year (net of tax)	(₱2,257,289)	₱261,378

Fair Value Hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and
- Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

As of December 31, 2019 and 2018, the Group held the following financial instruments that are measured and carried or disclosed at fair value:

December 31, 2019

	Total	Level 1	Level 2	Level 3
Carried at fair value:				
Derivative assets	₱110,576	₱-	₱110,576	₱-
Derivative liabilities	2,468,324	-	2,468,324	-
Disclosed at fair value:				
Lease liabilities	38,495,450	-	-	38,495,350
Long-term debt - fixed rate	152,786,437	-	-	152,786,437
Long-term obligation on PDS	320,194	-	-	320,194

December 31, 2018

	Total	Level 1	Level 2	Level 3
Carried at fair value:				
Derivative assets	₱292,828	₱-	₱292,828	₱-
Derivative liabilities	159,926	-	159,926	-
Disclosed at fair value:				
Lease liabilities	40,495,647	-	-	40,495,647
Long-term debt - fixed rate	138,103,091	-	-	138,103,091
Long-term obligation on PDS	297,790	-	-	297,790

The fair values of the Group's investment properties were determined as follows:

- In valuing the land, the Group used the Sales Comparison Approach. This is a comparative approach to value that considers the sales of similar or substitute properties and related market data and establishes a value estimate by processes involving comparison.
- The appraiser gathers data on actual sales and/or listings, offers, and renewal options, and identifies the similarities and differences in the data, ranks the data according to their relevance, adjusts the sales prices of the comparable to account for the dissimilarities with the unit being appraised, and forms a conclusion as to the most reasonable and probable market value of the subject property.

The elements of comparison include location, physical characteristics, available utilities, zoning, and highest and best use. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography and location.

Fair value investment properties are estimated under Level 3 inputs.

During the years ended December 31, 2019 and 2018, there were no transfers between level 1 and level 2 fair value measurements and transfers into and out of level 3 fair value measurement

35. Lease Agreements

TLI

TLI was appointed by PSALM as Administrator under the IPP Administration Agreement, giving TLI the right to receive, manage and control the capacity of the power plant for its own account and at its own cost and risk; and the right to receive the transfer of the power plant at the end of the IPP Administration Agreement for no consideration.

In view of the nature of the IPP Administration Agreement, the arrangement has been considered as a finance lease. Accordingly, TLI recognized the capitalized asset and related liability of P44.79 billion (equivalent to the present value of the minimum lease payments using TLI's incremental borrowing rates of 10% and 12% for dollar and peso payments, respectively) in the consolidated financial statements as "Power plant" and "Lease liabilities" accounts, respectively. The discount determined at inception of the IPP Administration Agreement is amortized over the period of the IPP Administration Agreement and is recognized as interest expense in the consolidated statements of income. Interest expense in 2019, 2018 and 2017 amounted to P4.14 billion, P4.66 billion, and P4.76 billion, respectively (see Note 33).

Future minimum monthly dollar and peso payments under the IPP Administration Agreement and their present values as of December 31, 2018 are as follows:

	Dollar payments	Peso equivalent of dollar payments ¹	Peso payments	2018 Total
Within one year	\$90,000	P4,732,200	P4,320,000	P9,052,200
After one year but not more than five years	415,500	21,846,990	19,944,000	41,790,990
More than five years	155,000	8,149,900	7,440,000	15,589,900
Total contractual payments	660,500	34,729,090	31,704,000	66,433,090
Unamortized discount	193,770	9,516,320	10,022,415	19,538,735
Present value	466,730	25,212,770	21,681,585	46,894,355
Less current portion				4,131,059
Noncurrent portion of finance lease obligation				P42,763,296

¹US\$1 = P52.58 in 2018

APRI

On May 25, 2009, APRI entered into a lease agreement with PSALM for a parcel of land owned by the latter on which a portion of the assets purchased under the APA is situated. The lease term is for a period of 25 years commencing from the Closing Date as defined in the APA which falls on May 25, 2009. The rental fees for the whole term of 25 years amounting to P492.0 million were paid in full after the receipt by APRI of the Certificate of Effectivity on the lease (see Notes 8 and 14). Total lease charged to operations amounted to P19.7 million in 2018 and 2017 (see Note 25).

GMCP

In August 2007, a 25-year lease agreement with Authority of the Freeport Area of Bataan for land at Bataan Economic Zone, used as an access road and right of way for electric power transmission lines.

January 2010, a 50-year land lease agreement with PMR Group Retirement Plan, Inc. (PGRPI), used for its power plant facilities. GMCP, upon mutual agreement of PGRPI, has the right and on to extend the lease for a period of twenty-five years. In August 2016, GMCP entered into another lease agreement with PGRPI for land to be used for staff house.

HI, HTI and HSI

HI, HTI and HSI entered into contracts with various lot owners for lease of land where their power plants are located. Terms of contract are for a period of 1 to 50 years renewable upon mutual agreement by the parties.

Sacasun

Sacasun entered into a contract for lease of land where the power plant is located. The contract pertains to rent for 25 years renewable upon mutual agreement by the parties. Prepaid rent amounts to P51.5 million as of December 31, 2018 (see Note 8).

Therma Mobile

On April 26, 2014, a 10-year lease for portions of the breakwater area of the Navotas Fishport Complex (NFPC), including the mooring facility, marine and land transmission lines.

EAUC

Lease agreement with PEZA for a piece of land located inside Mactan Economic Zone for its power plant facilities for a period of 25 years.

TPVI

TPVI entered into a contract for lease of land where the power plant is located. The contract pertains to rent for 25 years renewable upon mutual agreement by the parties. Prepaid rent amounts to P516.0 million as of December 31, 2018. (see Notes 8, 14 and 40e).

Lease Disclosure in Accordance with PAS 17 (applicable prior to January 1, 2019)

Future minimum lease payments under the non-cancellable operating leases of GMCP, Sacasun, HI, HTI, HSI, Therma Mobile, EAUC and TPVI as of December 31, 2018 are as follows (amounts in millions):

Not later than 1 year	P292.9
Later than 1 year but not later than 5 years	749.5
Later than 5 years	6,039.2
	P7,081.6

Total lease charged to operations related to these contracts amounted to P263.5 million in 2018 and P163.7 million in 2017 (see Note 25).

Set out below, are the carrying amounts of the Group's right-of-use assets and lease liabilities and the movements during the period:

Lease Disclosure in Accordance with PFRS 16 (applicable beginning January 1, 2019)

Set out below, are the carrying amounts of the Company's right-of-use assets and lease liabilities and the movements during the year ended December 31, 2019:

	Right-of-use assets				Total	Lease liability
	Land	Building	Power plant	Equipment and others		
As at January 1, as previously stated	P-	P-	P-	P-	P-	P-
Effect of adoption - PFRS 16 (see Note 3)	2,804,819	249,400	34,669,713	116,437	37,840,369	49,190,986
As at January 1, 2019, as restated	2,804,819	249,400	34,669,713	116,437	37,840,369	49,190,986
Additions	24,249	-	-	-	24,249	-
Amortization expense	(98,992)	(19,166)	(1,094,513)	(10,402)	(1,223,073)	-
Interest expense	-	-	-	-	-	4,350,043
Payments	-	-	-	-	-	(7,424,990)
Others	-	-	-	11,567	11,567	(1,326,395)
As at December 31	P2,730,076	P230,234	P33,575,200	P117,602	P36,653,112	P44,789,644

The carrying amount of the Group's right-of-use assets as of December 31, 2019 is presented as part of "Property, plant and equipment".

The Group also has certain leases of equipment, meeting rooms and event sites with lease terms of 12 months or less. The Group applies the 'short-term lease' recognition exemption of these leases.

Set out below, are the amounts recognized in the consolidated statements of income for the year ended December 31, 2019:

Amortization expense of right-of-use assets	₱1,223,073
Interest expense on lease liabilities	4,350,043
Rent expense - short-term leases	58,896
	<u>₱5,632,012</u>

36. Agreements

Pagbilao IPP Administration Agreement

TLI and PSALM executed the IPP Administration Agreement wherein PSALM appointed TLI to manage the 700MW contracted capacity (the "Capacity") of NPC in the coal-fired power plant in Pagbilao, Quezon.

The IPP Administration Agreement includes the following obligations TLI would have to perform until the transfer date of the power plant (or the earlier termination of the IPP Administration Agreement):

- a. Supply and deliver all fuel for the power plant in accordance with the specifications of the original Energy Conservation Agreement (ECA); and
- b. Pay to PSALM the monthly payments (based on the bid) and energy fees (equivalent to the amount paid by NPC to the IPP).

TLI has the following rights, among others, under the IPP Administration Agreement:

- a. The right to receive, manage and control the Capacity of the power plant for its own account and at its own cost and risk;
- b. The right to trade, sell or otherwise deal with the Capacity (whether pursuant to the spot market, bilateral contracts with third parties or otherwise) and contract for or offer related ancillary services, in all cases for its own account and its own risk and cost. Such rights shall carry the rights to receive revenues arising from such activities without obligation to account therefore to PSALM or any third party;
- c. The right to receive the transfer of the power plant at the end of the IPP Administration Agreement (which is technically the end of the ECA) for no consideration; and
- d. The right to receive an assignment of NPC's interest to existing short-term bilateral Power Supply Contract from the effective date of the IPP Administration Agreement the last of which were scheduled to end in November 2011.

In view of the nature of the IPP Administration Agreement, the arrangement has been accounted for as a finance lease (see Note 35).

Agreements with Contractors and Suppliers

- a. APRI total steam supply cost reported as part of "Cost of generated power" amounted to ₱5.01 billion in 2019, ₱5.23 billion in 2018, and ₱4.98 billion in 2017 (see Note 23).

On May 26, 2013, APRI's steam supply contract with Chevron Geothermal Philippines Holdings, Inc. (CGPHI) shifted to a GRSC. The change is due to an existing provision under the government's existing contract with CGPHI when the Tiwi-Makban facilities were bidded out under the former's privatization program. Under the GRSC, the effective steam price of APRI payable to PGPC will be a premium to coal.

To ensure that APRI will continue to remain competitive in the market, a two-month interim agreement supplementing the GRSC was implemented on August 14, 2013 and extended until August 25, 2018. On August 24, 2018, a new contract was signed by the Company and Philippine Geothermal Production Company, Inc. which aims to ensure long-term operations of both parties. The Geothermal Resources Supply and Services Agreement took effect August 26, 2018 and shall continue in effect until October 22, 2034, unless earlier terminated or extended by mutual agreement of the Parties.

- b. Construction of civil and electromechanical works, procurement and installation of solar panels and project management related to the construction of the San Carlos Solar Plant. Total purchase commitments entered into by Sacasun from its contracts amounted nil and P526.7 million as of December 31, 2019 and 2018, respectively. Total payments made for the commitments amounted to \$5.7 million and nil as of December 31, 2019 and 2018.
- c. TLI enters into short-term coal supply agreements. Outstanding coal supply agreements as of December 31, 2019 have aggregate supply amounts of 560,000 MT (equivalent dollar value is estimated to be at \$28.6 million), which are due for delivery from January 2020 to April 2020. Outstanding coal supply agreements as of December 31, 2018 have aggregate supply amounts of 1,840,000 MT (equivalent dollar value is estimated to be at \$210 million), which are due for delivery from January 2019 to December 2019. Terms of payment are by letter of credit where payment is due at sight against presentation of documents, and by telegraphic transfer where payment is due within 7 days from receipt of original invoice.
- d. GMCP has a current Coal Supply Agreement (CSA) with PT Arutmin Indonesia (Seller) for the delivery of coal, which is effective until November 2, 2019. The agreement was extended for two (2) months ending on December 31, 2019. In addition a supply backstop deed was included in the coal supply agreement wherein PT Kaltim Prima Coal (Obligor) irrevocably and unconditionally undertakes for the benefit of GMCP the due and punctual performance of the Seller each and all of their obligations, duties and undertakings pursuant to the CSA, when and such obligations, duties and undertakings shall become due and performable according to the terms of the CSA; provided that the undertaking of the Obligor hereunder shall be limited to 1,000,000 tonnes of substitute coal per delivery year.
- e. PEC enters into EPC contracts with suppliers relating to the construction of the 400MW coal fired power plant. Total EPC contract price for the complete performance of these contracts amount to US\$398.0 million and P7.00 billion. The joint operation has a retention payable amounting to P280.3 million as of December 31, 2019 and 2018, which is presented as part of "Trade and other payables" in the consolidated balance sheets.

37. Registration with the Board of Investments (BOI)

Certain power generation subsidiaries in the Group have been registered with the BOI. The following are the incentives granted by the BOI:

a. ITH for a period of four (4) to seven (7) years, as follows:

Subsidiary/Joint operation	BOI Approval Date	Start of ITH Period	ITH Period
Hedcor Sibulan ³	December 27, 2005	March 1, 2010	7 years
APRI ²	June 19, 2009	June 1, 2009	7 years
GMCP	January 29, 2010	July 1, 2013	6 years
TSI	July 15, 2011	February 1, 2016 ¹	4 years
TVI	August 28, 2012	January 1, 2017 ¹	4 years
Hedcor Tudaya	January 31, 2013	August 1, 2014 ¹	7 years
Hedcor, Inc. ⁵	February 20, 2013	February 1, 2013	7 years
Hedcor Sibulan ⁴	April 23, 2013	September 1, 2014 ¹	7 years
Hedcor Sabangan	October 23, 2013	February 1, 2015 ¹	7 years
Hedcor Bukidnon	January 7, 2015	July 2, 2018 ⁶	7 years
PEC	June 26, 2014	March 7, 2018	6 years
Sacasun	October 26, 2015	Start of commercial operations	7 years

¹ Or actual start of commercial operations, whichever is earlier.

² Expired ITH: APRI - June 2016

³ For Sibulan hydroelectric plants with 1 year extension.

⁴ For Tudaya-1 hydroelectric plant.

⁵ For Irian-1 hydroelectric plant.

⁶ For Manolo-1 hydroelectric plant.

The ITH shall be limited only to sales/revenue generated from the sales of electricity of the power plant and revenues generated from the sales of carbon emission reduction credits.

- b. For the first five (5) years from date of registration, the registrant shall be allowed an additional deduction from taxable income of fifty percent (50) of the wages corresponding to the increment in the number of direct labor for skilled and unskilled workers in the year of availment as against the previous year if the project meets the prescribed ratio of capital equipment to the number of workers set by BOI of US\$10,000 to one worker and provided that this incentive shall not be availed of simultaneously with the ITH.
- c. Employment of foreign nationals may be allowed in supervisory, technical or advisory positions for five (5) years from date of registration.
- d. Importation of consigned equipment for a period of ten (10) years from the date of registration, subject to the posting of re-export bond.
- e. Special realty tax rates on equipment and machinery and tax credit on domestic capital equipment and services.

- f. For APRI, it may qualify to import capital requirement, spare parts and accessories at zero (0%) duty rate from the date of registration to June 16, 2011 pursuant to Executive Order No. 528 and its Implementing Rules and Regulations.

As a requirement for availment of the incentives, the registrant is required to maintain a minimum equity requirement.

As of December 31, 2019 and 2018, the power generation subsidiaries referred to above, which are currently availing the incentives, have complied with the requirements.

38. Notes to Consolidated Statement of Cash Flows

The following are the cash flow movements of the Group's financing liabilities:

December 31, 2019

	Non-cash Changes							December 31, 2019			
	January 1, 2019	Net cash flows	Adoption - PERS 16 (see Note 3)	Effect of	Dividend declaration	Amortized deferred financing costs	Foreign exchange movement		Changes in Fair values	Accrued interest	Others
Current interest-bearing loans and borrowings, excluding obligations under finance leases	₱20,243,964	(₱9,885,204)	₱-	₱-	₱-	₱-	(₱23,340)	₱-	₱-	₱10,386,311	₱20,721,731
Non-current interest-bearing loans and borrowings, excluding obligations under finance leases	149,360,287	30,378,265	-	7,424,990	-	231,245	(1,506,799)	-	-	(10,877,687)	167,585,311

Total liabilities from financing activities										

Others includes the effect of reclassification of noncurrent portion of interest-bearing loans and borrowings

39. Contingencies

The Group is a party to certain proceedings and legal cases with other parties in the normal course of business. The ultimate outcome of these proceedings and legal cases cannot be presently determined. Management, in consultation with its legal counsels, believes that it has substantial legal and factual bases for its positions and is currently of the opinion that the likely outcome of these proceedings and legal cases will not have a material adverse effect on the Group's financial position and operating results. It is possible, however, that the future results of operations could be materially affected by changes in estimates or in the effectiveness of the strategies relating to these proceedings and legal cases.

The Company obtained SBLC and is acting as surety for the benefit of certain associates and joint ventures in connection with loans and credit accommodations. The Company provided SBLC for STEAG, CEDC, SNAP M and SNAP B in the amount of ₱958.3 million in 2019, ₱1.02 billion in 2018 and ₱1.04 billion in 2017 (see Note 32).

40. Other Matters

a. Temporary Restraining Order (TRO) affecting power generation companies trading in WESM

On December 19, 2013, Bayan Muna representatives filed a Petition for Certiorari against the ERC and MERALCO with the Supreme Court (SC). On December 20, 2013, National Association of Electricity Consumers for Reforms filed a Petition for Certiorari and/or Prohibition against MERALCO, ERC and Department of Energy (DOE). These cases raised and questioned, among others, the alleged substantial increase in MERALCO's power rates for the billing period of November 2013, the failure of the ERC to protect consumers from high energy prices and perceived market collusion of the generation companies.

These cases were consolidated by the SC which issued a TRO for a period of 60 days from December 23, 2013 to February 21, 2014, preventing MERALCO from collecting the increase in power rates for the billing period of November 2013. The TRO was subsequently extended for another 60 days ending April 22, 2014 by the SC. Thereafter, the TRO was extended indefinitely.

MERALCO, in turn, filed a counter-petition impleading generation companies supplying power to the WESM. The SC also ordered all the parties in the consolidated cases to file their respective pleadings in response to MERALCO's counter-petition. The SC set the consolidated cases for oral arguments last January 21, 2014, February 4 and 11, 2014. After hearing, all parties were directed to file their comments and/or memorandum. The case is now submitted for resolution.

As a result of the TRO, MERALCO has not been able to fully bill its consumers for the generation costs for the supply month of November 2013; and in turn, it has not been able to fully pay its suppliers of generation costs. As of December 31, 2019, the SC has not lifted the TRO.

b. Imposition of financial penalties on Therma Mobile by PEMC

This case involves an investigation of Therma Mobile in the dispatch of its power barges during the November and December 2013 supply periods. As a result of the MERALCO price hike case brought before the SC, the SC ordered the ERC to investigate anti-competitive behavior and abuse of market power allegedly committed by some WESM participants.

PEMC conducted the investigation under the "Must-Offer" rules of the WESM Rules.

PEMC initially found that Therma Mobile violated the "Must-Offer Rule" during the period under investigation. In its letter dated January 30, 2015, the PEM Board imposed financial penalties amounting to ₱234.9 million on Therma Mobile. According to the PEM Board, the penalties will be collected from Therma Mobile through the WESM settlement process.

Therma Mobile maintains that there is no basis for the PEMC decision. It did not violate the Must-Offer Rule for the period covered, as it was physically impossible for Therma Mobile to transmit more than 100MW to MERALCO. Although Therma Mobile's rated capacity is 234 MW (Net), it could only safely, reliably and consistently deliver 100MW during the November and December 2013 supply period because of transmission constraints. Therma Mobile's engines and transmission lines were still undergoing major repairs to address issues on post rehabilitation.

On February 13, 2015, Therma Mobile filed a notice of dispute with the PEMC to refer the matter to dispute resolution under the WEM Rules and the WESM Dispute Resolution Market Manual.

Therma Mobile also filed a Petition for the Issuance of Interim Measures of Protection with the Regional Trial Court (RTC) of Pasig to hold off enforcement of the payment of the penalties during the pendency of the Therma Mobile and PEMC dispute resolution proceedings. On February 24, 2015, the RTC issued in favor of Therma Mobile an ex parte 20-day Temporary Order of Protection directing PEMC to refrain from (a) demanding and collecting from Therma Mobile the ₱234.9 million financial penalty; (b) charging and accruing interest on the financial penalty; and (c) transmitting the PEMC-ECO investigation report to the ERC.

On April 1, 2015, the RTC granted the prayer for the issuance of Writ of Preliminary Injunction, which ruling was assailed by the PEMC and elevated to the Court of Appeals (CA) via Petition for Review. On December 15, 2015, the CA issued a Decision confirming the RTC's findings. PEMC filed a Motion for Reconsideration, and in compliance with a Resolution of the CA, has filed a comment on the said motion.

On June 6, 2016, PEMC filed a petition before the SC questioning the CA's Decision. TMO also filed its Comment on the Petition on November 14, 2016. On June 1, 2017, TMO received the SC Notice dated March 29, 2017. In the Resolution, the SC noted TMO's Comment and PEMC's Reply. As of December 31, 2019, the petition is still pending resolution with the SC.

c. **Therma Marine Cases**

In 2013, ERC issued Final Approval of various ESAs of Therma Marine with some modifications on ERC's provisionally approved rates which directed both parties to devise a scheme for the refund of the difference between the final and the provisionally approved rates.

On November 25, 2013, ERC issued its order for Therma Marine to refund the amount of P180.0 million to its customers for a period of 6 months with equal installments per month.

On August 27, 2014, ERC issued an order directing NGCP to refund its customers the amount of P12.7 million and the corresponding VAT for a period of twelve months. As such, Therma Marine will refund the said amount to NGCP and the latter will refund the same to its customers. In 2015, ERC issued Provisional Approvals (PA) on ESA contracts extensions with capacity fees lower than the previously approved rates. Therma Marine filed MRs on these PAs. During the last quarter of 2015, ERC issued Final Approvals on some of these ESA's sustaining the decision in the PA's, thus Therma Marine filed MRs on the final decisions. As of December 31, 2019, there is no resolution yet on the MRs on the Final Approvals.

d. **ERC Case No. 2013-077 MC**

On August 29, 2013, MERALCO filed a petition for dispute resolution against TLI/APRI, among other Successor Generating Companies ("SGCs") under ERC Case No. 2013-077 MC. The case arose from a claim of refund of the alleged over charging of transmission line losses pursuant to the ERC Order dated March 4, 2013 and July 1, 2013 in ERC Case No. 2008-083 MC.

On September 20, 2013, TLI, together with the other SGCs, filed a Joint Motion to Dismiss arguing that MERALCO's petition should be dismissed for failure to state a cause of action and ERC's lack of jurisdiction over the subject matter of the case. The SGCs and Meralco have filed their respective comments, reply, rejoinder and sur-rejoinder after the filing of the Joint Motion to Dismiss. The Joint Motion to Dismiss has since then been submitted for resolution with the ERC. As of December 31, 2019, the ERC has yet to render its decision on the Joint Motion to Dismiss.

e. **Sergio Osmena III vs. PSALM, Emmanuel R. Ledesma, Jr., SPC Power Corporation (SPC) & Therma Power Visayas, Inc. (TPVI)**

In 2009, SPC acquired through a negotiated bid the 153.1MW Naga Land-Based Gas Turbine Power Plant ("Naga Plant") in Naga, Cebu. In the same year, it entered into a Land Lease Agreement (LLA) with PSALM, which includes SPC's right to top (RTT) the price of a winning bidder for the sale of any property in the vicinity of the leased premises.

PSALM subsequently bid out the Naga Plant located in the leased premises. On April 30, 2014 and after two failed biddings, PSALM issued a Notice of Award to TPVI for submitting the highest bid for the Naga Plant. SPC wrote PSALM of its intent to exercise its RTT the winning bid, on the condition that the LLA would be for a term of 25 years from closing date.

Senator Sergio Osmeña III filed with the SC a Petition for Certiorari and Prohibition with prayer for issuance of a Temporary Restraining Order and/or Writ of Preliminary Injunction dated June 16, 2014 (the "Case") with PSALM, Emmanuel R. Ledesma, SPC and TPVI as respondents to enjoin PSALM from making the award of the Naga Plant to SPC. In his petition, Sen. Osmeña argued that the RTT should be held invalid as it defeats the purpose of a fair and transparent bidding for a government asset and it discourages interested bidders considering the unfair advantage given to SPC.

On July 25, 2014, PSALM awarded the contract to SPC, despite TPVI's objection on the ground that SPC did not validly exercise its right to top because of its qualified offer. Thereafter, an APA for the Naga Plant was executed between PSALM and SPC.

On September 28, 2015, the SC declared in the Case that the RTT and the APA executed in favor of SPC are null and void. The parties thereafter filed various motions for reconsideration which the SC subsequently denied.

On March 16, 2016, TPVI filed its Manifestation/Motion praying that the Notice of Award dated April 30, 2014 be reinstated and that respondent PSALM be ordered to execute the Asset Purchase Agreement ("NPPC-APA"), Land Lease Agreement ("NPPC-LLA") and other documents to implement TPVI's acquisition of the Naga Plant.

On April 6, 2016, the SC issued a Resolution that required PSALM and SPC to comment on TPVI's Manifestation/Motion. In the same Resolution, the SC denied the motion for leave to file and admit SPC's second motion for reconsideration and referral to the SC en banc.

On July 19, 2016, TPVI filed its Manifestation with Omnibus Motion to clarify the motion dated March 16, 2016 and for early resolution. TPVI prayed that the SC Decision dated

September 28, 2015 be clarified, and if necessary, be amended to include in its "fallo" that the Notice of Award in favor of TPVI be reinstated.

In response to various motions, the SC issued a Notice of Judgment and Resolution dated October 5, 2016 clarifying that the nullification of SPC's right to top did not invalidate the entire bidding process. Thus, the SC ordered the reinstatement of the Notice of Award dated April 30, 2014 in favor of TPVI. Further, the SC annulled and set aside the APA and the LLA executed between SPC and PSALM and directed PSALM to execute with dispatch the NPPC-APA and the NPPC-LLA in favor of TPVI.

On October 26, 2016, SPC filed an Urgent Motion for Reconsideration with Alternative Motion to Refer to the En Banc of the SC. SPC reiterated its prayer for the reversal of the October 5, 2016 Resolution, denial of TPVI's Manifestation/Motion and for the conduct of a new round of bidding for the Naga Plant. PSALM also filed its Motion for Reconsideration with Leave and prayed that the SC's October 5, 2016 Resolution be re-examined and/or reconsidered.

In its Resolution dated November 28, 2016, the SC denied SPC's and PSALM's motions for reconsideration (of the October 5, 2016 Resolution) with finality. The SC ordered that no further pleadings, motions, letters, or other communications shall be entertained in the Case, and it ordered the issuance of Entry of Judgment.

Notwithstanding the above SC Resolution, SPC filed its Motion for Leave to File and Admit (Motion for Reconsideration dated 9 December 2016) with attached Motion for Reconsideration dated December 9, 2016. Thereafter, SPC filed its Supplemental Motion/Petition for Referral to the Banc dated January 16, 2017.

On February 14, 2017, TPVI received a copy of the Entry of Judgment which states that the October 5, 2016 Resolution of the SC has become final and executory on November 28, 2016.

In May 2018, TPVI received the Certificate of Effectivity (COE) from PSALM initiating the purchase of the facility. The COE implements the September 28, 2015 decision of the SC, which upheld the April 30, 2014 award of the facility to TPVI. Pursuant to the NPPC-APA, on July 16, 2018 ("Closing date"), the Joint Certificate of Turn-Over was signed and issued and the facility was formally turned-over to TPVI.

In 2018, TPVI paid a total amount ₱1.03 billion for the NPPC-APA and NPPC-LLA and ₱495.97 million for the inventories upon implementation of the acquisition of the Naga Power Plant.

F. DLP Case

On December 7, 1990, certain customers of DLP filed before the then Energy Regulatory Board (ERB) a letter-petition for recovery claiming that with the SC's decision reducing the sound appraisal value of DLP's properties, DLP exceeded the 12% Return on Rate Base (RORB). The ERB's order dated June 4, 1998, limited the computation coverage of the refund from January 19, 1984 to December 14, 1984. No amount was indicated in the ERB order as this has yet to be recomputed.

The CA, in Court of Appeals General Register Special Proceeding (CA-GR SP) No. 50771, promulgated a decision dated February 23, 2001 which reversed the order of the then ERB, and expanded the computation coverage period from January 19, 1984 to September 18, 1989.

The SC in its decision dated November 30, 2006 per GR150253 reversed the CA's decision CA-GR SP No. 50771 by limiting the period covered for the refund from January 19, 1984 to December 14, 1984, approximately 11 months. The respondent/customers filed a Motion for Reconsideration with the SC, which was denied with finality by the SC in its Order dated July 4, 2007.

The SC, following its decision dated November 30, 2006, ordered the ERC to proceed with the refund proceedings instituted by the respondents with reasonable dispatch.

On March 17, 2010, the ERC directed DLP to submit its proposed scheme in implementing the refund to its customers. In compliance with the order, the DLP filed its compliance stating that DLP cannot propose a scheme for implementing a refund as its computation resulted to no refund.

A clarificatory meeting was held where DLP was ordered to submit its memoranda.

On October 4, 2010, in compliance with the ERC directive, DLP submitted its memoranda reiterating that no refund can be made. After which, no resolution has been received by DLP from the ERC as of December 31, 2019.

g. LHC Franchise Tax Assessment

In 2007, the Provincial Treasurer of Benguet issued a franchise tax assessment against LHC, requiring LHC to pay franchise tax amounting to approximately ₱40.4 million, inclusive of surcharges and penalties covering the years 2002 to 2007. In 2008, LHC has filed for a petition for the annulment of the franchise tax assessment, based primarily on the fact that LHC is not liable for franchise tax because it does not have a franchise to operate the business. Section 6 of R.A. No. 9136 provides that power generation shall not be considered a public utility operation. As such, an entity engaged or which shall engage in power generation and supply of electricity shall not be required to secure a national franchise. Accordingly, no provision has been made in the consolidated financial statements. The case remains pending as of December 31, 2019.

h. EPIRA of 2001

R.A. No. 9136 was signed into law on June 8, 2001 and took effect on June 26, 2001. The law provides for the privatization of NPC and the restructuring of the electric power industry. The IRR were approved by the Joint Congressional Power Commission on February 27, 2002.

R.A. No. 9136 and the IRR impact the industry as a whole. The law also empowers the ERC to enforce rules to encourage competition and penalize anti-competitive behavior.

R.A. No. 9136, the EPIRA, and the covering IRR provides for significant changes in the power sector, which include among others:

- i. The unbundling of the generation, transmission, distribution and supply and other disposable assets of a company, including its contracts with IPPs and electricity rates;
- ii. Creation of a WESM; and
- iii. Open and non-discriminatory access to transmission and distribution systems.

The law also requires public listing of not less than 15% of common shares of generation and distribution companies within 5 years from the effectivity date of the EPIRA. It provides cross ownership restrictions between transmission and generation companies and a cap of 50% of its demand that a distribution utility is allowed to source from an associated company engaged in generation except for contracts entered into prior to the effectivity of the EPIRA.

There are also certain sections of the EPIRA, specifically relating to generation companies, which provide for a cap on the concentration of ownership to only 30% of the installed capacity of the grid and/or 25% of the national installed generating capacity.

i. Retail Competition and Open Access

The EPIRA mandates the implementation of Retail Competition and Open Access (RCOA) subject to the fulfilment of the conditions as provided in the EPIRA. The ERC was tasked under the EPIRA Implementing Rules and Regulations to declare, after due notice and public hearing, the initial

implementation of RCOA. Through the RCOA, eligible customers will have the option to source their electricity from eligible suppliers that have secured Retail Electricity Supplier (RES) licenses from the ERC. End users with a monthly average peak demand of at least 1 Megawatt (MW) for the preceding 12 months are eligible to be contestable customers. The 1 MW qualification would gradually be reduced upon evaluation of the ERC.

In June 2011, after due notice and public hearings, the ERC declared December 26, 2011 as the date to mark the commencement of the full operation of RCOA in Luzon and Visayas. However, due to deficiencies in the rules and guidelines governing the RCOA at that time, the December 26, 2011 commencement date was deferred several times until an interim system commenced on July 26, 2013.

The DOE and ERC have issued and revised several circulars, rules and resolutions on the implementation of the RCOA and the issuance of RES licenses, including a Code of Conduct, Rules on Contestability, and Rules on RES Licensing.

On February 21, 2017, the SC issued a TRO enjoining the DOE and ERC from implementing the following issuances:

1. DOE Circular No. DC-2015-06-0010 or the DOE Circular Providing Policies to Facilitate the Full Implementation of RCOA in the Philippine Electric Power Industry;
2. ERC Resolution No. 5, Series of 2016 or the Rules Governing the Issuance of Licenses to RES and Prescribing the Requirements and Conditions Therefor;
3. ERC Resolution No. 10, Series of 2016 or a Resolution adopting the Revised Rules for Contestability;
4. ERC Resolution No. 11, Series of 2016 or a Resolution Imposing Restrictions on the Operations of DUs and RES in the Competitive Retail Electricity Market; and
5. ERC Resolution No. 28, Series of 2016 or the Revised Timeframe for Mandatory Contestability, Amending Resolution No. 10, Series of 2016, entitled Revised Rules of Contestability.

The TRO effectively enjoined the DOE and the ERC from imposing the mandatory migration of end-users with average monthly peak demand of at least 1MW and 750 kW on 26 February 2017 and 26 June 2017, respectively, and barring Local RESs and DUs from supplying electricity to the Contestable Market.

Due to the TRO, no new or renewed RES licenses were issued by the ERC due to the perceived risk of being declared in contempt by the SC. The renewal of PEI, AEI and AESI's RES licenses remain pending before the ERC. The application for RES licenses of TLI and APRI are likewise pending.

On November 29, 2017, DOE issued Department Circular No. 2017-12-0013, which provides, among other things, for voluntary participation of Contestable Customers in the Retail Market. On the same date, DOE issued Department Circular No. 2017-12-0014, which provides, among other things, the guidelines on the licensing of RES. Both DOE Circulars enjoin the ERC to promote the supporting guidelines to the DOE Circulars. Once the ERC promulgates these rules, approval of RES license applications and renewals can be expected.

j. Renewable Energy Act of 2008

On January 30, 2009, R.A. No. 9513, An Act Promoting the Development, Utilization and Commercialization of Renewable Energy Resources and for Other Purposes, which shall be known as the "Renewable Energy Act of 2008" (the Act), became effective. The Act aims to (a) accelerate the exploration and development of renewable energy resources such as, but not limited to, biomass, solar, wind, hydro, geothermal and ocean energy sources, including hybrid systems, to achieve energy self-reliance, through the adoption of sustainable energy development strategies to reduce the country's dependence on fossil fuels and thereby minimize the country's exposure to price fluctuations in the international markets, the effects of which spiral down to almost all sectors of the economy; (b) increase the utilization of renewable energy by institutionalizing the development of national and local capabilities in the use of renewable energy systems, and promoting its efficient and cost-effective commercial application by providing fiscal and non-fiscal incentives; (c) encourage the development and utilization of renewable energy resources as tools to effectively prevent or reduce harmful emissions and thereby balance the goals of economic growth and development with the protection of health and environment; and (d) establish the necessary infrastructure and mechanism to carry out mandates specified in the Act and other laws.

As provided for in the Act, renewable energy (RE) developers of RE facilities, including hybrid systems, in proportion to and to the extent of the RE component, for both power and non-power applications, as duly certified by the DOE, in consultation with the BOI, shall be entitled to incentives, such as, income tax holiday, duty-free importation of RE machinery, equipment and materials, zero percent VAT rate on sale of power from RE sources, and tax exemption of carbon credits, among others.

k. PSALM deferred adjustment

Deferred Accounting Adjustments (DAA)

The ERC issued a Decision dated March 26, 2012 which granted PSALM DAA pertaining to GRAM and ICERA and in its Order dated June 20, 2017, the ERC authorized PSALM to implement the methodology for the recovery/refund of the approved DAA.

Upon Private Electric Power Operators Association's (PEPOA) motion, the ERC, in an Order dated October 19, 2017, deferred the implementation of the approved DAA pending clarification by the ERC of the queries raised in the motion for clarification.

In its Order dated December 19, 2017, the ERC clarified that the GRAM and ICERA DAA are deferred adjustments, which were incurred by PSALM/NPC in supplying energy during the corresponding period; thus, it should be recovered/refunded by PSALM/NPC to its customers. Hence, the Distribution Utilities (DUs) are not just mere collectors of the said DAA but these are charges that they should pay to NPC/PSALM and charged to their customers as part of their generation charge. In the same Order, the ERC directed the DUs to resume the implementation of the GRAM and ICERA starting the January 2018 billing period.

Automatic Cost Recovery Mechanism (ACRM)

On June 20, 2017, the ERC issued its Decision, authorizing PSALM to recover/refund the True-up Adjustments of Fuel and Purchased Power Costs and Foreign Exchange-Related Costs effective its next billing period.

In an Order dated October 19, 2017, the implementation of the ACRM was deferred to the January 2018 billing period pending the evaluation of the clarifications raised in PEPOA's letter and motion and on 19 December 2017, the Commission issued an Order directing PSALM and the DUS to abide with the clarifications issued by the Commission.

i. CSR Projects

The Group has several CSR projects in 2019, 2018 and 2017 which are presented as part of "General and administrative expenses" (see Note 24).

**INDEPENDENT AUDITOR'S REPORT ON
COMPONENTS OF FINANCIAL SOUNDNESS INDICATORS**

The Board of Directors and Stockholders
Aboitiz Power Corporation
32nd Street, Bonifacio Global City
Taguig City, Metro Manila
Philippines

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of Aboitiz Power Corporation and Subsidiaries as at December 31, 2019 and 2018, and for each of the three years in the period ended December 31, 2019. Our audits were made for the purpose of forming an opinion on the basic financial statements taken as a whole. The Supplementary Schedule on Financial Soundness Indicators, including their definitions, formulas, calculation, and their appropriateness or usefulness to the intended users, are the responsibility of the Company's management. These financial soundness indicators are not measures of operating performance defined by Philippine Financial Reporting Standards (PFRS) and may not be comparable to similarly titled measures presented by other companies. This schedule is presented for the purpose of complying with the Revised Securities Regulation Code Rule 68 issued by the Securities and Exchange Commission, and is not a required part of the basic financial statements prepared in accordance with PFRS. The components of these financial soundness indicators have been traced to the Company's financial statements as at December 31, 2019 and 2018 and for each of the three years in the period ended December 31, 2019 and no material exceptions were noted.

Annex C. Reporting Template

(For additional guidance on how to answer the Topics, organizations may refer to Annex B: Topic Guide)

We are pleased to present, on our 11th year of sustainability reporting, the Aboitiz Power Corporation (AboitizPower) Annual and Sustainability Report (the “2019 Integrated Annual Report”). The theme for 2019 report is “*Guided by Values for a Sustainable Future*” as the Aboitiz Group continues to integrate the principles sustainability in fulfilling our purpose and brand promise: to drive change for a better world by advancing business and communities.

The 2019 Integrated Annual Report provides information on AboitizPower’s financial, operational, governance, social, and environmental performance that are material to its businesses and various stakeholders. This report also provides our progress through various programs guided by the UN Sustainable Development Goals. This report has been prepared in accordance with the GRI Standards: Core Option. GRI Materiality Disclosures Services reviewed that the GRI content index is clearly presented and the references for Disclosures 102-40 to 102-49 align with appropriate sections in the body of the report. The GRI content index is found starting on page 253 of the 2019 Integrated Annual Report.

This report is in compliance with the Securities and Exchange Commission Memorandum Circular No. 4 Series of 2019: “Sustainability Reporting Guidelines for Publicly Listed Companies.”

Kindly refer to the 2019 Integrated Annual Report: Guided by Values for a Sustainable Future, available for downloading at <https://abotizpower.com/investor-relations/latest-annual-report/>

Contextual Information

Name of Organization	Aboitiz Power Corporation
Location of Headquarters	NAC Tower, 32nd Street, Bonifacio Global City, Taguig City, 1643 Philippines
Location of Operations	The locations where the operations of the Aboitiz Group’s businesses are found on pages 200 to 201 of the 2019 Integrated Annual Report.
Report Boundary: Legal entities (e.g. subsidiaries) included in this report*	The reporting scope is found on page 5 of the 2019 Integrated Annual Report.
Business Model, including Primary Activities, Brands, Products, and Services	Kindly refer to pages 6 to 9 of the 2019 Integrated Annual Report.
Reporting Period	January 1, 2019 to December 31, 2019

Highest Ranking Person responsible for this report	Emmanuel V. Rubio President and Chief Executive Officer
--	--

**If you are a holding company, you could have an option whether to report on the holding company only or include the subsidiaries. However, please consider the principle of materiality when defining your report boundary.*

Materiality Process

Explain how you applied the materiality principle (or the materiality process) in identifying your material topics.¹

The discussion on the materiality assessment process can be found on page 5 of the 2019 Integrated Annual Report (About the Report)

Materiality, as defined by the GRI reporting framework, includes topics and disclosures that reflect the Group’s significant economic, environmental, and social impacts, or those that would substantially influence the assessments and decisions of our stakeholders. Our process involved an internal analysis of the importance of a broad list of sustainability issues related to our core businesses of power, banking and financial services, food, infrastructure, land, and our corporate foundations. At the parent company level, we integrated the common material issues that are within the medium-term horizon of our reporting parameters.

We used our stakeholder dialogues and company-wide feedback channels to inform the selection of these material issues, which were discussed and approved by the Aboitiz Group Management Committee as part of the focus areas of our Aboitiz Sustainability Framework.

Supporting references are found on pages 139 (Key Dialogue Channel for Stakeholders) and 252 (Summary of Material Concerns) of the 2019 Integrated Annual Report.

ECONOMIC

Economic Performance

Direct Economic Value Generated and Distributed

AboitizPower’s financial performance is summarized on pages 12 to 13 (Financial Highlights), and discussed on pages 28 to 37 (CFO Message) of the 2019 Integrated Annual Report.

Disclosure	Amount	Units
Direct economic value generated (revenue)		PhP
Direct economic value distributed:		

¹ See [GRI 102-46](#) (2016) for more guidance.

a. Operating costs		PhP
b. Employee wages and benefits		PhP
c. Payments to suppliers, other operating costs		PhP
d. Dividends given to stockholders and interest payments to loan providers		PhP
e. Taxes given to government		PhP
f. Investments to community (e.g. donations, CSR)		PhP

A discussion on management’s approach in addressing material economic indicators are found on pages 130 to 155 of the 2019 Integrated Annual Report (Management Approach)

What is the impact and where does it occur? What is the organization’s involvement in the impact?	Which stakeholders are affected?	Management Approach
<i>Identify the impact and where it occurs (i.e., primary business operations and/or supply chain)</i> <i>Indicate involvement in the impact (i.e., caused by the organization or linked to impacts through its business relationship)</i>	<i>(e.g. employees, community, suppliers, government, vulnerable groups)</i>	<i>What policies, commitments, goals and targets, responsibilities, resources, grievance mechanisms, and/or projects, programs, and initiatives do you have to manage the material topic?</i>
What are the Risk/s Identified?	Which stakeholders are affected?	Management Approach
<i>Identify risk/s related to material topic of the organization</i>		
What are the Opportunity/ies Identified?	Which stakeholders are affected?	Management Approach
<i>Identify the opportunity/ies related to material topic of the organization</i>		

Climate-related risks and opportunities²

A discussion on the Aboitiz Group's Climate-related actions is found on pages 142 and 143, and Climate-related risk management on pages 147 to 152 of the 2019 Integrated Annual Report.

In 2019, the Aboitiz Group embarked on preparatory activities to align with the recommendations of the Task Force on Climate-related Financial Disclosures. In February 2020, the Aboitiz Group officially signed to support TCFD and will further improve our reports in the succeeding year to include climate-related risks and opportunities. Kindly refer to the CFO Message on pages 28 to 35 of the 2019 Integrated Annual Report.

Governance	Strategy	Risk Management	Metrics and Targets
Disclose the organization's governance around climate-related risks and opportunities	Disclose the actual and potential impacts ³ of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning where such information is material	Disclose how the organization identifies, assesses, and manages climate-related risks	Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material
Recommended Disclosures			
a) Describe the board's oversight of climate-related risks and opportunities	a) Describe the climate-related risks and opportunities the organization has identified over the short, medium and long term	a) Describe the organization's processes for identifying and assessing climate-related risks	a) Disclose the metrics used by the organization to assess climate-related risks and opportunities in line with its strategy and risk management process
b) Describe management's role in assessing and managing climate-related risks and opportunities	b) Describe the impact of climate-related risks and opportunities on the organization's businesses,	b) Describe the organization's processes for managing climate-related risks	b) Describe the targets used by the organization to manage climate-related risks and opportunities and

² Adopted from the Recommendations of the Task Force on Climate-Related Financial Disclosures. The TCFD Recommendations apply to non-financial companies and financial-sector organizations, including banks, insurance companies, asset managers and asset owners.

³ For this disclosure, impact refers to the impact of climate-related issues on the company.

	strategy and financial planning.		performance against targets
	c) Describe the resilience of the organization's strategy, taking into consideration different climate-related scenarios including a 2°C or lower scenario	c) Describe how processes for identifying, assessing, and managing climate-related risks are integrated into the organization's overall risk management

Yes No

PART I--FINANCIAL INFORMATION

Item 1. Financial Statements.

Please refer to the financial statements and schedules attached herewith.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of the Company's consolidated financial condition and results of operations should be read in conjunction with the consolidated financial statements and accompanying schedules and disclosures set forth elsewhere in this report.

Key Performance Indicators

Management uses the following indicators to evaluate the performance of the Company and its subsidiaries (the Company and its subsidiaries are hereinafter collectively referred to as the "Group"):

1. **Share in Net Earnings of Associates and Joint Ventures.** This represents the Group's share in the undistributed earnings or losses of its investees for each reporting period subsequent to the acquisition of said investment, net of goodwill impairment cost, if any. It also indicates the profitability of the investment and investees' contribution to the Group's net income.

Goodwill is the difference between the purchase price of an investment and the investor's share in the value of the net identifiable assets of the investee at the date of acquisition.

Manner of Computation:

Investee's Net Income (Loss) x Investor's % ownership - Goodwill Impairment Cost

2. **Earnings before Interest, Taxes, Depreciation, and Amortization (EBITDA).** The Company computes EBITDA as earnings before extraordinary items, net finance expense, income tax provision, depreciation, and amortization. It provides management and investors with a tool for determining the ability of the Group to generate cash from operations to cover financial charges and income taxes. It is also a measure to evaluate the Group's ability to service its debts.
3. **Cash Flow Generated.** Using the Consolidated Statement of Cash Flows, management determines the sources and usage of funds for the period and analyzes how the Group manages its profit and uses its internal and external sources of capital. This aids management in identifying the impact on

cash flow when the Group's activities are in a state of growth or decline, and in evaluating management's efforts to control the impact.

4. **Current Ratio.** Current Ratio is a measurement of liquidity, calculated by dividing total current assets by total current liabilities. It is an indicator of the Group's short-term debt-paying ability. The higher the ratio, the more liquid the Group.
5. **Debt-to-Equity Ratio.** Debt-to-Equity Ratio indicates how leveraged the Group is. It compares assets provided by creditors to assets provided by shareholders. It is determined by dividing total liabilities by stockholders' equity.

The table below shows the comparative figures of the key performance indicators for the three (3) months of 2020 and 2019 and as of December 31, 2019:

Key Performance Indicators	MARCH 2020 (INTERIM)	MARCH 2019 (INTERIM)	DECEMBER 2019
<i>Amounts in thousands of ₱s, except for financial ratios</i>			
SHARE IN NET EARNINGS OF ASSOCIATES AND JOINT VENTURES	464,473	551,130	3,813,962
EBITDA	9,394,497	10,404,355	45,005,022
CASH FLOW GENERATED:			
Net cash flows from operating activities	9,841,030	6,341,341	39,356,962
Net cash flows used in investing activities	(3,999,152)	(976,223)	(34,060,584)
Net cash flows used in financing activities	660,421	(1,553,471)	(14,376,055)
Net (Decrease)/Increase in Cash & Cash Equivalents	6,502,299	3,881,647	(9,079,677)
Cash & Cash Equivalents, Beginning	37,433,929	46,343,041	46,343,041
Cash & Cash Equivalents, End	44,030,335	50,109,442	37,433,929
CURRENT RATIO	1.20		1.50
DEBT-TO-EQUITY RATIO	2.32		2.07

- Share in net earnings in associates and joint ventures for the first quarter of 2020 decreased by 16% compared to the first quarter of 2019. The decrease was mainly due to lower income contributions from SN Aboitiz Power-Benguet, Inc. (SN Aboitiz Power- Benguet), which was primarily driven by a reduction in volume sold due to reduced water levels during the first quarter of 2020 compared to the same period in 2019.
- EBITDA for the first quarter of 2020 decreased by 10%. In the first quarter of 2019, income from the Generation Rate Adjustment Mechanism (GRAM) and Incremental Currency Exchange Rate Adjustment (ICERA) were included. Other contributing factors during the first quarter of 2020 were lower plant availability and lower spot market revenues across the Power Generation Group.
- For the first quarter of 2020, cash and cash equivalents increased by ₱6.60 billion (bn). During same period in 2019, there were higher (i) cash flows used for the AA Thermal, Inc. (AA Thermal) partial acquisition, and (ii) cash flows used to invest in GNPowr Dinginin Ltd. Co. (GNPD) for its on-going power plant construction and the Group's capital expenditures.
- Current Ratio as of March 31, 2020 was at 1.20x as compared to 1.50x as of December 31, 2019. This is due to an increase in current liabilities during the first quarter of 2020, mainly from higher levels of current debt maturities.

- Debt-to-Equity Ratio as of March 31, 2020 was at 2.32x, higher than the 2.07x recorded at the end of 2019.

Results of Operations

Net income for the first quarter of 2020 of ₱2.06 bn, which was 43% lower than the ₱3.63 bn reported for the same period in 2019. This translated to earnings per share of ₱0.28 for the period. The Company recognized non-recurring losses of ₱27 million (mn) during the period, lower than the ₱440 mn in non-recurring losses recorded during the same period last year. Without these one-off losses, core net income for the first quarter of 2020 was ₱2.09 bn, 49% lower year-on-year (YoY). This was mostly due to the decline in EBITDA, coupled with additional taxes from the expiration of the Income Tax Holiday incentives of Therma South, Inc. (TSI) and GN Power Mariveles Coal Plant Ltd. Co. (GMCP), and the additional interest expense from the Parent Company bond and loan that were taken up late last year.

Power Generation and Retail Electricity Supply (RES)

AboitizPower's generation and retail supply business recorded EBITDA of ₱7.40 bn during the first quarter of 2020, 13% lower than the ₱8.60 bn recorded during the corresponding period last year. The variance was primarily due to the EBITDA for the first quarter of 2019 that included one-time income from GRAM and ICERA. AboitizPower's performance during the first quarter of 2020 was also affected by outages in TSI and GMCP, and by lower selling prices. These offset the fresh contributions of Therma Visayas, Inc. (TVI) and the decreased purchased power costs.

Capacity sold for the first quarter of 2020 increased by 17% to 3,445 megawatts (MW) from 2,947 MW in the same period last year.

Power Distribution

For the first quarter of 2020, AboitizPower's distribution business recorded EBITDA of ₱2.10 bn, 12% higher than the ₱1.90 bn recorded during the same period last year. Energy sales increased by 6% to 1,429 gigawatt-hours (GWh) during the first three months of 2020, from 1,343 GWh in the first quarter of 2019. This was driven by higher energy consumption from the Residential and Commercial customer segments and growth in the number of customers from the Industrial segment.

Material Changes in Line Items of Registrant's Statements of Income and Comprehensive Income

Consolidated Statements of Income

Net income attributable to equity holders of the Parent Company decreased by ₱1.57 bn, or 43%. The various movements in line items are shown below to account for the decrease:

Net Income Attributable to Equity Holders of the Parent (January – March 2019)	₱3,625,436
Decrease in operating revenues	(1,944,541)
Decrease in operating expenses	1,741,269
Decrease in interest income	(198,039)
Increase in interest expense	(551,877)
Decrease in share in net earnings of associates and joint ventures	(86,657)
Decrease in other income	(842,447)
Lower provision for taxes	140,143
Decrease in income attributable to non-controlling interests	176,467
Total	(1,565,683)
Net Income Attributable to Equity Holders of the Parent (January – March 2020)	₱2,059,753

Operating Revenues

(7% decrease from ₱29.82 bn to ₱27.88 bn)

The decrease in operating revenues was primarily due to the extended outage of TSI Unit 2, lower indices, and lower spot prices. Forced outages for the first quarter of 2020 were primarily from TSI Unit 2, which is expected to return to service on May 22, 2020 after the plant's reliability run. These decreases were partly offset by higher electricity sales from the Company's distribution utilities.

Operating Expenses

(7% decrease from ₱23.57 bn to ₱21.83 bn)

The decrease in operating expenses was mainly due to lower cost of purchased power and cost of generated power during the first quarter of 2020. During the same period in 2019, the Company bought replacement power at higher spot market prices due to contracting in advance for incoming capacities and outages of AP Renewables Inc. (APRI) and Pagbilao Energy Corporation (PEC).

Interest Income

(46% decrease from ₱430 mn to ₱232 mn)

Interest income during the first quarter of 2019 was higher compared to the same period in 2020 primarily due to the Parent Company's higher cash investments and higher interest income from TSI, Hedcor Bukidnon, Inc., and PEC.

Interest Expense and other financing costs

(17% increase from ₱3.21 bn to ₱3.76 bn)

Interest expense increased in the first quarter of 2020 compared to the same period last year due to interest and financing costs on AboitizPower's ₱7.25 bn retail bonds issued in October 2019 and the recognition of interest expense from TVI's project loans. The proceeds from the October 2019 bond offering were used to pay for short-term borrowings.

Share in Net Earnings of Associates and Joint Ventures

(16% decrease from ₱551 mn to ₱464 mn)

Share in net earnings in associates and joint ventures for the first quarter of 2020 decreased by 16% compared to the first quarter of 2019. The decrease was mainly due to lower income contributions from SN Aboitiz Power-Benguet. SN Aboitiz Power-Benguet lower income contribution was primarily driven by a reduction in volume sold due to reduced water levels during the first half of 2020 compared to the same period in 2019

Other Income (Expenses) – net

(83% decrease from ₱1.01 bn to ₱172 mn other income)

The decrease in other income was mainly due to lower unrealized foreign exchange and derivative losses mostly from dollar-denominated assets and liabilities.

Provision for Taxes

(18% decrease from ₱781 mn to ₱641 mn)

The decrease was due to lower taxable and higher net deferred tax benefit recognized during the first quarter of 2020 compared to the same period in 2019, which offset the additional taxes from the expiration of the Income Tax Holiday incentives of TSI and GMCP.

Changes in Registrant's Resources, Liabilities and Shareholders' Equity

Assets

Total assets (as of March 31, 2020 compared to December 31, 2019) increased by ₱8.19 bn, or 2%. The major movements of the accounts leading to the increase were as follows:

- a) Cash and cash equivalents increased by ₱6.60 bn, or 18% (from ₱37.43 bn to ₱44.03 bn). During the first quarter of 2019 there were higher (i) cash flows used for the AA Thermal partial acquisition, and (ii) cash flows used to invest into GNPD for its on-going power plant construction and the Group's capital expenditures. This was partially offset by proceeds from short term loans.
- b) Inventories increased by ₱593 mn or 9% (from ₱6.63 bn to ₱7.23 bn) mainly driven by an increase in Coal inventory.
- c) Other current assets increased by ₱977 mn, or 9% (from ₱11.08 bn to ₱12.06 bn) mainly driven by an increase in input VAT and prepaid expenses. This was partially offset by a decrease in restricted cash of TSI being held as cash reserves in compliance with its covenants on its project debt.
- d) Property, plant and equipment decreased slightly (from ₱210 bn to ₱208 bn) mainly due depreciation of existing assets.
- e) Financial assets at fair value through profit or loss increased by 135% (from ₱4 mn to ₱9 mn) mainly due mark to market valuations.
- f) Deferred income tax assets increased by ₱414 mn, or 15% (from ₱2.79 bn to ₱3.20 bn) mainly due to the deferred tax benefits recognized by Therma Mobile, Inc. on its net operating loss and Therma Luzon, Inc. (TLI) on its unrealized forex loss.

Liabilities

Compared to December 31, 2019, total liabilities as of March 31, 2020 increased by ₱15.65 bn, or 6%. The major movements of accounts leading to the increase were as follows:

- a) Short-term loans increased by ₱10.70 bn, or 103% (from ₱10.34 bn to ₱21.03 bn), mainly due to new loans availed by the Parent Company, Visayan Electric Company, Inc., and Davao Light & Power Company, Inc. for working capital purposes.
- b) Trade and other payables increased by ₱8.03 bn, or 36% due to the Dividends payable declared during the first quarter of 2020. These dividends were paid on April 3, 2020.
- c) Income tax payable increased by ₱855 mn, or 168%, mainly from a higher provision for taxes at the Company's Distribution Utilities, Adventenergy, Inc., and expiration of the Income Tax Holiday incentives of TSI and GMCP.
- d) Long-term debt (current and non-current portions) decreased by ₱3.30 bn (from ₱177.97 bn to ₱174.67 bn) mainly due to principal payments made on existing loans of GMCP, TVI, APRI, Hedcor Bukidnon, and Hedcor, Inc.
- e) Net Derivative liabilities (current and non-current portions) went up by ₱374 mn, primarily due to fair value changes on GMCP's interest rate swaps.
- f) Lease liabilities (current and noncurrent portions) decreased by ₱1.05 bn (from ₱44.79 bn to ₱43.74 bn), as TLI made timely payments on its obligation to Power Sector Assets and Liabilities Management Corporation (PSALM).

Equity

Equity attributable to equity shareholders of the Parent Company decreased by 5% (from ₱125.54 bn at the end of 2019 to ₱118.78 bn as of March 31, 2020) after the declaration of dividends in March 2020, net of comprehensive income recognized during the first quarter of 2020. Cumulative translation adjustments increased by ₱214 mn, due to (i) downward effect of changes in the fair value of foreign currency forward and commodity swap contracts designated as cash flow hedges, and (ii) translation effect of GMCP and Luzon Hydro Corporation (LHC) for the period.

Material Changes in Liquidity and Cash Reserves of Registrant

The Group continues to realize a significant amount of cash generated from operations, which brought in ₱9.84 bn in the first three months of 2020, a ₱3.50 bn or 55% increase compared to the same period last year. The increase in operating cash flows was due to lower working capital requirements and lower taxes paid during the first quarter of 2020.

Net cash flows used in investing activities increased to ₱4.0 bn in the first quarter of 2020 from ₱976 mn for the same period last year. The increase in cash outflow was mainly due to funding for the GNPD construction of power plant.

The net cash flows from financing activities amounting to ₱660 mn is higher than the same period last year mainly due to higher short-term loan availments.

As of March 31, 2020, the Group's cash and cash equivalents increased by 18% to ₱44.03 bn, from ₱37.43 bn as of December 31, 2019.

Financial Ratios

Current assets increased by 10% and current liabilities increased by 38%. The current ratio as of March 31, 2020 was at 1.20x compared to 1.50x as of December 31, 2020.

Consolidated debt to equity ratio as of March 31, 2020 was at 2.32x, higher than the 2.07x recorded at the end of 2019. The change is mainly due to the 6% increase in total liabilities bolstered by the 6% decrease in equity during the first quarter of 2020.

Outlook for the Upcoming Year/ Known Trends, Events, and Uncertainties which may have Material Impact on the Registrant

AboitizPower is focused on addressing the needs of its markets, namely: (1) reliable supply, at a (2) reasonable cost, and with (3) minimal impact on the environment and communities. The Company believes that there is no single technology that completely addresses the country's energy requirements; and that to address the deficiency, a mix of power generation technologies is necessary. Thus, AboitizPower continues to pursue both renewable projects and thermal technologies where and when it makes sense.

Despite increased competition in the power generation market, the Company believes that it has built the foundation to sustain its long term growth, as seen in its pipeline of new power generation projects (Naga Power Plant Complex project and GNPower Dinginin project).

For the Naga Power Plant Complex Project in Cebu, the six diesel engine units passed the grid compliance tests of the National Grid Corporation of the Philippines and were successfully rehabilitated in January 2020. The units have demonstrated a combined net capacity of 39 MW. The issuance of a Certificate of Compliance (CoC) and a Provisional Authority to Operate (PAO) are both pending from the Energy Regulatory Commission (ERC). The plant is expected to go into commercial operations once either a PAO or a final CoC is obtained.

The GNPowr Dinginin project is in the final stages of construction but continues to face numerous challenges due to the COVID-19 pandemic and the imposition of the travel ban on China. Construction has slowed down because of the preventive measures taken to ensure the safety of workers on-site. As previously disclosed, the travel ban prevented the return of a number of its EPC Contractor's workers from their Lunar New Year holiday, as well as the arrival of technicians critical to the commissioning of Unit 1. As a result, commissioning works are ongoing only in areas where the presence of technical field assistants from China is not required. Due to these circumstances, Unit 1 is now expected to synchronize and earn commissioning revenues by the fourth quarter of 2020 and to commence commercial operations by the first quarter of 2021. On the other hand, Unit 2 is expected to synchronize and earn commissioning revenues by the first quarter of 2021 and to commence commercial operations by the second quarter of 2021.

By 2020, is on track to meet its 2020 target of 4,000 MW net attributable capacity. By year end, AboitizPower will own 4,432 MW of attributable capacity, with the entry of GNPD, both units of which are under construction.

AboitizPower is committed to growing its attributable capacity to 9,300 MW by 2029, which it expects will be sourced from a portfolio of renewables and selective baseload builds. In terms of renewable energy, the Company aims to maximize opportunities from the implementation of the Renewable Portfolio Standards (RPS) by the Department of Energy (DOE) starting this year. In line with DOE's aspirational goal of a 35% share in renewable energy utilization by 2030, RPS is a market-based policy that mandates power distribution utilities, electric cooperatives, and retail electricity suppliers to source an agreed portion of their energy supplies from renewable energy facilities. The Company will continue to pursue its international aspirations with a continued focus on renewable energy projects in the ASEAN region. With all of these combined, it is expected that the Company's portfolio ratio will be close to a 50:50 Cleanergy (renewable energy) and thermal capacity mix by the end of the current decade.

AboitizPower believes that it is well-positioned to take advantage of opportunities arising from developments in the power industry. The Company expects its financial condition to give it the agility to create or acquire additional generating capacity over the next few years.

AboitizPower, together with its partners, had initially budgeted ₱41 bn in capital expenditures for 2020 but is currently reviewing its capex program for the year in order to take into consideration the impact of COVID-19.

Despite the challenges posed by the global pandemic and the unusual business situation, the Company continues to operate with its business continuity plans in force, in accordance with the protocols and guidelines of the government's community quarantine. The Company will continue to provide the country with the much-needed power supply for the hospitals, government institutions, and critical businesses, while ensuring the safety of its teams, partners, and communities.

Other known trends, events, uncertainties which may have a material impact on AboitizPower have been discussed extensively in sections of the Company's Information Statement (e.g. for an extensive discussion on regulatory issues, see Effects of Existing or Probable Government Regulations on the Business on page 80 of the Company's 2020 Definitive Information Statement.

PART II--OTHER INFORMATION

There are no significant information on the company which requires disclosure herein and/or were not included in SEC Form 17-C.

ABOITIZ POWER CORPORATION AND SUBSIDIARIES

UNAUDITED INTERIM CONDENSED NOTES TO FINANCIAL STATEMENTS

(Amounts in Thousands, Except Earnings per Share and Exchange Rate Data and When Otherwise Indicated)

1. Corporate Information

Aboitiz Power Corporation (the Company) was incorporated in the Philippines and registered with the Securities and Exchange Commission on February 13, 1998. The Company is a publicly-listed holding company of the entities engaged in power generation and power distribution in the Aboitiz Group. As of March 31, 2020, Aboitiz Equity Ventures, Inc. (AEV, also incorporated in the Philippines) owns 76.98% of the Company. The ultimate parent of the Company is Aboitiz & Company, Inc. (ACO).

On March 6, 2020 and April 27, 2020, the Company's Board of Directors (BOD) and stockholders, respectively, approved the amendments of the Company's primary purpose to include the power to act as guarantor or surety for the loans and obligations of its affiliates and associates.

The registered office address of the Company is 32nd street, Bonifacio Global City, Taguig City, Metro Manila.

2. Group Information

The unaudited interim condensed consolidated financial statements comprise the financial statements of the Company, subsidiaries controlled by the Company and joint operation that are subject to joint control (collectively referred to as "the Group").

The following are the subsidiaries as of March 31, 2020 and December 31, 2019:

3. Basis of Financial Statement Preparation and Changes in Accounting Policies

Basis of Financial Statement Preparation

The accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with Philippine Accounting Standard (PAS) 34, *Interim Financial Reporting*. Accordingly, the unaudited interim condensed consolidated financial statements do not include all of the information and disclosures required in the annual audited consolidated financial statements, and should be read in conjunction with the Group's annual audited consolidated financial statements as of and for the year ended December 31, 2019, which have been prepared in accordance with Philippine Financial Reporting Standards (PFRSs).

The unaudited interim condensed consolidated financial statements of the Group are presented in Philippine peso, the Company's functional currency, and rounded to the nearest thousands except for earnings per share and exchange rates and when otherwise indicated.

On April 29, 2020, the Audit Committee of the BOD approved and authorized the release of the accompanying unaudited interim condensed consolidated financial statements of the Group.

Changes in Accounting Policies

The accounting policies adopted are consistent with those of the previous financial year, except for the new and revised standards and Philippine Interpretations which were applied starting January 1, 2020. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

- Amendments to PFRS 3, *Definition of a Business*

The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

These amendments will apply on future business combinations of the Group.

- Amendments to PAS 1, *Presentation of Financial Statements*, and PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material*

The amendments refine the definition of material in PAS 1 and align the definitions used across PFRSs and other pronouncements. They are intended to improve the understanding of the existing requirements rather than to significantly impact an entity's materiality judgements.

These amendments did not have an impact in the unaudited interim condensed consolidated financial statements as the Group's practice is generally aligned with the amendments.

Effective beginning on or after January 1, 2021

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The adoption of the new standard is not expected to have an impact on the unaudited interim condensed consolidated financial statements of the Group as the Group is not into the business of providing insurance contracts.

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3, *Business Combinations*. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

4. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the Group's unaudited interim condensed consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosures of contingent liabilities. However, uncertainty about these assumptions could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in the future periods.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Judgments, key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting period are consistent with those applied in the most recent annual audited consolidated financial statements.

5. Cash and Cash Equivalents

	March 31, 2020	December 31, 2019
Cash on hand and in banks	₱14,775,879	₱14,177,919
Short-term deposits	29,254,456	23,256,010
	₱44,030,335	₱37,433,929

Cash in banks earn interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods depending on the immediate cash requirements of the Group and earn interest at the respective short-term deposits rates. Interest income earned from cash and cash equivalents amounted to ₱232.18 million and ₱430.22 million for the periods ended March 31, 2020 and 2019, respectively.

6. Trade and Other Receivables

	March 31, 2020	December 31, 2019
Trade receivables - net of allowance for expected credit losses	₱13,673,565	₱12,958,429
Others:		
Dividends receivable	748,000	1,199,068
Advances to contractors	199,903	63,339
Accrued revenue	2,893,999	3,462,523
Non-trade receivable	2,943,898	2,450,311
Interest receivable	52,634	48,666
Power Sector Assets and Liabilities Management (PSALM) Corporation deferred adjustment	1,042,861	1,042,861
Others	51,742	522,225
	₱21,606,602	₱21,747,422

Trade and other receivables are non-interest bearing and are generally on 10 - 30 days' term.

Advances to contractors refer to non-interest bearing advance payments made for project mobilization which are offset against progress billings to be made by the contractors.

Accrued revenue relates to accrual of power sales of the Power Generation segment.

Non-trade receivable relates mostly to advances to partners in GMCP which are subject to offset against any cash dividends declared by GMCP and due to the partners.

7. Other Current Assets

	March 31, 2020	December 31, 2019
Restricted cash	₱3,394,456	₱4,449,716
Input VAT	3,237,362	2,049,496
Prepaid tax	1,758,651	1,854,792
Advances to National Grid Corporation of the Philippines (NGCP)	2,132,100	1,727,028
Prepaid expenses	1,444,545	610,426
Others	106,526	391,947
	₱12,073,640	₱11,083,405

Restricted cash represents proceeds from sale of power under the control of trustees of TSI's lenders as per loan agreement. The asset will be used to pay the current portion of loans payable and interest payments in the following period.

Advances to NGCP pertain to the cost of construction and installation of substation and transmission facilities which are subject for reimbursement after completion of the project.

Prepaid expenses mainly include prepayments for insurance.

8. Investments and Advances

	March 31, 2020	December 31, 2019
Acquisition cost:		
Balance at beginning of the period	₱58,144,997	₱30,559,245
Additions during the period	1,270,873	27,591,092
Redemptions during the period	–	(5,340)
Balance at end of period	59,415,870	58,144,997
Accumulated equity in net earnings:		
Balance at beginning of the period	3,345,164	3,867,849
Share in net earnings	464,473	3,813,962
Transition adjustment	–	(18,691)
Dividends received or receivable	(23,299)	(4,317,956)
Balance at end of period	3,786,338	3,345,164
Share in net unrealized valuation gains on FVOCI investment of an associate	101,727	101,727
Share in actuarial losses on defined benefit plans of associates and joint ventures	(13,598)	(14,299)
Share in cumulative translation adjustments of associates and joint ventures	(113,798)	(153,485)
	63,176,539	61,424,104
Less allowance for impairment losses	568,125	568,125
Investments at equity	62,608,414	60,855,979
Advances	38,351	22,562
	₱62,646,765	₱60,878,541

2020

In 2020, the Group, through TPI and ATI, made capital contributions to GNPD amounting to ₱1.27 billion.

The Group's associates and joint ventures and the corresponding equity ownership as of March 31, 2020 are as follows:

	Nature of Business	Percentage of ownership
Manila-Oslo Renewable Enterprise, Inc. (MORE) ¹	Holding company	83.33
GNPower Dinginin Ltd. Co. (GNPD) ^{1, *}	Power generation	72.50
Hijos de F. Escaño, Inc. (Hijos)	Holding company	46.73
Mazaraty Energy Corporation (MEC)	Retail Electricity Supplier	44.87
San Fernando Electric Light & Power Co., Inc. (SFELAPCO)	Power distribution	43.78
AA Thermal, Inc. (ATI) ²	Holding company	60.00
Pampanga Energy Ventures, Inc. (PEVI)	Holding company	42.84
La Filipina Elektrika, Inc.*	Power generation	40.00
STEAG State Power, Inc. (STEAG)	Power generation	34.00
AEV Aviation, Inc. (AAI)	Service	26.69
Cebu Energy Development Corporation (CEDC)	Power generation	26.40
Redondo Peninsula Energy, Inc. (RPEI)*	Power generation	25.00
Southern Philippines Power Corporation (SPPC)	Power generation	20.00
Western Mindanao Power Corporation (WMPC)	Power generation	20.00

¹Joint ventures.

²Economic interest.

*No commercial operations as of March 31, 2020.

The principal place of business and country of incorporation of the Group's associates and joint venture are in the Philippines.

The carrying values of investments, which are accounted for under the equity method follow:

	March 31, 2020	December 31, 2019
ATI	₱24,319,097	₱24,084,947
GNPD	18,119,789	17,172,530
MORE	10,445,492	10,180,552
STEAG	4,088,660	4,032,405
CEDC	3,640,760	3,447,491
RPEI	525,298	525,769
PEVI	543,454	508,895
SFELAPCO	379,469	372,917
Hijos	176,037	176,037
WMPC	161,747	142,577
SPPC	58,180	61,497
Others	150,431	150,362
	₱62,608,414	₱60,855,979

9. Joint Operation

Name of Joint Operation	Nature of Business	Percentage of Ownership
		March 31, 2020
Pagbilao Energy Corporation (PEC)	Power generation	50.00

**PEC's principal place of business and country of incorporation is the Philippines.*

The financial and operating activities of the operation are jointly controlled by the participating shareholders and are primarily designed for the provision of output to the shareholders.

The Group's share of assets, liabilities, revenue, expenses and cash flows of joint operations are included in the unaudited interim condensed consolidated financial statements on a line-by-line basis.

10. Intangible AssetsMarch 31, 2020

	Goodwill	Service concession rights	Franchise	Project development costs	Customer contracts	Software and licenses	Total
Cost:							
Balances at beginning of period	₱40,876,082	₱5,456,916	₱3,078,431	₱622,491	₱60,068	₱468,123	₱50,562,111

11. Trade and Other Payables

	March 31, 2020	December 31, 2019
Trade payables	₱9,509,396	₱9,947,733
Output VAT	4,200,266	3,022,048
Amounts due to contractors and other third parties	1,129,330	1,159,984
PSALM deferred adjustment	1,042,861	1,042,861
Accrued expenses:		
Interest	1,578,414	2,350,811
Materials and supplies cost	66,067	470,588
Taxes and fees	1,027,995	1,246,863
Energy fees and fuel purchase	988,722	937,988
Claims conversion costs	108,317	102,808
Insurance	41,101	18,437
Dividends payable (Note 22)	8,778,129	94,976
Unearned revenues	37,290	37,425
Customers' deposit	44,050	19,360
Nontrade	1,563,633	1,270,946
Others	293,080	653,292
	₱30,408,651	₱22,376,120

Trade payables are non-interest bearing and generally on 30-day terms.

Accrued taxes and fees represent accrual of real property tax, transfer tax and other fees.

Amounts due to contractors and other third parties include liabilities arising from the power plant construction.

Nontrade payables include amounts due to PSALM pertaining to Generation Rate Adjustment Mechanism (GRAM), Incremental Currency Exchange Rate Adjustment (ICERA), and Universal Charges.

Others include withholding taxes and other accrued expenses and are generally payable within 12 months from the balance sheet date.

12. Short-term Loans

		March 31, 2020	December 31, 2019
Peso loans - financial institutions - unsecured	2.00% - 4.92% in 2020 2.68% - 4.95% in 2019	₱20,395,400	₱9,727,800
Temporary advances		636,034	607,620
		₱21,031,434	₱10,335,420

The bank loans are unsecured short-term notes payable obtained from local banks. These loans are covered by the respective borrower's existing credit lines with the banks and are not subject to any significant covenants and warranties.

13. Long-term Debts

	2020 Interest Rate	March 31, 2020	December 31, 2019
Company (see Note 14):			
Bonds due 2024	7.51%	₱7,700,000	₱7,700,000
Bonds due 2026	5.28%	7,250,000	7,250,000

		₱164,109,323	₱167,585,311

Loan covenants

The loan agreements on long-term debt of the Group provide for certain restriction with respect to, among others, mergers or consolidations or other material changes in their ownership, corporate set-up or management, investment and guaranties, incurrence of additional debt, disposition of mortgage of assets, payment of dividends, and maintenance of financial ratios at certain levels.

These restrictions and requirements were complied with by the Group as of March 31, 2020 and December 31, 2019.

14. Debt Securities

The Company registered and issued ₱10 billion worth of peso denominated fixed rate retail bonds on September 10, 2014.

On July 3, 2017, the Company issued the first tranche on the ₱30 billion bonds registered in June 2017.

In October 2018, the Company issued and registered a total of ₱10.20 billion bonds.

In October 2019, the Company issued and registered a total of ₱7.25 billion bonds.

Terms of the bonds are as follows:

Maturity	Interest Rate (p.a.)	Amount
12-year bonds to mature on September 10, 2026	6.10%	₱3,400,000
10-year bonds to mature on September 10, 2021	5.21%	6,600,000
10-year bonds to mature on July 3, 2027	5.3367%	3,000,000
5.25-year bonds to mature on January 25, 2024	7.51%	7,700,000
7-year bonds to mature on October 25, 2025	8.51%	2,500,000
7-year bonds to mature on October 14, 2026	5.28%	7,250,000

15. Operating Expenses

	For the periods ended March 31	
	2020	2019
		(As restated)
Cost of purchased power	₱9,116,234	₱9,299,905
Cost of generated power	6,531,641	8,335,634
Depreciation and amortization	2,610,960	2,150,501
Operations and maintenance	1,965,535	2,399,173
General and administrative	1,602,484	1,382,910
	₱21,826,854	₱23,568,123

16. Other Income (Expenses)

	For the periods ended March 31	
	2020	2019
Surcharges	₱113,642	₱123,598
Non-utility operating income	86,669	73,374
Rental income	7,154	24,684
Net foreign exchange losses	(49,913)	(161,182)
Losses on disposal of property, plant and equipment	(47,524)	(273,029)
Others – net	62,302	1,227,334
	₱172,330	₱1,014,779

Included in “Net foreign exchange losses” are the net gains and losses relating to currency forward transactions.

“Others” include other non-recurring items like sale of scrap and sludge oil in 2020 and reversal of APRI and TLI’s liability to PSALM pertaining to GRAM and ICERA in 2019.

17. Earnings Per Common Share

Earnings per common share amounts were computed as follows:

	For the periods ended March 31	
	2020	2019
a. Net income attributable to equity holders of the parent	₱2,059,753	₱3,625,436
b. Average number of outstanding shares	7,358,604,307	7,358,604,307
Earnings per share (a/b)	₱0.28	₱0.49

There are no dilutive potential common shares as of March 31, 2020 and 2019.

18. Operating Segment Information

Operating segments are components of the Group that engage in business activities from which they may earn revenues and incur expenses, whose operating results are regularly reviewed by the Group’s Chief Operating Decision Maker (CODM) to make decisions about how resources are to be allocated to the segment and assess their performances, and for which discrete financial information is available.

For purposes of management reporting, the Group’s operating businesses are organized and managed separately according to services provided, with each segment representing a strategic business segment. The Group’s identified operating segments, which are consistent with the segments reported to the BOD, which is the Group’s CODM, are as follows:

- “Power Generation” segment, which is engaged in the generation and supply of power to various customers under power supply contracts, ancillary service procurement agreements and for trading in WESM;

- “Power Distribution” segment, which is engaged in the distribution and sale of electricity to the end-users; and
- “Parent Company and Others”, which includes the operations of the Company, retail electricity sales to various off takers that are considered to be eligible contestable customers and electricity related services of the Group such as installation of electrical equipment.

The power generation segment's revenue from contracts with customers is mainly from power supply contracts. Set out below is the disaggregation of the Group's revenue from contracts with customers:

January - March 2020

	Power Generation	Power Distribution	Parent and Others	Total
Revenue from power supply contracts	₱3,713,512	₱–	₱–	₱3,713,512
Revenue from distribution services	–	10,905,702	–	10,905,702
Revenue from retail electricity sales	–	–	4,135,637	4,135,637
Revenue from non-power supply contracts	9,111,632	–	–	9,111,632
Revenue from technical and management services	–	–	9,667	9,667
	₱12,825,144	₱10,905,702	₱4,145,304	₱27,876,150

January - March 2019

(As amended)

	Power Generation	Power Distribution	Parent and Others	Total
Revenue from power supply contracts	₱12,065,957	₱–	₱–	₱12,065,957
Revenue from distribution services	–	10,612,737	–	10,612,737
Revenue from retail electricity sales	–	–	5,301,548	5,301,548
Revenue from non-power supply contracts	1,805,592	–	–	1,805,592
Revenue from technical and management services	–	–	34,857	34,857
	₱13,871,549	₱10,612,737	₱5,336,405	₱29,820,691

The revenue from contracts with customers is consistent with the revenue with external customers presented in Segment information.

The Group has only one geographical segment as all of its assets are located in the Philippines. The Group operates and derives principally all of its revenue from domestic operations. Thus, geographical business information is not required.

Management monitors the operating results of its segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment revenue and segment expenses are measured in accordance with PFRS. The presentation and classification of segment revenue and segment expenses are consistent with the interim unaudited condensed consolidated statements of income. Interest expense and other financing costs, depreciation and amortization expense and income taxes are managed on a per segment basis.

The Group has inter-segment revenues in the form of management fees as well as inter-segment sales of electricity which are eliminated in consolidation. The transfers are accounted for at competitive market prices on an arm's-length transaction basis.

Segment assets do not include deferred income tax assets, pension asset and other noncurrent assets. Segment liabilities do not include deferred income tax liabilities, income tax payable and pension liability. Capital expenditures consist of additions of property, plant and equipment and intangible asset - service concession rights. Adjustments as shown below include items not presented as part of segment assets and liabilities.

Financial information on the operations of the various business segments are summarized as follows:

March 31, 2020

	Power Generation	Power Distribution	Parent Company/ Others	Eliminations and Adjustments	Consolidated

19. Financial Risk Management Objectives and Policies

The Group's principal financial instruments comprise cash and cash equivalents and long-term debts. The main purpose of these financial instruments is to raise finances for the Group's operations. The Group has various other financial instruments such as trade and other receivables, investments in equity securities, short-term loans, trade and other payables, lease liabilities, long-term obligation on power distribution system (PDS) and customers' deposits, which generally arise directly from its operations.

The Group also enters into derivative transactions, particularly foreign currency forwards, to economically hedge its foreign currency risk from foreign currency denominated liabilities and purchases.

Risk Management Structure

The BOD is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Group.

Financial risk committee

The Financial Risk Committee has the overall responsibility for the development of risk strategies, principles, frameworks, policies and limits. It establishes a forum of discussion of the Group's approach to risk issues in order to make relevant decisions.

Treasury service group

The Treasury Service Group is responsible for the comprehensive monitoring, evaluating and analyzing of the Group's risks in line with the policies and limits.

The main risks arising from the Group's financial instruments are interest rate risk, credit risk, liquidity risk, commodity price risk and foreign exchange risk.

Liquidity risk

Liquidity risk is the risk of not meeting obligations as they become due because of the inability to liquidate assets or obtain adequate funding. The Group maintains sufficient cash and cash equivalents to finance its operations. Any excess cash is invested in short-term money market placements. These placements are maintained to meet maturing obligations and pay any dividend declarations.

In managing its long-term financial requirements, the Group's policy is that not more than 25% of long-term borrowings should mature in any twelve-month period. 7.15% and 6.97% of the Group's debt will mature in less than one year as of March 31, 2020 and December 31, 2019, respectively. For its short-term funding, the Group's policy is to ensure that there are sufficient working capital inflows to match repayments of short-term debt.

The financial assets that will be principally used to settle the financial liabilities presented in the following table are from cash and cash equivalents and trade and other receivables. Cash and cash

equivalents can be withdrawn anytime while trade and other receivables are expected to be collected/realized within one year.

The following table summarizes the maturity profile of the Group's financial liabilities as of March 31, 2020 based on contractual undiscounted principal payments:

	Total carrying value	Contractual undiscounted principal payments				
		Total	On demand	<1 year	1 to 5 years	> 5 years
Short-term loans	₱21,031,434	₱21,031,434	₱–	₱21,031,434	₱–	₱–
Trade and other payables*	23,233,629	23,233,629	1,919,751	5,027,927	16,285,951	–
Long-term debts	174,667,491	176,303,215	–	10,658,443	93,027,829	72,616,943
Customers' deposits	6,643,879	6,643,879	–	21,134	308,095	6,314,650
Lease liabilities	43,737,612	60,905,789	–	9,117,883	44,872,854	6,915,052
Long-term obligation on PDS	205,372	360,000	–	40,000	200,000	120,000
Derivative liabilities	2,759,979	2,759,979	–	2,085,047	674,932	–
	₱272,279,396	₱291,237,925	₱1,919,751	₱47,981,868	₱155,369,661	₱85,966,645

*Include the noncurrent portion of the PSALM deferred adjustment presented under noncurrent liabilities in the unaudited interim consolidated balance sheet.

Market Risk

The risk of loss, immediate or over time, due to adverse fluctuations in the price or market value of instruments, products, and transactions in the Group's overall portfolio (whether on or off-balance sheet) is market risk. These are influenced by foreign and domestic interest rates, foreign exchange rates and gross domestic product growth.

Interest rate risk

The Group's exposure to market risk for changes in interest rates relates primarily to its long-term debt obligations. To manage this risk, the Group determines the mix of its debt portfolio as a function of the level of current interest rates, the required tenor of the loan, and the general use of the proceeds of its various fund-raising activities. As of March 31, 2020, 17% of the Group's long-term debt had annual floating interest rates ranging from 2.94% to 3.45%, and 83% have annual fixed interest rates ranging from 4.05% to 9.00%. As of December 31, 2019, 16% of the Group's long-term debt had annual floating interest rates ranging from 3.09% to 4.81%, and 84% have annual fixed interest rates ranging from 4.05% to 9.00%.

The following tables set out the carrying amounts, by maturity, of the Group's financial instruments that are exposed to cash flow interest rate risk:

As of March 31, 2020

	<1 year	1-5 years	>5 years	Total
Floating rate - long-term debt	₱2,003,629	₱23,860,900	₱3,162,789	₱29,027,318

Interest on financial instruments classified as floating rate is repriced at intervals of less than one year. Interest on financial instruments classified as fixed rate is fixed until the maturity of the instrument. The other financial instruments of the Group that are not included in the above tables are non-interest bearing and are therefore not subject to interest rate risk. The Group's derivative assets and liabilities are subject to fair value interest rate risk.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, of the Group's income before tax (through the impact on floating rate borrowings):

	Increase (decrease) in basis points	Effect on income before tax
March 31, 2020	200	(₱580,546)
	(100)	290,273
March 31, 2019	200	(586,577)
	(100)	293,289

There is no other impact on the Group's equity other than those already affecting the unaudited interim condensed consolidated statements of income.

The interest expense and other financing costs recognized according to source are as follows:

	For the periods ended March 31	
	2020	2019
Short-term loans and long-term debt	₱2,585,155	₱1,922,563
Lease liabilities (Note 21)	1,120,574	1,206,938
Customers' deposits	843	7,847
Other long-term obligations	55,518	72,865
	₱3,762,090	₱3,210,213

Foreign exchange risk

The foreign exchange risk of the Group pertains significantly to its foreign currency denominated obligations. To manage its foreign exchange risk, stabilize cash flows and improve investment and cash flow planning, the Group enters into foreign currency forward contracts aimed at reducing and/or managing the adverse impact of changes in foreign exchange rates on financial performance and cash flows. Foreign currency denominated borrowings account for 33% and 32% of total consolidated borrowings as of March 31, 2020 and December 31, 2019.

Presented below are the Group's foreign currency denominated financial assets and liabilities as of March 31, 2020 and December 31, 2019, translated to Philippine Peso:

	March 31, 2020		December 31, 2019	
	US Dollar	Philippine Peso equivalent ¹	US Dollar	Philippine Peso Equivalent ²
Financial assets:				
Cash and cash equivalents	\$75,104	₱3,806,271	\$43,352	₱2,195,129
Trade and other receivables	49	2,483	18,725	948,140
Total financial assets	75,153	3,808,754	62,077	3,143,269
Financial liabilities:				
Short-term loans	12,550	636,034	12,000	607,620
Trade and other payables	3,150	159,642	13,439	680,493
Long-term debt	300,000	15,204,000	300,000	15,190,500
Lease liabilities	431,272	21,856,865	443,002	22,431,406
Total financial liabilities	746,972	37,856,541	768,441	38,910,019
Total net financial liabilities	(\$671,819)	(₱34,047,787)	(\$706,364)	(₱35,766,750)

¹\$1= 50.680

²\$1= 50.635

The following table demonstrates the sensitivity to a reasonably possible change in the US dollar exchange rates, with all other variables held constant, of the Group's income before tax as of March 31, 2020:

	Increase/ (decrease) in US Dollar	Effect on income before tax
US Dollar denominated accounts	US Dollar strengthens by 5%	(₱1,702,389)
US Dollar denominated accounts	US Dollar weakens by 5%	1,702,389

The increase in US Dollar rate represents the depreciation of the Philippine Peso while the decrease in US Dollar rate represents appreciation of the Philippine Peso.

There is no other impact on the Group's equity other than those already affecting the interim consolidated statements of comprehensive income.

Credit risk

For its cash investments (including restricted portion), financial assets at FVTPL and receivables, the Group's credit risk pertains to possible default by the counterparty, with a maximum exposure equal to the carrying amount of these investments. With respect to cash investments and financial assets at FVTPL, the risk is mitigated by the short-term and/or liquid nature of its cash investments mainly in bank deposits and placements, which are placed with financial institutions and entities of high credit standing. With respect to receivables, credit risk is controlled by the application of credit approval, limit and monitoring procedures. It is the Group's policy to only enter into transactions with credit-worthy parties to mitigate any significant concentration of credit risk. The Group ensures that sales are made to customers with appropriate credit history and it has internal mechanisms to monitor the granting of credit and management of credit exposures.

Concentration Risk

Credit risk concentration of the Group's receivables according to the customer category is summarized in the following table:

	March 31, 2020	December 31, 2019
Power distribution:		
Industrial	₱5,080,068	₱5,554,969
Residential	2,034,503	1,825,217
Commercial	821,645	437,994
City street lighting	163,961	111,570
Power generation:		
Power supply contracts	3,768,420	1,481,760
Spot market	4,205,459	5,520,439
	₱16,074,056	₱14,931,949

Capital Management

Capital includes equity attributable to the equity holders of the parent. The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

The Group monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. The Group's policy is to keep the gearing ratio at 70% or below. The Group determines net debt as the sum of interest-bearing short-term and long-term loans (comprising long-term debt and lease liabilities) less cash and short-term deposits (including restricted cash).

Gearing ratios of the Group as of March 31, 2020 and December 31, 2019 are as follows:

	March 31, 2020	December 31, 2019
Short-term loans	₱21,031,434	₱10,335,420
Long-term obligations	218,405,103	222,761,266
Cash and cash equivalents	(44,030,335)	(37,433,929)
Restricted cash	(8,118,108)	(9,121,747)
Net debt (a)	187,288,094	186,541,010
Equity	126,187,204	133,643,011
Equity and net debt (b)	₱313,475,298	₱320,184,021
Gearing ratio (a/b)	59.75%	58.26%

No changes were made in the objectives, policies or processes during the three-month period ended March 31, 2020.

20. Financial Instruments

Fair Value of Financial Instruments

Fair value is defined as the amount at which the financial instrument could be sold in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

A financial instrument is regarded as quoted in an active market if quoted prices are readily available from an exchange, dealer, broker, pricing services or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. For a financial instrument with an active market, the quoted market price is used as its fair value. On the other hand, if transactions are no longer regularly occurring even if prices might be available and the only observed transactions are forced transactions or distressed sales, then the market is considered inactive. For a financial instrument with no active market, its fair value is determined using a valuation technique (e.g., discounted cash flow approach) that incorporates all factors that market participants would consider in setting a price.

Set out below is a comparison by category of carrying amounts and fair values of the Group's financial instruments whose fair values are different from their carrying amounts.

	March 31, 2020		December 31, 2019	
	Carrying Amounts	Fair Values	Carrying Amounts	Fair Values
Financial Asset:				
PSALM deferred adjustment	₱2,922,373	₱2,619,564	₱3,183,080	₱2,846,279
Financial Liabilities:				
Lease liabilities	₱43,737,612	₱38,332,555	₱44,789,644	₱38,495,450
Long-term debt - fixed rate	145,640,173	152,194,443	148,642,748	152,786,437
PSALM deferred adjustment	2,922,373	2,619,564	3,183,080	2,846,279
Long-term obligation on PDS	205,372	289,023	199,350	320,194
	₱192,505,530	₱193,435,585	₱196,814,822	₱194,448,360

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, trade and other receivables, short-term loans and trade and other payables. The carrying amounts of cash and cash equivalents, trade and other receivables, short-term loans and trade and other payables approximate fair value due to the relatively short-term maturity of these financial instruments.

Fixed-rate borrowings. The fair value of fixed rate interest-bearing loans is based on the discounted value of future cash flows using the applicable rates for similar types of loans.

Floating-rate borrowings. Since repricing of the variable-rate interest bearing loan is done on a quarterly basis, the carrying value approximates the fair value.

Lease liabilities. The fair value of the lease liabilities was calculated by discounting future cash flows using applicable interest rates.

Long-term obligation on PDS. The fair value of the long-term obligations on PDS is calculated by discounting expected future cash flows at prevailing market rates.

Customers' deposits. The fair value of bill deposits approximates the carrying values as these deposits earn interest at the prevailing market interest rate in accordance with regulatory guidelines. The timing and related amounts of future cash flows relating to transformer and lines and poles deposits cannot be reasonably and reliably estimated for purposes of establishing their fair values using an alternative valuation technique.

Financial assets at FVTPL. These equity securities are carried at fair value.

Derivative financial instruments. The fair value of forward contracts is calculated by reference to prevailing interest rate differential and spot exchange rate as of valuation date, taking into account its remaining term to maturity. The fair value of the embedded prepayment options is determined using Binomial Option Pricing Model which allows for the specification of points in time until option expiry date. This valuation incorporates inputs such as interest rates and volatility. The fair value of the interest rate swap and interest rate cap are determined by generally accepted valuation techniques with reference to observable market data such as interest rates.

The Group enters into non-deliverable short-term forward contracts with counterparty banks to manage its foreign currency risks associated with foreign currency-denominated liabilities and purchases.

The Group also entered into an interest rate swap agreement to fully hedge its floating rate exposure on its foreign currency-denominated loan and par forward contracts to hedge the floating rate exposure on foreign-currency denominated payments.

The Group also entered into commodity swap contracts to hedge the price volatility of its forecasted coal purchases.

The movements in fair value changes of all derivative instruments for the three-month period ended March 31, 2020 and for the year ended December 31, 2019 are as follows:

	2020	2019
At beginning of year	(₱2,385,997)	₱132,902
Net changes in fair value of derivatives designated as cash flow hedges	(276,858)	(2,515,732)
Net changes in fair value of derivatives not designated as accounting hedges	(18,767)	(3,889)
Fair value of settled instruments	(78,357)	722
At end of period	(₱2,759,979)	(₱2,385,997)

Fair Value Hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: other techniques for which all inputs, which have a significant effect on the recorded fair value, are observable, either directly or indirectly; and
- Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

As of March 31, 2020, the Group held the following financial instruments that are measured and carried or disclosed at fair value:

	Total	Level 1	Level 2	Level 3
Carried at fair value:				
Derivative liability	₱2,759,979	₱–	₱2,759,979	₱–
Disclosed at fair value:				
Lease liabilities	38,332,555	–	–	38,332,555
Long-term debt - fixed rate	152,194,443	–	–	152,194,443
Long-term obligation on PDS	289,023	–	–	289,023

During the three-month period ended March 31, 2020, there were no transfers between level 1 and level 2 fair value measurements and transfers into and out of level 3 fair value measurement.

21. Leases

Set out below, are the carrying amounts of the Group's right-of-use assets and lease liabilities and the movements during the period:

	Land	Building	Power plant	Equipment & others	Total	Lease liabilities
As at January 1, 2020	₱2,730,076	₱230,234	₱33,575,200	₱117,602	₱36,653,112	₱44,789,644
Amortization expense	(24,748)	(4,791)	(273,628)	(19,092)	(322,259)	–
Interest expense	–	–	–	–	–	1,120,574
Payments	–	–	–	–	–	(2,164,754)
Others	–	–	–	–	–	(7,852)
March 31, 2020	₱2,705,328	₱225,443	₱33,301,572	₱98,510	₱36,330,853	₱43,737,612

Set out below are the amounts recognized in the unaudited interim condensed consolidated statement of income for the three months ended March 31, 2020:

Amortization expense of right-of-use assets	₱322,259
Interest expense on lease liabilities	1,120,574
Rent expense - short-term leases	13,207
	<u>₱1,456,040</u>

22. Equity

Paid-in Capital

- On March 6, 2020 and April 27, 2020, the Company's BOD and stockholders, respectively, approved the amendments of the features of the preferred shares of the Company as follows: "preferred shares shall be non-voting, non-convertible, and shall have preference over common shares in case of liquidation or dissolution of the corporation. The Board of Directors or the Executive Committee is expressly authorized to issue preferred shares in one or more series, establish and designate each particular series of preferred shares, including its features, fix the number of shares to be included in the series, and to determine the dividend rate, issue price, designations, relative rights, preferences, privileges and limitations of the preferred shares and/or series of shares. Upon redemption, preferred shares shall not be considered retired, but may be reissued under such terms and conditions as may be determined by the Board of Directors or the Executive Committee".

Retained Earnings

- a. On March 6, 2020, the BOD approved the declaration of regular cash dividends of ₱1.18 a share (₱8.68 billion) to all stockholders of record as of March 20, 2020. These dividends were paid on April 3, 2020.
- b. The balance of retained earnings includes the accumulated equity in net earnings of subsidiaries, associates and joint arrangements. Such amounts are not available for distribution until such time that the Company receives the dividends from the respective subsidiaries, associates and joint arrangements.

23. Disclosures

1. COVID 19

In December 2019, a novel coronavirus strain (“COVID-19”) emerged in the city of Wuhan, China. Starting in January 2020, the resulting COVID-19 outbreak became a major global concern to countries including the Philippines. On March 8, 2020, President Rodrigo R. Duterte declared a State of Public Health Emergency throughout the Philippines. Thereafter, President Duterte declared a State of Calamity for a period of six (6) months (unless earlier lifted or extended as circumstances may warrant) and imposed an “enhanced community quarantine” throughout the entire island of Luzon from March 16, 2020 until April 12, 2020, which was later extended until April 30, 2020 and then again until May 15, 2020. The “enhanced community quarantine” measures include the suspension of work in private sector, except in establishments providing basic necessities and engaged in food and medicine production; suspension of mass public transport facilities; suspension of travel to and from Metro Manila; and observance of strict home quarantine.

Since the declaration of a State of Public Health Emergency and the implementation of various community quarantine measures on business operations, public transportation, social distancing, international travel bans, and health protocols, the Group has been implementing work-from-home arrangements and facility quarantine rotational duty schemes to address any constrained mobility brought about by the quarantine measures, as well as to ensure the health and safety of the Group’s employees while continuing to serve its customers and other stakeholders. To date, all power generation facilities and power distribution utilities have normal operations. The Company’s business continuity plans have been successfully implemented to ensure the adequate and reliable supply and distribution of electricity.

The curtailed economic activity brought about by the quarantine measures has resulted in significant drops in electricity demand and consumption which, in turn, have affected the revenue targets of the Distribution Companies, Generation Companies, and RES business units. Nevertheless, the Group has been in constant discussions, and has been working together with its customers and other key stakeholders to minimize the impact of the pandemic to the respective parties’ power supply agreements.

The Group has also been compliant with the Department of Energy circulars on distribution utilities granting extensions on the payments of electricity consumers for bills falling due during the community quarantine period with the cumulative amount of such electricity bills being amortized in four (4) equal installments payable in the four (4) succeeding billing months following the end of the quarantine. This increased credit and collection risk has posed a challenge to the Group’s cash flows.

Such circulars also provide that all private and public corporations in the power sector shall be given a similar grace period for their respective obligations without interest, penalties, fees and charges,

as well as the same four (4)-month amortized payment arrangement for all unpaid balances on obligations within the same period. This directive has eased the impact and helped manage the cash flows of the Group, with respect to all payments due to NGCP, PSALM, Independent Electricity Market Operator of the Philippines, independent power producers, and suppliers of oil and steam.

The Group is continuously reviewing its forecast, cash flows and schedule of its capital expenditures to manage the impact of COVID-19.

2. Seasonality of Interim Operations

Operations of hydropower plants are generally affected by climatic seasonality. Seasonality and location have a direct effect on the level of precipitation. In Luzon where rainy and summer seasons are more pronounced, higher rainfall is normally experienced in the months of June to September. As such, the hydropower plants located in Luzon operate at their maximum capacity during this period. In contrast, the hydropower plants in Mindanao experience a well-distributed rainfall throughout the year, with a slightly better precipitation during the months of December to April. This precipitation seasonality greatly affects subsidiary companies HI, HSI, Hedcor Tudaya, Hedcor Sabangan and LHC, which operate 'run-of-river' hydropower plants since these plants do not have any means to impound water.

Any unexpected change in the seasonal aspects will have no material effect on the Group's financial condition or results of operations.

3. Pagbilao IPP Administration Agreement

Therma Luzon, Inc. and PSALM executed the IPP Administration Agreement wherein PSALM appointed TLI to manage the 700MW contracted capacity of NPC in the coal-fired power plant in Pagbilao, Quezon.

Under the IPP Administration Agreement, TLI has the right to receive, manage and control the capacity of the power plant for its own account and at its own cost and risk; and the right to receive the transfer of the power plant at the end of the IPP Administration Agreement for no consideration.

The IPP Administration Agreement includes the following obligations TLI would have to perform until the transfer date of the power plant (or the earlier termination of the IPP Administration Agreement):

- a. Supply and deliver all fuel for the power plant in accordance with the specifications of the original Energy Conservation Agreement (ECA); and
- b. Pay to PSALM the monthly payments (based on the bid) and energy fees (equivalent to the amount paid by NPC to the IPP).

In view of the nature of the IPP Administration Agreement, the arrangement has been considered as a finance lease. Accordingly, TLI recognized the related liability equivalent to the present value of the minimum monthly payments using TLI's incremental borrowing rates of 10% and 12% for dollar and peso payments, respectively.

The present value of the future minimum monthly dollar and peso payments under the IPP Administration Agreement as of March 31, 2020:

Present value of minimum monthly payments to PSALM	₱41,640,632
Less: Current portion	(5,431,971)
Noncurrent portion of lease liability	₱36,208,661

4. Property, Plant and Equipment

During the three-month period ended March 31, 2020, the Group's additions to property, plant and equipment amounted to ₱181.5 million.

5. Dividends to Non-controlling Interests

The Group's material partly-owned subsidiaries, namely GMCP and VECO, paid cash dividends amounting to ₱952.7 million and ₱1.52 billion to non-controlling interests during the three-month periods ended March 31, 2020 and 2019, respectively.

6. Material Events and Changes

Except as disclosed in some other portions of this report, no other significant event occurred that would have a material impact on the registrant and its subsidiaries, and no other known trend, event or uncertainty came about that had or were reasonably expected to have a material favorable or unfavorable impact on revenues or income from continuing operations, since the end of the most recently completed fiscal year. There were also no significant elements of income or loss that did not arise from the continuing operations of the registrant and its subsidiaries.

Other than those disclosed above, no material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships with unconsolidated entities or other person entities or other persons were created during the interim period. There were also no events that would trigger substantial direct or contingent financial obligations or cause any default or acceleration of an existing obligation.

Likewise, there were no other material changes made in such items as: accounting principles and practices, estimates inherent in the preparation of unaudited interim condensed financial statements, status of long-term contracts, changes in the composition of the issuer, and reporting entity resulting from business combinations or dispositions.

Lastly, there were no changes in estimates of amounts reported in prior interim period and financial year that would have a material effect in the current interim period.

7. Restatement

The unaudited consolidated statement of income for the three-month period ended March 31, 2019 was restated due to the adjustments of eliminating entries as part of consolidation, to reflect the more appropriate presentation. Both operating revenues and operating expenses for the said period slightly increased as compared to what were previously reported, by the same amount of ₱723.0 million, which is 2% and 3% of operating revenues and operating expenses, respectively. The related notes to consolidated financial statements which contain operating revenues and operating expenses were also restated. Such sections are marked appropriately with "As restated". There is no impact to net income, retained earnings and per-share amounts previously reported.

Except for the item above, there were no material, non-recurring adjustments made during the period that would require appropriate disclosures. All other adjustments are of a normal recurring nature.

8. Contingencies

The Group is a party to certain proceedings and legal cases with other parties in the normal course of business. The ultimate outcome of these proceedings and legal cases cannot be presently determined. Management, in consultation with its legal counsels, believes that it has substantial legal and factual bases for its positions and is currently of the opinion that the likely outcome of these proceedings and legal cases will not have a material adverse effect on the Group's financial position and operating results. It is possible, however, that the future results of operations could be materially affected by changes in estimates or in the effectiveness of the strategies relating to these proceedings and legal cases.

The Company obtained Standby Letters of Credit and is acting as surety for the benefit of certain associates and a subsidiary in connection with loans and credit accommodations.

SCHEDULE A - USE OF PROCEEDS

(Amounts are in thousands)

1) Ten Billion Fixed Rate Bonds issued in 2014

As of December 31, 2016, the proceeds from the 2014 bonds were fully utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus)	Actual Usage
400 MW (net) Pulverised Coal-Fired Expansion Unit 3 in Pagbilao, Quezon	₱4,100,000	₱3,917,722
68 MW Manolo Fortich Hydropower Plant	3,600,000	2,253,450
300 MW Cebu Coal	500,000	527,859
300 MW Davao Coal	500,000	1,698,469
14 MW Sabangan Hydropower Plant	1,300,000	1,602,500
TOTAL	₱10,000,000	₱10,000,000

2) Series "A" of the Thirty Billion Shelf Registration issued in 2017

As of December 31, 2019, the proceeds from the 2017 bonds were fully utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus)	Actual Usage
Equity infusions into GNPD in 2017	₱2,206,373	₱1,255,745
Equity infusions into GNPD in 2018	764,395	1,711,317
Bond issuance costs	29,232	32,938
TOTAL	₱3,000,000	₱3,000,000

3) Series "B" and "C" of the Thirty Billion Shelf Registration issued in 2018

As of March 31, 2020 the proceeds from the 2018 bonds were fully utilized for the following:

Name of Project	Projected Usage (Per Prospectus)	Actual Usage
Refinancing of the Medium-Term Loan of Therma Power, Inc.	₱8,700,000	₱8,700,000
Bond issuance costs	118,868	121,924
General corporate purposes	1,381,132	1,378,076
TOTAL	₱10,200,000	₱10,200,000

4) Series "D" of the Thirty Billion Shelf Registration issued in 2019

As of December 31, 2019, the proceeds from the 2019 bonds were fully utilized for the following:

Name of Project	Projected Usage (Per Prospectus)	Actual Usage
Repayment of short-term loan.	₱7,161,972	₱7,250,000
Bond issuance costs	88,028	–
TOTAL	₱7,250,000	₱7,250,000

SCHEDULE B – RELEVANT FINANCIAL RATIOS

	Formula	Mar 31, 2020	Dec 31, 2019
LIQUIDITY RATIOS			
Current ratio	$\frac{\text{Current assets}}{\text{Current liabilities}}$	1.20	1.50
Acid test ratio	$\frac{\text{Cash + Marketable securities} + \text{Accounts receivable} + \text{Other liquid assets}}{\text{Current liabilities}}$	0.92	1.15
SOLVENCY RATIOS			
Debt to equity ratio	$\frac{\text{Total liabilities}}{\text{Total equity}}$	2.32	2.07
Asset to equity ratio	$\frac{\text{Total assets}}{\text{Total equity}}$	3.32	3.07
Net debt to equity ratio	$\frac{\text{Debt - Cash \& cash equivalents}}{\text{Total equity}}$	1.48	1.42
Gearing ratio	$\frac{\text{Debt - Cash \& cash equivalents}}{\text{Total equity} + (\text{Debt - Cash \& cash equivalents})}$	59.75%	58.60%
Interest coverage ratio	$\frac{\text{EBIT}}{\text{Interest expense}}$	n.a	2.83
PROFITABILITY RATIOS			
Operating margin	$\frac{\text{Operating profit}}{\text{Total revenues}}$	n.a	23%
Return on equity	$\frac{\text{Net income after tax}}{\text{Total equity}}$	n.a	14%

*Ratio marked * is deemed not applicable (n.a.) for the interim reporting period since this would not be comparable to the ratio reported in the previous period.*

Common Stock P1 Par Value	7,358,604,307
Amount of Debt Outstanding	P239,875,868,000.00

11. Are any or all of the securities listed on a Stock Exchange?

Yes [] No []

If yes, state the name of such Stock Exchange and the class/es of securities listed therein:

Philippine Stock Exchange

Common

12. Indicate by check mark whether the registrant:

- (a) has filed all reports required to be filed by Section 17 of the Code and SRC Rule 17 thereunder or Sections 11 of the RSA and RSA Rule 11(a)-1 thereunder, and Sections 26 and 141 of the Corporation Code of the Philippines, during the preceding twelve (12) months (or for such shorter period the registrant was required to file such reports)

Yes No

- (b) has been subject to such filing requirements for the past ninety (90) days.

Yes No

PART I--FINANCIAL INFORMATION

Item 1. Financial Statements.

Please refer to the financial statements and schedules attached herewith.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of Aboitiz Power Corporation's (AboitizPower, Parent, or the Company) consolidated financial condition and results of operations should be read in conjunction with the consolidated financial statements and accompanying schedules and disclosures set forth elsewhere in this report.

Top Five Key Performance Indicators

Management uses the following indicators to evaluate the performance of the Company and its subsidiaries (the Company and its subsidiaries are hereinafter collectively referred to as the "Group"):

1. **Share in Net Earnings of Associates and Joint Ventures.** This represents the Group's share in the undistributed earnings or losses of its investees for each reporting period subsequent to the acquisition of said investment, net of goodwill impairment cost, if any. It also indicates the profitability of the investment and investees' contribution to the Group's net income.

Goodwill is the difference between the purchase price of an investment and the investor's share in the value of the net identifiable assets of the investee at the date of acquisition.

Manner of Computation:

Investee's Net Income (Loss) x Investor's % ownership - Goodwill Impairment Cost

2. **Earnings before Interest, Taxes, Depreciation, and Amortization (EBITDA).** The Company calculates EBITDA as earnings before extraordinary items, net finance expense, income tax provision, depreciation, and amortization. It provides management and investors with a tool for determining the ability of the Group to generate cash from operations to cover financial charges and income taxes. It is also a measure to evaluate the Group's ability to service its debts.
3. **Cash Flow Generated.** Using the Consolidated Statement of Cash Flows, management determines the sources and usage of funds for the period and analyzes how the Group manages its profit and uses its internal and external sources of capital. This aids management in identifying the impact on

cash flow when the Group's activities are in a state of growth or decline, and in evaluating management's efforts to control the impact.

4. **Current Ratio.** Current Ratio is a measurement of liquidity, calculated by dividing total current assets by total current liabilities. It is an indicator of the Group's short-term debt-paying ability. The higher the ratio, the more liquid the Group.
5. **Debt-to-Equity Ratio.** Debt-to-Equity Ratio indicates how leveraged the Group is. It compares assets provided by creditors to assets provided by shareholders. It is determined by dividing total liabilities by stockholders' equity.

The table below shows the comparative figures of the key performance indicators as of and for the six (6) months of 2020 and 2019, and as of December 31, 2019:

Key Performance Indicators	JUNE 2020 (INTERIM)	JUNE 2019 (INTERIM)	DECEMBER 2019
<i>Amounts in thousands of ₱s, except for financial ratios</i>			
SHARE IN NET EARNINGS OF ASSOCIATES AND JOINT VENTURES	979,818	1,044,929	3,813,962
EBITDA	18,319,470	21,466,463	45,005,022
CASH FLOW GENERATED:			
Net cash flows from operating activities	15,354,061	18,163,692	39,356,962
Net cash flows used in investing activities	(3,776,856)	(25,536,243)	(34,060,584)
Net cash flows used in financing activities	(9,311,963)	(7,592,595)	(14,376,055)
Net (Decrease)/Increase in Cash & Cash Equivalents	2,265,242	(14,965,146)	(9,079,677)
Cash & Cash Equivalents, Beginning	37,433,929	46,343,041	46,343,041
Cash & Cash Equivalents, End	39,829,177	31,777,756	37,433,929
CURRENT RATIO	1.25	1.27	1.50
DEBT-TO-EQUITY RATIO	2.24	2.23	2.07

- Share in net earnings in associates and joint ventures for the first half of 2020 decreased by 6% compared to the first half of 2019. The decrease was primarily due to lower income contributions from SN Aboitiz Power-Benguet, Inc. (SN Aboitiz Power- Benguet) during the period. This was the result of a reduction in volume sold due to reduced water levels during the first half of 2020, compared to the same period in 2019.
- EBITDA for the first half of 2020 decreased by 15%, due to lower demand resulting from the imposition of COVID-19 related quarantine measures. EBITDA was also affected by the outage of Therma South, Inc. (TSI) Unit 2, GNPowder Mariveles Coal Plant Ltd. Co. (GMCP) Unit 2, and of the Pagbilao units 1, 2 and 3 during the period. These were offset by lower purchased power cost during the first half of 2020, as well as new capacities from Therma Visayas, Inc. (TVI) and Thermal Mobile, Inc. (TMO), which were both online on January 2020. During the first half of 2019, income from the Generation Rate Adjustment Mechanism (GRAM) and Incremental Currency Exchange Rate Adjustment (ICERA) were also included as part of EBITDA but were no longer recognized during the same period in 2020.
- For the first half of 2020, cash and cash equivalents increased by ₱2.40 billion (bn), primarily due to the availment of additional loans.
- Current Ratio as of June 30, 2020 was at 1.25x, compared to 1.50x as of December 31, 2019. The decline primarily due to an increase in short term borrowing of the Parent Company during the first half of 2020, as well as additional loans from subsidiaries.

- Debt-to-Equity Ratio as of June 30, 2020 was at 2.24x, higher than the 2.07x recorded at the end of 2019.

Results of Operations

Net income for the first half of 2020 of ₱3.74 bn, which was 57% lower than the ₱8.65 bn reported during the same period in 2019. This translated to earnings per share of ₱0.51 for the period. The Company recognized non-recurring gains of ₱224 million (mn) during the relevant period, compared to non-recurring gains of ₱121 mn during the same period in 2019, due to net foreign exchange gains on the revaluation of dollar denominated liabilities. Without these one-off gains, the Company's core net income for the first half of 2020 was ₱3.51 bn, 59% lower than the ₱8.53 bn recorded during the same period in 2019. This was impacted by lower EBITDA due to plant outages and reduced demand following the imposition of COVID-related community quarantines. The Company also incurred additional tax expenses following the expiration of the Income Tax Holiday (ITH) incentives of TSI and GMCP, and additional interest expense from the Company's bond issued during the fourth quarter of 2019 as well as from loans availed of during the same period.

Power Generation and Retail Electricity Supply (RES)

AboitizPower's generation and retail supply business recorded EBITDA of ₱14.80 bn during the first six months of 2020, 17% lower than the ₱17.80 bn recorded during the corresponding period in 2019. The decline was primarily due to reduced demand resulting from the imposition of COVID-related community quarantines during the first half of 2020, as well as forced outages involving Pagbilao units 1, 2, and 3, TSI Unit 2, and GMCP Unit 2. These reductions offset the decrease in purchased power costs during the first half of 2020, as well as the additional revenues from TVI and TMO. Moreover, EBITDA for the first quarter of 2019 also included income from the GRAM and ICERA, which could no longer be recognized as income during the first half of 2020.

Capacity sold for the first half of 2020 increased by 12% to 3,388 megawatts (MW), compared to 3,035 MW in the same period last year. This was due to increased contracting levels driven by the new capacity of TVI and TMO. However, due to the lower demand brought about by the COVID-19 pandemic and forced outages, energy sold during the first half of 2020 declined by 6% to 10,764 gigawatt-hours (GWh), compared to 11,460 GWh for the same period in 2019.

Power Distribution

For the first half of 2020, AboitizPower's distribution business recorded EBITDA of ₱3.70 bn, 0.5% lower than the ₱3.70 bn recorded during the same period last year. Energy sales decreased by 7% to 2,629 GWh during the first six months of 2020, from 2,842 GWh in the first half of 2019. This was driven by lower energy consumption from the Commercial and Industrial customer segments due to the imposition of COVID-related community quarantines.

Material Changes in Line Items of Registrant's Statements of Income and Comprehensive Income

Consolidated Statements of Income

Net income attributable to equity holders of the Parent Company decreased by ₱4.91 bn, or 57%. The various movements in line items are shown below to account for the decrease:

Net Income Attributable to Equity Holders of the Parent (January – June 2019)	₱8,648,370
Decrease in operating revenues	(10,926,910)
Decrease in operating expenses	7,971,184
Decrease in interest income	(359,380)
Increase in interest expense	(633,854)
Decrease in share in net earnings of associates and joint ventures	(65,111)
Decrease in other income	(634,522)
Increase in provision for taxes	(709,421)
Decrease in income attributable to non-controlling interests	446,584
Total	(4,911,430)
Net Income Attributable to Equity Holders of the Parent (January – June 2020)	₱3,736,940

Operating Revenues

(17% decrease from ₱63.96 bn to ₱53.03 bn)

The decrease in operating revenues was primarily due to lower demand brought about by COVID-19, lower spot prices and indices, and the forced outages of TSI Unit 2, GMCP Unit 2, and Pagbilao units, as well as lower contract rates.

These were offset by new capacities from TVI and TMO, which were both online during the first half of 2020.

Operating Expenses

(16% decrease from ₱49.97 bn to ₱42.00 bn)

The decrease in operating expenses was mainly due to the lower cost of purchased power and of generated power during the first half of 2020. Wholesale Electricity Spot Market prices were lower than marginal cost, and as a result AboitizPower opted to purchase power from the spot market as part of its trading strategy. During the same period in 2019, the Company bought replacement power at higher spot market prices due to contracting in advance for incoming capacities and outages of AP Renewables Inc. (APRI) and Pagbilao Energy Corporation (PEC).

Interest Income

(47% decrease from ₱765 mn to ₱405 mn)

Interest income during the first half of 2020 was lower compared to the same period in 2019, primarily due to the Parent Company's lower cash investments and lower interest income from TSI, Hedcor Bukidnon, Inc. (Hedcor Bukidnon), and PEC.

Interest Expense and other financing costs

(10% increase from ₱6.56 bn to ₱7.20 bn)

Interest expense increased during the first half of 2020 compared to the same period in 2019 due to interest and financing costs on AboitizPower's ₱7.25 bn retail bonds issued in October 2019, the

recognition of interest expense from TVI's project loans, and additional loan availments during the relevant period.

Share in Net Earnings of Associates and Joint Ventures

(6% decrease from ₱1.04 bn to ₱980 mn)

Share in net earnings in associates and joint ventures for the first half of 2020 decreased by 6% compared to the first half of 2019. The decrease was mainly due to lower income contributions from SN Aboitiz Power-Benguet. This was primarily driven by a reduction in volume sold due to reduced water levels during the first half of 2020 compared to the same period in 2019

Other Income (Expenses) – net

(31% decrease from ₱2.06 bn other income to ₱1.43 bn other income)

The decrease in other income was mainly due to the Company no longer being able to recognize GRAM and ICERA as income during the first half of 2020.

Provision for Taxes

(60% increase from ₱1.17 bn to ₱1.88 bn)

The decrease in provision for taxes was due to the additional taxes from the expiration of the ITH incentives of TSI and GMCP.

Changes in Registrant's Resources, Liabilities and Shareholders' Equity

Assets

Total assets (as of June 30, 2020 compared to December 31, 2019) increased by ₱5.10 bn, or 1%. The major movements of the accounts leading to the increase were as follows:

- a) Cash and cash equivalents increased by ₱2.40 bn, or 6% (from ₱37.44 bn to ₱39.83 bn) due to additional loan availments by the Group.
- b) Trade and other receivables increased by ₱3.00 bn, or 14% (from ₱21.75 bn to ₱24.75 bn), primarily due to the impact of the extension of bill payments as per Energy Regulatory Commission (ERC) and Department of Energy (DOE) advisories.
- c) Other current assets increased by ₱2.51 bn, or 9% (from ₱11.08 bn to ₱13.59 bn), mainly due to an increase in input VAT and prepaid expenses. This was partially offset by a decrease in the restricted cash of TSI being held as cash reserves in compliance with its covenants on its project debt.
- d) Investments and advances increased by ₱1.77 bn, or 3% (from ₱60.88 bn to ₱62.65 bn) mainly as a result of capital infusions to GNPowr Dinginin Ltd. Co. (GNPD) plant construction.
- e) Property, plant and equipment decreased slightly by 2% (from ₱209.52 bn to ₱205.64 bn) mainly due depreciation of existing assets.
- f) Deferred income tax assets increased by ₱425 mn, or 15% (from ₱2.79 bn to ₱3.21 bn) mainly due to the deferred tax benefits recognized by Therma Luzon, Inc. on its net operating loss.
- g) Other noncurrent assets decreased by ₱672 mn, or 5% (from ₱13.52 bn to ₱12.85 bn). This was mainly due to the decrease in Input VAT.

Liabilities

Compared to December 31, 2019, total liabilities as of June 30, 2020 increased by ₱10.30 bn, or 4%. The major movements of accounts leading to the increase were as follows:

- a) Short-term loans increased by ₱12.67 bn, or 123% (from ₱10.33 bn to ₱23.01 bn), mainly due to new loans availed of by the Group for working capital purposes.
- b) Trade and other payables increased by ₱1.60 bn or 7% during the first half of 2020 (from ₱22.38 bn to ₱23.97 bn) primarily driven by an increase in output VAT and other nontrade payables.
- c) Income tax payable increased by ₱680 mn, or 133%, mainly due to the expiration of the ITH incentives of TSI and GMCP.
- d) Long-term debt (current and non-current portions) decreased by ₱4.12 bn (from ₱177.97 bn to ₱173.85 bn) mainly due to principal payments made on existing loans of GMCP, TVI, APRI, Hedcor Bukidnon, and Hedcor, Inc.
- e) Lease liabilities (current and noncurrent portions) decreased by ₱1.77 bn (from ₱44.79 bn to ₱43.02 bn), as TLI made timely payments on its obligation to Power Sector Assets and Liabilities Management Corporation (PSALM).
- f) Net derivative liabilities increased by ₱1.30 bn (from ₱2.39 bn to ₱3.68 bn) during the first half of 2020 due to hedging losses.
- g) Net pension liabilities increased by ₱34 mn, or 8% (from ₱426 mn to ₱460 mn), mainly due to the accrual of pension expenses.
- h) Deferred income tax liabilities increased by ₱66 mn, or 8% (from ₱848 mn to ₱914 mn), mainly due to fair value changes of the Group's foreign currency denominated assets and liabilities.

Equity

Equity attributable to equity shareholders of the Parent Company decreased by 5% (from ₱125.54 bn at the end of 2019 to ₱119.46 bn as of June 30, 2020) after the declaration of dividends in March 2020, net of comprehensive income recognized during the first quarter of 2020. Cumulative translation adjustments increased by ₱1.18 bn, due to an upward adjustment in the fair value of the Group's foreign currency forward and commodity swap contracts designated as cash flow hedges, as well as the net assets translation effect of GMCP and Luzon Hydro Corporation during the period.

Material Changes in Liquidity and Cash Reserves of Registrant

As of June 30, 2020, the Group's cash and cash equivalents increased by 6% to ₱39.83 bn, from ₱37.43 bn as of December 31, 2019.

The extension of bill payments as per ERC/DOE advisories contributed to lower cash generated from operations during the first half of 2020 by ₱2.81 bn or 15% decrease compared to the same period last year.

Net cash flows used in investing activities decreased to ₱3.78 bn in the first half of 2020 from ₱25.54 bn for the same period last year, which was mainly due to the ₱24.95 bn AA Thermal acquisition taken up in the first half of 2019.

The net cash flows used in financing activities as of 30 June 2020 was ₱1.72 bn higher compared to the same period in 2019, primarily due to payment by the Group of principal amortizations on various loans.

Financial Ratios

As of 30 June 2020, current assets increased by 10% and current liabilities increased by 32% compared to end-2019. The current ratio as of June 30, 2020 was at 1.25x compared to 1.50x as of December 31, 2019.

Consolidated debt to equity ratio as of June, 2020 was at 2.24x, higher than the 2.07x recorded at the end of 2019. This was primarily due to a 4% increase in total liabilities during the first half of 2020, coupled with a 4% decrease in equity during the same period.

Outlook for the Upcoming Year/ Known Trends, Events, and Uncertainties which may have Material Impact on the Registrant

AboitizPower is focused on addressing the needs of its markets, namely: (1) reliable supply, at a (2) reasonable cost, and with (3) minimal impact on the environment and communities. The Company believes that there is no single technology that completely addresses the country's energy requirements; and that to address the deficiency, a mix of power generation technologies is necessary. Thus, AboitizPower continues to pursue both renewable projects and thermal technologies where and when it makes sense.

Despite increased competition in the power generation market, the Company believes that it has built the foundation to sustain its long term growth, as seen in its pipeline of new power generation projects (Naga Power Plant Complex project and GNPower Dinginin project).

For the Naga Power Plant Complex Project in Cebu, the six diesel engine units passed the grid compliance tests of the National Grid Corporation of the Philippines and were successfully rehabilitated in January 2020. The units have demonstrated a combined net capacity of 39 MW. This was almost twice the output of these units prior to Therma Power Visayas, Inc. (TPVI) taking over. A Provisional Authority to Operate (PAO) has been obtained from the Energy Regulatory Commission and will allow TPVI to proceed with commercial operations as soon as its intent to commence participation in the Wholesale Electricity Spot Market is accepted by the Philippine Electricity Market Corporation. The plant is expected to start commercial operations by end-August of this year.

The GNPower Dinginin project is in the final stages of construction but continues to face challenges due to the COVID-19 pandemic and the imposition of the travel ban on China. Construction has slowed down due to the preventive measures taken to ensure the safety of workers on-site. A total of 172 Technical Field Assistants (TFA) have arrived in the country with 38 TFA's expected to arrive to complete testing and commissioning of Unit 1. Due to these circumstances, Unit 1 is now expected to synchronize and earn commissioning revenues by the fourth quarter of 2020 and to commence commercial operations by the first quarter of 2021. Unit 2 is expected to synchronize and earn commissioning revenues by the first quarter of 2021 and to commence commercial operations by the second quarter of 2021.

In relation to AboitizPower's existing capacity, the steam field operator for AP Renewables Inc. (APRI) has commenced the drilling of 12 new wells, which are expected to result in a minimum 50 MW of steam capacity by 2022. For Tiwi, the first well drilled and commissioned in December 2019, was tested at 12.11 MW in January 2020. For MakBan, the first well is targeted by December 2020 with a capacity of 5 to 7 MW. The Company expects to complete the drilling for incremental steam capacity by 2022. The drilling project is significant as it will allow the Company to optimize APRI's current net sellable capacity of 290 MW.

AboitizPower is on track to meet its 2020 target of 4,000 MW net attributable capacity. By year end, AboitizPower expects to own 4,432 MW of attributable capacity, with the entry of GNPower Dinginin Ltd. Co.'s Units 1 and 2, both units of which are under construction.

AboitizPower is committed to growing its attributable capacity which it expects will be sourced from a portfolio of renewables and selective baseload builds. In terms of renewable energy, the Company aims to maximize opportunities from the implementation of the Renewable Portfolio Standards (RPS) by the Department of Energy (DOE) starting this year. In line with DOE's aspirational goal of a 35% share in renewable energy utilization by 2030, RPS is a market-based policy that mandates power distribution utilities, electric cooperatives, and retail electricity suppliers to source an agreed portion of their energy supplies from renewable energy facilities. The Company will continue to pursue its international aspirations with continued focus on renewable energy projects in the ASEAN region. With all of these combined, it is expected that the Company's portfolio ratio will be close to a 50:50 Cleanenergy (renewable energy) and thermal capacity mix by the end of the current decade.

AboitizPower believes that it is well-positioned to take advantage of opportunities arising from developments in the power industry. The Company expects its financial condition to give it the agility to create or acquire additional generating capacity over the next few years.

AboitizPower, together with its partners, had initially budgeted ₱41 billion in capital expenditures for 2020. In order to take into consideration the impact of COVID-19, the Company has cut its initial budget for capital expenditures by about 20%.

Despite the challenges posed by the global pandemic and the unusual business situation, the Company continues to operate with its business continuity plans in force, in accordance with the protocols and guidelines of the government's community quarantine. The Company will continue to provide the country with the much-needed power supply for hospitals, government institutions, and critical businesses, while ensuring the safety of its teams, partners, and communities.

Other known trends, events, uncertainties which may have a material impact on AboitizPower have been discussed extensively in sections of the Company's Information Statement (e.g. for an extensive discussion on regulatory issues, see Effects of Existing or Probable Government Regulations on the Business on page 80 of the Company's 2020 Definitive Information Statement).

PART II--OTHER INFORMATION

There are no significant information on the company which requires disclosure herein and/or were not included in SEC Form 17-C.

3. Basis of Financial Statement Preparation and Changes in Accounting Policies

Basis of Financial Statement Preparation

The accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with Philippine Accounting Standard (PAS) 34, *Interim Financial Reporting*. Accordingly, the unaudited interim condensed consolidated financial statements do not include all of the information and disclosures required in the annual audited consolidated financial statements, and should be read in conjunction with the Group's annual audited consolidated financial statements as of and for the year ended December 31, 2019, which have been prepared in accordance with Philippine Financial Reporting Standards (PFRSs).

The unaudited interim condensed consolidated financial statements of the Group are presented in Philippine peso, the Company's functional currency, and rounded to the nearest thousands except for earnings per share and exchange rates and when otherwise indicated.

On July 27, 2020, the Audit Committee of the Board of Directors (BOD) approved and authorized the release of the accompanying unaudited interim condensed consolidated financial statements of the Group.

Changes in Accounting Policies

The accounting policies adopted are consistent with those of the previous financial year, except for the new and revised standards and Philippine Interpretations which were applied starting January 1, 2020. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

- Amendments to PFRS 3, *Definition of a Business*

The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is

introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

These amendments will apply on future business combinations of the Group.

- Amendments to PAS 1, *Presentation of Financial Statements*, and PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material*

The amendments provide a new definition of material that states “information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity.”

The amendments clarify that materiality will depend on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements. A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users.

These amendments did not have an impact in the unaudited interim condensed consolidated financial statements as the Group’s practice is generally align with the amendments.

- Amendments to PFRS 7, *Financial Instruments: Disclosures* and PFRS 9, *Financial Instruments, Interest Rate Benchmark Reform*

The amendments to PFRS 9 provide a number of reliefs, which apply to all hedging relationships that are directly affected by the interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainties about the timing and or amount of benchmark-based cash flows of the hedged item or the hedging instrument.

These amendments did not have an impact in the unaudited interim condensed consolidated financial statements.

- *Conceptual Framework for Financial Reporting issued on March 29, 2018*

The Conceptual Framework is not a standard, and none of the concepts contained therein override the concepts or requirements in any standard. The purpose of the Conceptual Framework is to assist the standard-setters in developing standards, to help preparers develop consistent accounting policies where there is no applicable standard in place and to assist all parties to understand and interpret the standards.

The revised Conceptual Framework includes new concepts, provides updated definitions and recognition criteria for assets and liabilities and clarifies some important concepts.

- Amendments to PFRS 16, *COVID-19-related Rent Concessions*

The amendments provide relief to lessees from applying the PFRS 16 requirement on lease modifications to rent concessions arising as a direct consequence of the COVID-19 pandemic. A lessee may elect not to assess whether a rent concession from a lessor is a lease modification if it meets all of the following criteria:

- The rent concession is a direct consequence of COVID-19;
- The change in lease payments results in a revised lease consideration that is substantially the same as, or less than, the lease consideration immediately preceding the change;

- Any reduction in lease payments affects only payments originally due on or before June 30, 2021; and
- There is no substantive change to other terms and conditions of the lease.

A lessee that applies this practical expedient will account for any change in lease payments resulting from the COVID-19 related rent concession in the same way it would account for a change that is not a lease modification, i.e., as a variable lease payment.

The amendments are effective for annual reporting periods beginning on or after June 1, 2020. Early adoption is permitted.

The Group adopted the amendments beginning January 1, 2020. These amendments did not have an impact in the unaudited interim condensed consolidated financial statements.

Effective beginning on or after January 1, 2021

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The adoption of the new standard is not expected to have an impact on the unaudited interim condensed consolidated financial statements of the Group as the Group is not into the business of providing insurance contracts.

4. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the Group's unaudited interim condensed consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosures of contingent liabilities. However, uncertainty about these assumptions could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in the future periods.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Judgments, key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting period are consistent with those applied in the most recent annual audited consolidated financial statements.

5. Cash and Cash Equivalents

	June 30, 2020	December 31, 2019
Cash on hand and in banks	₱17,357,817	₱14,177,919
Short-term deposits	22,471,360	23,256,010
	₱39,829,177	₱37,433,929

Cash in banks earn interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods depending on the immediate cash requirements of the Group and earn interest at the respective short-term deposits rates.

6. Trade and Other Receivables

	June 30, 2020	December 31, 2019
Trade receivables - net of allowance for expected credit losses	₱19,148,281	₱16,420,952
Others		
Dividends receivable	748,000	1,199,068
Advances to contractors	250,475	63,339
Non-trade receivable	3,516,535	2,972,536
Interest receivable	41,964	48,666
PSALM deferred adjustment	1,042,861	1,042,861
	₱24,748,116	₱21,747,422

Trade and other receivables are non-interest bearing and are generally on 10 - 30 days' term.

Advances to contractors refer to non-interest bearing advance payments made for project mobilization which are offset against progress billings to be made by the contractors.

Accrued revenue relates to accrual of power sales of the Power Generation segment.

Non-trade receivable relates mostly to advances to partners in GMCP which are subject to offset against any cash dividends declared by GMCP and due to the partners.

7. Other Current Assets

	June 30, 2020	December 31, 2019
Restricted cash	₱3,474,588	₱4,449,716
Input VAT	3,655,815	2,049,496
Prepaid tax	1,633,099	1,854,792
Advances to National Grid Corporation of the Philippines (NGCP)	2,132,100	1,727,028
Prepaid expenses	1,641,805	610,426
Others	1,048,282	391,947
	₱13,585,689	₱11,083,405

Restricted cash represents proceeds from sale of power under the control of trustees of TSI's lenders as per loan agreement. The asset will be used to pay the current portion of loans payable and interest payments in the following period.

Advances to NGCP pertain to the cost of construction and installation of substation and transmission facilities which are subject for reimbursement after completion of the project.

Prepaid expenses mainly include prepayments for insurance.

8. Investments and Advances

	June 30, 2020	December 31, 2019
Acquisition cost:		
Balance at beginning of the year	₱58,144,997	₱30,559,245
Additions during the period	1,533,418	27,591,092
Redemptions during the period	(6,939)	(5,340)
Balance at end of period	59,671,476	58,144,997
Accumulated equity in net earnings:		
Balance at beginning of the year	3,345,164	3,867,849
Share in net earnings	979,818	3,813,962
Transition adjustment	–	(18,691)
Dividends received or receivable	(790,870)	(4,317,956)
Balance at end of period	3,534,112	3,345,164
Share in net unrealized valuation gain on FVOCI investment of an associate	98,602	101,727
Share in actuarial gains on defined benefit plans of associates and joint ventures	(13,079)	(14,299)
Share in cumulative translation adjustments of associates and joint ventures	(109,298)	(153,485)
	63,181,813	61,424,104
Less allowance for impairment losses	568,125	568,125
Investments at equity	62,613,688	60,855,979
Advances	38,351	22,562
	₱62,652,039	₱60,878,541

2020

In 2020, the Group, through TPI and ATI, made capital contributions to GNPD amounting to ₱1.53 billion.

The Group's associates and joint ventures and the corresponding equity ownership as of June 30, 2020 are as follows:

	Nature of Business	Percentage of ownership
Manila-Oslo Renewable Enterprise, Inc. (MORE) ¹	Holding company	83.33
GNPower Dinginin Ltd. Co. (GNPD)*	Power generation	72.50
Hijos de F. Escaño, Inc. (Hijos)	Holding company	46.73
Mazzaraty Energy Corporation (MEC)	Retail Electricity Supplier	44.87
San Fernando Electric Light & Power Co., Inc. (SFELAPCO)	Power distribution	43.78
AA Thermal, Inc. (AA THERMAL)	Holding company	60.00
Pampanga Energy Ventures, Inc. (PEVI)	Holding company	42.84
La Filipina ElektriKa, Inc.*	Power generation	40.00
STEAG State Power, Inc. (STEAG)	Power generation	34.00
AEV Aviation, Inc. (AAI)	Service	26.69
Cebu Energy Development Corporation (CEDC)	Power generation	26.40
Redondo Peninsula Energy, Inc. (RPEI)*	Power generation	25.00
Southern Philippines Power Corporation (SPPC)	Power generation	20.00
Western Mindanao Power Corporation (WMPC)	Power generation	20.00

Joint venture.

* No commercial operations as of June 30, 2020

The principal place of business and country of incorporation of the Group's associates and joint venture are in the Philippines.

The carrying values of investments, which are accounted for under the equity method follow:

	June 30, 2020	December 31, 2019
ATI	₱24,278,945	₱24,084,947
GNPD	18,158,614	17,172,530
MORE	10,521,217	10,180,552
STEAG	3,754,622	4,032,405
CEDC	3,816,569	3,447,491
RPEI	524,543	525,769
PEVI	570,837	508,895
SFELAPCO	405,674	372,917
Hijos	198,102	176,037
WMPC	183,703	142,577
SPPC	56,580	61,497
Others	144,282	150,362
	₱62,613,688	₱60,855,979

9. Joint Operations

Name of Joint Operation	Nature of Business	Percentage of Ownership
		June 30, 2020
Pagbilao Energy Corporation (PEC)	Power generation	50.00

* PEC's principal place of business and country of incorporation is the Philippines;

The financial and operating activities of the operation are jointly controlled by the participating shareholders and are primarily designed for the provision of output to the shareholders.

The Group's share of assets, liabilities, revenue, expenses and cash flows of joint operations are included in the unaudited interim condensed consolidated financial statements on a line-by-line basis.

10. Intangible Assets

June 30, 2020

	Goodwill	Service concession rights	Franchise	Project development costs	Customer contracts	Software and licenses	Total
Cost:							
Balances at beginning of year	₱40,876,082	₱5,456,916	₱3,078,431	₱622,491	₱60,068	₱468,123	₱50,562,111
Additions	–	46,808	–	47,882	–	6,675	101,365
Exchange differences	35,546	(40,410)	–	–	–	(17,278)	(22,142)
Balances at end of year	40,911,628	5,463,314	3,078,431	670,373	60,068	457,520	50,641,334
Accumulated amortization:

Balances at end of year	–	3,152,631	545,139	–	60,068	248,834	4,006,672
Net book values	₱40,911,628	₱2,310,683	₱2,533,292	₱670,373	₱–	₱208,686	₱46,634,662

11. Trade and Other Payables

	June 30, 2020	December 31, 2019
Trade payables	₱10,557,896	₱10,885,721
Output VAT	4,479,175	3,022,048
Amounts due to contractors and other third parties	883,860	1,159,984
PSALM deferred adjustment	1,042,861	1,042,861
Accrued expenses:		
Interest	2,375,328	2,350,811
Materials and supplies cost	66,067	470,588
Taxes and fees	912,874	1,246,863
Claims conversion costs	93,726	102,808
Insurance	13,486	18,437
Dividends payable (see Note 22)	125,891	94,976
Unearned revenues	37,062	37,425
Customers' deposit	63,948	19,360
Nontrade	3,113,762	1,270,946
Others	208,479	653,292
	₱23,974,415	₱22,376,120

Trade payables are non-interest bearing and generally on 30-day terms.

Accrued taxes and fees represent accrual of real property tax, transfer tax and other fees.

Amounts due to contractors and other third parties include liabilities arising from the power plant construction.

Nontrade payables include amounts due to PSALM pertaining to Generation Rate Adjustment Mechanism (GRAM), Incremental Currency Exchange Rate Adjustment (ICERA), and Universal Charges.

Others include withholding taxes and other accrued expenses and are generally payable within 12 months from the balance sheet date.

12. Short-term Loans

		June 30, 2020	December 31, 2019
Peso loans - financial institutions - unsecured	2.00% - 5.68% in 2020 2.68% - 4.95% in 2019	₱22,382,500	₱9,727,800
Temporary advances		625,834	607,620
		₱23,008,334	₱10,335,420

The bank loans are unsecured short-term notes payable obtained from local banks. These loans are covered by the respective borrower's existing credit lines with the banks and are not subject to any significant covenants and warranties.

13. Long-term Debts

	2020 Interest Rate	June 30, 2020	December 31, 2019
Company (see Note 14):			
Bonds due 2024	7.51%	₱7,700,000	₱7,700,000

Less deferred financing costs		1,586,089	1,700,376
		173,852,008	177,971,622
Less current portion - net of deferred financing costs		10,285,381	10,386,311
		₱163,566,627	₱167,585,311

Loan covenants

The loan agreements on long-term debt of the Group provide for certain restriction with respect to, among others, mergers or consolidations or other material changes in their ownership, corporate set-up or management, investment and guaranties, incurrence of additional debt, disposition of mortgage of assets, payment of dividends, and maintenance of financial ratios at certain levels.

These restrictions and requirements were complied with by the Group as of June 30, 2020 and December 31, 2019.

14. Debt Securities

The Company registered and issued ₱10 billion worth of peso denominated fixed rate retail bonds on September 10, 2014.

On July 3, 2017, the Company issued the first tranche on the ₱30 billion bonds registered in June 2017.

In October 2018, the Company issued and registered a total of ₱10.20 billion bonds.

In October 2019, the Company issued and registered a total of ₱7.25 billion bonds.

Terms of the bonds are as follows:

Maturity	Interest Rate (p.a.)	Amount
12-year bonds to mature on September 10, 2026	6.10%	₱3,400,000
10-year bonds to mature on September 10, 2021	5.21%	₱6,600,000
10-year bonds to mature on July 3, 2027	5.3367%	₱3,000,000
5.25-year bonds to mature on January 25, 2024	7.51%	₱7,700,000
7-year bonds to mature on October 25, 2025	8.51%	₱2,500,000
7-year bonds to mature on October 14, 2026	5.28%	₱7,250,000

15. Operating Expenses

For the periods ended June 30

	2020	2019
		0
Cost of purchased power	₱16,280,335	₱19,067,822
Cost of generated power	12,392,597	18,621,521
Depreciation and amortization	5,338,223	4,616,911
General and administrative	3,961,755	3,999,890
Operations and maintenance	4,023,420	3,661,370
	₱41,996,330	₱49,967,514

16. Other Income (Expenses)

	For the periods ended June 30	
	2020	2019
Net foreign exchange gain (loss)	₱506,709	₱523,214
Surcharges	145,513	260,357
Non-utility operating income	290,191	79,255
Rental income	18,767	31,870
Losses on disposal of property, plant and equipment	(44,910)	(269,466)
Others - net	511,445	1,454,169
	₱1,427,715	₱2,062,239

Included in “Net foreign exchange gain (loss)” are the net gains and losses relating to currency forward transactions.

“Others” include other non-recurring items like sale of scrap and sludge oil in 2020 and reversal of APRI and TLI’s liability to PSALM pertaining to GRAM and ICERA in 2019.

17. Earnings Per Common Share

Earnings per common share amounts were computed as follows:

	For the periods ended June 30	
	2020	2019
a. Net income attributable to equity holders of the parent	₱3,736,940	₱8,648,370
b. Average number of outstanding shares	7,358,604,307	7,358,604,307
Earnings per share (a/b)	₱0.51	₱1.18

There are no dilutive potential common shares as of June 30, 2020 and 2019.

18. Operating Segment Information

Operating segments are components of the Group that engage in business activities from which they may earn revenues and incur expenses, whose operating results are regularly reviewed by the Group’s Chief Operating Decision Maker (CODM) to make decisions about how resources are to be allocated to the segment and assess their performances, and for which discrete financial information is available.

For purposes of management reporting, the Group’s operating businesses are organized and managed separately according to services provided, with each segment representing a strategic business segment. The Group’s identified operating segments, which are consistent with the segments reported to the BOD, which is the Group’s CODM, are as follows:

- “Power Generation” segment, which is engaged in the generation and supply of power to various customers under power supply contracts, ancillary service procurement agreements and for trading in WESM;
- “Power Distribution” segment, which is engaged in the distribution and sale of electricity to the end-users; and

- “Parent Company and Others”, which includes the operations of the Company, retail electricity sales to various off takers that are considered to be eligible contestable customers and electricity related services of the Group such as installation of electrical equipment.

The power generation segment's revenue from contracts with customers is mainly from power supply contracts. Set out below is the disaggregation of the Group's revenue from contracts with customers:

January - June 2020

	Power Generation	Power Distribution	Parent and Others	Total
Revenue from power supply contracts	₱15,516,108	–	–	₱15,516,108

	₱27,820,559	₱23,042,174	₱13,096,031	₱63,958,764

The revenue from contracts with customers is consistent with the revenue with external customers presented in Segment information.

The Group has only one geographical segment as all of its assets are located in the Philippines. The Group operates and derives principally all of its revenue from domestic operations. Thus, geographical business information is not required.

Management monitors the operating results of its segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment revenue and segment expenses are measured in accordance with PFRS. The presentation and classification of segment revenue and segment expenses are consistent with the interim condensed consolidated statements of income. Interest expense and other financing costs, depreciation and amortization expense and income taxes are managed on a per segment basis.

The Group has inter-segment revenues in the form of management fees as well as inter-segment sales of electricity which are eliminated in consolidation. The transfers are accounted for at competitive market prices on an arm's-length transaction basis.

Segment assets do not include deferred income tax assets, pension asset and other noncurrent assets. Segment liabilities do not include deferred income tax liabilities, income tax payable and pension liability. Capital expenditures consist of additions of property, plant and equipment and intangible asset - service concession rights. Adjustments as shown below include items not presented as part of segment assets and liabilities.

Financial information on the operations of the various business segments are summarized as follows:

June 30, 2020

	Power Generation	Power Distribution	Parent Company/ Others	Eliminations and Adjustments	Consolidated

19. Financial Risk Management Objectives and Policies

The Group's principal financial instruments comprise cash and cash equivalents and long-term debts. The main purpose of these financial instruments is to raise finances for the Group's operations. The Group has various other financial instruments such as trade and other receivables, investments in equity securities, short-term loans, trade and other payables, lease liabilities, long-term obligation on power distribution system and customers' deposits, which generally arise directly from its operations.

The Group also enters into derivative transactions, particularly foreign currency forwards, to economically hedge its foreign currency risk from foreign currency denominated liabilities and purchases.

Risk Management Structure

The BOD is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Group.

Financial risk committee

The Financial Risk Committee has the overall responsibility for the development of risk strategies, principles, frameworks, policies and limits. It establishes a forum of discussion of the Group's approach to risk issues in order to make relevant decisions.

Treasury service group

The Treasury Service Group is responsible for the comprehensive monitoring, evaluating and analyzing of the Group's risks in line with the policies and limits.

The main risks arising from the Group's financial instruments are interest rate risk, credit risk, liquidity risk, commodity price risk and foreign exchange risk.

Liquidity risk

Liquidity risk is the risk of not meeting obligations as they become due because of the inability to liquidate assets or obtain adequate funding. The Group maintains sufficient cash and cash equivalents to finance its operations. Any excess cash is invested in short-term money market placements. These placements are maintained to meet maturing obligations and pay any dividend declarations.

In managing its long-term financial requirements, the Group's policy is that not more than 25% of long-term borrowings should mature in any twelve-month period. 7.63% of the Group's debt will mature in less than one year as of June 30, 2020 (December 31, 2019: 6.97%). For its short-term funding, the Group's policy is to ensure that there are sufficient working capital inflows to match repayments of short-term debt.

The financial assets that will be principally used to settle the financial liabilities presented in the following table are from cash and cash equivalents and trade and other receivables. Cash and cash equivalents can be withdrawn anytime while trade and other receivables are expected to be collected/realized within one year.

The following table summarizes the maturity profile of the Group's financial liabilities as of June 30, 2020 based on contractual undiscounted principal payments:

	Total carrying value	Contractual undiscounted principal payments				
		Total	On demand	<1 year	1 to 5 years	> 5 years
Short-term loans	₱23,008,334	₱23,008,334	₱–	₱23,008,334	₱–	₱–
Trade and other payables*	24,977,732	24,977,732	2,955,209	6,077,444	15,945,079	–
Long-term debts	173,852,008	175,438,097	–	10,381,683	93,527,144	71,529,270
Customers' deposits	6,735,717	6,735,717	–	21,134	370,327	6,344,256
Lease liabilities	43,015,526	59,266,815	–	9,117,883	44,872,854	5,276,078
Long-term obligation on PDS	211,393	360,000	–	40,000	200,000	120,000
Derivative liabilities	3,675,948	3,675,948	–	2,493,709	1,182,239	–
	₱275,476,658	₱293,462,643	₱2,955,209	₱51,140,187	₱156,097,643	₱83,269,604

*Include the noncurrent portion of the PSALM deferred adjustment presented under noncurrent liabilities in the audited interim consolidated balance sheet.

Market Risk

The risk of loss, immediate or over time, due to adverse fluctuations in the price or market value of instruments, products, and transactions in the Group's overall portfolio (whether on or off-balance sheet) is market risk. These are influenced by foreign and domestic interest rates, foreign exchange rates and gross domestic product growth.

Interest rate risk

The Group's exposure to market risk for changes in interest rates relates primarily to its long-term debt obligations. To manage this risk, the Group determines the mix of its debt portfolio as a function of the level of current interest rates, the required tenor of the loan, and the general use of the proceeds of its various fund raising activities. As of June 30, 2020, 16% of the Group's long-term debt had annual floating interest rates ranging from 2.94% to 3.09%, and 84% have annual fixed interest rates ranging from 4.05% to 9.00%. As of December 31, 2019, 16% of the Group's long-term debt had annual floating interest rates ranging from 3.09% to 4.81%, and 84% have annual fixed interest rates ranging from 4.05% to 9.00%.

The following tables set out the carrying amounts, by maturity, of the Group's financial instruments that are exposed to cash flow interest rate risk:

As of June 30, 2020

	<1 year	1-5 years	>5 years	Total
Floating rate - long-term debt	₱1,845,449	₱22,740,584	₱3,761,728	₱28,347,761

Interest on financial instruments classified as floating rate is repriced at intervals of less than one year. Interest on financial instruments classified as fixed rate is fixed until the maturity of the instrument. The other financial instruments of the Group that are not included in the above tables are non-interest-bearing and are therefore not subject to interest rate risk. The Group's derivative assets and liabilities are subject to fair value interest rate risk.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, of the Group's income before tax (through the impact on floating rate borrowings):

	Increase (decrease) in basis points	Effect on income before tax
June 30, 2020	200	(P566,955)
	-100	283,478
June 30, 2019	200	(586,577)
	-100	293,289

There is no other impact on the Group's equity other than those already affecting the unaudited interim condensed consolidated statements of income.

The interest expense and other financing costs recognized according to source are as follows:

	For the periods ended June 30	
	2020	2019
Short-term loans and long-term debt	P5,341,577	P4,265,330
Lease liabilities (Note 21)	1,743,694	2,137,123
Customers' deposits	853	293
Other long-term obligations	110,999	160,523
	P7,197,123	P6,563,269

Foreign exchange risk

The foreign exchange risk of the Group pertains significantly to its foreign currency denominated obligations. To manage its foreign exchange risk, stabilize cash flows and improve investment and cash flow planning, the Group enters into foreign currency forward contracts aimed at reducing and/or managing the adverse impact of changes in foreign exchange rates on financial performance and cash flows. Foreign currency denominated borrowings account for 30% and 32% of total consolidated borrowings as of June 30, 2020 and December 31, 2019.

Presented below are the Group's foreign currency denominated financial assets and liabilities as of June 30, 2020 and December 31, 2019, translated to Philippine Peso:

	June 30, 2020		December 31, 2019	
	US Dollar	Philippine Peso equivalent ¹	US Dollar	Philippine Peso equivalent ²
Financial assets:				
Cash and cash equivalents	\$87,312	P4,350,757	\$43,352	P2,195,129
Trade and other receivables	41	2,043	18,725	948,140
Total financial assets	88,191	4,394,558	62,077	3,143,269
Financial liabilities:				
Short-term loans	12,559	625,834	12,000	607,620
Trade and other payables	24,260	1,208,876	13,439	680,493
Long-term debt	300,000	14,949,000	300,000	15,190,500
Lease liabilities	426,736	21,264,255	443,002	22,431,406
Total financial liabilities	763,555	38,047,965	768,441	38,910,019
Total net financial liabilities	(\$675,364)	(P33,653,407)	(\$706,364)	(P35,766,750)

¹⁵¹ = 49.83

²⁵¹ = 50.635

The following table demonstrates the sensitivity to a reasonably possible change in the US dollar exchange rates, with all other variables held constant, of the Group's income before tax as of June 30, 2020:

	Increase/ (decrease) in US Dollar	Effect on income before tax
US Dollar denominated accounts	US Dollar strengthens by 5%	(₱1,682,670)
US Dollar denominated accounts	US Dollar weakens by 5%	1,682,670

The increase in US Dollar rate represents the depreciation of the Philippine Peso while the decrease in US Dollar rate represents appreciation of the Philippine Peso.

There is no other impact on the Group's equity other than those already affecting the interim consolidated statements of comprehensive income.

Credit risk

For its cash investments (including restricted portion), financial assets at FVTPL and receivables, the Group's credit risk pertains to possible default by the counterparty, with a maximum exposure equal to the carrying amount of these investments. With respect to cash investments and financial assets at FVTPL, the risk is mitigated by the short-term and/or liquid nature of its cash investments mainly in bank deposits and placements, which are placed with financial institutions and entities of high credit standing. With respect to receivables, credit risk is controlled by the application of credit approval, limit and monitoring procedures. It is the Group's policy to only enter into transactions with credit-worthy parties to mitigate any significant concentration of credit risk. The Group ensures that sales are made to customers with appropriate credit history and it has internal mechanisms to monitor the granting of credit and management of credit exposures.

Concentration Risk

Credit risk concentration of the Group's receivables according to the customer category is summarized in the following table:

	June 30, 2020	December 31, 2019
Power distribution:		
Industrial	₱4,707,726	₱5,554,969
Residential	1,244,019	1,825,217
Commercial	1,852,478	437,994
City street lighting	1,752,705	111,570
Power generation:		
Power supply contracts	3,536,952	1,481,760
Spot market	8,235,642	5,520,439
	₱21,329,522	₱14,931,949

Capital Management

Capital includes equity attributable to the equity holders of the parent. The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic

conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

The Group monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. The Group's policy is to keep the gearing ratio at 70% or below. The Group determines net debt as the sum of interest-bearing short-term and long-term loans (comprising long-term debt and lease liabilities) less cash and short-term deposits (including restricted cash).

Gearing ratios of the Group as of June 30, 2020 and December 31, 2019 are as follows:

	June 30, 2020	December 31, 2019
Short-term loans	₱23,008,334	₱10,335,420
Long-term obligations	216,867,534	222,761,266
Cash and cash equivalents	(39,829,177)	(37,433,929)
Restricted cash	(8,954,921)	(9,121,747)
Net debt (a)	191,091,770	186,541,010
Equity	128,446,176	133,643,011
Equity and net debt (b)	319,537,946	320,184,021
Gearing ratio (a/b)	59.80%	58.26%

No changes were made in the objectives, policies or processes during the periods ended June 30, 2020.

20. Financial Instruments

Fair Value of Financial Instruments

Fair value is defined as the amount at which the financial instrument could be sold in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

A financial instrument is regarded as quoted in an active market if quoted prices are readily available from an exchange, dealer, broker, pricing services or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. For a financial instrument with an active market, the quoted market price is used as its fair value. On the other hand, if transactions are no longer regularly occurring even if prices might be available and the only observed transactions are forced transactions or distressed sales, then the market is considered inactive. For a financial instrument with no active market, its fair value is determined using a valuation technique (e.g. discounted cash flow approach) that incorporates all factors that market participants would consider in setting a price.

Set out below is a comparison by category of carrying amounts and fair values of the Group's financial instruments whose fair values are different from their carrying amounts.

	June 30, 2020		December 31, 2019	
	Carrying Amounts	Fair Values	Carrying Amounts	Fair Values
Financial Asset				
PSALM deferred adjustment	₱2,661,658	₱2,392,843	₱3,183,080	₱2,846,279
Financial Liabilities				
Lease liabilities	₱43,015,526	₱40,212,762	₱44,789,644	₱38,495,450
Long-term debt - fixed rate	145,504,248	152,708,695	148,642,748	152,786,437
PSALM deferred adjustment	2,661,658	2,392,843	3,183,080	2,846,279
Long-term obligation on power distribution system	211,393	289,023	199,350	320,194
	₱191,392,825	₱195,603,323	₱196,814,822	₱194,448,360

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, trade and other receivables, short-term loans and trade and other payables. The carrying amounts of cash and cash equivalents, trade and other receivables, short-term loans and trade and other payables approximate fair value due to the relatively short-term maturity of these financial instruments.

Fixed-rate borrowings. The fair value of fixed rate interest-bearing loans is based on the discounted value of future cash flows using the applicable rates for similar types of loans.

Floating-rate borrowings. Since repricing of the variable-rate interest bearing loan is done on a quarterly basis, the carrying value approximates the fair value.

Lease liabilities. The fair value of the lease liabilities was calculated by discounting future cash flows using applicable interest rates.

Long-term obligation on PDS. The fair value of the long-term obligations on power distribution system is calculated by discounting expected future cash flows at prevailing market rates.

Customers' deposits. The fair value of bill deposits approximates the carrying values as these deposits earn interest at the prevailing market interest rate in accordance with regulatory guidelines. The timing and related amounts of future cash flows relating to transformer and lines and poles deposits cannot be reasonably and reliably estimated for purposes of establishing their fair values using an alternative valuation technique.

Financial assets at FVTPL. These equity securities are carried at fair value.

Derivative financial instruments. The fair value of forward contracts is calculated by reference to prevailing interest rate differential and spot exchange rate as of valuation date, taking into account its remaining term to maturity. The fair value of the embedded prepayment options is determined using Binomial Option Pricing Model which allows for the specification of points in time until option expiry date. This valuation incorporates inputs such as interest rates and volatility. The fair value of the interest rate swap and interest rate cap are determined by generally accepted valuation techniques with reference to observable market data such as interest rates.

The Group enters into non-deliverable short-term forward contracts with counterparty banks to manage its foreign currency risks associated with foreign currency-denominated liabilities and purchases.

The Group also entered into an interest rate swap agreement to fully hedge its floating rate exposure on its foreign currency-denominated loan and par forward contracts to hedge the floating rate exposure on foreign-currency denominated payments.

The Group also entered into commodity swap contracts to hedge the price volatility of its forecasted coal purchases.

The movements in fair value changes of all derivative instruments for the nine-month period ended June 30, 2020 and for the year ended December 31, 2019 are as follows:

	2020	2019
At beginning of year	(₱2,385,997)	₱132,902
Net changes in fair value of derivatives designated as cash flow hedges	(759,376)	(2,515,732)
Net changes in fair value of derivatives not designated as accounting hedges	(30,428)	(3,889)
Fair value of settled instruments	(500,147)	722
At end of period	(₱3,675,948)	(₱2,385,997)

Fair Value Hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

As of June 30, 2020, the Group held the following financial instruments that are measured and carried or disclosed at fair value:

	Total	Level 1	Level 2	Level 3
Carried at fair value:				
Derivative liability	3,675,948	-	3,675,948	-
Disclosed at fair value:				
Lease liabilities	40,212,762	-	-	40,212,762
Long-term debt - fixed rate	152,708,695	-	-	152,708,695
Long-term obligation on PDS	289,023	-	-	289,023

During the nine-month period ended June 30, 2020, there were no transfers between level 1 and level 2 fair value measurements and transfers into and out of level 3 fair value measurement.

21. Leases

Set out below, are the carrying amounts of the Group's right-of-use assets and lease liabilities and the movements during the period:

	Land	Building	Power plant	Equipment & others	Total	Lease liabilities
As at January 1, 2020	₱2,730,076	₱230,234	₱33,575,200	₱117,602	₱36,653,112	₱44,789,644
Amortization expense	(49,496)	(9,583)	(547,257)	(8,769)	(615,105)	–
Interest expense	–	–	–	–	–	1,743,694
Payments	–	–	–	–	–	(3,803,728)
Others	–	–	–	–	–	285,915
June 30, 2020	₱2,680,580	₱220,651	₱33,027,943	₱108,833	₱36,038,007	₱43,015,526

Set out below, are the amounts recognized in the unaudited condensed consolidated statements of income for the six months ended June 30, 2020:

Amortization expense of right-of-use assets	₱615,105
Interest expense on lease liabilities	1,743,694
Rent expense - short-term leases	35,621
	₱2,394,420

22. Retained Earnings

- On March 6, 2020, the BOD approved the declaration of regular cash dividends of ₱1.18 a share (₱8.68 billion) to all stockholders of record as of March 20, 2020. These dividends were paid on April 3, 2020.
- The balance of retained earnings includes the accumulated equity in net earnings of subsidiaries, associates and joint arrangements. Such amounts are not available for distribution until such time that the Company receives the dividends from the respective subsidiaries, associates and joint arrangements.

23. Disclosures

1. COVID 19

In a move to contain the COVID-19 outbreak, on March 13, 2020, the Office of the President of the Philippines issued a Memorandum directive to impose stringent social distancing measures in the National Capital Region effective March 15, 2020. On March 16, 2020, Presidential Proclamation No. 929 was issued, declaring a State of Calamity throughout the Philippines for a period of six (6) months and imposed an enhanced community quarantine (ECQ) throughout the island of Luzon until April 12, 2020, as subsequently extended to April 30, 2020. This was further extended to May 15, 2020 in selected areas including the National Capital Region. These measures have caused disruptions to businesses and economic activities, and its impact on businesses continue to evolve.

The Group is operating normally but at a lower energy dispatch level because of the decreased demand during the ECQ. In addition, because of the decrease in energy demand, market prices are down. Furthermore, collections are not expected to be made on their original due dates because of the staggered payment scheme implemented by the Energy Regulatory Commission with respect to the consumers' energy bills.

Considering the evolving nature of this outbreak, the Group will continue to monitor the situation in subsequent periods.

2. Seasonality of Interim Operations

Operations of hydropower plants are generally affected by climatic seasonality. Seasonality and location have a direct effect on the level of precipitation. In Luzon where rainy and summer seasons are more pronounced, higher rainfall is normally experienced in the months of June to September. As such, the hydropower plants located in Luzon operate at their maximum capacity during this period. In contrast, the hydropower plants in Mindanao experience a well-distributed rainfall throughout the year, with a slightly better precipitation during the months of December to April. This precipitation seasonality greatly affects subsidiary companies HI, HSI, Hedcor Tudaya, Hedcor Sabangan and LHC, which operate 'run-of-river' hydropower plants since these plants do not have any means to impound water.

Any unexpected change in the seasonal aspects will have no material effect on the Group's financial condition or results of operations.

3. Pagbilao IPP Administration Agreement

Therma Luzon, Inc. and PSALM executed the IPP Administration Agreement wherein PSALM appointed TLI to manage the 700MW contracted capacity of NPC in the coal-fired power plant in Pagbilao, Quezon.

Under the IPP Administration Agreement, TLI has the right to receive, manage and control the capacity of the power plant for its own account and at its own cost and risk; and the right to receive the transfer of the power plant at the end of the IPP Administration Agreement for no consideration.

The IPP Administration Agreement includes the following obligations TLI would have to perform until the transfer date of the power plant (or the earlier termination of the IPP Administration Agreement):

- a. Supply and deliver all fuel for the power plant in accordance with the specifications of the original Energy Conservation Agreement (ECA); and
- b. Pay to PSALM the monthly payments (based on the bid) and energy fees (equivalent to the amount paid by NPC to the IPP).

In view of the nature of the IPP Administration Agreement, the arrangement has been considered as a finance lease. Accordingly, TLI recognized the related liability equivalent to the present value of the minimum monthly payments using TLI's incremental borrowing rates of 10% and 12% for dollar and peso payments, respectively.

The present value of the future minimum monthly dollar and peso payments under the IPP Administration Agreement as of June 30, 2020:

Present value of minimum monthly payments to PSALM	₱40,899,233
Less: Current portion	(6,685,978)
<u>Noncurrent portion of lease liability</u>	<u>₱ 34,213,255</u>

4. Property, Plant and Equipment

During the nine-month period ended June 30, 2020, the Group's additions to property, plant and equipment amounted to ₱820.7 million.

5. Dividends to Non-controlling Interests

The Group's material partly-owned subsidiaries, namely GMCP and VECO, paid cash dividends amounting to ₱952.7 million and ₱1.80 billion to non-controlling interests during the six-month periods ended June 30, 2020 and 2019, respectively.

6. Material Events and Changes

Mekong Transaction

On April 1 2020, the Group disclosed that it was informed by AboitizPower International Pte. Ltd. ("AboitizPower Intl.") that its planned acquisition of a 100% ownership interest in Mekong Wind Pte. Ltd. from Armstrong Southeast Asia Clean Energy Fund Pte. Ltd. ("AAM") was not completed due to a condition precedent being unmet by the agreed longstop date. As a result, AboitizPower Intl. decided to hold-off the transaction.

AboitizPower Intl. is in discussions with AAM to revisit the acquisition at a future date.

The termination of the transaction has no impact to the Group's existing operations and financial performance.

₱9.55 billion bond issuance

The Company issued the fourth and last tranche of its ₱30 billion debt securities program, equivalent to ₱9.55 billion in July (the “Series E and F Bonds”). The Fixed Rate “Series E and F Bonds” has an interest rate of 3.125% and 3.935% per annum maturing in 2022 and 2025 respectively. The bonds have been rated PRS Aaa by PhilRatings.

Except for the above developments and as disclosed in some other portions of this report, no other significant event occurred that would have a material impact on the registrant and its subsidiaries, and no other known trend, event or uncertainty came about that had or were reasonably expected to have a material favorable or unfavorable impact on revenues or income from continuing operations, since the end of the most recently completed fiscal year. There were also no significant elements of income or loss that did not arise from the continuing operations of the registrant and its subsidiaries.

Other than those disclosed above, no material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships with unconsolidated entities or other persons entities or other persons were created during the interim period. There were also no events that would trigger substantial direct or contingent financial obligations or cause any default or acceleration of an existing obligation.

Likewise, there were no other material changes made in such items as: accounting principles and practices, estimates inherent in the preparation of unaudited interim condensed financial statements, status of long-term contracts, changes in the composition of the issuer, and reporting entity resulting from business combinations or dispositions.

Lastly, there were no changes in estimates of amounts reported in prior interim period and financial year that would have a material effect in the current interim period.

7. Material Adjustments

There were no material, non-recurring adjustments made during period that would require appropriate disclosures. All other adjustments are of a normal recurring nature.

8. Contingencies

The Group is a party to certain proceedings and legal cases with other parties in the normal course of business. The ultimate outcome of these proceedings and legal cases cannot be presently determined. Management, in consultation with its legal counsels, believes that it has substantial legal and factual bases for its positions and is currently of the opinion that the likely outcome of these proceedings and legal cases will not have a material adverse effect on the Group’s financial position and operating results. It is possible, however, that the future results of operations could be materially affected by changes in estimates or in the effectiveness of the strategies relating to these proceedings and legal cases.

The Company obtained Standby Letters of Credit and is acting as surety for the benefit of certain associates and a subsidiary in connection with loans and credit accommodations.

SCHEDULE A - USE OF PROCEEDS

(Amounts are in thousands)

1) Ten Billion Fixed Rate Bonds issued in 2014

As of December 31, 2016, the proceeds from the 2014 bonds were fully utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus)	Actual Usage
400 MW (net) Pulverised Coal-Fired Expansion Unit 3 in Pagbilao, Quezon	₱4,100,000	₱3,917,722
68 MW Manolo Fortich Hydropower Plant	3,600,000	2,253,450
300 MW Cebu Coal	500,000	527,859
300 MW Davao Coal	500,000	1,698,469
14 MW Sabangan Hydropower Plant	1,300,000	1,602,500
TOTAL	₱10,000,000	₱10,000,000

2) Series "A" of the Thirty Billion Shelf Registration issued in 2017

As of December 31, 2019 the proceeds from the 2017 bonds were fully utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus)	Actual Usage
Equity infusions into GNPD in 2017	₱2,206,373	₱1,255,745
Equity infusions into GNPD in 2018	764,395	1,711,317
Bond issuance costs	29,232	32,938
TOTAL	₱3,000,000	₱3,000,000

3) Series "B" and "C" of the Thirty Billion Shelf Registration issued in 2018

As of June 30, 2020 the proceeds from the 2018 bonds were fully utilized for the following:

Name of Project	Projected Usage (Per Prospectus)	Actual Usage
Refinancing of the Medium-Term Loan of Therma Power, Inc.	₱8,700,000	₱8,700,000
Bond issuance costs	118,868	121,924
General corporate purposes	1,381,132	1,378,076
TOTAL	₱10,200,000	₱10,200,000

4) Series "D" of the Thirty Billion Shelf Registration issued in 2019

As of December 31, 2019, the proceeds from the 2019 bonds were fully utilized for the following:

Name of Project	Projected Usage (Per Prospectus)	Actual Usage
Repayment of short-term loan.	₱7,161,972	₱7,250,000
Bond issuance costs	88,028	-
TOTAL	₱7,250,000	₱7,250,000

SCHEDULE B – RELEVANT FINANCIAL RATIOS

	Formula	Jun 30, 2020	Dec 31, 2019
LIQUIDITY RATIOS

PART I--FINANCIAL INFORMATION

Item 1. Financial Statements.

Please refer to the financial statements and schedules attached herewith.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of Aboitiz Power Corporation's (AboitizPower, Parent, or the Company) consolidated financial condition and results of operations should be read in conjunction with the consolidated financial statements and accompanying schedules and disclosures set forth elsewhere in this report.

Top Five Key Performance Indicators

Management uses the following indicators to evaluate the performance of the Company and its subsidiaries (the Company and its subsidiaries are hereinafter collectively referred to as the "Group"):

1. **Share in Net Earnings of Associates and Joint Ventures.** This represents the Group's share in the undistributed earnings or losses of its investees for each reporting period subsequent to the acquisition of said investment, net of goodwill impairment cost, if any. It also indicates the profitability of the investment and investees' contribution to the Group's net income.

Goodwill is the difference between the purchase price of an investment and the investor's share in the value of the net identifiable assets of the investee at the date of acquisition.

Manner of Computation:

Investee's Net Income (Loss) x Investor's % ownership - Goodwill Impairment Cost

2. **Earnings before Interest, Taxes, Depreciation, and Amortization (EBITDA).** The Company calculates EBITDA as earnings before extraordinary items, net finance expense, income tax provision, depreciation, and amortization. It provides management and investors with a tool for determining the ability of the Group to generate cash from operations to cover financial charges and income taxes. It is also a measure to evaluate the Group's ability to service its debts.
3. **Cash Flow Generated.** Using the Consolidated Statement of Cash Flows, management determines the sources and usage of funds for the period and analyzes how the Group manages its profit and uses its internal and external sources of capital. This aids management in identifying the impact on

cash flow when the Group's activities are in a state of growth or decline, and in evaluating management's efforts to control the impact.

4. **Current Ratio.** Current Ratio is a measurement of liquidity, calculated by dividing total current assets by total current liabilities. It is an indicator of the Group's short-term debt-paying ability. The higher the ratio, the more liquid the Group.
5. **Debt-to-Equity Ratio.** Debt-to-Equity Ratio indicates how leveraged the Group is. It compares assets provided by creditors to assets provided by shareholders. It is determined by dividing total liabilities by stockholders' equity.

Nine-Month Period Ended September 30, 2020 versus Nine-Month Period Ended September 30, 2019

The table below shows the comparative figures of the key performance indicators for the nine (9) months of 2020 and 2019 and as of December 31, 2019:

Key Performance Indicators	September 2020	September 2019	December 2019
	(INTERIM)	(INTERIM)	
<i>Amounts in thousands of ₱s, except for financial ratios</i>			
SHARE IN NET EARNINGS OF ASSOCIATES AND JOINT VENTURES	1,709,968	2,812,358	3,813,962
EBITDA	30,449,053	34,707,402	45,005,022
CASH FLOW GENERATED:			
Net cash flows from operating activities	23,593,695	31,520,771	39,356,962
Net cash flows used in investing activities	(4,805,451)	(29,553,681)	(34,060,584)
Net cash flows used in financing activities	(18,418,649)	(17,358,201)	(14,376,055)
Net (Decrease)/Increase in Cash & Cash Equivalents	369,595	(15,391,111)	(9,079,677)
Cash & Cash Equivalents, Beginning	37,433,929	46,343,041	46,343,041
Cash & Cash Equivalents, End	38,039,586	31,478,303	37,433,929
CURRENT RATIO	1.28		1.50
DEBT-TO-EQUITY RATIO	2.14		2.07

- Share in net earnings in associates and joint ventures for the first nine months of 2020 decreased by 39% compared to the same period last year. The decrease was mainly due to lower income contribution from SN Aboitiz Power-Magat, Inc. (SN Aboitiz Power-Magat) resulting from a reduction in volume sold caused by reduced water levels.
- EBITDA for the first nine months of 2020 decreased by 12%. This was due to lower demand resulting from the imposition of COVID-19 related quarantine measures. EBITDA was also affected by plant outages during the period, which were partly offset by lower purchased power cost and additional new capacities from Therma Visayas, Inc. (TVI).
- Cash and cash equivalents as of 30 September 2020 increased by ₱606.00 million (mn) compared to the amount as of end-2019. This was mainly due to Company's retail bond issuance in June 2020 which was partly offset by principal payments made on existing loans.
- Current Ratio as of September 30, 2020 was at 1.28x, compared to 1.50x as of December 31, 2019. The decline was primarily due to maturing bonds of the Company that were reclassified from non-current, as well as additional short-term loans availed of by Subsidiaries during the first nine months of 2020.

- Debt-to-Equity Ratio as of September 30, 2020 was at 2.14x, higher than the 2.07x recorded at the end of 2019.

Results of Operations

The Company reported net income for the first nine months of 2020 of ₱7.01 bn, which was 48% lower than the ₱13.45 bn reported for the same period in 2019. This translated to earnings per share of ₱0.95 for the period. The Company recognized non-recurring net gains of ₱528 mn during the relevant period, compared to non-recurring net losses of ₱220 mn during the corresponding period last year, due to net foreign exchange gains on the revaluation of dollar denominated liabilities. Without these one-off gains, the Company's core net income for the first nine months of 2020 was ₱6.5 bn, 53% lower than the ₱13.7 bn recorded during the same period last year. This was due to a decline in EBITDA resulting from lower demand caused by the enforcement of COVID-related community quarantines, as well as lower water inflow. The Company also recorded additional tax expenses during the first nine months of 2020 following the expiration of the income tax holiday (ITH) incentives of Therma South, Inc. (TSI) and GNPowder Mariveles Energy Center Ltd. Co. (GMEC, formerly GNPowder Mariveles Coal Plant Ltd. Co.), as well as additional interest expenses from the Company's bonds and loans that were availed of during the fourth quarter of 2019.

Power Generation and Retail Electricity Supply (RES)

AboitizPower's generation and retail supply business recorded EBITDA of ₱24.9 bn during the first nine months of 2020, 13% lower than the ₱28.7 bn recorded during the corresponding period last year. The variance was primarily due to reduced demand resulting from the enforcement of COVID-related community quarantines and to lower water inflow.

Capacity sold for the first three quarters of 2020 increased by 9% to 3,394 megawatts (MW) from 3,123 MW in the same period in 2019. This was due to increased contracting levels from the new capacity of TVI and additional portfolio contracts. Despite the increase in contracting levels, the reduced demand brought about by the COVID-19 pandemic and the prolonged outage of TSI resulted in an 8% decline in energy sold during the first nine months of 2020 to 16,689 gigawatt-hours (GWh), compared to from 18,083 GWh during the same period in 2019.

Power Distribution

For the first nine months of 2020, AboitizPower's distribution business recorded EBITDA of ₱5.8 bn, 3% lower than the ₱6.0 bn recorded during the same period in 2019. Energy sales decreased by 8% to 3,994 GWh during the first three quarters of 2020, compared to 4,341 GWh during the corresponding period in 2019. This was driven by lower energy consumption from the Commercial and Industrial customer segments resulting from the enforcement of the COVID-related community quarantines.

Material Changes in Line Items of Registrant's Statements of Income and Comprehensive Income

Consolidated Statements of Income

Net income attributable to equity holders of the Parent Company decreased by ₱6.45 bn, or 48%. The various movements in line items are shown below to account for the decrease:

Net Income Attributable to Equity Holders of the Parent (January - September 2019)	₱13,454,956
Decrease in operating revenues	(14,318,485)
Decrease in operating expenses	10,266,297
Decrease in interest income	(520,216)
Increase in interest expense	(366,859)
Decrease in share in net earnings of associates and joint ventures	(1,102,390)
Increase in other income	1,309,948
Increase in provision for taxes	(2,277,078)
Decrease in income attributable to non-controlling interests	559,528
Total	<u>(6,449,255)</u>
Net Income Attributable to Equity Holders of the Parent (January - September 2020)	<u>₱7,005,701</u>

Operating Revenues

(15% decrease from ₱94.68 bn to ₱80.36 bn)

The decrease in operating revenues was primarily due to lower demand brought about by the COVID-19 pandemic and resulting community quarantines, lower spot prices and indices, and lower contract rates.

These were partially offset by new capacities from TVI which went online in 2020.

Operating Expenses

(14% decrease from ₱72.45 bn to ₱62.18 bn)

The decrease in operating expenses was mainly due to the lower cost of purchased power and of generated power during the first half of 2020 brought about by COVID-19.

Interest Income

(49% decrease from ₱1.06 bn to ₱540.00 mn)

The decrease in interest income during the first nine months of 2020 compared to the same period in 2019 was primarily due to lower interest rates on placements.

Interest Expense and other financing costs

(4% increase from ₱10.25 bn to ₱10.61 bn)

Interest expense increased during the first nine months of 2020 compared to the same period in 2019 due to the interest and financing costs on AboitizPower's ₱7.25 bn and ₱9.55 bn retail bonds issued in October 2019 and July 2020 respectively, as well as from additional short-term loan availments during the relevant period.

Share in Net Earnings of Associates and Joint Ventures

(39% decrease from ₱2.81 bn to ₱1.71 bn)

Share in net earnings in associates and joint ventures for the first nine months of 2020 decreased by 39% compared to the same period in 2019. The decrease was mainly due to lower income contributions from SN Aboitiz Power-Magat. This was primarily driven by a reduction in volume sold due to reduced water levels.

Other Income (Expenses) – net

(57% increase from ₱2.30 bn to ₱3.61 bn other income)

The increase in other income during the first nine months of 2020 compared to the same period in 2019 was mainly due to foreign exchange gains on US Dollar denominated liabilities resulting from the weakening of the US Dollar as against the Philippine Peso.

Provision for Taxes

(91% increase from ₱2.51 bn to ₱4.79 bn)

The increase in provision for taxes was due to the additional taxes following the expiration of the ITH incentives of TSI and GMEC.

Changes in Registrant’s Resources, Liabilities and Shareholders’ Equity**Assets**

Total assets as of September 30, 2020 (compared to December 31, 2019) decreased by ₱6.36 bn, or 2%. The major movements of the accounts leading to the decrease were as follows:

- i. Cash and cash equivalents increased by ₱606.00 mn, or 2% (from ₱37.43 bn to ₱38.04 bn). This was due to the additional loan availments by the Group.
- ii. Trade and other receivables increased by ₱484.00 mn, or 2% (from ₱21.75 bn to ₱22.23 bn), primarily due to the impact of the extension of bill payments as per Energy Regulatory Commission (ERC) and Department of Energy (DOE) advisories.
- iii. Inventories decreased by ₱82.00 mn or 1% (from ₱6.63 bn to ₱6.55 bn). This was mainly driven by a decrease in Coal inventory.
- iv. Other current assets increased by ₱4.10 bn, or 37% (from ₱11.08 bn to ₱15.19 bn). This was mainly driven by the reclassification of TVI’s restricted cash from Other noncurrent assets.
- v. Investments and advances increased by ₱2.82 bn, or 5% (from ₱60.88 bn to ₱63.70 bn). This was mainly driven by new capital contributions to GN Power Dinginin Ltd. Co.
- vi. Property, plant and equipment decreased by ₱5.01 bn, or 2% (from ₱209.52 bn to ₱204.51 bn). This was primarily due to the depreciation of existing assets.
- vii. Intangible assets decreased by ₱1.96 bn, or 4% (from ₱46.71 bn to ₱44.75 bn). This was primarily due to the amortization of existing assets.
- viii. Financial assets at fair value through profit or loss increased by ₱5 mn, or 135% (from ₱4 mn to ₱9 mn). This was mainly due to mark-to-market valuations.
- ix. Deferred income tax assets decreased by ₱1.06 bn, or 38% (from ₱2.79 bn to ₱1.73 bn). This was mainly due to the reduction of the deferred tax benefits recognized by Therma Luzon, Inc. (TLI) on its net operating loss.
- x. Other noncurrent assets decreased by ₱6.18 bn, or 46% (from ₱13.52 bn to ₱7.34 bn). This was mainly due to the decrease in Input VAT, regular reduction in Power Sector Assets and Liabilities Management Corporation (PSALM) deferred adjustments, and the reclassification of TVI’s restricted cash to Other current assets.

Liabilities

Compared to December 31, 2019, total liabilities as of September 30, 2020 decreased by ₱1.40 bn, or 1%. The major movements of accounts leading to the decrease were as follows:

- i. Short-term loans increased by ₱3.16 bn, or 31% (from ₱10.34 bn to ₱13.49 bn). This was mainly due to new loans availed of by the Group for working capital purposes.
- ii. Trade and other payables increased by ₱1.66 bn, or 7% (from ₱22.38 bn to ₱24.03 bn). This was primarily due to the reclassification of TVI's Other noncurrent liabilities to current. These were partly offset by the reduction of trade payables and accrued expenses.
- iii. Income tax payable increased by ₱685.00 mn, or 134% (from ₱510.00 mn to ₱1.19 bn). This was mainly due to the expiration of the ITH incentives of TSI and GMEC.
- iv. Decommissioning liability increased by ₱899.00 mn, or 25% (from ₱3.57 bn to ₱4.47 bn). This was mainly due to the recognition of additional decommissioning provisions on power plant assets.
- v. Long-term debt (current and non-current portions) increased by ₱770.00 mn (from ₱177.97 bn to ₱178.74 bn). This was mainly due to Company's retail bond issuance in June 2020, which was partly offset by principal payments made on existing loans.
- vi. Lease liabilities (current and noncurrent portions) decreased by ₱4.28 bn (from ₱44.79 bn to ₱40.51 bn), as TLI made timely payments on its obligation to PSALM.
- vii. Long-term obligation on power distribution system (current and noncurrent portions) increased by ₱18.00 mn, or 9% (from ₱199.00 mn to ₱217.00 mn), as interest accretion was regularly recognized.
- viii. Net derivative liabilities increased by ₱737.00 mn (from ₱2.39 bn to ₱3.12 bn) during the first nine months of 2020 due to hedging losses.
- ix. Deferred income tax liabilities increased by ₱58.00 mn, or 7% (from ₱848.00 mn to ₱906.00 mn), mainly due to fair value changes of the Group's foreign currency denominated assets and liabilities.
- x. Other noncurrent liabilities decreased by ₱5.28 bn, or 78% (from ₱6.81 bn to ₱1.53 bn), mainly due to the regular payments of PSALM deferred adjustments and the reclassification of TVI's Other noncurrent liabilities to current.

Equity

Equity attributable to equity shareholders of the Parent Company decreased by 3% (from ₱125.54 bn at the end of 2019 to ₱121.24 bn as of September 30, 2020) after the declaration of dividends in March 2020, net of comprehensive income recognized during the first nine months of 2020. Cumulative translation adjustments decreased by ₱2.37 bn, due to the downward net adjustment in the fair value of the Group's foreign currency forward and commodity swap contracts designated as cash flow hedges, as well as the net assets translation effect of GMEC and Luzon Hydro Corporation during the period.

Material Changes in Liquidity and Cash Reserves of Registrant

As of September 30, 2020, the Group's cash and cash equivalents increased by 2% to ₱38.04 bn, from ₱37.43 bn as of December 31, 2019.

The reduction in demand for power brought about by COVID-19 related community quarantines contributed to lower cash generated from operations during the first nine months of 2020 by ₱7.93 bn, which was a 25% decrease compared to the same period in 2019.

Net cash flows used in investing activities decreased to ₱4.81 bn during the first nine months of 2020, compared to ₱29.55 bn for the same period in 2019, which was mainly due to the ₱24.95 bn AA Thermal acquisition taken up during 2019.

The net cash flows used in financing activities as of September 30, 2020 increased by ₱1.06 bn compared to the same period in 2019, primarily due to payments by the Group of principal amortizations on various loans.

Financial Ratios

As of September 30, 2020, current assets increased by 7% and current liabilities increased by 25% compared to the 31 December 2019. The current ratio as of September 30, 2020 was at 1.28x compared to 1.50x as of December 31, 2019.

Consolidated debt to equity ratio as of September 30, 2020 was at 2.14x, higher than the 2.07x recorded at the end of 2019. This was due to a 1% decrease in total liabilities during the first nine months of 2020, coupled with a 4% decrease in equity during the same period.

Outlook for the Upcoming Year/ Known Trends, Events, and Uncertainties which may have Material Impact on the Registrant

AboitizPower is focused on addressing the needs of its markets, namely: (1) reliable supply, at a (2) reasonable cost, and with (3) minimal impact on the environment and communities. The Company believes that there is no single technology that completely addresses the country's energy requirements; and that to address the deficiency, a mix of power generation technologies is necessary. Thus, AboitizPower continues to pursue both renewable projects and thermal technologies where and when it makes sense.

Despite increased competition in the power generation market, the Company believes that it has built the foundation to sustain its long term growth, as seen in its pipeline of six new power generation projects: (1) the Naga Power Plant Complex project; (2) the GNPowder Dinginin project; (3) the SNAP Magat Floating Solar project; (4) the APRI steam drilling project; (5) the TMI Hybrid Battery Energy Storage System ("BESS") project; and (6) the SN Aboitiz Power-Magat BESS project.

The Naga Power Plant Complex's six diesel engine units have all passed the grid compliance tests of the National Grid Corporation of the Philippines (NGCP) and were successfully rehabilitated in January 2020. The units have demonstrated a combined net capacity of 39 MW, almost twice the output of the units prior to Therma Power Visayas, Inc. (TPVI) taking over the complex. During the second quarter of 2020, TPVI obtained a Provisional Authority to Operate from the ERC which allowed TPVI to commence commercial operations. The plant began commercial operations on August 7, 2020 and was first dispatched based on an offer into the Wholesale Electricity Spot Market (WESM) on August 26, 2020. The plant is scheduled for NGCP ASPA testing this November 2020.

The GNPowder Dinginin project is in the final stages of construction but continues to face challenges due to the COVID-19 pandemic and the imposition of the travel ban from China. Project timelines have been impacted due to the imposition of travel restrictions and delays in the delivery of materials. However, with the strict COVID-19 measures implemented on the site, key technical personnel and materials mobilization have now been largely achieved. Due to these circumstances, Unit 1 is now scheduled to commence commercial operations by the second quarter of 2021. Unit 2 is expected to commence commercial operations by the third quarter of 2021.

In June 2019, SN Aboitiz Power-Magat switched on its first 200kW floating solar project over the Magat reservoir in Isabela. This was the first non-hydro renewable energy project of SNAP, which was looking at other renewables and complementary technologies to expand its portfolio. The SN Aboitiz Power-Magat floating solar project has proven its viability, both technical and commercial. On October 21, 2020, the SNAP Board approved for the project to proceed to engineering design for 67 MW.

In relation to AboitizPower's existing capacity, the steam field operator for AP Renewables Inc. (APRI) has commenced the drilling of 12 new wells, which are expected to result in a minimum 50 MW of additional steam capacity by 2022. For Tiwi, the first well drilled was commissioned in December 2019 and was tested at 12.11 MW in January 2020. For MakBan, the first make-up well is targeted by January 2021 with a capacity of 5 to 7 MW. The Company expects to complete the drilling for incremental steam capacity by 2022. The drilling project is significant as it will allow the Company to optimize APRI's current net sellable capacity of 290 MW.

In November 2020, AboitizPower announced its two battery projects. The TMI Hybrid BESS project ("TMI BESS") is located in Maco, Compostela Valley. It has a storage capacity of 49 MW and is intended to be used for ancillary services. Development activities are ongoing to integrate the battery energy storage system with Therma Marine's Maco oil barge. The TMI BESS project is targeted to commence commercial operations in 2022. The SN Aboitiz Power-Magat BESS project ("SNAP BESS") is located in Ramon, Isabela. It has a storage capacity of 20 MW and will be used to provide ancillary services. The project is currently in the pre-construction phase, with the next step being the engagement of a preferred EPC contractor for early works. The SNAP BESS project is targeted to commence commercial operations in 2023.

The TMI BESS and SNAP BESS projects are of strategic significance to AboitizPower as they optimize the capacity of the Company's energy portfolio and build its capability to meet the energy demands of the future, as well as serving as a model for its future battery investments.

As of September 2020, AboitizPower owns 4,435 MW of net attributable capacity, of which 3,499 MW is currently operating.

AboitizPower fully supports the DOE's coal moratorium efforts to make the Philippine energy system more flexible, resilient, and sustainable. The Company has been a pioneer of renewable energy in the country and its diversification into thermal technologies was primarily driven by the country's need for a reliable, accessible, and affordable power supply.

AboitizPower remains committed to growing its attributable capacity, which it expects will be sourced from a portfolio consisting of both renewables and selective baseload builds. In terms of renewable energy, the Company aims to maximize opportunities from the implementation of the Renewable Portfolio Standards ("RPS") by the DOE starting this year. In line with DOE's aspirational goal of a 35% share in renewable energy utilization by 2030, RPS is a market-based policy that mandates power distribution utilities, electric cooperatives, and retail electricity suppliers to source an agreed portion of their energy supplies from renewable energy facilities. The Company will continue to pursue its international aspirations, with a continued focus on renewable energy projects in wind, hydro, solar, and gas in the ASEAN region. With all of these combined, it is expected that the Company's portfolio ratio will be close to a 50:50 Cleanenergy (renewable energy) and thermal capacity mix by the end of the current decade.

AboitizPower believes that it is well-positioned to take advantage of opportunities arising from developments in the power industry. The Company expects its financial condition to give it the agility to create or acquire additional generating capacity over the next few years.

Despite the challenges posed by the global pandemic and the currently challenging business situation, the Company continues to operate with its business continuity plans in force, in accordance with the

protocols and guidelines of the government's community quarantine. The Company will continue to provide the country with the much-needed power supply for hospitals, government institutions, and critical businesses, while ensuring the safety of its teams, partners, and communities.

Other known trends, events, uncertainties which may have a material impact on AboitizPower have been discussed extensively in sections of the Company's Information Statement (e.g. for an extensive discussion on regulatory issues, see Effects of Existing or Probable Government Regulations on the Business on page 80 of the Company's 2020 Definitive Information Statement).

PART II--OTHER INFORMATION

There are no significant information on the company which requires disclosure herein and/or were not included in SEC Form 17-C.

ABOITIZ POWER CORPORATION AND SUBSIDIARIES

UNAUDITED INTERIM CONDENSED NOTES TO FINANCIAL STATEMENTS

(Amounts in Thousands, Except Earnings per Share and Exchange Rate Data and When Otherwise Indicated)

1. Corporate Information

Aboitiz Power Corporation (the Company) was incorporated in the Philippines and registered with the Securities and Exchange Commission on February 13, 1998. The Company is a publicly-listed holding company of the entities engaged in power generation and power distribution in the Aboitiz Group. As of September 30, 2020, Aboitiz Equity Ventures, Inc. (AEV, also incorporated in the Philippines) owns 76.98% of the Company. The ultimate parent of the Company is Aboitiz & Company, Inc. (ACO).

The registered office address of the Company is 32nd street, Bonifacio Global City, Taguig City, Metro Manila.

2. Group Information

The unaudited interim condensed consolidated financial statements comprise the financial statements of the Company, subsidiaries controlled by the Company and joint operation that are subject to joint control (collectively referred to as “the Group”).

The following are the subsidiaries as of September 30, 2020 and December 31, 2019:

	Nature of Business	September 30, 2020		December 31, 2019

3. Basis of Financial Statement Preparation and Changes in Accounting Policies

Basis of Financial Statement Preparation

The accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with Philippine Accounting Standard (PAS) 34, *Interim Financial Reporting*. Accordingly, the unaudited interim condensed consolidated financial statements do not include all of the information and disclosures required in the annual audited consolidated financial statements, and should be read in conjunction with the Group's annual audited consolidated financial statements as of and for the year ended December 31, 2019, which have been prepared in accordance with Philippine Financial Reporting Standards (PFRSs).

The unaudited interim condensed consolidated financial statements of the Group are presented in Philippine peso, the Company's functional currency, and rounded to the nearest thousands except for earnings per share and exchange rates and when otherwise indicated.

On October 28, 2020, the Audit Committee of the Board of Directors (BOD) approved and authorized the release of the accompanying unaudited interim condensed consolidated financial statements of the Group.

Changes in Accounting Policies

The accounting policies adopted are consistent with those of the previous financial year, except for the new and revised standards and Philippine Interpretations which were applied starting January 1, 2020. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

- Amendments to PFRS 3, *Definition of a Business*

The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

These amendments will apply on future business combinations of the Group.

- Amendments to PAS 1, *Presentation of Financial Statements*, and PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material*

The amendments provide a new definition of material that states "information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity."

The amendments clarify that materiality will depend on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements. A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users.

These amendments did not have an impact in the unaudited interim condensed consolidated financial statements as the Group's practice is generally align with the amendments.

- Amendments to PFRS 7, *Financial Instruments: Disclosures* and PFRS 9, *Financial Instruments, Interest Rate Benchmark Reform*

The amendments to PFRS 9 provide a number of reliefs, which apply to all hedging relationships that are directly affected by the interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainties about the timing and or amount of benchmark-based cash flows of the hedged item or the hedging instrument.

These amendments did not have an impact in the unaudited interim condensed consolidated financial statements.

- *Conceptual Framework for Financial Reporting issued on March 29, 2018*

The Conceptual Framework is not a standard, and none of the concepts contained therein override the concepts or requirements in any standard. The purpose of the Conceptual Framework is to assist the standard-setters in developing standards, to help preparers develop consistent accounting policies where there is no applicable standard in place and to assist all parties to understand and interpret the standards.

The revised Conceptual Framework includes new concepts, provides updated definitions and recognition criteria for assets and liabilities and clarifies some important concepts.

- Amendments to PFRS 16, *COVID-19-related Rent Concessions*

The amendments provide relief to lessees from applying the PFRS 16 requirement on lease modifications to rent concessions arising as a direct consequence of the COVID-19 pandemic. A lessee may elect not to assess whether a rent concession from a lessor is a lease modification if it meets all of the following criteria:

- The rent concession is a direct consequence of COVID-19;
- The change in lease payments results in a revised lease consideration that is substantially the same as, or less than, the lease consideration immediately preceding the change;
- Any reduction in lease payments affects only payments originally due on or before June 30, 2021; and
- There is no substantive change to other terms and conditions of the lease.

A lessee that applies this practical expedient will account for any change in lease payments resulting from the COVID-19 related rent concession in the same way it would account for a change that is not a lease modification, i.e., as a variable lease payment. The amendments are effective for annual reporting periods beginning on or after June 1, 2020. Early adoption is permitted.

The Group adopted the amendments beginning January 1, 2020. These amendments did not have an impact in the unaudited interim condensed consolidated financial statements.

Effective beginning on or after January 1, 2021

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance),

regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The adoption of the new standard is not expected to have an impact on the unaudited interim condensed consolidated financial statements of the Group as the Group is not into the business of providing insurance contracts.

4. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the Group's unaudited interim condensed consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosures of contingent liabilities. However, uncertainty about these assumptions could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in the future periods.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Judgments, key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting period are consistent with those applied in the most recent annual audited consolidated financial statements.

5. Cash and Cash Equivalents

	September 30, 2020	December 31, 2019
Cash on hand and in banks	₱14,508,649	₱14,177,919
Short-term deposits	23,530,937	23,256,010
	₱38,039,586	₱37,433,929

Cash in banks earn interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods depending on the immediate cash requirements of the Group and earn interest at the respective short-term deposits rates.

6. Trade and Other Receivables

	September 30, 2020	December 31, 2019
Trade receivables - net of allowance for expected credit losses	₱17,127,127	₱16,420,952
Others		
Dividends receivable	—	1,199,068
Advances to contractors	204,645	63,339
Non-trade receivable	3,811,828	2,972,536
Interest receivable	44,653	48,666
PSALM deferred adjustment	1,042,861	1,042,861
	₱22,231,114	₱21,747,422

Trade and other receivables are non-interest bearing and are generally on 10 - 30 days' term.

Advances to contractors refer to non-interest bearing advance payments made for project mobilization which are offset against progress billings to be made by the contractors.

Non-trade receivable relates mostly to advances to partners in GMEC which are subject to offset against any cash dividends declared by GMEC and due to the partners.

7. Other Current Assets

	September 30, 2020	December 31, 2019
Restricted cash	₱8,513,507	₱4,449,716
Input VAT	1,793,405	2,049,496
Prepaid tax	1,486,227	1,854,792
Advances to National Grid Corporation of the Philippines (NGCP)	2,132,100	1,727,028
Prepaid expenses	1,012,576	610,426
Others	249,315	391,947
	₱15,187,130	₱11,083,405

Restricted cash represents proceeds from sale of power under the control of trustees of TSI's lenders as per loan agreement. The asset will be used to pay the current portion of loans payable and interest payments in the following period.

Advances to NGCP pertain to the cost of construction and installation of substation and transmission facilities which are subject for reimbursement after completion of the project.

Prepaid expenses mainly include prepayments for insurance.

8. Investments and Advances

	September 30, 2020	December 31, 2019
Acquisition cost:		
Balance at beginning of the year	₱58,144,997	₱30,559,245
Additions during the period	2,252,987	27,591,092
Redemptions during the period	(6,939)	(5,340)
Balance at end of period	60,391,045	58,144,997
Accumulated equity in net earnings:		
Balance at beginning of the year	3,345,164	3,867,849
Share in net earnings	1,709,968	3,813,962
Transition adjustment	—	(18,691)
Dividends received or receivable	(898,059)	(4,317,956)
Balance at end of period	4,157,073	3,345,164
Share in net unrealized valuation gain on FVOCI investment of an associate	98,602	101,727
Share in actuarial gains on defined benefit plans of associates and joint ventures	(13,079)	(14,299)
Share in cumulative translation adjustments of associates and joint ventures	(406,560)	(153,485)
	64,227,081	61,424,104
Less allowance for impairment losses	568,125	568,125
Investments at equity	63,658,956	60,855,979
Advances	38,351	22,562
	₱63,697,307	₱60,878,541

2020

In 2020, the Group, through TPI and ATI, made capital contributions to GNPD amounting to ₱2.25 billion.

The Group's associates and joint ventures and the corresponding equity ownership as of September 30, 2020 are as follows:

	Nature of Business	Percentage of ownership
Manila-Oslo Renewable Enterprise, Inc. (MORE) ¹	Holding company	83.33
GNPower Dinginin Ltd. Co. (GNPD)* (Note 23)	Power generation	70.00
Hijos de F. Escaño, Inc. (Hijos)	Holding company	46.73
Mazzaraty Energy Corporation (MEC)	Retail electricity supplier	44.87
San Fernando Electric Light & Power Co., Inc. (SFELAPCO)	Power distribution	43.78
AA Thermal, Inc. (AA THERMAL) (Note 23)	Holding company	60.00
Pampanga Energy Ventures, Inc. (PEVI)	Holding company	42.84
La Filipina ElektriKa, Inc.*	Power generation	40.00
STEAG State Power, Inc. (STEAG)	Power generation	34.00
AEV Aviation, Inc. (AAI)	Service	26.69
Cebu Energy Development Corporation (CEDC)	Power generation	26.40
Redondo Peninsula Energy, Inc. (RPEI)*	Power generation	25.00
Southern Philippines Power Corporation (SPPC)	Power generation	20.00
Western Mindanao Power Corporation (WMPC)	Power generation	20.00

¹ Joint venture.

* No commercial operations as of September 30, 2020

The principal place of business and country of incorporation of the Group's associates and joint venture are in the Philippines.

The carrying values of investments, which are accounted for under the equity method follow:

	September 30, 2020	December 31, 2019
ATI	₱24,314,535	₱24,084,947
GNPD	18,141,634	17,172,530
MORE	11,286,200	10,180,552
STEAG	3,803,936	4,032,405
CEDC	4,006,231	3,447,491
RPEI	523,779	525,769
PEVI	606,487	508,895
SFELAPCO	423,280	372,917
Hijos	198,102	176,037
WMPC	156,749	142,577
SPPC	53,687	61,497
Others	144,336	150,362
	₱63,658,956	₱60,855,979

9. Joint Operations

Name of Joint Operation	Nature of Business	Percentage of Ownership
		September 30, 2020
Pagbilao Energy Corporation (PEC)	Power generation	50%

* PEC's principal place of business and country of incorporation is the Philippines;

The financial and operating activities of the operation are jointly controlled by the participating shareholders and are primarily designed for the provision of output to the shareholders.

The Group's share of assets, liabilities, revenue, expenses and cash flows of joint operations are included in the unaudited interim condensed consolidated financial statements on a line-by-line basis.

10. Intangible Assets

September 30, 2020

	Goodwill	Service concession rights	Franchise	Project development costs	Customer contracts	Software and licenses	Total

11. Trade and Other Payables

	September 30, 2020	December 31, 2019
Trade payables	P9,850,794	P10,885,721
Output VAT	3,034,196	3,022,048
Amounts due to contractors and other third parties	882,821	1,159,984
PSALM deferred adjustment	1,042,861	1,042,861
Accrued expenses:		
Interest	1,567,049	2,350,811
Materials and supplies cost	66,087	470,588
Taxes and fees	713,805	1,246,863
Claims conversion costs	96,137	102,808
Insurance	18,453	18,437
Dividends payable (see Note 22)	111,666	94,976
Unearned revenues	37,574	37,425
Customers' deposit	29,939	19,360
Nontrade	6,459,172	1,270,946
Others	123,347	653,292
	P24,033,901	P22,376,120

Trade payables are non-interest bearing and generally on 30-day terms.

Accrued taxes and fees represent accrual of real property tax, transfer tax and other fees.

Amounts due to contractors and other third parties include liabilities arising from the power plant construction.

Nontrade payables include amounts due to PSALM pertaining to Generation Rate Adjustment Mechanism (GRAM), Incremental Currency Exchange Rate Adjustment (ICERA), and Universal Charges.

Others include withholding taxes and other accrued expenses and are generally payable within 12 months from the balance sheet date.

12. Short-term Loans

		September 30, 2020	December 31, 2019
Peso loans - financial institutions -	2.00% - 4.92% in 2020		
unsecured	2.68% - 4.95% in 2019	P12,882,000	P9,727,800
Temporary advances		609,814	607,620
		P13,491,814	P10,335,420

The bank loans are unsecured short-term notes payable obtained from local banks. These loans are covered by the respective borrower's existing credit lines with the banks and are not subject to any significant covenants and warranties.

13. Long-term Debts

	2020 Interest Rate	September 30, 2020	December 31, 2019

		₱162,150,173	₱167,585,311

Loan covenants

The loan agreements on long-term debt of the Group provide for certain restriction with respect to, among others, mergers or consolidations or other material changes in their ownership, corporate set-up or management, investment and guaranties, incurrence of additional debt, disposition of mortgage of assets, payment of dividends, and maintenance of financial ratios at certain levels.

These restrictions and requirements were complied with by the Group as of September 30, 2020 and December 31, 2019.

14. Debt Securities

The Company registered and issued P10 billion worth of peso denominated fixed rate retail bonds on September 10, 2014.

On July 3, 2017, the Company issued the first tranche on the P30 billion bonds registered in June 2017.

In October 2018, the Company issued and registered a total of P10.20 billion bonds.

In October 2019, the Company issued and registered a total of P7.25 billion bonds.

In July 2020, the Company issued and registered a total of P9.55 billion bonds.

Terms of the bonds are as follows:

Maturity	Interest Rate (p.a.)	Amount
12-year bonds to mature on September 10, 2026	6.10%	P3,400,000
10-year bonds to mature on September 10, 2021	5.21%	P6,600,000
10-year bonds to mature on July 3, 2027	5.3367%	P3,000,000
5.25-year bonds to mature on January 25, 2024	7.51%	P7,700,000
7-year bonds to mature on October 25, 2025	8.51%	P2,500,000
7-year bonds to mature on October 14, 2026	5.28%	P7,250,000
2-year bonds to mature on July 6, 2022	3.13%	P9,000,000
5-year bonds to mature on July 6, 2025	3.94%	P550,000

15. Operating Expenses

For the period ended September 30

	2020	2019
Cost of purchased power	P23,608,193	P27,190,731
Cost of generated power	18,506,175	26,838,769
Depreciation and amortization	8,124,636	7,216,561
General and administrative	6,161,221	6,140,857
Operations and maintenance	5,781,274	5,060,878
	P62,181,499	P72,447,796

16. Other Income (Expenses)

	For the period ended September 30	
	2020	2019
Net foreign exchange gain (loss)	₱1,480,964	₱131,783
Surcharges	315,159	399,984
Non-utility operating income	887,435	118,862
Rental income	29,296	45,949
Write off of project costs and other assets	(7,240)	(18,466)
Losses on disposal of property, plant and equipment	(66,992)	(267,474)
Others - net	975,117	1,893,153
	₱3,613,739	₱2,303,791

Included in "Net foreign exchange gain (loss)" are the net gains and losses relating to currency forward transactions.

"Others" include other non-recurring items like sale of scrap and sludge oil in 2020 and reversal of APRI and TLI's liability to PSALM pertaining to GRAM and ICERA in 2019.

17. Earnings Per Common Share

Earnings per common share amounts were computed as follows:

	For the periods ended September 30	
	2020	2019
a. Net income attributable to equity holders of the parent	₱7,005,701	₱13,455
b. Average number of outstanding shares	7,358,604,307	7,358,604,307
Earnings per share (a/b)	₱0.95	₱1.83

There are no dilutive potential common shares as of September 30, 2020 and 2019.

18. Operating Segment Information

Operating segments are components of the Group that engage in business activities from which they may earn revenues and incur expenses, whose operating results are regularly reviewed by the Group's Chief Operating Decision Maker (CODM) to make decisions about how resources are to be allocated to the segment and assess their performances, and for which discrete financial information is available.

For purposes of management reporting, the Group's operating businesses are organized and managed separately according to services provided, with each segment representing a strategic business segment. The Group's identified operating segments, which are consistent with the segments reported to the BOD, which is the Group's CODM, are as follows:

- "Power Generation" segment, which is engaged in the generation and supply of power to various customers under power supply contracts, ancillary service procurement agreements and for trading in WESM;

- “Power Distribution” segment, which is engaged in the distribution and sale of electricity to the end-users; and
- “Parent Company and Others”, which includes the operations of the Company, retail electricity sales to various off takers that are considered to be eligible contestable customers and electricity related services of the Group such as installation of electrical equipment.

The power generation segment's revenue from contracts with customers is mainly from power supply contracts. Set out below is the disaggregation of the Group's revenue from contracts with customers:

January - September 2020

	Power Generation	Power Distribution	Parent and Others	Total
Revenue from power supply contracts	₱28,825,369	–	–	₱28,825,369
Revenue from distribution services	–	30,616,310	–	30,616,310
Revenue from retail electricity sales	–	–	11,696,258	11,696,258
Revenue from non-power supply contracts	9,111,632	–	–	9,111,632
Revenue from technical and management services	–	–	112,980	112,980
	₱37,937,001	₱30,616,310	₱11,809,238	₱80,362,549

January - September 2019

	Power Generation	Power Distribution	Parent and Others	Total
Revenue from power supply contracts	₱37,875,627	–	–	₱37,875,627
Revenue from distribution services	–	34,992,680	–	34,992,680
Revenue from retail electricity sales	–	–	17,961,057	17,961,057
Revenue from non-power supply contracts	3,686,681	–	–	3,686,681
Revenue from technical and management services	–	–	164,989	164,989
	₱41,562,308	₱34,992,680	₱18,126,046	₱94,681,034

The revenue from contracts with customers is consistent with the revenue with external customers presented in Segment information.

The Group has only one geographical segment as all of its assets are located in the Philippines. The Group operates and derives principally all of its revenue from domestic operations. Thus, geographical business information is not required.

Management monitors the operating results of its segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment revenue and segment expenses are measured in accordance with PFRS. The presentation and classification of segment revenue and segment expenses are consistent with the interim condensed consolidated statements of income. Interest expense and other financing costs, depreciation and amortization expense and income taxes are managed on a per segment basis.

The Group has inter-segment revenues in the form of management fees as well as inter-segment sales of electricity which are eliminated in consolidation. The transfers are accounted for at competitive market prices on an arm's-length transaction basis.

Segment assets do not include deferred income tax assets, pension asset and other noncurrent assets. Segment liabilities do not include deferred income tax liabilities, income tax payable and pension liability. Capital expenditures consist of additions of property, plant and equipment and intangible asset - service concession rights. Adjustments as shown below include items not presented as part of segment assets and liabilities.

Financial information on the operations of the various business segments are summarized as follows:

September 30, 2020

	Power Generation	Power Distribution	Parent Company/ Others	Eliminations and Adjustments	Consolidated

19. Financial Risk Management Objectives and Policies

The Group's principal financial instruments comprise cash and cash equivalents and long-term debts. The main purpose of these financial instruments is to raise finances for the Group's operations. The Group has various other financial instruments such as trade and other receivables, investments in equity securities, short-term loans, trade and other payables, lease liabilities, long-term obligation on power distribution system and customers' deposits, which generally arise directly from its operations.

The Group also enters into derivative transactions, particularly foreign currency forwards, to economically hedge its foreign currency risk from foreign currency denominated liabilities and purchases.

Risk Management Structure

The BOD is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Group.

Financial risk committee

The Financial Risk Committee has the overall responsibility for the development of risk strategies, principles, frameworks, policies and limits. It establishes a forum of discussion of the Group's approach to risk issues in order to make relevant decisions.

Treasury service group

The Treasury Service Group is responsible for the comprehensive monitoring, evaluating and analyzing of the Group's risks in line with the policies and limits.

The main risks arising from the Group's financial instruments are interest rate risk, credit risk, liquidity risk, commodity price risk and foreign exchange risk.

Liquidity risk

Liquidity risk is the risk of not meeting obligations as they become due because of the inability to liquidate assets or obtain adequate funding. The Group maintains sufficient cash and cash equivalents to finance its operations. Any excess cash is invested in short-term money market placements. These placements are maintained to meet maturing obligations and pay any dividend declarations.

In managing its long-term financial requirements, the Group's policy is that not more than 25% of long-term borrowings should mature in any twelve-month period. 10.23% of the Group's debt will mature in less than one year as of September 30, 2020 (December 31, 2019: 6.97%). For its short-term funding, the Group's policy is to ensure that there are sufficient working capital inflows to match repayments of short-term debt.

The financial assets that will be principally used to settle the financial liabilities presented in the following table are from cash and cash equivalents and trade and other receivables. Cash and cash equivalents can be withdrawn anytime while trade and other receivables are expected to be collected/realized within one year.

The following table summarizes the maturity profile of the Group's financial liabilities as of September 30, 2020 based on contractual undiscounted principal payments:

	Total carrying value	Contractual undiscounted principal payments				
		Total	On demand	<1 year	1 to 5 years	> 5 years
Short-term loans	₱13,491,814	₱13,491,814	₱—	₱13,491,814	₱—	₱—
Trade and other payables*	21,776,518	21,776,518	1,965,232	18,282,689	1,528,597	—
Long-term debts	178,741,847	180,328,793	—	16,736,529	95,644,682	67,947,582
Customers' deposits	6,780,255	6,780,255	—	—	403,028	6,377,227
Lease liabilities	40,513,721	56,642,147	—	9,117,883	44,872,854	2,651,410
Long-term obligation on PDS	217,414	360,000	—	40,000	200,000	120,000
Derivative liabilities	3,123,495	3,123,495	—	2,114,547	1,008,948	—
	₱264,645,064	₱282,503,022	₱ 1,965,232	₱ 59,783,462	₱ 143,658,109	₱ 77,096,219

*Include the noncurrent portion of the PSALM deferred adjustment presented under noncurrent liabilities in the audited interim consolidated balance sheet.

Market Risk

The risk of loss, immediate or over time, due to adverse fluctuations in the price or market value of instruments, products, and transactions in the Group's overall portfolio (whether on or off-balance sheet) is market risk. These are influenced by foreign and domestic interest rates, foreign exchange rates and gross domestic product growth.

Interest rate risk

The Group's exposure to market risk for changes in interest rates relates primarily to its long-term debt obligations. To manage this risk, the Group determines the mix of its debt portfolio as a function of the level of current interest rates, the required tenor of the loan, and the general use of the proceeds of its various fund raising activities. As of September 30, 2020, 15% of the Group's long-term debt had annual floating interest rates ranging from 1.45% to 3.60%, and 85% have annual fixed interest rates ranging from 4.00% to 8.50%. As of December 31, 2019, 16% of the Group's long-term debt had annual floating interest rates ranging from 3.09% to 4.81%, and 84% have annual fixed interest rates ranging from 4.05% to 9.00%.

The following tables set out the carrying amounts, by maturity, of the Group's financial instruments that are exposed to cash flow interest rate risk:

As of September 30, 2020

	<1 year	1-5 years	>5 years	Total
Floating rate - long-term debt	P1,769,848	P22,008,289	P3,510,251	P27,288,388

Interest on financial instruments classified as floating rate is repriced at intervals of less than one year. Interest on financial instruments classified as fixed rate is fixed until the maturity of the instrument. The other financial instruments of the Group that are not included in the above tables are non-interest-bearing and are therefore not subject to interest rate risk. The Group's derivative assets and liabilities are subject to fair value interest rate risk.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, of the Group's income before tax (through the impact on floating rate borrowings):

	Increase (decrease) in basis points	Effect on income before tax
September 2020	200	(P545,768)
	(100)	272,884
September 2019	200	(P586,577)
	(100)	293,289

There is no other impact on the Group's equity other than those already affecting the interim condensed consolidated statements of income.

The interest expense and other financing costs recognized according to source are as follows:

	For the period ended September 30	
	2020	2019
Short-term loans and long-term debt	P8,256,917	P6,871,346
Lease liabilities (Note 21)	2,192,202	3,136,202
Customers' deposits	940	293
Other long-term obligations	164,781	240,140
	P10,614,840	P10,247,981

Foreign exchange risk

The foreign exchange risk of the Group pertains significantly to its foreign currency denominated obligations. To manage its foreign exchange risk, stabilize cash flows and improve investment and cash flow planning, the Group enters into foreign currency forward contracts aimed at reducing and/or managing the adverse impact of changes in foreign exchange rates on financial performance and cash flows. Foreign currency denominated borrowings account for 29% and 32% of total consolidated borrowings as of September 30, 2020 and December 31, 2019.

Presented below are the Group's foreign currency denominated financial assets and liabilities as of September 30, 2020 and December 31, 2019, translated to Philippine Peso:

	September 30, 2020		December 31, 2019	
	US Dollar	Philippine Peso equivalent ¹	US Dollar	Philippine Peso equivalent ²
Financial assets:				
Cash and cash equivalents	\$120,764	₱5,856,450	\$43,352	₱2,195,129
Trade and other receivables	4	194	18,725	948,140
Advances to associates	852	41,318	—	—
Total financial assets	121,620	5,897,962	62,077	3,143,269
Financial liabilities:				
Short-term loans	12,575	609,814	12,000	607,620
Trade and other payables	23,392	1,134,395	13,439	680,493
Long-term debt	300,000	14,548,500	300,000	15,190,500
Lease liabilities	406,959	19,735,477	443,002	22,431,406
Total financial liabilities	742,926	36,028,186	768,441	38,910,019
Total net financial liabilities	(\$621,306)	(₱30,130,224)	(\$706,364)	(₱35,766,750)

¹\$1 = 48.50

²\$1 = 50.635

The following table demonstrates the sensitivity to a reasonably possible change in the US dollar exchange rates, with all other variables held constant, of the Group's income before tax as of September 30, 2020:

	Increase (decrease) in US Dollar	Effect on income before tax
US Dollar denominated accounts	US Dollar strengthens by 5%	(₱1,506,511)
US Dollar denominated accounts	US Dollar weakens by 5%	1,506,511

The increase in US Dollar rate represents the depreciation of the Philippine Peso while the decrease in US Dollar rate represents appreciation of the Philippine Peso.

There is no other impact on the Group's equity other than those already affecting the interim consolidated statements of comprehensive income.

Credit risk

For its cash investments (including restricted portion), financial assets at FVTPL and receivables, the Group's credit risk pertains to possible default by the counterparty, with a maximum exposure equal to the carrying amount of these investments. With respect to cash investments and financial assets at FVTPL, the risk is mitigated by the short-term and/or liquid nature of its cash investments mainly in bank deposits and placements, which are placed with financial institutions and entities of high credit standing. With respect to receivables, credit risk is controlled by the application of credit approval, limit and monitoring procedures. It is the Group's policy to only enter into transactions with credit-worthy parties to mitigate any

significant concentration of credit risk. The Group ensures that sales are made to customers with appropriate credit history and it has internal mechanisms to monitor the granting of credit and management of credit exposures.

Concentration Risk

Credit risk concentration of the Group's receivables according to the customer category is summarized in the following table:

	September 30, 2020	December 31, 2019
Power distribution:		
Industrial	₱5,038,594	₱5,554,969
Residential	2,589,588	1,825,217
Commercial	838,307	437,994
City street lighting	236,672	111,570
Power generation:		
Spot market	2,582,226	1,481,760
Power supply contracts	8,468,588	5,520,439
	₱19,753,975	₱14,931,949

Capital Management

Capital includes equity attributable to the equity holders of the parent. The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

The Group monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. The Group's policy is to keep the gearing ratio at 70% or below. The Group determines net debt as the sum of interest-bearing short-term and long-term loans (comprising long-term debt and lease liabilities) less cash and short-term deposits (including restricted cash).

Gearing ratios of the Group as of September 30, 2020 and December 31, 2019 are as follows:

	September 30, 2020	December 31, 2019
Short-term loans	₱13,491,814	₱10,335,420
Long-term obligations	219,255,568	222,761,266
Cash and cash equivalents	(38,039,586)	(37,433,929)
Restricted cash	(8,513,507)	(9,121,747)
Net debt (a)	186,194,289	186,541,010
Equity	128,682,604	133,643,011
Equity and net debt (b)	314,876,893	320,184,021
Gearing ratio (a/b)	59.13 %	58.26 %

No changes were made in the objectives, policies or processes during the periods ended September 30, 2020 and December 31, 2019.

20. Financial Instruments

Fair Value of Financial Instruments

Fair value is defined as the amount at which the financial instrument could be sold in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

A financial instrument is regarded as quoted in an active market if quoted prices are readily available from an exchange, dealer, broker, pricing services or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. For a financial instrument with an active market, the quoted market price is used as its fair value. On the other hand, if transactions are no longer regularly occurring even if prices might be available and the only observed transactions are forced transactions or distressed sales, then the market is considered inactive. For a financial instrument with no active market, its fair value is determined using a valuation technique (e.g. discounted cash flow approach) that incorporates all factors that market participants would consider in setting a price.

Set out below is a comparison by category of carrying amounts and fair values of the Group's financial instruments whose fair values are different from their carrying amounts.

	September 30, 2020		December 31, 2019	
	Carrying Amounts	Fair Values	Carrying Amounts	Fair Values
Financial Asset				
PSALM deferred adjustment	P2,400,942	P2,166,120	P3,183,080	P2,846,279
Financial Liabilities				
Lease liabilities	P40,513,721	P37,822,318	P44,789,644	P38,495,450
Long-term debt - fixed rate	151,453,459	157,007,069	148,642,748	152,786,437
PSALM deferred adjustment	2,400,942	2,166,120	3,183,080	2,846,279
Long-term obligation on power distribution system	217,414	289,023	199,350	320,194
	P194,585,536	P197,284,530	P196,814,822	P194,448,360

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, trade and other receivables, short-term loans and trade and other payables. The carrying amounts of cash and cash equivalents, trade and other receivables, short-term loans and trade and other payables approximate fair value due to the relatively short-term maturity of these financial instruments.

Fixed-rate borrowings. The fair value of fixed rate interest-bearing loans is based on the discounted value of future cash flows using the applicable rates for similar types of loans.

Floating-rate borrowings. Since repricing of the variable-rate interest bearing loan is done on a quarterly basis, the carrying value approximates the fair value.

Lease liabilities. The fair value of the lease liabilities was calculated by discounting future cash flows using applicable interest rates.

Long-term obligation on PDS. The fair value of the long-term obligations on power distribution system is calculated by discounting expected future cash flows at prevailing market rates.

Customers' deposits. The fair value of bill deposits approximates the carrying values as these deposits earn interest at the prevailing market interest rate in accordance with regulatory guidelines. The timing and related amounts of future cash flows relating to transformer and

lines and poles deposits cannot be reasonably and reliably estimated for purposes of establishing their fair values using an alternative valuation technique.

Financial assets at FVTPL. These equity securities are carried at fair value.

Derivative financial instruments. The fair value of forward contracts is calculated by reference to prevailing interest rate differential and spot exchange rate as of valuation date, taking into account its remaining term to maturity. The fair value of the embedded prepayment options is determined using Binomial Option Pricing Model which allows for the specification of points in time until option expiry date. This valuation incorporates inputs such as interest rates and volatility. The fair value of the interest rate swap and interest rate cap are determined by generally accepted valuation techniques with reference to observable market data such as interest rates.

The Group enters into non-deliverable short-term forward contracts with counterparty banks to manage its foreign currency risks associated with foreign currency-denominated liabilities and purchases.

The Group also entered into an interest rate swap agreement to fully hedge its floating rate exposure on its foreign currency-denominated loan and par forward contracts to hedge the floating rate exposure on foreign-currency denominated payments.

The Group also entered into commodity swap contracts to hedge the price volatility of its forecasted coal purchases.

The movements in fair value changes of all derivative instruments for the nine-month period ended September 30, 2020 and for the year ended December 31, 2019 are as follows:

	2020	2019
At beginning of year	(P2,385,997)	P132,902
Net changes in fair value of derivatives designated as cash flow hedges	(232,687)	(2,515,732)
Net changes in fair value of derivatives not designated as accounting hedges	(226,406)	(3,889)
Fair value of settled instruments	(278,405)	722
At end of period	(P3,123,495)	(P2,385,997)

Fair Value Hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and
- Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

As of September 30, 2020, the Group held the following financial instruments that are measured and carried or disclosed at fair value:

	Total	Level 1	Level 2	Level 3
Carried at fair value:				
Derivative liabilities	3,123,495	–	3,123,495	–
Disclosed at fair value:				
Lease liabilities	37,822,318	–	–	37,822,318
Long-term debt - fixed rate	157,007,069	–	–	157,007,069
Long-term obligation on PDS	289,023	–	–	289,023

During the nine-month period ended September 30, 2020, there were no transfers between level 1 and level 2 fair value measurements and transfers into and out of level 3 fair value measurement.

21. Leases

Set out below, are the carrying amounts of the Group's right-of-use assets and lease liabilities and the movements during the period:

	Land	Building	Power Plant	Equipment and Others	Total	Lease liabilities
As at January 1, 2020	₱2,730,076	₱230,234	₱33,575,200	₱117,602	₱36,653,112	₱44,789,644
Amortization expense	(74,244)	(14,374)	(820,885)	(16,079)	(925,582)	–
Interest expense	–	–	–	–	–	2,192,202
Payments	–	–	–	–	–	(6,428,396)
Others	–	–	–	–	–	(39,729)
As at September 30, 2020	₱2,655,832	₱215,860	₱32,754,315	₱101,523	₱35,727,530	₱40,513,721

Set out below, are the amounts recognized in the unaudited consolidated statements of income for the Nine months ended September 30, 2020:

Amortization expense of right-of-use assets	₱925,582
Interest expense on lease liabilities	2,192,202
Rent expense - short-term leases	58,218
	₱3,176,002

22. Retained Earnings

- On March 6, 2020, the BOD approved the declaration of regular cash dividends of ₱1.18 a share (₱8.68 billion) to all stockholders of record as of March 20, 2020. These dividends were paid on April 3, 2020.
- The balance of retained earnings includes the accumulated equity in net earnings of subsidiaries, associates and joint arrangements. Such amounts are not available for distribution until such time that the Company receives the dividends from the respective subsidiaries, associates and joint arrangements.

23. Disclosures

1. COVID 19

In a move to contain the COVID-19 outbreak, on March 13, 2020, the Office of the President of the Philippines issued a Memorandum directive to impose stringent social distancing measures in the National Capital Region effective March 15, 2020. On March 16, 2020, Presidential Proclamation No. 929 was issued, declaring a State of Calamity throughout the Philippines for a period of six (6) months and imposed community quarantine throughout the island of Luzon until April 12, 2020, as subsequently extended to April 30, 2020. This was further extended to May 15, 2020 in selected areas including the National Capital Region. The government released further guidelines extending the quarantines under different levels of strictness depending on the assessment of the situation in the numerous parts of the country. These measures have caused disruptions to businesses and economic activities, and its impact on businesses continue to evolve.

The Group is operating normally but at a lower energy dispatch level because of the decreased demand during the community quarantines. In addition, because of the decrease in energy demand, market prices are down. Furthermore, collections are not expected to be made on their original due dates because of the staggered payment scheme implemented by the Energy Regulatory Commission with respect to the consumers' energy bills.

Considering the evolving nature of this outbreak, the Group will continue to monitor the situation in subsequent periods.

2. Seasonality of Interim Operations

Operations of hydropower plants are generally affected by climatic seasonality. Seasonality and location have a direct effect on the level of precipitation. In Luzon where rainy and summer seasons are more pronounced, higher rainfall is normally experienced in the months of June to September. As such, the hydropower plants located in Luzon operate at their maximum capacity during this period. In contrast, the hydropower plants in Mindanao experience a well-distributed rainfall throughout the year, with a slightly better precipitation during the months of December to April. This precipitation seasonality greatly affects subsidiary companies HI, HSI, Hedcor Tudaya, Hedcor Sabangan and LHC, which operate 'run-of-river' hydropower plants since these plants do not have any means to impound water. Any unexpected change in the seasonal aspects will have no material effect on the Group's financial condition or results of operations.

3. Pagbilao IPP Administration Agreement

Therma Luzon, Inc. and PSALM executed the IPP Administration Agreement wherein PSALM appointed TLI to manage the 700MW contracted capacity of NPC in the coal-fired power plant in Pagbilao, Quezon.

Under the IPP Administration Agreement, TLI has the right to receive, manage and control the capacity of the power plant for its own account and at its own cost and risk; and the right to receive the transfer of the power plant at the end of the IPP Administration Agreement for no consideration.

The IPP Administration Agreement includes the following obligations TLI would have to perform until the transfer date of the power plant (or the earlier termination of the IPP Administration Agreement):

- a. Supply and deliver all fuel for the power plant in accordance with the specifications of the original Energy Conservation Agreement (ECA); and
- b. Pay to PSALM the monthly payments (based on the bid) and energy fees (equivalent to the amount paid by NPC to the IPP).

In view of the nature of the IPP Administration Agreement, the arrangement has been considered as a finance lease. Accordingly, TLI recognized the related liability equivalent to the present value of the minimum monthly payments using TLI's incremental borrowing rates of 10% and 12% for dollar and peso payments, respectively.

The present value of the future minimum monthly dollar and peso payments under the IPP Administration Agreement as of September 30, 2020:

Present value of minimum monthly payments to PSALM	P38,489,776
Less: Current portion	(6,451,472)
<u>Noncurrent portion of lease liability</u>	<u>P32,038,304</u>

4. Property, Plant and Equipment

During the nine-month period ended September 30, 2020, the Group's additions to property, plant and equipment amounted to P3.35 billion.

5. Dividends to Non-controlling Interests

The Group's material partly-owned subsidiaries, namely GMEC and VECO, paid cash dividends amounting to P1.40 billion and P2.01 billion to non-controlling interests during the nine-month periods ended September 30, 2020 and 2019, respectively.

6. Material Events and Changes

Mekong Transaction

On April 1 2020, the Group disclosed that it was informed by AboitizPower International Pte. Ltd. ("AboitizPower Intl.") that its planned acquisition of a 100% ownership interest in Mekong Wind Pte. Ltd. from Armstrong Southeast Asia Clean Energy Fund Pte. Ltd. ("AAM") was not completed due to a condition precedent being unmet by the agreed longstop date. As a result, AboitizPower Intl. decided to hold-off the transaction.

AboitizPower Intl. is in discussions with AAM to revisit the acquisition at a future date.

The termination of the transaction has no impact to the Group's existing operations and financial performance.

Except for the above developments and as disclosed in some other portions of this report, no other significant event occurred that would have a material impact on the registrant and its subsidiaries, and no other known trend, event or uncertainty came about that had or were reasonably expected to have a material favorable or unfavorable impact on revenues or income from continuing operations, since the end of the most recently completed fiscal year. There were also no significant elements of income or loss that did not arise from the continuing operations of the registrant and its subsidiaries.

Other than those disclosed above, no material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships with unconsolidated entities or other persons entities or other persons were created during the interim period. There were also no events that would trigger substantial direct or contingent financial obligations or cause any default or acceleration of an existing obligation.

Likewise, there were no other material changes made in such items as: accounting principles and practices, estimates inherent in the preparation of unaudited interim condensed financial statements, status of long-term contracts, changes in the composition of the issuer, and reporting entity resulting from business combinations or dispositions.

Lastly, there were no changes in estimates of amounts reported in prior interim period and financial year that would have a material effect in the current interim period.

9.55 billion bond issuance

The Company issued the fourth and last tranche of its 30 billion debt securities program, equivalent to 9.55 billion in July (the "Series E and F Bonds"). The Fixed Rate "Series E and F Bonds" has an interest rate of 3.125% and 3.935% per annum maturing in 2022 and 2025 respectively. The bonds have been rated PRS Aaa by PhilRatings.

7. Material Adjustments

There were no material, non-recurring adjustments made during period that would require appropriate disclosures. All other adjustments are of a normal recurring nature.

8. Contingencies

The Group is a party to certain proceedings and legal cases with other parties in the normal course of business. The ultimate outcome of these proceedings and legal cases cannot be presently determined. Management, in consultation with its legal counsels, believes that it has substantial legal and factual bases for its positions and is currently of the opinion that the likely outcome of these proceedings and legal cases will not have a material adverse effect on the Group's financial position and operating results. It is possible, however, that the future results of operations could be materially affected by changes in estimates or in the effectiveness of the strategies relating to these proceedings and legal cases.

The Company obtained Standby Letters of Credit and is acting as surety for the benefit of certain associates and a subsidiary in connection with loans and credit accommodations.

SCHEDULE A - USE OF PROCEEDS**1) Ten Billion Fixed Rate Bonds issued in 2014**

As of December 31, 2016, the proceeds from the 2014 bonds were fully utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus)	Actual Usage
400 MW (net) Pulverised Coal-Fired Expansion Unit 3 in Pagbilao, Quezon	4,100,000	3,917,722
68 MW Manolo Fortich Hydropower Plant	3,600,000	2,253,450
300 MW Cebu Coal	500,000	527,859
300 MW Davao Coal	500,000	1,698,469
14 MW Sabangan Hydropower Plant	1,300,000	1,602,500
TOTAL	10,000,000	10,000,000

2) Series "A" of the Thirty Billion Shelf Registration issued in 2017

As of December 31, 2019 the proceeds from the 2017 bonds were fully utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus)	Actual Usage
Equity infusions into GNPD in 2017	2,206,373	1,255,745
Equity infusions into GNPD in 2018	764,395	1,711,317
Bond issuance costs	29,232	32,938
TOTAL	3,000,000	3,000,000

3) Series "B" and "C" of the Thirty Billion Shelf Registration issued in 2018

As of March 31, 2020 the proceeds from the 2018 bonds were fully utilized for the following:

Name of Project	Projected Usage (Per Prospectus)	Actual Usage
Therma Power, Inc.	8,700,000	8,700,000
Bond issuance costs	118,868	121,924
General corporate purposes	1,381,132	1,378,076
TOTAL	10,200,000	10,200,000

DIRECTORS' CERTIFICATE

We, the undersigned members of the Board of Directors of ABOITIZ POWER CORPORATION (hereinafter, the "Company"), do hereby certify as follows:

1. At the special meeting of the Board of Directors held on December 14, 2020, at which meeting a quorum was present and acting throughout, the following resolutions were passed and approved by a majority of the Board of Directors:

"RESOLVED, that the Board of Directors of Aboitiz Power Corporation (the "Company") authorize, as it hereby authorizes, the Company to file a registration statement for the issuance of a fixed-rate peso-denominated retail bonds up to the aggregate principal amount of PESOS: THIRTY BILLION (Php 30,000,000,000.00) (the "Bonds") (i) to be registered under the shelf registration program of the Securities and Exchange Commission ("SEC"), (ii) to be issued in one or more tranches, depending on market conditions, at an offer price to be determined based on a book-building process and recommendations by the Company's domestic underwriter/s;

RESOLVED FURTHER, that the Board of Directors approve the issuance of the first tranche of the Bonds, consisting of up to PESOS: FOUR BILLION (Php4,000,000,000.00), with oversubscription option of up to PESOS: FOUR BILLION (Php4,000,000,000.00) (the "First Tranche") to be issued in the first quarter of 2021, depending on market conditions;

RESOLVED FURTHER, that the following authorized representatives of the Company:

Name	Designation
Mr. Emmanuel V. Rubio	President and Chief Executive Officer
Ms. Liza Luv T. Montelibano	Senior Vice President/ Chief Financial Officer/ Corporate Information Officer
Ms. Maria Veronica C. So	Group Treasurer
Mr. Manuel R. Lozano	Authorized Representative
Ms. Ma. Racquel J. Bustamante	Authorized Representative

be authorized, as each is hereby authorized, to evaluate, plan, and decide all matters relating to the proposed offering of the Bonds and the First Tranche, including the timing of the issuance of the Bonds; the structure, terms, conditions, and aggregate principal amount of the tranches to be issued, and any oversubscription amount of the Bonds;

RESOLVED FURTHER, that the Board of Directors hereby approve the disclosures in the Registration Statement, and in the Preliminary and Final Prospectus to be filed with the SEC and assume full responsibility for the information contained therein;

RESOLVED FURTHER, that the Company be authorized to submit an application for the registration of the Bonds and the First Tranche with the SEC, including all the required exhibits and attachments;

RESOLVED FURTHER, that in connection with the foregoing resolutions, any one (1) of the following authorized representatives of the Company:

Name	Designation
Mr. Emmanuel V. Rubio	President and Chief Executive Officer
Ms. Liza Luv T. Montelibano	Senior Vice President/ Chief Financial Officer/ Corporate Information Officer
Ms. Maria Veronica C. So	Group Treasurer
Mr. Manuel Alberto R. Colayco	Corporate Secretary
Ms. Mailene M. de la Torre	Assistant Corporate Secretary
Mr. Sammy Dave A. Santos	Assistant Corporate Secretary
Mr. Manuel R. Lozano	Authorized Representative

be authorized, as each is hereby authorized, to sign and execute the necessary documents, papers, certifications such as, but not limited to, the Preliminary Prospectus, Final Prospectus, and Registration Statement, including all exhibits and attachments thereto; deliver the same to the SEC; and to do all acts and deeds as may be deemed necessary to give effect to the foregoing resolutions;

RESOLVED FURTHER, that in connection with the filing of the Registration Statement with the SEC, the following officers of the Company:

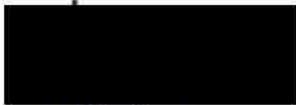

Name	Designation
Mr. Manuel Alberto R. Colayco	Corporate Secretary
Ms. Mailene M. de la Torre	Assistant Corporate Secretary
Mr. Sammy Dave A. Santos	Assistant Corporate Secretary

be authorized, as each is hereby authorized, to sign, execute, and deliver the necessary certifications; certify that photocopies of documents submitted to the SEC are true and faithful reproductions of the originals; and to do all acts and deeds as may be necessary to secure approval from SEC of the Bonds and the First Tranche;

RESOLVED FINALLY, that the Board of Directors of the Company approve and ratify, as it hereby approves and ratifies, any and all acts done by the Company's management team or any of the authorized representatives of the Company in connection with the foregoing authority."

2. These board resolutions have not been revoked, amended or modified and remain valid and binding on the Company.
3. The above statements are in accordance with the records of the Company.

IN WITNESS WHEREOF, the undersigned has hereunto set her hand this 16 December 2020 at Taguig City, Philippines.

REPUBLIC OF THE PHILIPPINES)
CITY OF TAGUIG) S.S.

SECRETARY'S CERTIFICATE

I, **MAILENE M. DE LA TORRE**, Filipino citizen, of legal age, with office address at NAC Tower, 32nd Street Bonifacio Global City, Taguig City, after having been duly sworn according to law, hereby depose and state that:

1. I am the Assistant Corporate Secretary of **ABOITIZ POWER CORPORATION** (the "Company"), a corporation duly organized and existing under and by virtue of the laws of the Philippines, with principal office address at 32nd Street, Bonifacio Global City, Taguig City, Metro Manila, Philippines.
2. At the special meeting of the Board of Directors held on December 14, 2020, at which meeting a quorum was present and acting throughout, the following resolutions were unanimously passed and approved:

"RESOLVED, that the Board of Directors of Aboitiz Power Corporation (the "Company") authorize, as it hereby authorizes, the Company to file a registration statement for the issuance of a fixed-rate peso-denominated retail bonds up to the aggregate principal amount of PESOS: THIRTY BILLION (Php 30,000,000,000.00) (the "Bonds") (i) to be registered under the shelf registration program of the Securities and Exchange Commission ("SEC"), (ii) to be issued in one or more tranches, depending on market conditions, at an offer price to be determined based on a book-building process and recommendations by the Company's domestic underwriter/s;

RESOLVED FURTHER, that the Board of Directors approve the issuance of the first tranche of the Bonds, consisting of up to PESOS: FOUR BILLION (Php4,000,000,000.00), with oversubscription option of up to PESOS: FOUR BILLION (Php4,000,000,000.00) (the "First Tranche") to be issued in the first quarter of 2021, depending on market conditions;

RESOLVED FURTHER, that the following authorized representatives of the Company:

Name	Designation
Mr. Emmanuel V. Rubio	President and Chief Executive Officer
Ms. Liza Luv T. Montelibano	Senior Vice President/ Chief Financial Officer/ Corporate Information Officer
Ms. Maria Veronica C. So	Group Treasurer
Mr. Manuel R. Lozano	Authorized Representative
Ms. Ma. Racquel J. Bustamante	Authorized Representative

be authorized, as each is hereby authorized, to evaluate, plan, and decide all matters relating to the proposed offering of the Bonds and the First Tranche, including the timing of the issuance of the Bonds; the structure, terms, conditions, and aggregate principal amount of the tranches to be issued, and any oversubscription amount of the Bonds;

RESOLVED FURTHER, that the Board of Directors hereby approve the disclosures in the Registration Statement, and in the Preliminary and Final Prospectus to be filed with the SEC and assume full responsibility for the information contained therein;

RESOLVED FURTHER, that the Company be authorized to submit an application for the registration of the Bonds and the First Tranche with the SEC, including all the required exhibits and attachments;

RESOLVED FURTHER, that in connection with the foregoing resolutions, any one (1) of the following authorized representatives of the Company:

Name	Designation
Mr. Emmanuel V. Rubio	President and Chief Executive Officer
Ms. Liza Luv T. Montelibano	Senior Vice President/ Chief Financial Officer/ Corporate Information Officer
Ms. Maria Veronica C. So	Group Treasurer
Mr. Manuel Alberto R. Colayco	Corporate Secretary
Ms. Mailene M. de la Torre	Assistant Corporate Secretary
Mr. Sammy Dave A. Santos	Assistant Corporate Secretary
Mr. Manuel R. Lozano	Authorized Representative

be authorized, as each is hereby authorized, to sign and execute the necessary documents, papers, certifications such as, but not limited to, the Preliminary Prospectus, Final Prospectus, and Registration Statement, including all exhibits and attachments thereto; deliver the same to the SEC; and to do all acts and deeds as may be deemed necessary to give effect to the foregoing resolutions;

RESOLVED FURTHER, that in connection with the filing of the Registration Statement with the SEC, the following officers of the Company:

Name	Designation
Mr. Manuel Alberto R. Colayco	Corporate Secretary
Ms. Mailene M. de la Torre	Assistant Corporate Secretary
Mr. Sammy Dave A. Santos	Assistant Corporate Secretary

be authorized, as each is hereby authorized, to sign, execute, and deliver the necessary certifications; certify that photocopies of documents submitted to the SEC are true and faithful reproductions of the originals; and to do all acts and deeds as may be necessary to secure approval from SEC of the Bonds and the First Tranche;

RESOLVED FINALLY, that the Board of Directors of the Company approve and ratify, as it hereby approves and ratifies, any and all acts done by the Company's management team or any of the authorized representatives of the Company in connection with the foregoing authority."

3. The above statements are in accordance with the records of the Company.

IN WITNESS WHEREOF, the undersigned has hereunto set her hand this 16 December 2020 at Taguig City, Philippines.

SECRETARY’S CERTIFICATE

I, **MAILENE M. DE LA TORRE**, Filipino citizen, of legal age, with office address at NAC Tower, 32nd Street Bonifacio Global City, Taguig City, after having been duly sworn according to law, hereby depose and state that:

1. I am the Assistant Corporate Secretary of **ABOITIZ POWER CORPORATION** (the “Company”), a corporation duly organized and existing under and by virtue of the laws of the Philippines, with principal office address at 32nd Street, Bonifacio Global City, Taguig City, Metro Manila, Philippines.
2. At the special meeting of the Board of Directors held on December 14, 2020, at which meeting a quorum was present and acting throughout, the following resolutions were unanimously passed and approved:

“**RESOLVED**, that pursuant to the authority of Aboitiz Power Corporation (the “Company”) to offer and issue up fixed-rate peso-denominated retail bonds up to an aggregate principal amount of PHILIPPINE PESOS: THIRTY BILLION (Php 30,000,000,000.00), under the shelf registration program of the Securities and Exchange Commission (“SEC”), and to issue the first tranche of the Bonds, consisting of up to PESOS: FOUR BILLION (Php4,000,000,000.00), with oversubscription option of up to PESOS: FOUR BILLION (Php4,000,000,000.00) (the “First Tranche Bonds”), the Board of Directors of the Company hereby authorizes the SEC and its duly authorized representatives to access, inspect and copy all of the bank accounts of the Company and its identified Subsidiaries (the “Bank Accounts”);

RESOLVED FURTHER, any one (1) of the following representatives of the Company, whose specimen signatures appear below:

Name	Designation	Specimen Signature
Mr. Emmanuel V. Rubio	President and Chief Executive Officer	
Ms. Liza Luv T. Montelibano	Senior Vice President/ Chief Financial Officer/ Corporate Information Officer	
Ms. Maria Veronica C. So	Group Treasurer	
Mr. Manuel R. Lozano	Authorized Representative	
Ms. Ma. Racquel J. Bustamante	Authorized Representative	

be authorized, as each is hereby authorized, to execute, sign and deliver, for and on behalf of the Company, the Letter Undertaking authorizing SEC to examine the Bank Accounts, as well as to perform all acts and deeds necessary to implement the foregoing resolution;

RESOLVED FINALLY, that the Board of Directors approve and ratify, as it hereby approves and ratifies, any and all acts done by the management or any of the authorized representatives of the Company in connection with the foregoing authority."

3. The above statements are in accordance with the records of the Company.

IN WITNESS WHEREOF, the undersigned has hereunto set her hand this 16 December 2020 at Taguig City, Philippines.

Re: Authority to Examine Bank Accounts

I, **MARIA VERONICA C. SO**, Group Treasurer of **ABOITIZ POWER CORPORATION** (the "**Corporation**"), with office address at 32nd Street, Bonifacio Global City, Taguig City, Metro Manila 1634, Philippines, as the duly authorized officer of the Corporation and in compliance with the requirements of SRC Rule 12.1 in connection with the Registration Statement filed by the Corporation relative to the issuance and registration of the fixed-rate retail bonds amounting to PhP30 Billion to be offered in one or several tranches (the "**Bonds**"), hereby authorizes the Securities and Exchange Commission ("**SEC**") and its duly authorized representatives to access, inspect, and copy the bank account of the Corporation relating to the Bonds with the following account details:

- Account Name: Aboitiz Power Corp.
- Account No. : 00-172-001545-7
- Bank/Branch : Unionbank / 32nd Street BGC, Taguig
- Account Type : Checking

I have been authorized by the Board of Directors of the Corporation, through appropriate board resolutions, to issue this authorization to the SEC.

This Authorization shall be continuous for as long as the registration of securities of the Corporation is effective and the Bonds remain outstanding.

The Corporation hereby absolves and renders harmless the SEC and its duly authorized representatives from any and all complaints, causes of action and suits, civil and criminal that may be filed in relation to the issuance of this Authorization and its exercise by SEC of its duty.

Sincerely,

ABOITIZ POWER CORPORATION

Bureau

ATTACHMENT 1

ENVIRONMENTAL COMPLIANCE CERTIFICATE

RD No. 9206-041-203 C

The Environmental Management Bureau hereby grants this Environmental Compliance Certificate (ECC) to the proposed HAKBAN GEOTHERMAL MODULAR POWER PLANT PROJECT OF NATIONAL POWER CORPORATION to be located within the Hakban Complex, after complying with the Environmental Impact Assessment (EIA) requirement as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and 1596.

This Certificate is being issued subject to the following conditions:

1. That this Certificate shall cover the installation and operation of two (2) power plants each consisting of two (2) units of 20 MW modular turbine-generator sets. One power plant (Plant D) shall be installed adjacent to and east of the existing Plant A while the other plant (Plant E) shall be constructed about 1Km. NW of Plant A near Sulalo Well No. 54;
2. That the noise and dust generated from the use of equipment shall be kept within the prescribed standards and handling of materials during construction period shall be kept minimal so as not to cause nuisance;
3. That there shall be no discharge of plant effluent and/or solid wastes resulting from the operation and maintenance of the power plant including laboratory wastes. That a detailed program for a closed system of handling effluents and solid wastes shall be submitted prior to the start of the operation to ensure compliance with the zero discharge requirement on all effluents and solid wastes at all times;
4. That contingency program in case of accidents, equipment malfunction and other emergencies shall be submitted within sixty (60) days upon issuance of the ECC;
5. That preventive measures shall be observed within the plant's premises and appropriate gadgets shall be provided to the workers to minimize health hazards;
6. That ambient air quality including noise shall conform with the prescribed EMB-DENR standards and that the plant design shall consider the proposed revision of air quality standards;
7. That on the spot monitoring and inspections can be initiated by the EMB-DENR Region IV anytime in coordination with concerned groups;
8. That a regular medical check-up shall be provided for

the workers;

9. That a continuing monitoring program for the illness associated with the project shall be undertaken in the affected areas and communities and provision of medical assistance, if necessary;
10. That the proponent shall conduct a continuous and intensive public information campaign about the project operation especially the types of pollution control facilities installed;
11. That local residents shall be given top priority for employment;
12. That monitoring of the project operation shall be conducted through the organization of a multisectoral group composed of DENR, Local Government Units, Non-government Organizations representing the towns covered and the National Power Corporation and that quarterly report shall be submitted to this Office;
13. That any valid complaint on air and water pollution arising from the project operation may be a cause for suspension or revocation of this Certificate;
14. That preventive measures shall be implemented to discourage proliferation of squatters within the plant;
15. That NPC shall conduct an acid rain monitoring on the impacted area and submit the results to EMB yearly;
16. That the proponent shall put up an Environmental Guarantee Fund the mechanics of which shall be developed by the National Power Corporation, DENR, concerned LGUs and NGOs and committed from a fixed share of profits per kilowatt-hour, a share of the royalty given to LGUs, and other funds made available from the environmental management budget of NAPCOR and grants from funding institutions to cover expenses for the multipartite monitoring of environmental quality; immediate rehabilitation and/or indemnification of damages to properties and other related concerns within sixty (60) days from the release of this ECC; and
17. That transfer of ownership of this project carries the same conditions in this ECC for which written notification shall be made within fifteen (15) days from such transfer.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this

Ju

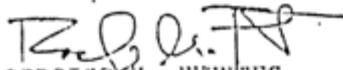

Certificate and/or a fine in an amount not to exceed Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Section 9 of P.D. 1586).

Given this 29th day of June 1992.

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The Environmental Management Bureau hereby grants this Environmental Compliance Certificate (ECC) to the proposed HAK BAH BINARY CYCLE GEOTHERMAL POWER GENERATING PLANT project of the NATIONAL POWER CORPORATION to be located in Bay, Laguna, after complying with the Environmental Impact Assessment (EIA) requirement as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and 1539.

This Certificate is being issued subject to the following conditions:

1. That this Certificate is valid only for 15.73 MW Hakban Binary Cycle Geothermal Power Generating Plant capacity of five (5) units, twin turbines of three (3) MW each and one (1) single turbine of 0.73 MW utilizing waste heat from the geothermal brine downstreams of the steam separators of the existing Geothermal Power Plant;
2. That the closed loop motive fluid system shall be installed, operationalized and maintained to avoid/eliminate emissions of gases into the atmosphere;
3. That the geothermal brine at the end of the process shall be reinjected into reinjection wells to maintain zero discharge of effluents;
4. That the ambient air quality including noise shall be kept within the prescribed standards;
5. That the closed loop air cooling system shall be installed, operationalized and maintained to avoid/eliminate discharges of heated cooling water to surface waters;
6. That plans of operation as contained in the Project Description shall be strictly implemented and if found inadequate, project operations shall be temporarily suspended until such time that remedial measures are properly adopted;
7. That results of monitoring of the project be submitted to this office in a summarized form semi-annually commencing from start of plant operation;
8. That all the mitigating measures indicated in the Project Description shall be implemented;
9. That on-the-spot monitoring and inspections can be initiated by the ENB-DENR Region IV anytime in coordination with concerned groups;

NOV 21 2002
ENVIRONMENTAL COMPLIANCE CERTIFICATE
0112-871-203

The Department of Environment and Natural Resources (DENR) through the Environmental Management Bureau (EMB) hereby grants this Environmental Compliance Certificate (ECC) to the **Mak-Ban Geothermal Power Plant Project** of the **PHILIPPINE GEOTHERMAL, INC.** and **NATIONAL POWER CORPORATION** located in Bay and Calauan Laguna and Sto Tomas, Batangas, after complying with the Environmental Impact Assessment (EIA) requirement, as prescribed in the promulgated guidelines implementing Section 3(b) of P.D. 1121 and P.D. 1586.

This Certificate is being issued subject to the following conditions:

1. This Certificate is valid only for the Upgrading and Rehabilitation activities of the Mak-Ban Geothermal Power Plant which involve the following: Upgrading of the Steam Gathering System, Rehabilitation of the Power Plants A, B, and C and Cooling Tower System to optimize these plants' installed capacity from 55MW to 63MW per turbine unit (or to generate 378 MW), and the Construction of Mono-Landfill for asbestos containing material (ACWM) situated at Bulalo 2 and Bulalo 30, each having an area of 6,135 and 8,239.1 sq.m., respectively, Turbine Overhaul, Cooling Tower System Rehabilitation;
2. The proponent shall furnish EMB with copies of the records published in broadsheet involving incidents/accidents relating to project's operation;
3. All effluents and emissions during all project phases shall conform with the standards and other requirements set by the DENR;
4. All commitments, mitigating measures and monitoring requirements, especially those contained in the Environmental Impact Statement (EIS) particularly in the Environmental Management and Monitoring Plans, including all its modifications and additional information as approved by the EMB shall be instituted to minimize any adverse impact of the project to the environment throughout the project implementation including the following:
 - 4.1 Installation of erosion control measures along critical areas specifically where the steam pipelines are located;
 - 4.2 Regular and proper maintenance of all pollution control equipment and facilities to attain maximum efficiency. Likewise, anti corrosion measures for protecting and maintaining the integrity of production casings and surface pipelines to prevent serious pipelines failures should be employed;
 - 4.3 Implementation of a regular pipe monitoring and pipe replacement program and regular checking of the integrity of the structures supporting the pipes especially after major storm or earthquake;

- 4.4 Regular checking and monitoring of the condition and integrity of the plugged wells and the production pipes by third party and submission of corresponding report to the EMB for review and evaluation;
- 4.5 Monitoring of the subsidence every 3-years by a third party, the results of which should be submitted every first quarter to EMB C.O. for review and evaluation as basis for revalidating allowable steam production/extraction limits;
- 4.6 Securing and proper marking for easy identification and for security purposes of the ACWM landfill site and all waste (i.e., geothermal residues) storage areas;
- 4.7 Installation of appropriate noise barriers especially near the generators/engines to effectively attenuate the noise emanating from the same;
- 4.8 Regular sampling and chemical testing of community wells and springs to determine hydrogeological and geochemical changes resulting from re-injection of brine;
- 4.9 Quarterly submission of monitoring reports on the compliance to the ECC conditions, the EMP and the DENR Emission and Effluent standards to the EMB Central and Regional Office;
- 4.10 Effective implementation of a Comprehensive Solid Waste Management Program in accordance with Ecological Solid Waste Act (RA 9003) and its Implementing Rules and Regulations throughout the life of the project.
- 4.11 Ensure that its contractors and subcontractors properly comply with the relevant conditions of this Certificate;
- 4.12 Implementation of a continuing Information, Education and Communication (IEC) Program including communication of environmental risks of project operations to be funded by the proponent;
- 4.13 Implementation of a Social Development Program (SDP) and a Community Assistance Program in coordination with appropriate agencies of government,

5. The proponent's existing Environmental Unit (EU) headed by a DENR accredited Pollution Control Officer (PCO) shall competently handle the environment-related aspects of the project. In addition to the monitoring requirements as specified in the Environmental Monitoring Plan, the EU shall also monitor actual project impacts vis-a-vis the predicted impacts and management measures in the EIS and accordingly formulate revisions to the EMP as necessary, ensure the appropriate post-assessment permits are in place, ensure that monitoring and reporting are carried out as required, and comply with the conditions of the ECC. The EU shall submit environmental/monitoring reports to the EMB Central and Region IV Office.;

NOV 21 2002

6. The proponent shall set up the following:

- 6.1 A readily available and replenishable Environmental Guarantee Fund (EGF) to cover expenses for compensation of damages to life and property that may be caused by the project, for rehabilitation and/or restoration of areas affected by the project's construction, operation and abandonment, for compensation of parties and communities affected by possible negative impacts and as a source of fund for contingency and clean-up activities :
- 6.2 A Multipartite Monitoring Team (MMT) composed of representatives from the proponent, DENR, LGUs, municipal/rural health center, PO, NGO, DOE and academe (UPLD);
- 6.3 An Environmental Monitoring Fund (EMF) to cover all costs attendant to the operation of the MMT such as training, sampling and analysis, hiring of technical experts (including third party), meals accommodations and transportation.

The proponent shall submit an Environmental Guarantee Fund (EGF) and Environmental Monitoring Fund (EMF) proposal (with supporting computation) based on the existing relevant guidelines within thirty (30) days from the receipt of this Certificate. The said amount shall be incorporated in the EGF-EMF-MMT MOA to be discussed among the signatories and the final draft should be submitted within sixty (60) days from the receipt of this ECC;

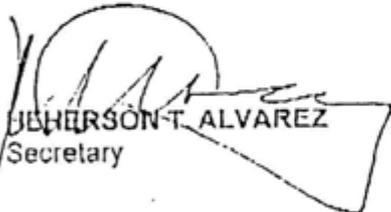

7. Submit an annual Environmental Audit Report to EMB CO for the first 5 years of operation and every 2 years thereafter;
8. This Certificate shall be considered automatically revoked if the geothermal power project rehabilitation and upgrading has not commenced within one (1) year from receipt hereof or if suspension or stoppage of its operation extends up to two (2) years;
9. Transfer/change of ownership of the project carries the same conditions in this Certificate for which written notification with certified transfer documents shall be submitted by herein grantee to the EMB within fifteen (15) days from such transfer;
10. An Abandonment Plan shall be submitted to the EMB Central Office and the EMB Region IV one (1) year prior to the project's abandonment schedule. The plan shall include rehabilitation measures/clean-up, remediation of areas possibly contaminated with chemical and other substances and proposed alternative projects in the area.

NOV 21 2002

Non-compliance with any of the above conditions will be sufficient cause for the suspension or cancellation of this Certificate and/or imposition of fine in the amount of Fifty Thousand Pesos (PhP 50,000.00) for every violation thereof, at the discretion of the EMB in accordance with Section 9 of P.D. No. 1586.

Granted this **NOV 21 2002**

ENVIRONMENTAL COMPLIANCE CERTIFICATE
0109-642-203

The Department of Environment and Natural Resources (DENR) through the Environmental Management Bureau (EMB) hereby grants this Environmental Compliance Certificate (ECC) to NATIONAL POWER CORPORATION and PHILIPPINE GEOTHERMAL, INC. for the Tiwi Geothermal Power Plant located at Tiwi, Albay, after complying with the Environmental Impact Assessment (EIA) requirement, as prescribed in the promulgated guidelines implementing Section 3(b) of P.D. 1121 - *Creating the National Environmental Protection Council and P.D. 1588 - Establishing the Environmental Impact System of the Philippines.*

This Certificate is being issued subject to the following conditions:

1. This Certificate is valid only for the Upgrading and Rehabilitation activities of the Tiwi Geothermal Power Plant which involve the following: Matallibong Ridge Steam Upgrade, Condensate and Brine Injection System Upgrade, Rehabilitation and Operation of the 330 MW Power Plant (consisting of six 55-MW units arranged in three plants), and Establishment of an Asbestos Containing Waste Materials (ACWM) Landfill with an area of 7,000 square meters located at Nag 20 which is within the proclaimed geothermal reserve of 17,881 hectares centered at coordinates 123° 38.4' South Longitude and 13° 28.9' North Latitude;
2. The steam extraction rate shall not exceed 5,930 kg.-lbs./hour. This allowable extraction rate shall be revalidated by EMB every three (3) years based on the results of subsidence modeling and monitoring;
3. The proponent shall conduct a modeling on the magnitude of subsidence for a period of at least 25 years to predict the impact of withdrawal of steam on infrastructure, settlement areas, and the communities. The report shall be submitted to the EMB Central and Region V Offices within 60 days from receipt of this ECC as basis for re-validation of the maximum extraction rate;
4. The proponent shall submit within 60 days from the receipt of this Certificate a documentation/transcription of the forum (specifically attended by the fisher folk, farmers, Indigenous Peoples) initiated by the proponent and conducted by a third party (i.e. LGU, EMB Region V) regarding the project's impacts, mitigating measures, and benefits. Relevant concerns that will be raised shall be addressed by the proponent;
5. The proponent shall furnish EMB Central Office with copies of the records published in a broadsheet involving incidents/accidents relating to project's operation for the past five years and every five years from the time the court case decision is issued;
6. All commitments, mitigating measures and monitoring requirements, especially those contained in the Environmental Impact Statement (EIS) particularly in the Environmental Management and Monitoring Plan (EMMP), including all its modifications and additional information approved by the EMB shall be instituted to minimize any adverse impact.

The Geothermal Power Plant Project
ECC-0109-642-203
Page 1 of 4

Let's Go Green!

- 6.12 Ensure that its contractors and subcontractors properly comply with the relevant conditions of this Certificate;
 - 6.13 Implementation of a continuing Information, Education and Communication (IEC) Program including communication of environmental risks of project operations to be funded by the proponent and
 - 6.14 Implementation of a Social Development Program (SDP) and a Community Assistance Program including employment priority for qualified local residents and assistance program for livelihood and skills training among affected families, health (medical and dental) services, education services (with the objective of improving their earning capacity and help them provide for their basic needs) in coordination with the DENR and other appropriate government agencies.
7. The proponent's existing Environmental Unit (EU) headed by a qualified/accredited Pollution Control Officer (PCO) shall competently handle all environment-related aspects of the project. In addition to the monitoring requirements as specified in the Environmental Monitoring Plan, the EU shall also monitor actual project impacts vis-a-vis the predicted impacts and management measures in the EIS and accordingly formulate revisions to the EMP as necessary, ensure the appropriate post-assessment permits are in place, ensure that monitoring and reporting are carried out as required, and comply with the conditions of the ECC. The EU shall submit environmental/monitoring reports to EMB Central and Region V Offices;
8. An Annual Environmental Audit Report shall be submitted to EMB Central and Regional Offices within the first quarter of the succeeding year.
9. The proponent shall set up the following:
- 9.1 A readily available and replenishable Environmental Guarantee Fund (EGF) or equivalent financing instrument to cover expenses for compensation of damages to life and property that may be caused by the project, for rehabilitation and/or restoration of areas affected by the project's construction, operation and abandonment, for compensation of parties and communities affected by possible negative impacts and as a source of fund for contingency and clean-up activities;
 - 9.2 A Multiparty Monitoring Team (MMT) composed of representatives from the proponent, DENR, LGUs, and stakeholder communities/NGO; and
 - 9.3 An Environmental Monitoring Fund (EMF) to cover all costs attendant to the operation of the MMT such as training, sampling and analysis, hiring or technical experts, meals accommodations and transportation.

[Handwritten Signature]
 SEP 10 2002

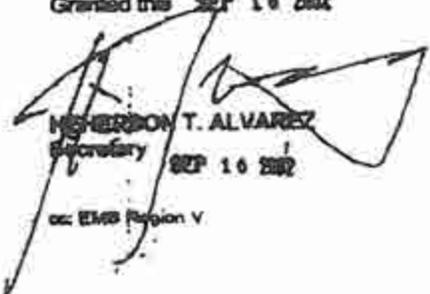

The proponent shall submit an Environmental Guarantee Fund (EGF) and Environmental Monitoring Fund (EMF) proposal (with supporting computation) based on the existing relevant guidelines within thirty (30) days from the receipt of this Certificate. The said amount shall be incorporated in the EGF-EMF-MMT MOA to be discussed among the signatories and the final draft shall be submitted within sixty (60) days from the receipt of this ECC.

10. This Certificate shall be considered automatically revoked if the geothermal power project rehabilitation and upgrading has not commenced within one (1) year from receipt hereof or if suspension or stoppage of its operation extends up to two (2) years.
11. Transfer/change of ownership of the project carries the same conditions in this Certificate for which written notification with certified transfer documents shall be submitted by herein grantees to the EMB within fifteen (15) days from such transfer.
12. An Abandonment Plan shall be submitted to the EMB Central and Region V Offices, one (1) year prior to the project's abandonment schedule. The plan shall include rehabilitation/clean-up measures, remediation of areas possibly contaminated with chemical and other substances and proposed alternative projects in the area.

Non-compliance with any of the above conditions shall be sufficient cause for the suspension or cancellation of this Certificate and/or imposition of fine in the amount of Fifty Thousand Pesos (PHP 50,000.00) for every violation thereof, at the discretion of the EMB in accordance with Section 9 of P.D. No. 1586.

Mr. Luis Miguel Aboitiz
Director
AP RENEWABLES INC. (APRI)
110 Legazpi Street, Legaspi Village,
Makati City

Subject : **ECC TRANSFER OF OWNERSHIP**

Dear **Mr. Aboitiz**:

This refers to your amendment request for transfer of ownership of **ECC No. 0109-642-203** issued on September 10, 2002 for the **Tiwi Geothermal Power Plant Project** located at Tiwi, Albay from National Power Corporation to APRI.

Based on evaluation of the submitted Joint Certificate of Turnover between APRI and Power Sector Assets and Liabilities Management Corporation (PSALM), Securities and Exchange Commission (SEC) registration, and the Amended Articles of Incorporation of APRI, the said request is hereby approved. Please be advised that this transfer shall carry with it the environmental management commitments and obligations including ECC compliance reporting. Further, all other conditions stipulated in the above-cited ECC shall remain in force unless otherwise revised in writing. Expansion and/or modification of approved operations shall be subject to an Environmental Impact Assessment (EIA) requirement.

With respect to the other permits and requirements, please coordinate with our EMB Region V Office located at Regional Center, Rawis, Legaspi City with telephone number (052) 482-0197.

Very truly yours,

JULIAN D. AMADOR
Director

ECC-R6-1502-0083-4220

MR. EMMANUEL V. RUBIO

President
 San Carlos Sun Power, Incorporated (SACASUN)
 Suite 1207 Security Bank Center, 6776 Ayala Avenue
 Makati City

Subject: Environmental Compliance Certificate (ECC No. ECC-R6-1502-0083-4220) issued on March 04, 2015 to San Carlos Sun Power Solar Power Plant Project located in Barangay Punao, San Carlos City, Negros Occidental. Amendment in view of the request of the proponent for the change of the project's transmission line capacity from 100 meters 139 kV Double Circuit to 100 meters 69 kV Single Circuit, increase of the plant's total capacity from 50 MWp DC to 61.33 MWp DC and inclusion of Lot No. 761-C under Transfer Certificate of Title (TCT No. T-351).

Dear Mr. Rubio:

This has reference to your request for amendment on the ECC (ECC No. ECC-R6-1502-0083-4220) issued on March 04, 2015 for your proposed **San Carlos Sun Power Solar Power Plant Project located in Barangay Punao, San Carlos City, Negros Occidental.**

Based on review and evaluation of the submitted documents, the requested amendment for the change of the project's transmission line capacity from 100 meters 139 kV Double Circuit to 100 meters 69 kV Single Circuit, increase of the plant's total capacity from 50 MWp DC to 61.33 MWp DC and inclusion of Lot No. 761-C under Transfer Certificate of Title (TCT No. T-351) are hereby granted to wit:

	Previous	New
Transmission Line Connection	100 meters 139 kV Double Circuit	100 meters 69 kV Single Circuit
Total Capacity	50 MWp DC	61.33 MWp DC
Titles	Lot No. 760-B-5-A (TCT No. T-342) with an area of 75 hectares	Lot No. 760-B-5-A (TCT No. T-342) with an area of 63 hectares Lot No. 761-C (TCT No. T-351) with an area of 12 hectares geographically located at 10°30'57.7", 10°31'21.5", 10°30'57.9", 10°31'44.9", 10°31'21.5", 10°31'01.7", 10°30'48.8" North Latitude and 123°25'10.9", 123°25'29.3", 123°25'51.8", 123°25'41.2", 123°25'29.2", 123°25'05.3", 123°25'36.5"

You may proceed with project implementation after securing necessary permits from pertinent government agencies. We will be monitoring your project periodically to ensure your compliance with the stipulated conditions in the ECC issued in your favor.

Further, all other conditions stated in the issued ECC should remain in effect and properly complied with.

This amendment forms part of your duly issued ECC.

Sincerely,

ATTY. JONATHAN P. BULOS
 Regional Director

MR. JOSE MARIA P. ZABALETA

Chairman
San Carlos Sun Power, Incorporated
Suite 1207 Security Bank Center, 6776 Ayala Avenue
Makati City

Dear Mr. Zabaleta:

This has reference to your Environmental Compliance Certificate (ECC) application for your proposed solar power plant (**San Carlos Sun Power**) project located in **Barangay Punao, San Carlos City, Negros Occidental**.

After a careful evaluation of the documents submitted for the aforesaid project, this office has decided to grant the same an ECC which contains our findings and recommendations as a result of evaluation of the EIA document you have submitted to EMB Region VI. **All the findings and recommendations shall be integrated by relevant Government Agencies in their decision making prior to the issuance of clearances, permits and licenses under their mandates.**

In view thereof, you are hereby reminded that you need to **secure all necessary permits/clearances from pertinent government agencies prior to project implementation**. Further, we will be monitoring the project periodically to ensure your compliance to the conditions stipulated in the attached ECC. You are also strongly advised to implement all the recommendations and to coordinate with the Government Agencies listed in your ECC for better management and mitigation of the impacts of the project. Any expansion to the currently approved operations will be subjected to another Environmental Impact Assessment (EIA) process.

Please be informed that you may request for relief from ECC Commitments based on Section 17 of the Revised Procedural Manual for DENR Administrative Order No. 30 Series of 2003 (DAO 03-30) under the following conditions:

- a) for projects which have secured ECCs but have not been implemented for five (5) years;
- b) for projects which were previously covered but are currently classified as outside the Philippine EIS System; and
- c) for projects that will be terminated or completed, or will be abandoned or decommissioned.

May we also remind you to abide with all the conditions stated in your ECC. Beginning January 2008, a penalty of not less than Ten Thousand Pesos (PhP10,000.00) for violating minor condition and Twenty Five Thousand Pesos (PhP25,000.00) for violating major condition will be imposed on all types of FIRST offenses. These new penalties are based on the revised Procedural Manual of DAO 2003-30, The Implementing Rules and Regulations of P.D. 1586. Likewise, penalties for succeeding offenses will also be based on the said manual.

Please get your approved ECC at EMB Regional Office, 2nd Floor Pacita Salazar Building, El 98 Street, Jaro, Iloilo City. Failure to claim within sixty (60) days upon receipt of this letter will cause the cancellation of your ECC.

Sincerely,

ATTY. JONATHAN P. BULOS
Regional Director

ENVIRONMENTAL COMPLIANCE CERTIFICATE
(Issued under Presidential Decree 1586)

ECC-R6-1502-0083-4220

This is to certify that the proponent, **SAN CARLOS SUN POWER, INCORPORATED** is granted this **Environmental Compliance Certificate (ECC)** for the proposed solar power plant (**San Carlos Sun Power**) project, located in **Barangay Punao, San Carlos City, Negros Occidental** by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau, Region 6, subject only to the conditions and restrictions set-out in this certificate.

This certification is issued for the proposed solar power plant (**San Carlos Sun Power**) **Project of San Carlos Sun Power, Incorporated** with the following details:

PROJECT DESCRIPTION

(Group 3.2.7 Renewable Energy Projects such as ocean, solar, wind, tidal power)

The proposed project covers the construction and operation of a **50 MW Solar Power Plant** having a total area of **Seventy Five (75) hectares** situated within portion of **Lot No. 760-B-5-A, Psd-064524-030365** under **Transfer Certificate of Title (TCT No. T-342)** located in **Barangay Punao, San Carlos City, Negros Occidental** geographically located at **10°30'57.7", 10°31'21.5", 10°30'57.9", 10°31'44.9", 10°31'21.5", 10°31'01.7", 10°30'48.8" North Latitude** and **123°25'10.9", 123°25'29.3", 123°25'51.8", 123°25'41.2", 123°25'29.2", 123°25'05.3", 123°25'36.5" East Longitude**.

The project includes: **50 MW Polycrystalline Modules (PH245P and Ph250P)**, **Main Switchyard (mixed power generation)**, **100 meters 139 kV Double Circuit Transmission Lines**, **Administration Office/Conference Room**, **Switch Gear Control Room** and **Battery Room**, **Septic Tank**, **Material Recovery Facility (MRF)** and **Drainage System** as stated in the submitted **IEER** document.

This certification is issued in compliance to the requirements of Presidential Decree No. 1586, in accordance to Department Administrative Order No. 2003-30. The Bureau, however, is not precluded from reevaluating, adding, removing, and correcting any deficiencies or errors that may be found after issuance of this certificate.

Issued on 04 MAR 2015

Recommending Approval:

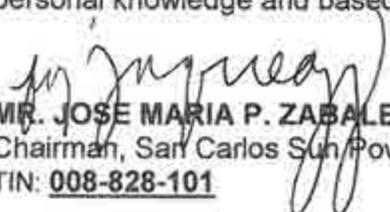

VIRGILIO F. FABRONERO
OIC-Chief, Clearance and Permitting Division

Approved by:

ATTY. JONATHAN P. BULOS
Regional Director

STATEMENT OF ACCOUNTABILITY

I, **Mr. Jose Maria P. Zabaleta**, Chairman of **San Carlos Sun Power, Incorporated**, project proponent of this proposed solar power plant (**San Carlos Sun Power**) project located in **Barangay Punao, San Carlos City, Negros Occidental** takes full responsibility in complying with all conditions stipulated in the Environmental Compliance Certificate (ECC) as well as in the Environmental Management Plan and the Environmental Monitoring Plan as contained in the Initial Environmental Examination Report (IEER) document. Further, I **HEREBY CERTIFY** that the information provided to the Department of Environment and Natural Resources pertaining to this project are true and correct to the best of my personal knowledge and based on the records on my possession.

MR. JOSE MARIA P. ZABALETA
Chairman, San Carlos Sun Power, Incorporated

"ANNEX A"

I. CONDITIONS

ENVIRONMENTAL MANAGEMENT

The proponent shall strictly implement the following mitigating, enhancement, and rehabilitating measures:

1. Proponent shall construct a temporary perimeter drainage canal provided with silt traps/ponds to treat/trap silt entrained run-off during heavy rains and dewatering of excavations prior to its discharge to prevent further siltation of the existing drainage facility and nearby water body prior to the start of the land clearing and earth moving activities;
2. Spoils shall be stockpiled on flat areas and away from the access road, drainage routes and nearby water body including earth and sand and gravel (SAG) materials. This shall be re-used as backfill material and shall not be disposed outside of the project area;
3. Excavated materials shall be properly stockpiled and properly disposed or reused. Excess soil materials shall not be deposited along areas traversed by run off and away from waterways and valuable crops and excess materials should be disposed to places as may be directed by the supervising engineer. Immediate vicinities of the disturbed area or temporary structures should be thoroughly cleared/ dismantled;
4. Proper drainage plan shall be developed and implementation must be observed so as not to inundate the adjacent areas and all drainage outfall shall be directed towards the existing drainage system (but not to overload its capacity) or the nearest water body;
5. Equipment to be used during construction shall be regularly maintained. Likewise, regular spraying of water on graded site/exposed soils shall be undertaken;
6. No cutting of matured trees specially banned species shall be done along the T/L route without proper clearance from authorities and be subjected to Forestry laws, rules and regulations. Removal of vegetation shall be limited only along the project area and along the ROW, as much as possible, unnecessary removal of vegetation shall be observed. Cutting of vegetation shall be kept at a minimum. Permit to Cut from Forest Management Services (FMS) shall be secured prior to cutting of trees. Burning of waste generated from land clearing such as leaves and branches shall be strictly prohibited, these shall be re-used as fire wood or made as compost;
7. Tree planting of at least **7,500 fruit, mangroves or forest tree species** (preferably those endemic in the area) shall be conducted on applicable areas, on open spaces and easement areas or on any alternative site. These should be maintained all throughout the duration of the project;
8. Proper orientation on the positioning of photovoltaic panels shall be applied to avoid possible specular reflections on the aircrafts approaching and leaving the nearby San Carlos City Air Strip.
9. Busted photovoltaic panels shall be properly handled, collected and stored in a separate storage facility. The proponent shall establish a centralize collection and storage of such and formulate measures as well as proper inventory, storage and handling of these materials. These materials shall not be disposed to public dump sites unless a landfill will be established that could cater this special wastes;

GENERAL CONDITIONS:

Further administrative conditions for the grant of this certificate shall be strictly complied:

10. The Proponent shall provide a three- chambered non-leaching septic tank to serve domestic wastes generated. Effluent should conform with the standard set in DAO No. 35 of R.A. 9275 otherwise known as the Philippine Clean Water Act;

11. Segregation, recycling, re-use and composting and proper disposal of solid wastes generated during construction and operation shall be in accordance with the provision of the Ecological Solid Waste Management under R.A. 9003 and its Implementing Rules and Regulations;
12. The proponent shall make an available budget based on the project scheduled in the submitted Environmental Management Plan (EMP) for the implementation of the project and proposed mitigating measures in the construction and operational phase. An accomplishment report on the implemented mitigating measures and the corresponding cost of the EMP activities shall be submitted to this Office on a quarterly basis for monitoring;
13. **Detailed specifications of the transformers and circuit breakers used by the project taking into consideration the coolant used should be submitted to this Office thirty (30) days after receipt of this ECC;**
14. The proponent shall set-up an Environmental Unit (EU) or assign a Pollution Control Officer (PCO) who shall handle the environmental aspects of the project, which shall have the following responsibilities:
 - a. Monitoring requirements as defined under the EMP;
 - b. Monitor actual project impact vis-à-vis predicted impacts and management measures in the EMP;
 - c. Make recommendations for the revision of the EMP as necessary;
 - d. Ensure that post-assessment permits are in place;
 - e. Ensure that monitoring and reporting are undertaken;
 - f. Ensure compliance to all the conditions and restrictions of the approved ECC.
 - g. Environmental monitoring reports shall be submitted to the EMB Region VI on a semi-annual basis using the **ECC Compliance Monitoring Report (CMR), Module No. 5 of the SMR;**
15. A 2' x 4' billboard containing this message: **"Notice to the Public, This project (title of the project) of (Name of the proponent) has been issued an Environmental Compliance Certificate (ECC Number) by the Environmental Management Bureau of the Department of Environment and Natural Resources, Region 6, on (date)."** This message must be installed at all entry and exit points and at all perimeters of the project facing the road to inform the general public within thirty (30) days from receipt of the certificate. A copy of the certificate shall also be posted by the Proponent at the barangay bulletin board of the affected barangays within thirty (30) days from receipt of the certificate. An accomplishment report which shall include picture verification of compliance to the posting of notices and the billboards shall be submitted to this Office within ninety (90) days from receipt of the ECC;
16. Proponent shall allow entry of EMB-R6 Field Personnel, DENR CENRO, PENRO and EMB R6 Focal Persons, into the project site at all times to conduct tangible monitoring and to validate project's compliance to the ECC conditions and EMP mitigating measures stipulated therein and in case there is a need for additional conditions in this ECC, the same shall be imposed by this office upon inspection if found necessary;
17. In case of abandonment, the Proponent shall notify the EMB Regional Office concerned within three (3) months prior to the abandonment and the Proponent shall submit its abandonment mitigation plan;

II. RESTRICTIONS:

The proponent is strictly subjected to the following restrictions:

1. No other activities should be undertaken other than what was stipulated in the IEER document. Should there be an expansion of the project beyond the project description, construction of other structures beyond those stated in the IEER document; or any change in the activity, shall be made subject to a new Environmental Impact Assessment;
2. Land clearing shall be limited to the project area. Burning of waste generated from land clearing such as leaves and branches shall be strictly prohibited. Any destruction of adjacent properties related to the project's construction and implementation shall be rehabilitated and affected parties shall be duly compensated;

3. Any request/s for ECC, amendments, except for change in ownership/s, should be submitted or filed within three (3) years from ECC issuance (for projects not started) or at any time during project implementation. Otherwise, the proponent shall have to file a new ECC application;
4. In case of transfer of ownership of this project, the same conditions and restrictions shall apply and the transferee shall be required to notify the EMB Regional Office concerned within fifteen (15) days as regards to the transfer of ownership;
5. This Certificate shall be considered automatically revoked if the project has not commenced within the period of five (5) years from the issuance thereof or if the ECC was not requested for extension within three (3) months from the expiration of its validity provided that no significant changes in land and resources uses have occurred in the project area or its vicinities to the extent that the impact assessment as embodied in the Environmental Management Plan (EMP) is no longer appropriate.

Non-compliance with any of the above mentioned conditions shall be a sufficient cause for the cancellation or suspension of this certificate and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (50,000.00) for every violation thereof.

“ANNEX B”

PROJECT ASSESSMENT PLANNING TOOL

For the assistance of the Proponents and government agencies concerned in the management of the project and for better coordination in mitigation on the impact of the project on its surrounding areas and to the environment, the following have been taken notice and the proponent is strongly advised to coordinate with the concerned government agencies. The monitoring of these regulatory conditions shall be their responsibility.

	RECOMMENDATIONS TO CONCERNED GOVERNMENT AGENCIES	RESPONSIBLE AGENCY
1	Consider Project's proper storm drainage canal, concrete culverts and other flood control measures needs to be provided to adequately receive and channel the increase in rain water run-off;	City concerned
2	Consider Project's construction shall conform to the existing rules and regulations of the National Building Code of the Philippines. Plans and design specifications shall be approved by the City Engineer's Office of San Carlos City, Negros Occidental prior to the project construction. All other plans and design specifications of facilities and amenities shall strictly conform to all applicable standards, rules and regulations and other standards, rules and regulations applicable to this kind of undertaking;	City concerned
3	Consider Project's need for the provision of a segregation, collection, recycling, and disposal mechanism for solid waste shall be provided;	City concerned
4	Consider Projects approval of Site Development Plan;	City concerned
5	Consider Project's Area Zonification/Locational Clearance;	City concerned
6	Consider Project's coordination for the traffic management in the area affected in anticipation of the growth of traffic caused by the project;	LTO/City concerned
7	Consider Project's temporary sanitary toilet facilities should be provided to the construction workers, and any waste should be properly disposed so as not to cause nuisance to the immediate environment;	DOLE/DOH
8	Consider Project's regulation on occupational health and safety standards shall be complied with;	DOLE/City concerned
9	Consider Project's compliance to strictly follow DENR Administrative Order No. 99-21 dated June 11, 1999 " Procedures in the Retention Areas within certain distances along the banks of rivers, streams, and shores of seas, lakes and oceans for environmental protection" to wit: a) Urban Areas - 3 meters b) Agricultural Areas - 20 meters c) Forest Areas - 40 meters	DENR-FMS/DPWH

RECOMMENDATIONS TO CONCERNED GOVERNMENT AGENCIES		RESPONSIBLE AGENCY
10	Consider Project's construction materials particularly sand and gravel and other quarry materials shall be sourced only from legitimate operators, if sourced from a River, quarry permits shall be secured and an ECC if it warrants, including those of its construction support facilities such as crushing and batching plants (if there is any);	PEMO-Province of Negros Occidental
11	Consider Project's compliance to the DENR no tree cutting policy and requiring the planting of trees in certain places and penalizing unauthorized cutting, destruction, damaging and injuring of trees, plants and vegetations of any kind as per P.D. 953. Permit to Cut shall be secured prior to cutting of trees in the area.	DENR-FMS

ENVIRONMENTAL PLANNING RECOMMENDATIONS FOR THE PROPONENT:

The following are the recommendations for the Proponent for the protection of the project area and the affected environment. It is strongly recommended that the same be strictly complied by the proponents.

1. Permits from other government agencies shall be secured prior to project implementation;
2. Close monitoring of the project should be undertaken by the proponent to maintain a high level of safety and efficiency at all stages of the project's construction and operation and to immediately address any environmental hazard/change that may take place;
3. Schedule noisy activities during daytime;
4. Donate collectable recyclables to the LGU;
5. Dust and exhaust fume emissions control;
6. Noise control measures;
7. Proper area for entrance and exit points shall be designated and enough space for loading and unloading purposes shall be provided;
8. Implementation of good housekeeping rules and regulations;
9. Regular access road development and maintenance;
10. All personnel involved in the construction shall be required to undergo orientation on safety precautions and practices. All workers shall be provided with necessary protective device and appropriate gadgets. First aid facilities and services for staff and employees must be available on-site during the construction and operation of the project. A health referral system and procedure should be instituted by the proponent and contractors;
11. Proponent shall provide copy of this approved ECC to the concerned government agencies as listed in the Project Assessment Planning Tool.

Subject : **ECC TRANSFER OF OWNERSHIP**

Dear **Mr. Aboitiz**:

This refers to your request for transfer of ownership of ECCs issued for the following projects:

1. Mak-Ban Geothermal Modular Power Plant Project (ECC Ref. Code No. 9206-041-203C);
2. Upgrading and Rehabilitation of Mak-Ban Geothermal Power Plants A and B (ECC Ref. No. 0112-871-203); and
3. Mak-Ban Binary Cycle Geothermal Power Generating Plant Project (ECC Ref. 9112-037-203).

Based on evaluation of the documents submitted, the said request is hereby approved.

Please be advised that this transfer shall carry with it the environmental liability and obligations including ECC compliance reporting requirement of the former proponent of each of the above projects. Further, all other conditions stipulated in the ECCs shall remain in force unless otherwise revised in writing. Any expansion and/or modification of approved operations shall be subjected to a new Environmental Impact Assessment (EIA) requirement.

With respect to the other permits and requirements, please coordinate with our EMB CALABARZON Regional Office located at 1515 L & S Building, Roxas Boulevard, Ermita Manila.

Very truly yours,

JULIAN D. AMADOR
Director

ECC-CO-1506-0018

Mr. Sebastian Arsenio R. Lacson
President and COO
THERMA VISAYAS INC.
Sitio Looc, Barangay Bato
Toledo City

Subject: **ENVIRONMENTAL COMPLIANCE CERTIFICATE**

Dear Sir:

This refers to your application for Environmental Compliance Certificate (ECC) for the proposed **Coal-Fired Power Plant Expansion Project** located in Sitio Looc, Brgy. Bato, Toledo City.

After satisfying the requirements of the Presidential Decree No. 1586 and its Implementing Rules and Regulations, and upon recommendation of the Environmental Impact Assessment Review Committee, the Department of Environment and Natural Resources (DENR) through the Environmental Management Bureau (EMB), has decided to grant the ECC amendment for the above-mentioned project.

With the issuance of the ECC, you are expected to fully implement the measures presented in the Environmental Performance Report and Management Plan (EPRMP) intended to protect and mitigate the project's adverse impacts on community health, welfare and the environment. Likewise, environmental considerations shall be incorporated in all phases and aspects of the project.

This Certificate does not create any right nor be used as an authorization to implement the project, you may proceed with the implementation only after securing all the necessary and relevant permits from other pertinent Government Agencies. This Office shall be monitoring the project periodically to ensure strict compliance with the stipulations cited in the attached ECC.

Please be guided accordingly.

Very truly yours,

By the Authority of the Secretary

ENVIRONMENTAL COMPLIANCE CERTIFICATE

(Issued under Presidential Decree 1586 and its IRR)

ECC-CO-1506-0018

THIS IS TO CERTIFY THAT THE PROPONENT, **THERMA VISAYAS, INC.**, represented by its President and COO, **Mr. Sebastian Arsenio R. Lacson** is granted this Environmental Compliance Certificate (ECC), for the proposed **Coal-Fired Power Plant Expansion Project** located at Sitio Looc, Barangay Bato, Toledo City by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau (EMB).

SUBJECT to the conditions and restrictions set-out herein labeled as Annex A and Annex B, this Certificate supersedes ECC-CO-1301-0003 issued on May 20, 2013.

This Certificate is issued with the following details:

PROJECT DESCRIPTION

This Certificate covers the construction and operation of 450 MW (2x150MW existing and 1x150MW expansion) Coal-Fired Power Plant Project using Circulating Fluidized Bed (CFB) Coal Technology to be located within 58 hectare property in Sitio Looc, Brgy. Bato, Toledo City and with the following major and support facilities:

- A. Major Components
 - 3x150 MW Boilers
 - 3x150 MW Steam Turbines and Generators
 - 3 Step-up and Auxiliary Transformer (units)
 - Jetty
 - Coal Storage (covered)
- B. Materials Handling Facilities
 - 3 Limestone Silo
 - 3 Bottom Ash Silo
 - 3 Fly Ash Silo
 - Coal Dome
 - Coal Conveyor (covered)
 - Screw-type ship unloader
- C. Pollution Control Devices and Waste Management System
 - 3 Electrostatic Precipitator Set
 - 2 Demineralization Facility
 - 3 Demineralized Water Storage Tank
 - 3 Fire/Service Water Tank
 - 3 Sea Water Reverse Osmosis (SWRO) Production Tank
 - 3 Filtered Water Tank
 - 2 Water Treatment Building
- D. Major and Support facilities indicated in the EPRMP

I. CONDITIONS**ENVIRONMENTAL MANAGEMENT**

All commitments, appropriate mitigating/enhancement measures and monitoring requirements especially those contained in the EPRMP, as approved by the EMB shall be instituted by the Proponent to minimize any adverse impact to the environment throughout the project implementation, including the following:

1. Implementation of an intensive and effective Information, Education and Communication (IEC) Program to inform and educate all affected stakeholders, particularly the direct impact barangays, about the Project's mitigating measures embodied in the EPRMP and the conditions stipulated in this Certificate for greater awareness, understanding and sustained acceptance of the Project. An annual detailed IEC program in coordination with the Environmental Management Bureau Region VII and report/proof of implementation thereof shall be submitted to the EMB Central Office annually and copy-furnished EMB Region VII;
2. Implementation of a comprehensive Social Development Program (SDP) and submission of a separate semi-annual report simultaneous with the submission of the Compliance Monitoring Report (CMR) to the EMB Central Office semi-annually and copy-furnished EMB Region VII;
3. Establish at least five (5) meters buffer zone along the entire periphery of the project site with appropriate species/dense vegetation cover to mitigate the adverse effect of its operation to the existing condition of the ecosystems in the area and to serve as noise, vibration and dust buffers.
4. Conduct validation of air dispersion modeling one (1) year after the start of project commercial operation and updated every two (2) years thereafter until results are consistent with the first year validation results and are compliant with existing standards, laws, rules and regulations. The validation reports shall be submitted to EMB Central Office within sixty (60) days from the conduct thereof. The validation shall be undertaken based on data collected from the automatic weather station;
5. Conduct validation of thermal plume modeling one (1) year after the start of the project commercial operation and shall be updated every two (2) years thereafter. The validation reports shall be submitted to EMB Central Office within sixty (60) days from the conduct of validation;
6. Conduct a risk/safety assessment one (1) month prior to commercial operation covering the entire facilities which shall be updated every five (5) years thereafter, to ensure that hazards and risks are kept at a minimum. The report shall be submitted to EMB Central Office within thirty (30) days from the conduct of assessment;
7. Submit and implement a LGU-approved Coastal Resource Management Program (CRMP) covering the project impact area to EMB Central Office copy furnished the EMB Region VII within one (1) year after the start of the project commercial operation;

8. Install an automatic weather station compliant with the relevant PAGASA standards and requirements within six (6) months after commercial operation. Proof of compliance shall be submitted to EMB Central Office at the end of the period specified;
9. Ensure that construction and operation of jetty will not pose significant impacts to marine life and ecosystem. Measures to guarantee protection shall be coordinated with Multipartite Monitoring Team (MMT) and Biodiversity Management Bureau (BMB);
10. Undertake a Carbon Sink Program to offset emissions of carbon dioxide from the power plant aligned with the current Carbon Sink Programs of DENR in coordination with EMB;

GENERAL CONDITIONS

11. The proponent shall comply with the guidelines on the requirements for Continuous Emission Monitoring Systems (CEMS) under DAO 2007-22. Installed CEMS shall be capable of providing real-time monitoring data and shall be transmitted online to EMB Central and EMB Region VII;
12. The Memorandum of Agreement (MOA) on the creation of Multipartite Monitoring Team which was signed and approved on 22 July 2014 shall be amended to include the entire operation of the 450 MW Coal-Fired power plant and the jetty covered by this Certificate;
13. The Environmental Unit (EU) shall competently handle the environment-related aspects of the project. In addition to the monitoring requirements as specified in the Environmental Management and Monitoring Plan (EMMoP), the EU shall have the following responsibilities:
 - 13.1 Monitor actual project impacts vis-à-vis the predicted impacts and management measures in the EPRMP;
 - 13.2 Conduct heavy metal analysis on ash (nearby ash disposal facilities) as part of the regular monitoring activities of the power plant project;
 - 13.3 Recommend revisions to the EMMoP, whenever necessary subject to the approval of EMB Central Office. Revisions shall also consider the result of the validation of air dispersion and thermal plume modeling; and
 - 13.4 Ensure that data gathered during monitoring activities are properly documented, assessed, evaluated and reported to EMB (Central Office and Region VII) in accordance with the prescribed formats.
14. The proponent shall ensure that its contractors and subcontractors consider among others, the following mitigating measures for jetty/pier and initial dredging activities:
 - 14.1 The use of applicable sound attenuation devices;
 - 14.2 Re-suspension of loose sediments to enclose and limit dispersal of sediments; and
 - 14.3 The jetty design shall use platform on stilts to avoid

interfering with the marine hydrodynamic processes existing in the area

15. The proponent shall ensure that its contractors and subcontractors strictly comply with the relevant conditions of this Certificate;
16. Restore to its former condition the backfilled area along the shoreline after completion of its jetty construction as committed within three (3) months;

II. RESTRICTIONS

17. No construction or development-activities as identified herein or any portion thereof shall be initiated/undertaken until outstanding issues on zoning, conversion, tenurial and/or similar land concerns shall have been resolved with finality;
18. No activities shall be undertaken other than what were stipulated in the EPRMP. Should there be any expansion of the project beyond the EPRMP or any change in the activity or transfer of location, the same shall be subject to a new Environmental Impact Assessment; and
19. Transfer of ownership of this project carries the same conditions and restrictions, for which written notification must be made by herein grantee to EMB within fifteen (15) days prior to such transfer.

PROJECT ASSESSMENT PLANNING TOOL

For the assistance of the Proponent and government agencies concerned in the management of the project and for better coordination in mitigation of the impact of the project on its surrounding areas and to the environment, the following are recommendations to the parties and authorities concerned for proper appreciation and action.

OTHER REGULATORY REQUIREMENTS	CONCERNED GOVERNMENT AGENCIES/ENTITIES
1. Compliance by the proponent with the following: <ul style="list-style-type: none"> a. Ecological Solid Waste Management Act b. Building Code of the Philippines c. Zoning Clearance 	LGU concerned
2. Compliance with the Sanitation Code of the Philippines	DOH
3. Labor Code of the Philippines including occupational safety and safety standards for petrochemical plant and provide personal protective equipment for the workers.	DOLE-Bureau of Working Condition
4. Secure tree cutting permit.	DENR
5. Foreshore Lease Agreement (FLA), if necessary	DENR

ENVIRONMENTAL PLANNING RECOMMENDATIONS FOR THE PROPONENT

6. Priority of employment shall be given to qualified local residents. Adequate public information on jobs available for local residents in the affected areas shall be provided; and
7. An independent third party shall be commissioned to undertake an environmental audit, including a continuing study of the effects of the Project on the health of the workers and affected residents. The result of the third party environmental audit, including the auditing of risks and hazards of the Project, shall be submitted to EMB, while the result of the continuing health study shall be submitted, every five (5) years, to the Department of Health (DOH), for evaluation.

For dissemination and proper action of the parties concerned.

ECC Ref. No. 1107-0010

Mr. Thomas Sliman, Jr.
Vice President – Business Development
THERMA SOUTH INC.
5/F 110 Legaspi St., Legaspi Village
Makati City

SUBJECT: ENVIRONMENTAL COMPLIANCE CERTIFICATE

Dear Sir:

This refers to the Environmental Compliance Certificate (ECC) application for the proposed Therma South Energy Project to be located in Barangay Binugao, Toril District, Davao City and Barangay Inawayan, Sta. Cruz, Davao Del Sur.

After satisfying the requirements in the said application and upon recommendation of the Environmental Management Bureau (EMB), this Department has decided to grant an ECC to the above-mentioned project.

With the issuance of this ECC, you are expected to implement the measures presented in the Environmental Impact Statement (EIS) and the Environmental Management and Monitoring Plan (EMMoP), intended to protect and mitigate the project's adverse impacts on community health, welfare and the environment. Environmental considerations shall be incorporated in all phases and aspects of the project. You may proceed with the project implementation after securing all the necessary permits from other pertinent Government agencies. This Office will be monitoring the project periodically to ensure your compliance with stipulations cited in the attached ECC.

Please be guided accordingly.

Very truly yours,

ENVIRONMENTAL COMPLIANCE CERTIFICATE

(Issued under Presidential Decree No. 1586)

ECC Ref. Code: 1107-0010

THIS IS TO CERTIFY THAT THE PROPONENT, THERMA SOUTH INC., as represented by its Vice President for Business Development, Mr. Thomas Sliman Jr., is granted this Environmental Compliance Certificate (ECC) for the proposed **Therma South Energy Project** located in **Barangay Binugao, Toril District, Davao City and Barangay Inawayan, Sta. Cruz, Davao Del Sur** by the Department of Environment and Natural Resources (DENR) through the Environmental Management Bureau (EMB).

SUBJECT ONLY to the conditions and restrictions set in this ECC and in the attached document labeled as Annexes A and B.

This Certificate is issued with the following details:

PROJECT DESCRIPTION

The proposed Therma South Energy Project shall use the Circulating Fluidized Bed (CFB) Coal Technology with the following facilities:

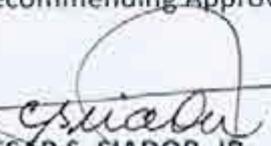

- Coal unloading pier capable of unloading 73,000 DWT sized vessels;
- Barge pier for smaller vessels, boats and barges;
- Enclosed conveying equipment with coal crushers;
- Enclosed coal storage area;
- 2 x 150-MW CFB boilers;
- 2 x 150-MW steam turbine generators;
- Cooling water intake and discharge structures for the condenser cooling water;
- Sea water cooled condensers for condensing and reusing steam;
- Limestone preparation plant;
- Sand silos;
- Electrostatic Precipitator or fabric filter for ash collection;
- Continuous Emission Monitoring System (CEMS);
- Ash silos;
- Lined, dry ash cells for storage of unsold ash;
- Water treatment plant for process water;
- Waste water treatment and sewage treatment facilities for recycling water for project dust control and landscaping needs;
- Desalination plant, if required for source of process water;
- Transmission Line;
- substation for connection to DLPC/ NGCP for power export; and
- Central control room.

This Certificate is issued in compliance to the requirements of Presidential Decree No. 1586, in accordance to DENR Administrative Order (D.A.O.) No. 2003-30. Non-compliance with any of the provisions of this Certificate shall be a sufficient cause for the cancellation of this Certificate and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (P50,000.00) for every violation thereof. The EMB, however, is not precluded from reevaluating, and correcting any deficiencies or errors that may be found after issuance of this Certificate.

Issued at DENR, Quezon City, Philippines, this SEP 09 2011.

I. CONDITIONS

ENVIRONMENTAL MANAGEMENT

All commitments, mitigating measures and monitoring requirements, contained in the Environmental Impact Statement (EIS) for the proposed Therma South Energy Project, particularly in the Environmental Management and Monitoring Plan (EMMoP), including the modifications and additional information as approved by the EMB, shall be instituted to minimize any adverse impact of the project to the environment throughout its implementation, including the following:

1. Conduct an effective Information, Education and Communication (IEC) Program to inform and educate all stakeholders, especially its contractors, workers, and local residents about the mitigating measures embodied in its EIS, the conditions stipulated in this Certificate and the environmental and human safety features of the project for greater awareness, understanding and sustained acceptance of the project;
2. Implement a Comprehensive Social Development Program (SDP) and submit a report to the EMB Central Office and EMB Region XI on a regular quarterly basis;
3. Establish appropriate measures and buffer zones along the entire periphery of the project site with appropriate species/dense vegetation cover to enhance the condition of the ecosystems and to serve as noise, vibration and dust buffers;
4. Conduct validation of air dispersion and thermal plume modeling within one year from the start of project operation. The proponent may opt to design and implement its own air and water quality monitoring program in a manner that can be used for validating said models to be used in determining accuracy of impacts and impact areas and to ensure that actual levels of pollutants are within the DENR standards;
5. Establishment of a reforestation and carbon sink program using endemic/indigenous species to mitigate greenhouse gas (GHG) emissions of the project in line with the DENR's thrust for GHG emission reduction programs. The program shall be submitted to EMB six (6) months prior to the project operation;

GENERAL CONDITIONS

6. The plant operations shall conform with the provisions of RA 6969 (Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990), RA 8749 (Philippine Clean Air Act of 1999), RA 9003 (Act providing for an Ecological Solid Waste Management Program), and RA 9275 (Philippine Clean Water Act of 2004) and other relevant policies, rules and regulations;
7. The proponent shall set-up the following:
 - 7.1 A readily available and replenishable Environmental Guarantee Fund (EGF) to cover the following expenses for further environmental assessments, compensations/indemnification for whatever damages to life and property that may be caused by the project; rehabilitation and /or restoration of areas affected by the project's implementation; and abandonment/decommissioning of the project facilities related to the prevention of possible negative impacts and as a source of

fund for contingency and clean up activities;

7.2 A Multipartite Monitoring Team (MMT) composed of representative(s) from the proponent, EMB Region XI, a local environmental Non-Government Organization (NGO), DOE and the LGUs shall be organized. The MMT should primarily oversee the compliance of the proponent with the Environmental Management and Monitoring Plan (EMMoP) and the ECC conditions;

7.3 A replenishable Environmental Monitoring Fund (EMF) to cover all costs attendant to the operation of the MMT such as training, sampling and analysis, the hiring of technical experts, accommodations and transportation.

The amount and mechanics of the EGF, EMF and the establishment of the MMT shall be determined by the DENR and the proponent in consultation with EMB Region XI through a Memorandum of Agreement (MOA) which shall be submitted within sixty (60) days upon receipt of this Certificate;

8. Creation of an Environmental Unit (EU) within sixty days from issuance of this Certificate that competently handle the environment-related aspects of the project. In addition to the monitoring requirements as specified in the Environmental Management and Monitoring Plan (EMMoP), EU shall have the following responsibilities:
 - a. Monitor actual project impacts vis-à-vis the predicted impacts and management measures in the EIS;
 - b. Accordingly recommend revisions to the EMMoP, whenever necessary subject to the approval of EMB Central Office. Revisions should also consider the result of the validation of air dispersion and thermal plume modeling as required in item 4 (Annex A) of this Certificate;
 - c. Ensure that data gathered during monitoring activities are properly documented, assessed, evaluated and reported in accordance to the standard formats; and,
 - d. Ensure that monitoring and submissions of reports to EMB (Central Office and Region XI) are carried out as required;
9. The proponent shall ensure that its contractors and sub-contractors properly comply with the relevant conditions of this Certificate;

II. RESTRICTIONS

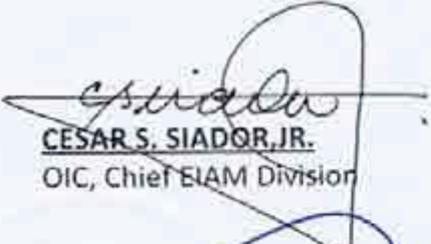

10. No activities shall be undertaken other than what was stipulated in the final EIS. Should there be any expansion of the project beyond the project description or any change in the activity or transfer of location shall be subject to a new Environmental Impact Assessment; and,
11. In case of transfer of ownership of this project, these same conditions and restrictions shall apply and the transferee shall be required to notify the EMB Regional Office within fifteen (15) days as regards the transfer of ownership.

O.R. No : 9724570
Date : July 12, 2011
Processing Fee : PhP6,010.00

PROJECT ASSESSMENT PLANNING TOOL

For the assistance of the Proponent and the Government agencies concerned in the management of the Project and for better coordination in mitigation of the impacts of the Project on its surrounding areas and the environment, and by way of recommendation, the following have been taken notice of by the EIA Review Committee and are forwarding these recommendations to the parties and authorities concerned for appropriate action.

OTHER REGULATORY REQUIREMENTS/CONDITIONS	CONCERNED GOVERNMENT AGENCIES/ENTITIES
1. Compliance with the Sanitation Code of the Philippines;	DOH
2. Compliance with the Labor Code of the Philippines;	DOLE
3. Ensure conformance with the Ecological Solid Waste Management Act;	LGUs concerned
4. Presentation of the EIA findings for consideration in the securing of clearance from the office of the President on tree cutting;	Office of the President
5. Secure Zoning Clearance;	LGUs concerned
ENVIRONMENTAL PLANNING RECOMMENDATIONS FOR THE PROPONENT	
6. Priority of employment need to be given to qualified local residents and IPs. Adequate public information for jobs available to local residents and IPs in the affected areas needs to be provided; and,	
7. An independent third party shall be commissioned to undertake an environmental audit, including a continuing study of the effects of the Project on the health of the workers and affected residents, including vulnerable groups. The result of the third party environmental audit, including the auditing of risks and hazards of the Project, shall be submitted to EMB, while the result of the continuing health study shall be submitted, every two (2) years, to the Department of Health (DOH), for evaluation.

SUBJECT: ENVIRONMENTAL COMPLIANCE CERTIFICATE

Dear Sir:

This refers to the Environmental Compliance Certificate (ECC) application of Therma Visayas Inc. for the proposed Therma Visayas Coal Fired Power Plant Project to be located at Sitio Looc, Barangay Bato, Toledo City.

After satisfying the requirements in the said application and upon recommendation of the Environmental Management Bureau (EMB), this Department has decided to grant an ECC for the above-mentioned project.

With the issuance of this ECC, you are expected to implement the measures presented in the Environmental Impact Statement (EIS) and the Environmental Management and Monitoring Plan (EMMoP), intended to protect and mitigate the project's adverse impacts on community health, welfare and the environment. Environmental considerations shall be incorporated in all phases and aspects of the project. You may proceed with the project implementation after securing all the necessary permits from other pertinent Government agencies. This Office will be monitoring the project periodically to ensure your compliance with stipulations cited in the attached ECC.

Please be guided accordingly.

ENVIRONMENTAL COMPLIANCE CERTIFICATE
 (Issued under Presidential Decree No. 1586)
ECC-CO-1301-003

THIS IS TO CERTIFY THAT THE PROPONENT, **THERMA VISAYAS, INC.**, as represented by its President, **Mr. Benjamin A. Cariaso, Jr.**, is granted this Environmental Compliance Certificate (ECC) for the proposed **Therma Visayas Coal Fired Power Plant Project** located in **Sitio Looc, Barangay Bato, Toledo City** by the Department of Environment and Natural Resources (DENR) through the Environmental Management Bureau (EMB).

SUBJECT ONLY to the conditions and restrictions set in this ECC and in the attached document labeled as Annexes A and B.

This Certificate is issued with the following details:

PROJECT DESCRIPTION

This certificate shall cover the construction and operation of Therma Visayas Coal-Fired Power Plant Project with a net capacity of three hundred (300) MW using Circulating Fluidized Bed (CFB) Coal Technology to be located within a 40.63 hectare property in Sitio Looc Brgy. Bato, Toledo City with the following facilities:

- 2 x 150MW CFB boilers;
- 2 x 150MW steam turbine generators;
- Coal Handling and Storage System (Enclosed conveying equipment with coal crushers);
- Coal Unloading pier;
- Barge pier;
- Cooling water intake and discharge structures for condenser cooling water;
- Auxiliary Materials Handling and Storage System;
- Seawater cooled condensers for condensing and reusing steam;
- Limestone preparation plant;
- Sand Silos;
- Ash handling and disposal area;
- Water treatment plant (Demineralization Plant);
- Desalination Plant;
- Air pollution control facilities (ie. electrostatic precipitator);
- Continuous Emission Monitoring System (CEMS);
- Wastewater treatment and sewage treatment facilities;
- Transmission line and substation for connection to VECO/NGCP for power export; and Other support facilities

I. CONDITIONS

ENVIRONMENTAL MANAGEMENT

All commitments, mitigating measures and monitoring requirements, contained in the Environmental Impact Statement (EIS) for the proposed Therna Visayas Power Plant Project, particularly in the Environmental Management Plan/ Environmental Monitoring Plan, including any modifications and/or additional information as approved by the EMB, shall be instituted to minimize any adverse impact of the project to the environment throughout its implementation, which shall include among others to wit:

1. Conduct an effective Information, Education and Communication (IEC) Program to inform and educate all stakeholders, especially its contractors, workers, and local residents about the mitigating measures embodied in its EIS, the conditions stipulated in this Certificate and the environmental and human safety features of the project for greater awareness, understanding and sustained acceptance of the project. The program shall be submitted to EMB Central Office on an annual basis;
2. Implement a Comprehensive Social Development Program (SDP) and submit a separate report together with the Compliance Monitoring Report (CMR) to the EMB CO and copy furnished EMB Region VII on a semi-annual basis;
3. Establish appropriate measures and buffer zones along the entire periphery of the project site with appropriate species/dense vegetation cover to enhance the condition of the ecosystems and to serve as noise, vibration and dust buffers;
4. Conduct validation of air dispersion, coastal current circulation, and thermal plume modeling prior to the start of project construction;
5. Conduct detailed site investigation which includes detailed geotechnical study, erosion and dissolution of underlying limestone, and seismic risk analysis of the power plant and jetty areas and submit copy of the studies to EMB CO and EMB Region VII prior to project construction;
6. Conduct a risk assessment prior to the start of project construction covering the entire facilities in relation to occupational health and safety to be updated at least every five (5) years, to ensure that hazards and risks are kept at the minimum;
7. Establishment of a reforestation and carbon sink program using endemic/indigenous species to mitigate greenhouse gas (GHG) emissions of the project in line with the DENR's thrust for GHG emissions reduction programs and National Greening Program. The program shall be submitted to EMB CO and EMB Region VII six (6) months prior to the project implementation;

GENERAL CONDITIONS

8. The plant operations shall conform with the provisions of RA 6969 (Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990), RA 8749 (Philippine Clean Air Act of 1999), RA 9003 (Ecological Solid Waste Management Act of 2000), and RA 9275 (Philippine Clean Water Act of 2004) and other relevant policies, rules and regulations;

SUBJECT: EXTENSION ON THE VALIDITY OF ENVIRONMENTAL COMPLIANCE CERTIFICATE (ECC-CO-1405-0010) FOR THE THERMA SOUTH INC. ENERGY EXPANSION PROJECT (PHASE II)

Dear Mr. Aboitiz:

This refers to your letter dated 01 August 2019 requesting for extension on the validity of the Environmental Compliance Certificate (ECC-CO-1405-0010) issued for your Therma South Inc. Energy Expansion Project (Phase II) located in Barangay Binugao, Toril District, Davao City and Barangay Inawayan, Sta. Cruz, Davao del Sur.

EMB Memorandum Circular 005 of July 2014 section 4.h states that, "*EMB considered that the project is implemented once site development or clearing operations (i.e., demolition/relocation of informal settlers) started*". Based on the review of the attached documents and previous submission of the Compliance Monitoring Report (CMR), the project is considered implemented hence, no ECC extension is necessary.

However, please be reminded to submit online and regularly your Compliance Monitoring Report (CMR) to update EMB-CO of the status of your project.

Please be guided accordingly.

Very truly yours,

ENGR. ESPERANZA A. SAJUL

Subject: **ENVIRONMENTAL COMPLIANCE CERTIFICATE**

Dear Sir:

This refers to the Environmental Compliance Certificate (ECC) application for the proposed Therma South Energy Expansion Project (Phase II) to be located in Barangay Binugao, Toril District, Davao City and Barangay Inawayan, Sta. Cruz, Davao del Sur.

After satisfying the requirements of the said application and upon recommendation of the Environmental Management Bureau (EMB), this Department has decided to grant an ECC to the above-mentioned project.

With the issuance of this ECC, you are expected to comply with conditions herein set and to implement the measures presented in the Environmental Performance Report and Management Plan (EPRMP) intended to protect and mitigate the project's adverse impacts on community health, welfare and the environment. However, you may proceed with project implementation only after securing the necessary permits and/or clearances from other pertinent Government Agencies. Environmental considerations shall be incorporated in all phases and aspects of the Project. This Office shall be strictly monitoring the project periodically to ensure your compliance with stipulations cited in the attached ECC.

Please be guided accordingly.

ENVIRONMENTAL COMPLIANCE CERTIFICATE
(Issued under Presidential Decree 1586 and its IRR)
ECC-CO-1405-0010

THIS IS TO CERTIFY THAT THE PROPONENT, **THERMA SOUTH, INC.**, represented by its President and Chief Operating Officer, **Mr. Benjamin A. Cariaso, Jr.**, is granted this Environmental Compliance Certificate (ECC), for the proposed Therma South Energy Expansion Project (Phase II) to be located in Barangay Binugao, Toril District, Davao City and Barangay Inawayan, Sta. Cruz, Davao del Sur, by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau (EMB).

SUBJECT to the conditions and restrictions set-out herein labeled as Annex A and Annex B.

This Certificate is issued with the following details:

PROJECT DESCRIPTION

This Certificate covers the 345 MW Coal Fired Power Plant (Phase II), composed of two (2) units circulating fluidized bed (CFB). It shall be located within a land area of 79.6 hectares in Barangay Binugao, Toril District, Davao City and Barangay Inawayan, Sta. Cruz, Davao del Sur adjacent to the existing 300 MW (Phase I) coal fired power plant. The following are the major facilities of the power plant:

- 2 x 172.5 CFB boilers each equipped with coal silo
- 2 x 172.5 steam turbine generators
- Enclosed coal storage area
- Enclosed coal conveyor system
- Coal crushing facility with rated capacity of 400 tons per hour
- Limestone storage and preparation area
- Sand storage and preparation area
- Circulating water system
- Electrostatic Precipitator for each boiler

The following facilities shall be shared by the 345 MW (Phase II) and 300 MW (Phase I) coal fired power plants of Therma South Inc. (TSI): coal unloading jetty at 73,000 DWT vessels and equipped with unloader and fully covered conveyor systems, process wastewater treatment plant (chemical treatment), ash runoff wastewater treatment plant (chemical treatment), sewage treatment facilities (biological treatment), ash handling system and diesel fuel tanks.

This Certificate is issued in compliance with the requirements of Presidential Decree No. 1586, and its Implementing Rules and Regulations. Non-compliance with any of the provisions of this Certificate shall be a sufficient cause for the cancellation of this Certificate and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (₱50,000.00) for every violation thereof without prejudice to imposition of fines and penalties under other

environmental laws. The EMB, however, is not precluded from reevaluating and correcting any deficiencies or errors that may be found after issuance of this Certificate.

Issued at DENR, Quezon City, Philippines, this AUG 20 2014.

Recommending Approval:

I. CONDITIONS**ENVIRONMENTAL MANAGEMENT**

All commitments, appropriate mitigating/enhancement measures and monitoring requirements especially those contained in the EPRMP, as approved by the EMB shall be instituted to minimize any adverse impact to the environment throughout the project implementation, including the following:

1. Implementation of an intensive and effective Information, Education and Communication (IEC) Program to inform and educate all affected stakeholders, particularly the direct impact barangays, about the Project's mitigating measures embodied in the EPRMP and the conditions stipulated in this Certificate for greater awareness, understanding and sustained acceptance of the Project. The proponent shall implement an annual detailed IEC program in coordination with the Environmental Management Bureau Region XI and report of implementation thereof shall be submitted to the EMB Central Office annually and copy furnished EMB Region XI;
2. Implementation of a comprehensive Social Development Program (SDP) and Indigenous Peoples Development Program and submission of a separate semi-annual report simultaneous with the submission of the Compliance Monitoring Report (CMR) to the EMB Central Office semi-annually and copy furnished EMB Region XI;
3. Formulate a reforestation and carbon sink program using endemic/indigenous species to mitigate greenhouse gas (GHG) emissions of the project in line with the DENR's thrust for GHG emissions reduction program and the National Greening Program to consider the impact of the expansion project in coordination with PENRO and the CENRO and submitted to EMB (Central and Region XI) six (6) months prior to its operation. Implementation of the said program shall be reported to EMB (Central Office and Region XI) on a quarterly basis;
4. The proponent shall protect the natural springs/wells within the project site that are being utilized as sources of potable and domestic water by the community. Should the development activities affect the natural springs/wells, the proponent shall immediately provide an alternative source of potable water to the affected community;
5. Establishment of appropriate buffer zones along the entire periphery of the project site with appropriate species/dense vegetation cover to mitigate the adverse effect of its operation to the existing condition of the ecosystems in the area and to serve as noise, vibration and dust buffers;

GENERAL CONDITIONS

6. The plant operations shall conform with the provisions of R.A. No. 6969 (Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990), R.A. No. 8749 (Philippine Clean Air Act of 1999), R.A. No. 9003

(Ecological Solid Waste Management Act of 2000), and R.A. No. 9275 (Philippine Clean Water Act of 2004);

The proponent shall operate and maintain a Continuous Emission Monitoring System (CEMS), the data of which shall be submitted to EMB Central Office and the EMB Region XI on a quarterly basis;

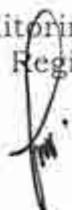

7. The proponent shall set-up the following:

- 7.1 A readily available and replenishable Environmental Guarantee Fund (EGF) to cover the following expenses:
 - 1) Further environmental assessments, compensations/indemnification for whatever damages to life and property that may be caused by the project;
 - 2) Rehabilitation and restoration of areas affected by the project's implementation; and
 - 3) Abandonment/decommissioning of the project facilities related to the prevention of possible negative impacts and as a source of funds for contingency and clean-up activities;
- 7.2 A Multipartite Monitoring Team (MMT) composed of representative(s) from the proponent, DOE, EMB Region XI, local environmental Non-Government Organization (NGO) and the LGUs concerned shall be organized. The MMT shall primarily monitor the compliance of the proponent with the Environmental Management Plan/ Environmental Monitoring Plan as well as the conditions of its ECC;
- 7.3 A replenishable Environmental Monitoring Fund (EMF) that shall cover all costs attendant to the operation of the MMT such as training, sampling and analysis, the hiring of technical experts, accommodations and transportation.

The amount and mechanics of the EGF, EMF and the establishment of the MMT shall be determined by the proponent in consultation with EMB Region XI through a Memorandum of Agreement (MOA) which shall be submitted to EMB Central Office for approval within sixty (60) days upon receipt of this Certificate.

8. Creation of an Environmental Unit (EU) within sixty (60) days from receipt of this Certificate that shall competently handle the environment-related aspects of the project. In addition to the monitoring requirements as specified in the Environmental Management and Monitoring Plan (EMMoP), the EU shall have the following responsibilities:

- 8.1 Monitor actual project impacts vis-à-vis the predicted impacts and management measures in the EPRMP;
- 8.2 Recommend revisions to the EMP/EMoP, whenever necessary subject to the approval of EMB Central Office. Revisions shall also consider the result of the validation of air dispersion and thermal plume modeling;
- 8.3 Ensure that data gathered during monitoring activities are properly documented, assessed, evaluated and reported to EMB (Central Office and Region XI) in accordance with the prescribed formats; and,
- 8.4 Ensure that monitoring and submissions of reports to EMB (Central Office and Region XI) are carried out as required;

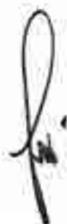

9. The proponent shall ensure that its contractors and subcontractors properly comply with the relevant conditions of this Certificate;
10. Conduct a Quantitative Risk Assessment (QRA) and Hazard Operability (HAZOP) prior to commissioning to ensure that hazards and risks are kept at a minimum. The report shall be submitted to EMB Central Office and EMB Region XI within sixty (60) days from the conduct of the QRA. At the minimum, the QRA shall be updated if there are major changes;
11. Conduct validation of the air dispersion and thermal plume modeling within one year from the start of project operation. The proponent may opt to design and implement its own air and water quality monitoring program in a manner that may be used for validating said models to be used in determining accuracy of impacts and impact areas and to ensure that actual levels of pollutants are within the DENR standards;
12. Submit a coastal resource management program (CRMP) to EMB Central Office copy furnished the EMB Region XI within six (6) months prior to its operation;

II. RESTRICTIONS

13. There shall be no development/operation in the project area classified as agricultural zone until such time that the area has been reclassified by the appropriate government agencies in accordance with law;
14. No activities shall be undertaken other than what were stipulated in the EPRMP. Should there be any expansion of the project beyond the EPRMP or any change in the activity or transfer of location, the same shall be subject to a new Environmental Impact Assessment; and
15. Transfer of ownership of this project carries the same conditions and restrictions, for which, written notification shall be made by herein grantee to EMB within fifteen (15) days from such transfer.

ENVIRONMENTAL COMPLIANCE CERTIFICATE
(Issued under Presidential Decree 1586 and its IRR)
ECC-CO-1405-0010

THIS IS TO CERTIFY THAT THE PROPONENT, **THERMA SOUTH, INC.**, represented by its President and Chief Operating Officer, **Mr. Benjamin A. Cariaso, Jr.**, is granted this Environmental Compliance Certificate (ECC), for the proposed Therma South Energy Expansion Project (Phase II) to be located in Barangay Binugao, Toril District, Davao City and Barangay Inawayan, Sta. Cruz, Davao del Sur, by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau (EMB).

SUBJECT to the conditions and restrictions set-out herein labeled as Annex A and Annex B.

This Certificate is issued with the following details:

PROJECT DESCRIPTION

This Certificate covers the 345 MW Coal Fired Power Plant (Phase II), composed of two (2) units circulating fluidized bed (CFB). It shall be located within a land area of 79.6 hectares in Barangay Binugao, Toril District, Davao City and Barangay Inawayan, Sta. Cruz, Davao del Sur adjacent to the existing 300 MW (Phase I) coal fired power plant. The following are the major facilities of the power plant:

- 2 x 172.5 CFB boilers each equipped with coal silo
- 2 x 172.5 steam turbine generators
- Enclosed coal storage area
- Enclosed coal conveyor system
- Coal crushing facility with rated capacity of 400 tons per hour
- Limestone storage and preparation area
- Sand storage and preparation area
- Circulating water system
- Electrostatic Precipitator for each boiler

The following facilities shall be shared by the 345 MW (Phase II) and 300 MW (Phase I) coal fired power plants of Therma South Inc. (TSI): coal unloading jetty at 73,000 DWT vessels and equipped with unloader and fully covered conveyor systems, process wastewater treatment plant (chemical treatment), ash runoff wastewater treatment plant (chemical treatment), sewage treatment facilities (biological treatment), ash handling system and diesel fuel tanks.

This Certificate is issued in compliance with the requirements of Presidential Decree No. 1586, and its Implementing Rules and Regulations. Non-compliance with any of the provisions of this Certificate shall be a sufficient cause for the cancellation of this Certificate and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (₱50,000.00) for every violation thereof without prejudice to imposition of fines and penalties under other

environmental laws. The EMB, however, is not precluded from reevaluating and correcting any deficiencies or errors that may be found after issuance of this Certificate.

Issued at DENR, Quezon City, Philippines, this AUG 20 2014.

I. CONDITIONS**ENVIRONMENTAL MANAGEMENT**

All commitments, appropriate mitigating/enhancement measures and monitoring requirements especially those contained in the EPRMP, as approved by the EMB shall be instituted to minimize any adverse impact to the environment throughout the project implementation, including the following:

1. Implementation of an intensive and effective Information, Education and Communication (IEC) Program to inform and educate all affected stakeholders, particularly the direct impact barangays, about the Project's mitigating measures embodied in the EPRMP and the conditions stipulated in this Certificate for greater awareness, understanding and sustained acceptance of the Project. The proponent shall implement an annual detailed IEC program in coordination with the Environmental Management Bureau Region XI and report of implementation thereof shall be submitted to the EMB Central Office annually and copy furnished EMB Region XI;
2. Implementation of a comprehensive Social Development Program (SDP) and Indigenous Peoples Development Program and submission of a separate semi-annual report simultaneous with the submission of the Compliance Monitoring Report (CMR) to the EMB Central Office semi-annually and copy furnished EMB Region XI;
3. Formulate a reforestation and carbon sink program using endemic/indigenous species to mitigate greenhouse gas (GHG) emissions of the project in line with the DENR's thrust for GHG emissions reduction program and the National Greening Program to consider the impact of the expansion project in coordination with PENRO and the CENRO and submitted to EMB (Central and Region XI) six (6) months prior to its operation. Implementation of the said program shall be reported to EMB (Central Office and Region XI) on a quarterly basis;
4. The proponent shall protect the natural springs/wells within the project site that are being utilized as sources of potable and domestic water by the community. Should the development activities affect the natural springs/wells, the proponent shall immediately provide an alternative source of potable water to the affected community;
5. Establishment of appropriate buffer zones along the entire periphery of the project site with appropriate species/dense vegetation cover to mitigate the adverse effect of its operation to the existing condition of the ecosystems in the area and to serve as noise, vibration and dust buffers;

GENERAL CONDITIONS

6. The plant operations shall conform with the provisions of R.A. No. 6969 (Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990), R.A. No. 8749 (Philippine Clean Air Act of 1999), R.A. No. 9003

(Ecological Solid Waste Management Act of 2000), and R.A. No. 9275 (Philippine Clean Water Act of 2004);

The proponent shall operate and maintain a Continuous Emission Monitoring System (CEMS), the data of which shall be submitted to EMB Central Office and the EMB Region XI on a quarterly basis;

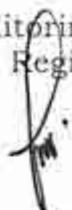

7. The proponent shall set-up the following:

- 7.1 A readily available and replenishable Environmental Guarantee Fund (EGF) to cover the following expenses:
- 1) Further environmental assessments, compensations/indemnification for whatever damages to life and property that may be caused by the project;
 - 2) Rehabilitation and restoration of areas affected by the project's implementation; and
 - 3) Abandonment/decommissioning of the project facilities related to the prevention of possible negative impacts and as a source of funds for contingency and clean-up activities;
- 7.2 A Multipartite Monitoring Team (MMT) composed of representative(s) from the proponent, DOE, EMB Region XI, local environmental Non-Government Organization (NGO) and the LGUs concerned shall be organized. The MMT shall primarily monitor the compliance of the proponent with the Environmental Management Plan/ Environmental Monitoring Plan as well as the conditions of its ECC;
- 7.3 A replenishable Environmental Monitoring Fund (EMF) that shall cover all costs attendant to the operation of the MMT such as training, sampling and analysis, the hiring of technical experts, accommodations and transportation.

The amount and mechanics of the EGF, EMF and the establishment of the MMT shall be determined by the proponent in consultation with EMB Region XI through a Memorandum of Agreement (MOA) which shall be submitted to EMB Central Office for approval within sixty (60) days upon receipt of this Certificate.

8. Creation of an Environmental Unit (EU) within sixty (60) days from receipt of this Certificate that shall competently handle the environment-related aspects of the project. In addition to the monitoring requirements as specified in the Environmental Management and Monitoring Plan (EMMoP), the EU shall have the following responsibilities:

- 8.1 Monitor actual project impacts vis-à-vis the predicted impacts and management measures in the EPRMP;
- 8.2 Recommend revisions to the EMP/EMoP, whenever necessary subject to the approval of EMB Central Office. Revisions shall also consider the result of the validation of air dispersion and thermal plume modeling;
- 8.3 Ensure that data gathered during monitoring activities are properly documented, assessed, evaluated and reported to EMB (Central Office and Region XI) in accordance with the prescribed formats; and,
- 8.4 Ensure that monitoring and submissions of reports to EMB (Central Office and Region XI) are carried out as required;

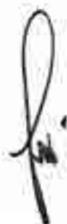

9. The proponent shall ensure that its contractors and subcontractors properly comply with the relevant conditions of this Certificate;
10. Conduct a Quantitative Risk Assessment (QRA) and Hazard Operability (HAZOP) prior to commissioning to ensure that hazards and risks are kept at a minimum. The report shall be submitted to EMB Central Office and EMB Region XI within sixty (60) days from the conduct of the QRA. At the minimum, the QRA shall be updated if there are major changes;
11. Conduct validation of the air dispersion and thermal plume modeling within one year from the start of project operation. The proponent may opt to design and implement its own air and water quality monitoring program in a manner that may be used for validating said models to be used in determining accuracy of impacts and impact areas and to ensure that actual levels of pollutants are within the DENR standards;
12. Submit a coastal resource management program (CRMP) to EMB Central Office copy furnished the EMB Region XI within six (6) months prior to its operation;

II. RESTRICTIONS

13. There shall be no development/operation in the project area classified as agricultural zone until such time that the area has been reclassified by the appropriate government agencies in accordance with law;
14. No activities shall be undertaken other than what were stipulated in the EPRMP. Should there be any expansion of the project beyond the EPRMP or any change in the activity or transfer of location, the same shall be subject to a new Environmental Impact Assessment; and
15. Transfer of ownership of this project carries the same conditions and restrictions, for which, written notification shall be made by herein grantee to EMB within fifteen (15) days from such transfer.

PROJECT ASSESSMENT PLANNING TOOL

For the assistance of the Proponent and the Government Agencies concerned in the management of the Project and for better coordination in mitigation of the impacts of the Project on the surrounding areas, the following are recommended to the parties and authorities concerned for appropriate action.

OTHER REGULATORY REQUIREMENTS/CONDITIONS	CONCERNED GOVERNMENT AGENCIES/ENTITIES
1. Compliance by the proponent with the following: a. Sanitation Code of the Philippines b. Building Code of the Philippines c. Zoning Clearance	LGU concerned
2. Labor Code of the Philippines including occupational safety and safety standards for petrochemical plants and provide personal protective equipment for the workers.	Department of Labor and Employment (DOLE)-Bureau of Working Condition
3. Secure tree cutting permit	DENR
4. Other permits/clearances	Department of Energy and other government agencies
ENVIRONMENTAL PLANNING RECOMMENDATIONS FOR THE PROPONENT	
5. Priority of employment shall be given to qualified local residents. Adequate public information on jobs available for local residents in the affected areas shall be provided; and,	
6. An independent third party shall be commissioned to undertake an environmental audit, including a continuing study of the effects of the Project on the health of the workers and affected residents. The result of the third party environmental audit, including the auditing of risks and hazards of the Project, shall be submitted to EMB, while the result of the continuing health study shall be submitted, every five (5) years, to the Department of Health (DOH), for evaluation.

Brgy. Binugao, Toril, Davao City

SUBJECT: ENVIRONMENTAL COMPLIANCE CERTIFICATE

Dear Mr. Beaumont,

This refers to the ECC application for the proposed Concrete Batching Plant Project to be located at Brgy. Binugao, Toril District, Davao City.

After evaluation of the documents submitted on the aforesaid project, this office has decided to grant the same an Environmental Compliance Certificate (ECC).

With the issuance of the ECC, you are expected to implement the measures presented in the Initial Environmental Examination (IEEC), intended to protect and mitigate the project's adverse impacts on community health, welfare and the environment.

Environmental considerations shall be incorporated in all phases and aspects of the project. You may proceed with the project implementation after securing all the necessary permits from other pertinent Government agencies. This Office will be monitoring the project periodically to ensure your compliance with stipulations cited in the attached ECC.

Please be guided accordingly.

Very truly yours,

ESTER A. OLAVIDES

ENVIRONMENTAL COMPLIANCE CERTIFICATE

(Issued under Presidential Decree 1586)

ECC-R11-1305-0091

THIS IS TO CERTIFY THAT PROPONENT, **LEIGHTON CONTRACTORS (PHILIPPINES), INC.**, is granted this Environmental Compliance Certificate (ECC) for the proposed Concrete Batching Plant Project to be located at Brgy. Binugao, Toril District, Davao City by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau, Region XI.

SUBJECT ONLY to the conditions and restrictions set-out in this ECC, and in the attached document labeled as Annex A, B and C.

This Certificate is issued with the following details;

PROJECT DESCRIPTION

The ECC covers the establishment of a proposed concrete batching plant to be located at Brgy. Binugao, Toril District, Davao City, which shall be confined only within the 46,163 square meters lot area covered under Transfer Certificate of Title No. 146-2012013576.

This certification is issued in compliance to the requirements of Presidential Decree No. 1586, in accordance to Department Administrative Order No. 2003-30, EMB Director Memorandum dated 22 December 2006, EMB Memorandum Circular No. 001 Series of 2007, EMB Memorandum dated February 12, 2007 and DENR Memorandum Circular No. 2007-08. The Bureau, however, is not precluded from reevaluating, adding, removing, and correcting any deficiency or error that may be found after issuance of this Certificate.

Given this JUN 06 2013, at Davao City Philippines.

ESTER A. OLAVIDES

Regional Director

I. CONDITIONS

ENVIRONMENTAL MANAGEMENT

The proponent shall strictly implement the following mitigating, enhancing and rehabilitating measures:

1. That the mitigating measures presented in the Initial Environmental Examination (IEE) Checklist and other form of mitigation and preventive measures be implemented throughout the operation to prevent/minimize negative environmental impacts;
2. That a greenline and cistern shall be installed to maximize recycling, distribution and utilization of used water and to store and capture rainwater as additional measures in water resources management, respectively;
3. That the proponent shall undertake **tree-planting activity** along the periphery and available areas within the project site to serve as buffer for dust, noise, improvement of aesthetics and in support of the national greening program of the government;

GENERAL CONDITIONS

*Further administrative conditions for the grant of this **Certificate** shall be strictly complied:*

4. That all permits and clearances shall be regularly secured from the concerned national and local offices prior to the project implementation. Likewise, the operation of the project shall conform with the applicable provisions of RA 6969 (Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990), RA 9003 (Act Providing for and Ecological Solid Waste Management Program), RA 9275 (Philippine Clean Water Act of 2004), and RA 8749 (Philippine Clean Air Act of 1999) and other environmental Laws;
5. That this Certificate shall automatically expire if the project ceases to operate for more than five (5) years or fails to start within five (5) years from the issuance hereof;
6. That the proponent shall conduct continuously an Information Education Communication (IEC) Campaign to the surrounding community to inform them of the environmental impacts and corresponding mitigating/enhancing measures of the proposed project;

II. RESTRICTIONS

The proponent is strictly subject to the following restrictions:

7. No other activities shall be undertaken other than what was stipulated in the IEE document. Should there be any expansion of the project beyond the project scope, installation or construction of other structures beyond those stated in the IEE document or any change in the activity or transfer of location shall be subjected to a new Environmental Impact Assessment; and
8. That the Proponent shall see to it that copy of this ECC shall be furnished to all agencies/offices concerned within one (1) month from receipt thereof. A certification shall be submitted by the Proponent to EMB XI that said copy has been delivered and duly stamped as received by the concerned agencies/offices;

Justin S. Delacruz

9. In case of transfer of ownership of this project, these same conditions and restrictions shall apply and the transferee/transferor shall be required to notify the EMB Regional Office concerned within fifteen (15) days of such transfer of ownership.
10. That three (3) months prior to the abandonment, the Project Proponent shall notify this Office of such action and shall submit therewith their abandonment mitigation plan.

Non-compliance with any of the provisions of this certificate shall be sufficient cause for the suspension or cancellation of this Certificate and/or an imposition of a fine in an amount not to exceed **FIFTY THOUSAND (Php 50,000.00) PESOS** for every violation thereof, at the discretion of this Office pursuant to Section 9 of P.D. 1586.

Dr. Daniel E. Chalmers

Chairman & CEO

GNPOWER MARIVELES COAL PLANT LTD. CO.

1905 Orient Square Bldg., Don Francisco Ortigas, Jr. Rd.,
Ortigas Center, Pasig City

Dear Sir:

This refers to your letter dated April 03, 2008 requesting an ECC amendment for the use of additional 10 hectares of land due to the re-orientation of the power blocks from east-west axis to north-south axis for the GNPower Mariveles Energy Project.

Based on the documents submitted, the re-orientation of the power blocks will be in the same area already described and evaluated in the original Environmental Impact Assessment (EIA) Report, and the incremental impacts arising from the project modification is being addressed in the approved Environmental Management Plan (EMP). The modification likewise does not entail other changes in technology, fuel, process flow and component as to what was presented in the original EIS. Also, as a result of the re-orientation, the 11 hectare reclamation will not be implemented.

Thus, pursuant to Annex 2-1c of the Revised Procedural Manual for DAO 2003-30, the said modification is hereby confirmed and covered by the ECC issued for the project.

Very truly yours,

JULIAN D. AMADOR

ATTENTION : **The President**

Gentleman:

This refers to the Environmental Compliance Certificate (ECC) application for the proposed **GNPOWER MARIVELES ENERGY PROJECT (2X300 MW COAL FIRED POWER PLANT)** located at **Barangay Alas-asin, Mariveles, Bataan.**

After evaluation of the documents submitted and upon recommendation of the Environmental Management Bureau (EMB), this Office has decided to grant an ECC to the abovementioned project.

With the issuance of this ECC, you are expected to implement the measures presented in the EIS intended to protect/enhance the environment and mitigate the project's adverse impacts on the environment and on the community's health and welfare. Environmental considerations shall be incorporated in all phases and aspects of the Project. This Office will be monitoring the project periodically to ensure your compliance with stipulations cited in the attached ECC.

Please be guided accordingly.

ENVIRONMENTAL COMPLIANCE CERTIFICATE

(Issued under Presidential Decree 1586)

0606-011-4021

THIS IS TO CERTIFY THAT PROPONENT **GNPOWER LTD. COMPANY**, is granted this Environmental Compliance Certificate (ECC), as represented by Mr. Ariel Punzalan, for the **GNPOWER MARIVELES ENERGY PROJECT (600 MW COAL-FIRED POWER PLANT)**, located at **BRGY. ALAS-ASIN, MARIVELES, BATAAN**, by the Department of Environmental and Natural Resources (DENR), through the Environmental Management Bureau, Central Office.

SUBJECT ONLY to the conditions and restrictions set-out in this certificate.

This Certification is issued for the **GNPOWER MARIVELES ENERGY PROJECT (600 MW COAL-FIRED POWER PLANT)**, with the following details:

PROJECT DESCRIPTION

The GNPower Mariveles Energy Project involves mainly the following project components:

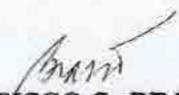

Installation and operation of 2 x 300 MW coal-fired power plant for base load service which also include:

- (i) Eleven (11) hectares reclamation works for the ancillary facilities;
- (ii) Operation of coal jetty facilities;
- (iii) Fully covered conveyor system to transport coal from the berthing area to the coal stockpile and coal yard;
- (iv) Ash disposal facility;
- (v) A four (4) km, 230 kV dual circuit new transmission line connecting the project site to the existing transmission line at Brgy. Alas-asin, Mariveles, Bataan;
- (vi) Upgrading of approximately 14 kms of the existing transmission line from Bataan Thermal Power Plant (BTPP) substation to Mariveles;
- (vii) A *desalination plant*, and
- (viii) A concrete hollow block processing plant using generated ash

This Certification is issued in compliance to the requirements of Presidential Decree No. 1586, in accordance to Department Administrative No. 2003-30. The Bureau, however, is not precluded from re-evaluating, adding, removing, and correcting any deficiencies or errors that may be found after issuance of this certificate.

Issued at _____ this FEB 15 2007 day of _____, 2007.

I. CONDITIONS

ENVIRONMENTAL MANAGEMENT:

The proponent shall strictly implement the following mitigating, enhancement, and rehabilitating measures:

1. Entire operation of facilities shall be equipped with appropriate air, water and noise pollution control facilities to include among others, smoke stack, electrostatic precipitator, industrial wastewater treatment facility, sea water flue gas desulfurizer;
2. Implementation of the different sectoral plans and programs but not limited to Environmental Management Plan, Information Education and Communication Program, Social Development Program in coordination with Gabay Mamamayan Action Center;
3. Compliance with the appropriate easement requirements and installation of adequate buffer zones to attenuate noise and minimize air pollution;
4. Implementation of an Integrated Coastal Resource Management Program in which a status report of its implementation shall be submitted to DENR-EMB Region III, copy furnished the DENR-EMB Central Office and the Multipartite Monitoring Team (MMT) every (3) three years from the start of the project construction;
5. Installation of an appropriate and effective shoreline protection measures such as silt screen, etc. prior to plant construction/operation and reclamation activities to prevent siltation or sedimentation of shoreline/North Channel to Manila Bay;
6. Implementation of an Environmental, Health and Safety Program based on the Health Risk Assessment and Environmental Risk Assessment (ERA) for Coal-fired Power Plants. An annual report of the results of the implementation of this program shall be submitted to EMB (Central Office and Region III) and the MMT; and
7. Implementation of other commitments relating to ecological and biodiversity conservation and safeguards includes the following;
 - 7.1. Establishment of two (2) hectares secondary forest;
 - 7.2. Establishment of five (5) hectares green buffer zone;
 - 7.3. Coordination with Bureau of Fisheries and Aquatic Resources (BFAR), Local Government Units (LGU) and Multi-Partite Monitoring Team (MMT) in establishing marine habitats in suitable sites in the project area in order to enhance ecological biodiversity;

GENERAL:

Further administrative conditions for the grant of this certificate shall be strictly complied:

8. The proponent shall set up the following:
 - 8.1. A readily available and replenishable Environmental Guarantee Fund (EGF) to cover the following: a) Expenses for further environmental assessments b) compensation, indemnification for whatever damages to life and property that may be caused by the project c) rehabilitation and/or restoration of areas affected by the project's implementation;
 - 8.2. A Multi-partite Monitoring Team (MMT) composed of representative(s) from the proponent, EMB, a local environmental Non-Government Organization (NGO), a duly organized fisherfolks and farmers association in the primary impact area, the LGUs where the plant is situated, and other concerned government agencies shall be organized. The MMT should primarily oversee the compliance of the proponent with the Environmental Management and Monitoring Plan (EMMP), other commitments and mitigation measures that are contained in the Project EIS documents and the ECC conditions; and
 - 8.3. A replenishable Environmental Monitoring Fund (EMF) to cover all costs attendant to the operation and monitoring activities of the MMT including but not limited to capability building, training, actual sampling and laboratory analysis. Said provisions must be consistent with the DAO 2003-30.

The amount and mechanics of the EGF, EMF, and the establishment of the MMT shall be determined by EMB and the proponent in consultation with EMB, through an integrated Memorandum of Agreement which shall be submitted to the EMB within sixty (60) days upon receipt of this Certificate;

9. GNPowder Ltd Co. shall establish an Environmental Unit (EU) to effectively handle, implement and manage all environment-related aspects of the project. In addition to the implementation of the monitoring requirements as specified in the Environmental Monitoring Plan, the EU shall also:
 - 9.1 Monitor actual project impacts vis-à-vis the predicted impacts and the implementation of the committed mitigation and management measures;
 - 9.2 Accordingly recommend revisions to the EMP when necessary and submit the updated/revised EMP to EMB for approval prior to implementation;
 - 9.3 Ensure that data gathered during monitoring activities are properly documented, assessed, evaluated and reported in accordance to the standard formats;

- 9.4 Quarterly submit to EMB Region 3 copy furnished EMB Central Office, validation report of the ambient temperatures at the mixing zone area (in accordance with the Clean Air Act) at different loads; and
 - 9.5 Submit annually, an assessment and evaluation report of the generated coastal and marine quarterly monitoring data (but not limited to the parameters included in the EIS) including the recommendations and enhancement programs to be implemented
10. This Certificate shall be considered automatically revoked if the project has not commenced within a period of five (5) years from issuance hereof or suspension/stoppage of operation extends to five (5) years such that significant changes in land and resource uses have occurred in the project area or its vicinities;

II. RESTRICTIONS

The proponent is strictly subject to the following restrictions:

- 11. The project shall primarily utilize only imported environmentally-friendly sub-bituminous coals from Indonesia which are considered to be the world's cleanest solid fossil fuel with extremely low sulphur, ultra low ash and very low mercury content;
- 12. No other activities should be undertaken other than what was stipulated in the EIS. Should there be an expansion of the project beyond the project description, construction of other structures beyond those stated in the EIS, or any change in the activity, shall be made subject to a new Environmental Impact Assessment; and
- 13. In case of transfer of ownership of this project, these same conditions and restrictions shall apply and the transferee shall be required to notify the EMB (Central Office and Region III) concerned within fifteen (15) days as regards to the transfer of ownership

Non-compliance with the above conditions shall be sufficient cause for the suspension or cancellation of this Certificate and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (Php 50,000.00) for every violation thereof, at the discretion of the EMB in accordance with Section 9 of P.D. 1586

PROJECT ASSESSMENT PLANNING TOOL

For the assistance of the Proponents and government agencies concerned in the management of the project and for better coordination in mitigation on the impact of the project on its surrounding areas and to the environment.

By way of recommendation, the following have been taken notice of by the Review Committee and are forwarding these recommendations to the parties and authorities concerned for proper appreciation and action.

Regulatory Conditions	
1. GNPower Ltd Co. shall provide adequate safety gadgets for the workers to prevent health and occupational hazards;	DOLE- Bureau of Working Conditions
2. GNPower shall comply with all related provisions of the DOE Circular, Energy Regulations No 1-94 implementing Section 5(i) of Republic Act 7633 granting the host communities financial benefits such as electrification fund, development and livelihood fund, reforestation, watershed management, health and/or environmental fund;	DOE
3. GNPower Ltd Co. shall design/install the transmission line in a manner that will minimize hazards to wildlife and humans especially during accidental failure, flooding and natural disasters. It shall also conduct periodic monitoring to detect concerns on the design and installation of the transmission lines and implement corrective measures;	Proponent / DOH- Bureau of Health Device and Technology
4. The ash storage yard and pond with adequate number of monitoring wells must be constructed in accordance with sound engineering design;	City/Municipal Engineers Office
5. GNPower Ltd Co. shall submit to DENR-EMB Region III, DENR- EMB, MMT and the LGU the results of cumulative impacts assessment conducted every (3) three years of operation to validate and assess the impacts of the operation in surrounding environment. The accumulated monitoring data generated throughout its three years operation shall be used as one of the bases of the activity and if additional data gathering will be done to further substantiate and validate the results; and	Proponent / LGU Concerned
6. GNPower Ltd. Co. shall provide technical assistance to LGU in developing meaningful and sustainable environmental, health and livelihood programs.	LGU concerned

For dissemination and proper action of the parties concerned.

SUBIC ENERZONE CORP.

Canal Road cor. Labitan St. Central Business Avenue
Subic Bay Freeport Zone, Olongapo City
Zambales

Dear Sir/Madam,

This refers to your application for an Environmental Compliance Certificate (ECC) for the **existing Power Transmission System** located at Canal Road cor. Labitan St. Central Business Avenue, Subic Bay Freeport Zone, Olongapo City, Zambales

After satisfying the requirements of the said application, this Office has decided to grant an Environmental Compliance Certificate (ECC) to the above-mentioned project.

In issuing this **CERTIFICATE**, it is expected that you will diligently secure pertinent **PERMITS/CLEARANCES** from all concerned government agencies.

With the issuance of this ECC, you are expected to implement the measures presented in the submitted Environmental Performance Report and Management Plan (EPRMP), intended to protect and mitigate the project's adverse impacts on community health, welfare and the environment. Environmental considerations shall be incorporated in all phases and aspects of the project. You may proceed with project implementation, after securing all the necessary permits from the pertinent government agencies. This Office will be monitoring the project periodically to ensure your compliance with the stipulations cited in the attached ECC.

Please be guided accordingly.

Very truly yours,

LORMELYN E. CLAUDIO, CESO IV
Regional Director

ENVIRONMENTAL COMPLIANCE CERTIFICATE

(Issued Under Presidential Decree 1586)

R03-03202018-4427

THIS IS TO CERTIFY THAT **SUBIC ENERZONE CORP.** is granted this Environmental Compliance Certificate (ECC) for the existing **Power Transmission System at Canal Road cor. Labitan St. Central Business Avenue, Subic Bay Freeport Zone, Olongapo City, Zambales**, by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau, Region III.

SUBJECT ONLY to the conditions and restrictions set-out in this ECC and in the attached document labeled as Annex A. Recommendations have been provided in Annex B as guidance to concerned government agencies and local government units for consideration in their decision making.

It shall cover the Power Transmission Lines (Category 3.2.10) with a power generating capacity of 69 kV / 13.8kV voltage level transformation for four distribution substations. Total length of distribution line is 192.54 km.

Project Geographical Coordinates/Location

North Latitude - 14.8214055 N

East Longitude - 120.27278282 E

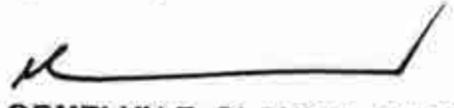

This certification is issued in compliance to the requirements of Presidential Decree No. 1586, in accordance to Department Administrative Order No.30-2003. The Bureau, however, is not precluded from reevaluating, adding, removing, and correcting any deficiencies or errors that may be found after issuance of this certificate.

Issued at City of San Fernando, Pampanga this JUN 14 2018

Recommending Approval:

Series of 2018

I. CONDITIONS

A. ENVIRONMENTAL MANAGEMENT and MONITORING PLAN (EMMoP)

1. All mitigating measures in the submitted Environmental Performance Report and Management Plan (EPRMP) shall be implemented;
2. No Polychlorinated Biphenyl (PCB) containing Transformer Oil shall be stored in the project area;
3. Planting of native tree species shall be undertaken either within the project area and/or in other areas as part of the proponent's social and environmental program.

B. GENERAL CONDITIONS

4. The proponent shall comply with the requirements of other environmental laws, i.e. Republic Act (RA) 8749 or "The Clean Air Act of 1999", RA 6969 or "Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990", RA 9003 or "Ecological Solid Waste Management Act of 2000" and RA 9275 or "Clean Water Act of 2004", among which are:
 - Secure Permit to Operate Air Pollution Source Control Installations (APSCI)
 - Designate Pollution Control Officer (PCO)
 - Submit quarterly Self Monitoring Report (SMR)
 - Submit semi-annual Compliance Monitoring Report (CMR)
 - Register as Hazardous Waste Generator
5. Copy of Environmental Compliance Certificate (ECC) shall be posted in a conspicuous area in the administrative building;
6. The proponent shall construct a Centralized Septage Treatment Facility to treat domestic wastewater and discharges shall be in conformity with the DENR Effluent Standards pursuant to DENR Memorandum Order dated February 10, 2004 and/or shall ensure that multi-chambered septic tank shall be constructed, siphoning/desludging of the same shall be undertaken. Septage shall be hauled/transported and treated by a third party Licensed Hauler and Treater;
7. That should there be any complaint from the community related to environmental pollution, nuisance and sanitation problem brought about by the project's operation, the proponent shall be held responsible to address such problem;
8. The proponent shall allow inspection or monitoring that will be conducted by this Office anytime in coordination with concerned groups;
9. Conduct an effective Information, Education and Communication (IEC) Program to inform and educate all stakeholders, especially its contractors, workers, and local residents about the mitigating measures embodied in its IECC, the conditions stipulated in this Certificate and the environmental and human safety features of the project for greater awareness, understanding

and sustained acceptance of the project. The program shall be submitted to EMB Regional Office on an annual basis;

10. An Abandonment Plan shall be submitted to this Office ninety (90) days prior to the project's abandonment. The plan shall include remediation, clean-up and rehabilitation measures of contaminated areas and proposed alternative project of activity suitable in the area;

II. RESTRICTIONS

11. Any expansion or modification of the approved project components shall be subject to new Environmental Impact Assessment (EIA) requirements;
12. In case of transfer of ownership of this project, these same conditions and restrictions shall apply and the transferee shall be required to notify this Office within fifteen (15) days as regards to the transfer of ownership.

Non-compliance with any of the provisions of this certificate shall be a sufficient cause for the cancellation or suspension of this certificate and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (50,000.00) for every violation thereof.

OR No. : 8027626
Processing fee: P3,000.00
Date : October 18, 2016

PROJECT ASSESSMENT PLANNING TOOL

For the assistance of the Proponent and government agencies concerned in the management of the project and for better coordination in mitigation on the impact of the project on its surrounding areas and to the environment.

By way of recommendation, the following have been taken notice by the undersigned and are forwarding these recommendations to the parties and authorities concerned for proper appreciation and action.

RECOMMENDATIONS TO CONCERNED GOVERNMENT AGENCIES/LGUs	CONCERNED GOVERNMENT AGENCIES/ENTITIES
1. Provide drainage canal, concrete culverts, and other flood and erosion control measures to adequately receive and channel the run-off to the nearby receiving body of water.	LGU/Proponent
2. Provide segregation, collection, recycling, and disposal mechanism for solid waste.	LGU/Proponent
3. Comply with the rules and regulation of occupational health and safety standards.	DOH/ DOLE/Proponent
4. Protect of legal easement along creek/river i.e. establishment of linear park along the easement, construction of boundary wall to prevent encroachment of the required legal easement of adjacent creek/river and regular clean-up and desilting of adjacent creek/river to prevent clogging.	LGU /Proponent
ENVIRONMENTAL PLANNING RECOMMENDATIONS FOR THE PROPONENT	
The following are strongly recommended for the Proponent to comply for the protection of the project area and the affected environment.	
1. Undertake close monitoring to maintain a high level of safety and efficiency at all stages of the construction phase and immediately address any environmental hazard that may take place.	
2. Donate collectible recyclables to the LGU	

For dissemination and proper action of the parties concerned.

Subject: Request for SEZ Environmental Compliance Certificate (ECC) Confirmation

Dear Madam,

This is to respectfully request your good office for the confirmation of Subic Enerzone Corporation's Environmental Compliance Certificate (ECC) issued by Subic Bay Metropolitan Authority (SBMA) Ecology Center with Reference No. EC-SBFZECC-56-24-365 for the location, Canal Road. cor. Labitan St., Central Business District (CBD) Area, Subic Bay Freeport Zone.

This confirmation is pertinent to SEZ Hazardous Waste Registration application. Also, attached herewith are the documents related to this request.

Your usual support and consideration would be very much appreciated.

Thank you very much!

Respectfully yours,

SUBIC ENERZONE CORPORATION

WARELLE KERN B. SARIO
AVP & General Manager

SUBIC BAY
METROPOLITAN AUTHORITY

EC-RPD-16-0977
21 September 2016

DIR. LORMELYN CLAUDIO
Director
DENR-EMB REGION 3
Dolores, San Fernando, Pampanga

SUBJECT : REQUEST FOR CONFIRMATION OF ENVIRONMENTAL COMPLIANCE CERTIFICATE (ECC) FOR SUBIC ENERZONE CORPORATION

Dear Dir. Claudio:

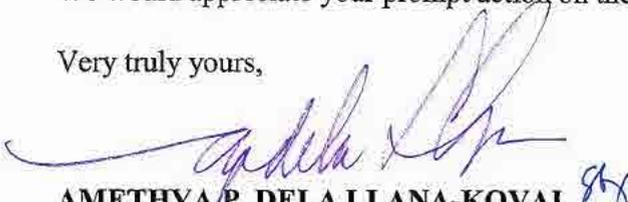

Greetings from SBMA!

This is to request for the confirmation of the ECC (i.e., SBFZECC issued by the Subic Bay Metropolitan Authority – Ecology Center to Subic Enerzone Corporation).

We have attached herewith all pertinent documents related to the issuance of said ECC including amendments made to the ECC.

We would appreciate your prompt action on the matter.

Very truly yours,

AMETHYA P. DELA LLANA-KOVAL
Department Manager

Encl: Copies of ECC, including Amendments made and all EIA-related documents

**SUBIC BAY FREEPORT ZONE
ENVIRONMENTAL COMPLIANCE CERTIFICATE
EC-SBFZECC-56-24-365.**

The Subic Bay Metropolitan Authority (SBMA) through the Ecology Center (EC) hereby grants this Subic Bay Freeport Zone Environmental Compliance Certificate for the operation of

SUBIC ENERZONE CORPORATION

located at Raymundo St. corner Labitan St., Subic Bay Freeport Zone after complying with the Initial Environmental Examination (IEE) Checklist Report requirements as provided for in the SBMA Environmental Impact Statement (EIS) System and Department of Environment and Natural Resources Admin. Order No. 96-37, series of 1996.

This Certificate is being issued subject to existing and applicable laws, rules and regulations and the following conditions:

1. This certificate is valid only for the following activities:

- Complete rehabilitation of the existing Remy Field Substation
- Clearing of right of way including the trimming/cutting of trees and other vegetation touching or near the high voltage line as part of the regular maintenance
- Installations of sectionalizers along 13.8kV distribution lines
- Installation of 69kV overhead sub-transmission line from Subic Substation to the new proposed Cubi 25MVA Substation
- Installation of 25MVA-Substation, installation of 15kV metal clad switchgear and 15kV feeder take-off of Cubi Power Plant
- Installation of switching station (switchgear and accessories) along 69kV line supplying Subic Bay Industrial Park
- Replacement of rotten poles along distribution lines and replacement of its line hardware and accessories
- Installation of 69kV gang operated air break switch, replacement of rotten poles, and rehabilitation of 69kV take-off of Subic Bay Industrial Park
- Construction of Administration Building, warehouse / shops, and covered parking space for service vehicles
- Acquisition of TransCo's 69kV Line 1, 2, 3, 4 that supply the SBFZ
- Installation of additional power transformer for Subic Bay Industrial Park (SBIP) when the needs arises
- Improvement of the existing Subic Substation (includes the installation of additional switchgear and other electrical equipment and reconstruction of lines inside the substation)

- Simplification of MV Lines Architecture/ Configuration
- Transfer the existing Kalaklan metering which will be affected by the STEP 2 site development
- Installation of new 13.8kV feeder line to supply Subic Bay Industrial Park, Phase II
- Repairs/replacement of underground power cable both feeder lines and customer lines as the need arises
- Replacement of existing bare line conductors located in forested areas
- Installation/extension of new overhead 13.8kV Distribution Line for customer expansion
- Installation of second 25 MVA power transformer for Cubi Substation (as the needs arises)
- Installation of 69kV overhead sub-transmission line from Cubi Substation to the proposed Naval Magazine Substation
- Rerouting of 13.8 kV Sta. Rita Communication Line to Subic-Tipo Highway. This includes the installation of 13.8kV line from George Dowey Convention Center to Tipo Highway Security Plaza and the upgrading of existing lines from Tipo Highway Security Plaza to Baily Bridge and re-route the existing lines supplying Sta. Rita Communication Towers
- Rehabilitation of dilapidated pole/pad mounted distribution transformers (as the need arises)
- Installation of fuse cut-outs on 13.8kV distribution line (as the need arises)
- Installation of capacitor bank on 13.8kV distribution line (as the need arises)

and that any expansion and/or modification/alteration shall be subject to a separate Environmental Impact Assessment (EIA) requirements;

2. The Proponent (*Subic Enerzone Corporation*) shall be responsible in ensuring strict compliance at all times by its employees, agents, consultants, contractors and subcontractors with the SBMA Environmental Rules and Regulations, Likewise, they shall conform with all the conditions cited in this Certificate;
3. The Proponent shall secure from appropriate SBMA departments and other national government agencies all the necessary permits and approval prior to commencement of any activity. The Proponent/Contractor shall obtain and keep current all permits related to the Company's operation;
4. All solid wastes generated in the conduct of activities shall be properly contained, handled and disposed at the SBMA landfill in accordance with the SBMA Waste Management Guidelines (*see Attachment # 1*);
5. All workers shall be provided with appropriate Personal Protective Equipment (PPE) to protect them from occupational hazards and health risks. As such, the Contractor shall develop and implement an Occupational Safety and Health Program that shall

[Handwritten signature]

include electrical safety, lock-out and tag-out procedures and Emergency Response Plan to be submitted for approval by SBMA Health and Welfare Department;

6. An effective scheduling of power interruptions and notification of concerned SBMA Departments and SBFZ locators for power outage shall be implemented by the Proponent/Contractor during maintenance and operations;
7. All "hot works" (welding, cutting, lead melting, soldering, blow torch, etc.) performed during maintenance operation shall be covered by a valid permit from Fire Department prior to operation. Fire extinguisher shall be provided at all times in the operation site especially during hot works activities. Fire watch shall be trained in the use of fire equipment that must be provided during and 30 minutes after hot work operation;
8. A Traffic Management Plan to ease traffic congestion and prevent road accident/hazards during roadside maintenance activities shall be implemented. Safety road signs shall be posted and installed visible to motorists and pedestrians where activity is in progress;
9. No tree may be cut, pruned unless a joint inspection with the Proponent/Contractor, Utilities Department and Ecology Center shall be done and a permit to do so has been issued by the Ecology Center. Hence, the Proponent shall comply with the SBMA Guidelines for allowable Tree Cutting and Tree Trimming with in SBFZ (*see Attachment # 2*);
10. The Proponent/Contractor shall ensure that no fishing, hunting or collection and/or buying of wild plants and animals is undertaken by its staff or its Sub-contractors;
11. All hazardous wastes, including unusable transformers containing polychlorinated biphenyls shall be handled, stored and disposed in compliance with R.A. 6969 otherwise known as the Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990 and DENR Administrative Order (DAO) 29, Series of 1992;
12. The Proponent/Contractor shall be held liable for any damage to life, property and the environment as a result of the company's regular and maintenance operation and shall pay just and reasonable compensation to the aggrieved party;
13. Should there be any complaint related to environmental problems brought about by the project, the Proponent shall be held responsible to address such problems;
14. Any misleading/false information submitted to this Office shall be sufficient cause for the cancellation of this Certificate;
15. The Ecology Center shall have the authority to conduct on the spot inspection at any time to monitor compliance with all the conditions cited in this Certificate;

Environmental Management Plan

A. DMSA Projects

Project	Project's Description	Predicted Environmental Impact	Mitigation	Cost of Mitigation or
1.Rehabilitation of Remy Field Substation	This project includes the Rehabilitation of existing two 20MVA Power Transformer, Rehabilitation of the existing on-load tap changer, Upgrading of Substation Controls and Protection, Expansion of the Control and Monitoring Room, Installation of new Automatic Voltage Regulator. This is upgrading the existing facilities of the substation for the reliability of power supply within SBMA area and also for delivering quality voltage to the valued customers.	1. Increase in dust due to clearing, civil works and earthmoving activities.	1. Sprinkling of water during clearing and earthmoving activities.	Included in the Project Cost
		2. Top soil removal and loss due to earthmoving and excavation activities.	2. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		3. Sedimentation/dilatation of drainage or waterways from unconfined stockpiles of soil and other materials.	3. Stockpiling of soil and other materials will be confined in an area away from the water ways. Stockpiles will be removed after construction.	Included in the Project Cost
		4. Pollution of nearby water body due to improper disposal of construction wastes.	4. Construction wastes will be properly collected and disposed. No construction wastes will be allowed to be disposed in water bodies.	Included in the Project Cost
		5. Generation of employment.	5. The project will generate additional employment in the form technical and construction workers.	Included in the Project Cost
		6. Generation of solid wastes.	6. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
2.Clearing of Rights of Way Trimming of Trees	This project is the trimming/cutting of trees and other vegetation touching or near the high voltage line. This is reducing power outages due to transient faults cause by these trees and vegetation.	1. Increased traffic and possible congestion.	1. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost
		2. Loss of vegetation due to land clearing.	2. Land clearing will be limited to structures that will be constructed. Other vegetation that will be destroyed in the process will be rehabilitated. Obtain tree cutting permit from EC prior to any cutting activities.	Included in the Project Cost
3.Installations of Sectionalizers	This project is the installation of Sectionalizers / Reclosers along 13.8KV Distribution Lines. This is eliminating total feeder outages by sectionalized switching thus reducing scope of power outages.	1. Increased traffic and possible congestion.	1. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost
		2. Generation of solid wastes.	2. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost

4. Subic-Cubi Overhead Transmission Lines (OHTL)	This project is the installation of 69kV overhead sub-transmission line from Subic Substation to the new proposed Cubi 25MVA Substation. This will be the transmission of power to supply Cubi Substation	1. Increase in dust due to clearing, civil works and earthmoving activities.	1. Sprinkling of water during clearing and earthmoving activities.	Included in the Project Cost
		2. Increased traffic and possible congestion.	2. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost
		3. Top soil removal and loss due to earthmoving and excavation activities.	3. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		4. Loss of vegetation due to land clearing.	4. Land clearing will be limited to structures that will be constructed. Other vegetation that will be destroyed in the process will be rehabilitated. Obtain tree cutting permit from EC prior to any cutting activities.	Included in the Project Cost
5. Replacement of Grande Island Submarine Cable	This project includes the installation of submarine power cable from Camayan Point to Grande Island and the installation of Switchgears at both ends of the submarine power cable. This is upgrading the existing line and the protection equipment to maximized reliability of power supply to Grande Island.	1. Pollution of nearby water body due to disturbance of sea bottom	1. Minimize disturbance of sea bottom by sectionalized installation	Included in the Project Cost
6. First 25 MVA Cubi Substation	This project includes the installation of 25MVA Substation, installation of 15kV MetalClad Switchgear and 15kV Feeder Take-off, and Site Development of Cubi Power Plant. This new substation will supply power requirement of Seaport Project and also for delivering reliable and quality power to customers in Cubi and other neighboring areas.	1. Generation of solid wastes.	1. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
		2. Generation of domestic wastes.	2. Provision of portalet.	Included in the Project Cost
		3. Increase in dust due to clearing, civil works and earthmoving activities.	3. Sprinkling of water during clearing and earthmoving activities.	Included in the Project Cost
		4. Top soil removal and loss due to earthmoving and excavation activities.	4. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		5. Erosion from exposed cuts and landslides due to earthmoving and excavation activities.	5. No cuts will be left exposed and new vegetation will be grown over excavated area.	Included in the Project Cost
		6. Sedimentation/dilatation of drainage or waterways from unconfined stockpiles of soil and other materials.	6. Stockpiling of soil and other materials will be confined in an area away from the water ways. Stockpiles will be removed after construction.	Included in the Project Cost
		7. Pollution of nearby water body due to improper disposal of construction wastes.	7. Construction wastes will be properly collected and disposed. No construction wastes will be allowed to be disposed in water bodies.	Included in the Project Cost

12.Acquisition of the Olongapo-Remy Field-Enron Line	This project includes the acquisition of TransCo's 69kV Line 1, 2, 3, 4 all supplying SBFZ. This is to have full access to these Lines for maintenance and rehabilitation works.	None		N A
13.SBIP Switching Station (Additional Power Transformer)	This project is the installation of additional Power Transformer for SBIP when the needs arises. This will address problems on power shortage of SBIP in the future.	1. Top soil removal and loss due to earthmoving and excavation activities.	1. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		2. Generation of solid wastes.	2. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
14.Improvement of the New Subic Substation	This project includes the installation of additional switchgear and other Electrical Equipment and reconstruction of Lines inside New Subic Substation. This is to simplify the line configuration and eliminate redundant lines and equipment.	1. Generation of solid wastes.	1. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
15.Simplification of MV Lines Architecture/ Configuration	This project is the reconstruction of 13.8kV Feeder Lines and By-pass Lines. This is to simplify the line configuration of the system and eliminate the existing redundant lines and equipment.	1. Increased traffic and possible congestion.	1. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost
		2. Top soil removal and loss due to earthmoving and excavation activities.	2. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
16.Transfer of Metering Station	This project is to transfer the existing Kalakian Metering which will be affected by the STEP 2 site development. This is to have a permanent location for this Metering Station.	1. Increased traffic and possible congestion.	1. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost
17.Rehabilitation of Remy Field Substation (Provision of 69kV Circuit Breakers)	This project is the rehabilitation of the existing 69kV Oil Circuit Breaker of Remy Field Substation. This is upgrading the Circuit Breakers of the substation for reliability of operations.	1. Generation of solid wastes.	1. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
		2. Increase in dust due to clearing, civil works and earthmoving activities.	2. Sprinkling of water during clearing and earthmoving activities.	Included in the Project Cost
		3. Top soil removal and loss due to earthmoving and excavation activities.	3. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		4. Sedimentation/dilatation of drainage or waterways from unconfined stockpiles of soil and other materials.	4. Stockpiling of soil and other materials will be confined in an area away from the water ways. Stockpiles will be removed after construction.	Included in the Project Cost
		5. Pollution of nearby water body due to improper disposal of construction wastes.	5. Construction wastes will be properly collected and disposed. No construction wastes will be allowed to be disposed in water bodies.	Included in the Project Cost

18. Construction of Feeders SBIP II	This project is the installation of new 13.8kV feeder line to supply SBIP II. This will improve the reliability of power supply for SBIP II.	1. Increased traffic and possible congestion.	1. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost
		2. Top soil removal and loss due to earthmoving and excavation activities.	2. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		3. Erosion from exposed cuts and landslides due to earthmoving and excavation activities.	3. No cuts will be left exposed and new vegetation will be grown over excavated area.	Included in the Project Cost
		4. Generation of solid wastes.	4. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
19. Underground Cable Repairs	This project is the repairs/replacement of underground power cable both feeder lines and customer lines. This is to upgrade the existing power cables for reliability of operations.	1. Generation of solid wastes.	1. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
20. Replacement of Bare to Insulated cables on selected areas within the SBFZ.	This project includes the replacement of existing bare line conductors located in forested areas to insulated cables and the replacement of rotten poles and assembly along these lines. This aims to electrically protect the line from trees/vegetation and foreign objects which cause power outages.	1. Top soil removal and loss due to earthmoving and excavation activities.	1. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		2. Generation of solid wastes.	2. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
21. Installation of New Lines	This project is the installation/extension of new overhead 13.8kV Distribution Line for customer expansion. This is to cater customer's needs.	1. Top soil removal and loss due to earthmoving and excavation activities.	1. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		2. Increased traffic and possible congestion.	2. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost
		3. Conflicts in right of way.	3. Conflicts in right of way will be addressed through dialogues with the concerned parties.	Included in the Project Cost
22. Second 25 MVA Cubi Substation	This project is the installation of additional Power Transformer for Cubi Substation when the needs arises. This is to address problems on power shortage in Cubi and other neighboring areas in the future.	1. Generation of solid wastes.	1. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
		2. Generation of domestic wastes.	2. Provision of portalet.	Included in the Project Cost
		3. Increase in dust due to clearing, civil works and earthmoving activities.	3. Sprinkling of water during clearing and earthmoving activities.	Included in the Project Cost
		4. Top soil removal and loss due to earthmoving and excavation activities.	4. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		5. Sedimentation/dilatation of drainage or waterways from unconfined stockpiles of soil and other materials.	5. Stockpiling of soil and other materials will be confined in an area away from the water ways. Stockpiles will be removed after construction.	Included in the Project Cost

23.Rehabilitation of Remy Field Substation (Replacement of 2 existing Transformers)	This project is the replacement of 2 existing 20 MVA transformers at Remy Field Substation. This is to upgrade the old transformer for realibility of operation.	1. Increase in dust due to clearing, civil works and earthmoving activities.	1. Sprinkling of water during clearing and earthmoving activities.	Included in the Project Cost
		2. Top soil removal and loss due to earthmoving and excavation activities.	2. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		3. Generation of solid wastes.	3. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
		4. Pollution of nearby water body due to improper disposal of construction wastes.	4. Construction wastes will be properly collected and disposed. No construction wastes will be allowed to be disposed in water bodies.	Included in the Project Cost
24.Cubi-Naval Magazine (OHTL)	This project is the installation of 69kV overhead sub-transmission line from Cubi Substation to the proposed Naval Magazine Substation. This will be the transmission of power to supply Naval Magazine Substation.	1. Increased traffic and possible congestion.	1. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost
		2. Generation of domestic wastes.	2. Provision of portalet.	Included in the Project Cost
		3. Top soil removal and loss due to earthmoving and excavation activities.	3. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		4. Generation of solid wastes.	4. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
25.Underground Transmission Line	This project is the installation of Underground Transmission Line. This is in replacement if overhead transmission line is not feasible.	1. Increased traffic and possible congestion.	5. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost
		2. Increase in dust due to clearing, civil works and earthmoving activities.	2. Sprinkling of water during clearing and earthmoving activities.	Included in the Project Cost
		3. Top soil removal and loss due to earthmoving and excavation activities.	3. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		4. Generation of solid wastes.	4. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
26.Installation of New Underground Cables	This project is the installation/extension of new underground 13.8kV Distribution Line for customer expansion. This is in replacement if overhead distribution line is not feasible. This is to cater customer's needs.	1. Increased traffic and possible congestion.	1. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost
		2. Generation of solid wastes.	2. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost

27. Naval Magazine Substation	This project is the installation of proposed Naval Magazine Substation. This is to address problems on power shortage in Naval Magazine and neighboring areas in the future.	1. Increased traffic and possible congestion.	1. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost
		2. Generation of domestic wastes.	2. Provision of portalet.	Included in the Project Cost
		3. Increase in dust due to clearing, civil works and earthmoving activities.	3. Sprinkling of water during clearing and earthmoving activities.	Included in the Project Cost
		4. Top soil removal and loss due to earthmoving and excavation activities.	4. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		5. Sedimentation/dilatation of drainage or waterways from unconfined stockpiles of soil and other materials.	5. Stockpiling of soil and other materials will be confined in an area away from the water ways. Stockpiles will be removed after construction.	Included in the Project Cost
		6. Generation of solid wastes.	6. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
28. Rehabilitation of Remy Field Substation (Third Transformer)	This project is the installation of the proposed third Power Transformer in Remy Field Substation. This is to address problems on power shortage in CBD areas in the future.	1. Generation of solid wastes.	1. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
		2. Top soil removal and loss due to earthmoving and excavation activities.	2. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost

Environmental Management Plan

B. SEZC Initiated Projects

Project	Project's Description	Predicted Environmental Impact	Mitigation	Cost of Mitigation or Enhancement
1. Rerouting of 13.8 kV Sta. Rita Communication Line to Subic-Tipo	This project includes the installation of 13.8kV Line from George Dewey Convention Center to Tipo Highway Security Plaza and the upgrading of existing lines from Tipo Highway Security Plaza to Baily Bridge. This is to re-route the existing lines supplying Sta. Rita Communication Towers.	1. Increased traffic and possible congestion.	1. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited.	Included in the Project Cost
		2. Top soil removal and due to earthmoving and excavation activities.	2. The top soil will be used as filling materials and will be used in landscaping.	Included in the Project Cost
		3. Generation of solid wastes.	3. Proper sorting and disposal of wastes. Compliance to SBMA Waste Management System.	Included in the Project Cost
2. Rehabilitation of Padmounted Transformers	This project is the rehabilitation of dilapidated pole/pad mounted distribution transformers. This is improving the reliability of these transformers supplying various customers.	1. Generation of solid wastes.	1. Proper sorting, collecting and disposal of solid wastes. Compliance to SBMA Waste Management System	Included in the Project Cost
3. Installation of Cut-outs and Distribution Line Correction	This project is the installation of fuse cut-outs on 13.8kV Distribution Line. This will be the isolation point when interrupting laterals of 13.8kV Distribution Line.	1. Generation of solid wastes.	1. Proper sorting, collecting and disposal of solid wastes. Compliance to SBMA Waste Management System	Included in the Project Cost
4. Power Factor Correction	This project is the installation of capacitor bank on 13.8kV Distribution Lines. This is improving the efficiency of power usage and will deliver quality power to customers.	1. Generation of solid wastes.	1. Proper sorting, collecting and disposal of solid wastes. Compliance to SBMA Waste Management System	Included in the Project Cost
		2. Increased traffic and possible congestion.	2. Proper coordination with Law Enforcement regarding implementation of traffic system. Parking of vehicles will be limited w/in the leased property.	Included in the Project Cost

OFFICE OF THE CHAIRMAN
ECOLOGY CENTER
Bldg. 157, Bonifacio St., Subic Bay Freeport Zone, Philippines 2222
(63-47) 252-4059/4435 Fax (63-47) 252-4157

**SUBIC BAY FREEPORT ZONE
CERTIFICATE OF NON-COVERAGE
EC-SBFZCNC-309-22-223**

The Subic Bay Metropolitan Authority (SBMA) through the Ecology Center (EC) hereby grants this Subic Bay Freeport Zone Certificate of Non-Coverage (SBFZCNC) for the operation of

SUBIC ENERZONE CORPORATION

with office address at Building No. 502, Dewey Avenue, Subic Bay Freeport Zone after complying with the application for Certificate of Non-Coverage (CNC) requirements as prescribed pursuant to SBMA Environmental Impact Statement (EIS) System and the Department of Environment and Natural Resources Administrative Order No. 96-37, series of 1996.

This Certificate is being issued subject to existing and applicable laws, rules and regulations and the following conditions:

1. This Certificate is valid only for the distribution and operation of the existing SBMA Power Distribution System, which include the following activity:
 - Annual preventive maintenance of all substations
 - Upgrading of all rotten electrical poles
 - Tree trimming and cutting as part of the regular maintenance
 - Extension of power lines to new locators,
 - Replacement of bare to insulated cables on selected areas.

and that any expansion and/or modification (i.e. construction of new overhead and underground transmission lines, replacement of submarine cables, expansion of substations, etc.) shall be subject to a separate Environmental Impact Assessment (EIA) requirements;

2. The Proponent shall be responsible in ensuring strict compliance at all times by its employees, agents, consultants, contractors and subcontractors with the SBMA Environmental Rules and Regulations, Likewise, they shall conform with all the conditions cited in this Certificate;;
3. The Proponent shall secure from appropriate SBMA Departments and other national government agencies all the necessary permits and approval prior to commencement of any activity. The Proponent/Contractor shall obtain and keep current all permits related to the Company's operation;

16. That the transfer of ownership of this business operation carries the same conditions in this Certificate for which a written notification shall be made by herein grantee to the EC within 15 days of said transfer;

This *EC-SBFZECC-56-24-365* supersedes the previously issued *Certificate of Non-Coverage (EC-SBFZCNC-309-22-223)* and its Amendment issued to the company on September 23, 2003 and October 14, 2004 respectively.

Non-compliance with any the above stipulations shall be sufficient cause for the suspension or cancellation of this certificate and/or a penalty in the amount not to exceed Fifty Thousand Pesos (Php 50,000.00) for every violation thereof shall be imposed at the discretion of the EC, pursuant to the SBMA EIS System and all other applicable Philippine environmental laws, rules and regulations.

The SBMA reserves the right to amend this SBFZECC should additional information become available or if circumstances should so warrant.

Signed this JUL 05 2005

Subject: ECOLOGY CLEARANCE

Dear Ma'am:

In compliance to your requirements for the processing of our building permit clearance for the construction of our Warehouse expansion project. We are submitting to your good office the the following documents for your reference. Please see attachments.

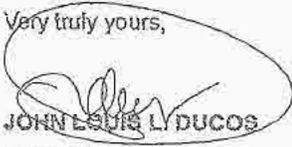

List of Requirements:

- a.) One (1) copy of Certificate of Non-Coverage (CNC) Application form
- b.) Description of project activities – please refer to DMSA
- c.) One (1) copy of Colored pictures (property labeled/with caption) North, South, East, West – please refer to attached file.
- d.) One (1) copy of Site Development plan, location plan, vicinity map & drainage plan - please refer to attached file.
- e.) Proof of ownership (i.e. SEC Registration/DTI & Lease Agreement) - please refer to DMSA

For further inquiries, please visit or call us at telephone number 252-7392 and look for Engr. Philip Ricablanca or Engr. John Louis Ducos.

Thank you very much.

Very truly yours,

JOHN LOUIS DUCOS

Project Engineer

SUBJECT : NOTICE OF COMPLIANCE

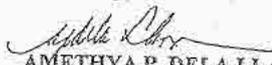

Dear Sir,

This office considers lifting the penalties imposed stated on the issued Notice of Violation (EC-PMD-05-0786) dated 5 September 2005 after due evaluation and consideration of the reasons and necessity of the activity cited during the Technical Compliance Conference last 13 September 2005 and Letter of Appeal dated 21 December 2005.

We hope you will be our partner in our continuing effort to safeguard and sustain our precious environment. Please do not hesitate to report to our office any incident involving environmental hazard that you have observed inside the Freeport. Rest assured that immediate and appropriate attention shall be provided.

Thank you very much.

Yours truly,

AMETHYA P. DELA LLANA
Manager

Minutes of Technical Conference

Purpose of Conference : DISCUSSION OF NOVI ISSUED TO SUBIC ENERZONE
 Reference : NOV LETTER DATED 5 SEPT. 2005 (EC-FMD-05-0786)
 Date & Time : SEPTEMBER 13, 2005 10:00 AM
 Venue : ECOLGY CENTER
 Attendees :

Ecology Center :

1. AMETHYA P. DELA LLANA
2. ANGEL P. BACALOYOS *ajpv*
3. LILIA ALCAZOR *ajpv*
- BEVERLY ENRILE *Enri*
- FLEBIDA CASTRO *Enri*

Company Representative:

1. ROSS PATRICIA *ross*
2. EVISIA RECORDO
3. _____

Discussion :

<u>Violations</u>	<u>Proposed Action/Reason</u>
1. <u>Illegal cutting /trimming of five (5) mangrove trees.</u>	
2. <u>Eight mangrove trees (mostly api- api) were covered by excavated earth materials at the basal portion.</u>	
3. _____	
4. _____	

Resolution :

- The subcontractor of Enerzone explained to EC that it was not them who trimmed/cut the mangroves.
- Subic Enerzone's maintenance worker might be responsible for the activity.
- Clarification of terms, cutting & trimming was discussed.
- A joint inspection was scheduled on Sept. 14 (Tue) together with Subic Enerzone's representatives and EC personnel. 9:00 am.
- Result of reinspection will be the basis for the resolution of the issued NOVI.

SUBJECT: NOTICE OF VIOLATION

Dear Sir:

The Ecology Center hereby issues this Notice of Violation (NOV) to your company based on result of the inspection conducted on one of your project sites along Maritan Highway corner Binictican Drive (near Subic Power Plant) last 30 August 2005.

This NOV is issued pursuant to the authority vested in the Department Manager of the Ecology Center under Section 96 of the Republic Act 7227 (Basic Conversion Development Act) Implementing Rules and Regulations.

VIOLATION NOTED	BASIS OF VIOLATION	PENALTY
<p>I. Illegal cutting/trimming of five (5) mangrove trees.</p> <p>• Eight mangrove trees (mostly Api-Api) were covered by excavated earth materials at the basal portion.</p>	<p>Guidelines on the Allowable Tree Cutting/ Trimming within the Subic Bay Freeport Zone,</p> <p><i>Section 4. Type of Activity/ Action Subject to these Guidelines</i></p> <p>These guidelines specifically address the cutting/trimming of trees under justifiable circumstances within the SBFZ. If the cutting or damaging trees is necessary or unavoidable, it should be covered by a Permit issued by the Ecology Center. Permits issued may specify conditions such as restoration, replanting and other remedial measures deemed reasonable by the Ecology Center.</p> <p><i>Section 11. Special Provision on Mangroves</i></p> <p>Strips or patches or groups or individual mangroves or associate mangrove species growing along shoreline, shoreline roads, river mouths, and coastal areas shall at all cost be maintained and protected. They must be kept free from artificial obstruction and any injury or damage. No mangrove shall be cut or damaged.</p>	<p>Guidelines on the Allowable Tree Cutting/ Trimming within the Subic Bay Freeport Zone,</p> <p>Section 13. Fines and Penalties "Any person or entity caught in violation of any provisions of these Guidelines shall be fined and penalized with twice the replacement ratios and fees as provided for in Section 9."</p> <p>(<i>Pls. see Attachment A, for computation of replacement and fees and Attachment B for the recommended replacement species.</i>)</p>

As such you are hereby directed by this office to attend a Compliance Conference on September 13, 2005 (Tuesday) 10:00 AM at the Ecology Center to discuss the violation cited. The Compliance Conference will allow you to explain the circumstances on the violation and present a proposal to remedy

OFFICE OF THE CHAIRMAN

INSPECTION REPORT

NAME OF COMPANY Subic Enerzone Corp. ACTIVITY Rectification of steel pole
 ADDRESS/LOCATION B-502, Dewey Ave., SBF2 POSITION _____
 CONTACT PERSON _____ INSPECTION DATE Nov. 14, 2005
 TEL/FAX NO. 252-7393/7392

I. FINDINGS

- o 15 mangrove trees were affected by the rectification of the steel pole for powerlines located on mangrove area along Maritan Highway cor. Causeway Ext.
- o of the 15 mangrove trees:
 - 3- have wilted
 - 2- being attacked by fungi/bacteria
 - 2- fallen (marked w/ red paint)
 - 2- already stumps
 - 1- cut, reclined, >10 cm diameter
 - 4- small, 2 cm diameter, were gone/covered by earth materials
 - 1- wounded

II. REQUIREMENTS/RECOMMENDATIONS

- o call a meeting w/ the company to settle previous violations committed and inform them of another set of trees that have been affected by their operation.

Subject: NOTICE OF VIOLATION

Dear Madam:

This pertains to the Notice of Violation dated 5 September 2005 regarding the cutting/trimming of five (5) mangrove trees at the swampy area along Causeway Extension corner Maritan Highway (back of Subic Power Plant).

One of the projects included in the Distribution Management Services Agreement (DMSA) with SBMA is the Cubi 25 mVA Substation. In line with this project is the construction of new 69 kV OHTL from TransCo100 mVA Subic Substation to Cubi Substation. It also includes the clearing of right of way in preparation for the stringing of 336.4 ACSR wire.

In view of the above, the five (5) mangrove trees en route of the 69 kV OHTL were cut/trimmed as stated in the Notice of Violation. In addition, the new lines should be clear from vegetation to prevent power interruption.

Also, during the site inspection held last September 2005, it was observed that new twigs have grown from the cut/trimmed mangrove trees.

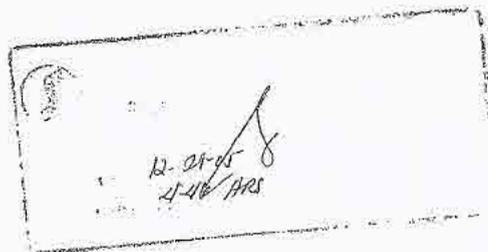

We would appreciate to sit down with you to discuss more on the matter.

Thank you and best regards.

Respectfully yours,

SUBIC ENERZONE CORPORATION

Subject: Request for Permission to Use Old Transformers with Potential to Contain Polychlorinated Biphenyls (PCB) Located in Subic Enerzone Corp. for the Train-the-Trainers of Package 4 of the Integrated Persistent Organic Pollutants (IPOP) Management Project: Technical Assistance and Training on Implementation and Monitoring of Environmentally Sound Management of PCBs

Dear Engr. Sario:

The Environmental Management Bureau (EMB) of the Department of Environment and Natural Resources (DENR), with assistance from the World Bank (WB), is currently conducting the Technical Assistance and Training on Implementation and Monitoring of Environmentally Sound Management of PCBs (hereafter referred to as the Project). As part of the country's obligations to the Stockholm Convention to reduce and eliminate POPs, this Project aims to strengthen DENR-EMB oversight on PCB management and improve the onsite management practices of PCB owners.

In line with this, DENR-EMB has contracted the services of ESD China Ltd. (ESD), in association with Innogy Solutions, Inc. (Innogy), to provide technical assistance in completing the Project. The Project involves a Train-the-Trainers workshop wherein PCB Management Specialists will be trained on the fundamentals of PCB management. The training will also level-off on the training methods to be employed by PCB Specialists in the subsequent training for PCB Owners.

In the Train-the-Trainers, a site demonstration on PCB sampling and analysis will be conducted. With regards to this, ESD-Innogy would like to request permission to use old transformers located in Subic Enerzone Corp's facility in Argonaut Highway, Subic Bay Freeport Zone. The training will be conducted on May 7-10, 2013.

Should you have any questions or clarifications, please do not hesitate to contact Ms. Loly Yana de Jesus of ESD-Innogy at (632)687-3831/914-0443.

Your cooperation in this undertaking will be very highly appreciated. Thank you very much for your support.

Sincerely,

EVA S. OCFEMINA, PhD.

Dear Sir:

We are forwarding herewith the attached letter-request of EMB-DENR, with regard to the use of old transformers in your facility at Argonaut Highway, SBFZ, for the Trainers Training Workshop on PCB Handling and Management on May 7-10, 2013.

Moreover, we would like to invite one of your staff to participate in the said workshop. For additional information, please do not hesitate to coordinate with Rossell Abuyo at 252-4059.

We are hoping for your kind consideration on this request.

Thank you very much.

Dear Sir:

The DENR as part of their Stockholm Convention obligations to manage Persistent Organic Pollutants (POPs) is implementing several projects funded by the World Bank. One of the project component is the conduct of training/workshop on PCB management.

Innogy Solutions, Inc., DENR consultant for this particular component is looking for possible sites/areas for training and demonstration on PCB inventory and screening. We have identified your facility at the Cubi area as one possible site for the said demonstration.

In this connection, we would like to request for an inspection on the said facility, to identify if it is suitable for demonstration. The inspection will be on April 23, 2013 at around 1:30 pm.

We are hoping for your kind consideration on this request.

Thank you very much.

Very truly yours,

ANGEL P. BAGALOYOS

Tel. No.: 252-7392

SUBJECT : PERMIT TO TRIM TREES

Mr. Pollescass,

The Ecology Center hereby granted this permit to Subic Enerzone Corporation to trim trees that obstruct and touch the power distribution lines of SBMA covering the areas of Central Business District, Kalayaan and Binetician Housing, Cubi Point, and Naval Magazine area subject to existing and applicable laws, rules and regulations and the following conditions:

1. This permit is for tree trimming only. Cutting of trees to their trunk is strictly prohibited unless it is really justified to do so and unless a written permit from this Office has been obtained for this purpose;
2. Enamel paint shall be applied on the cut/exposed portion (15 cm in diameter) to avoid fungal and bacterial attack on the tree. Good aesthetics and well-groomed trimming of trees shall be observed at all times;
3. The trimmed branches shall be cut into smaller pieces and disposed of in the SBMA Landfill. A permit has to be obtained from this Office prior to disposal of the same. In cases of trimming in forested areas, cut branches may be left on site to rot, however, these shall be done properly to prevent damage to wildlife and property;
4. Hunting and collection of any species of wild plants and animals (dead or alive) from the forest and bay shall not be allowed at all times. In the event that any of the staff, officials and subcontractors of Subic Enerzone Corporation are caught fishing and collecting any species of plants and animals or have caused deaths of any wildlife species, the company (Subic Enerzone Corporation) shall be held liable. They shall pay the corresponding fines and penalties to be imposed by the SBMA in accordance with the Subic Bay Protected Area Management Plan (SBPAMP) and its Rules and Regulations and other pertinent Philippine Environmental Laws;
5. Staff, officials, and subcontractors of Subic Enerzone Corporation are prohibited from smoking, cooking, and establishing makeshift huts in the forest;
6. The Subic Enerzone Corporation shall notify our Office prior and after completion of the trimming operation for each major area, i.e. Kalayaan Housing, Binetician Housing, Central Business District, etc.;

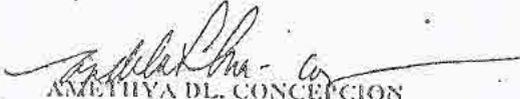

The Subic Enerzone Corporation shall inform/warn residents that they will be in their area to do the trimming. Subic Enerzone Corporation can do this through flyers to be distributed before their scheduled activity. Proper courtesy shall be accorded to residents and the Subic Enerzone Corporation shall present a copy of the trimming permit when requested;

8. The Subic Enerzone Corporation shall submit a monthly monitoring report to this Office regarding tree trimming activities. The report shall contain the areas where trimming activities are to be conducted, date of trimming, number of trees to be trimmed, names of personnel involved in the trimming activities, and place of disposal of cut tree branches;
9. In accidental death of trees due to severe trimming the same shall be replaced in accordance with the Allowable Tree Cutting and Tree Trimming Guidelines within the Subic Bay Freeport Zone. This kind of incident shall also be included in their monthly report to be submitted to this office;
10. Should there be any complaint related to the conduct of such activity, Subic Enerzone Corporation shall be held responsible to address such problems in a manner acceptable to this Office;
11. This permit is non-transferable and shall be in full force and in effect for a period of one (1) year from the date of issuance hereof unless sooner revoked or cancelled for non-compliance and/or violation of any terms and conditions herein specified.

For your information and strict compliance.

Thank you.

Very truly yours,

Subject: **STATION TRANSFORMER NO.7**

Dear Ms. Dela Llana Concepcion:

Reference to your letter dated 16 September 2004, we wish to inform you that the cause of transformer oil leak at sub-station no.7, SRF Area was identified and fixed on 30 September 2004. Our finding shows that the oil seeps out of the transformer because the nuts that hold the secondary bushing were removed by unknown personnel.

The said transformer is de-energized and our plan is to use this as spare for our future use.

For more queries, please feel free to visit our office or call us at telephone no. 252-4590.

Thank you and best regards.

Respectfully yours,

Subic Enerzone Corporation

**SUBJECT : CONNECTION TO SUBIC WATER & SEWERAGE CO., INC.
CENTRALIZED SEWER LINE ALONG RIZAL HIGHWAY**

Dear Engr. Sario:

The Philippine Clean Water Act of 2004 (Republic Act No. 9275) aims to protect the country's water bodies from pollution coming from land-based sources (industries and commercial establishments, agriculture and community/household activities). In line with the implementation of its Implementing Rules and Regulation (IRR) DAO 2005-10, the water supply and sewerage companies are mandated to construct facilities such as wastewater treatment facility and sewer lines within five years following the effectivity of this Act.

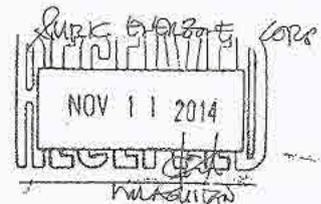

The Subic Water and Sewerage Company, as the Subic Bay Freeport water and sewerage system provider, has finally constructed a centralized waste water treatment facility at the CBD area and the installation of sewer lines along Rizal Highway is nearing its completion. In this connection, all companies located along the stretch of Rizal Highway are required to connect to the centralized sewer lines, to ensure that all domestic wastewater coming from all Subic Bay Freeport locators are treated properly prior to its discharge to the Subic Bay. This initiative is part of the Subic Water 2020 Masterplan and in line with the SBMA's vision for a swimmable and fishable Subic Bay by 2020. This is also in compliance with the conditions set in your Company's environmental permit.

We are hoping that you will give utmost importance to this directive. Thank you.

Very truly yours,

ANGEL P. BAGALOYOS
OIC- Manager

SUBJECT : NOTICE OF DEFICIENCY

Dear Engr. Sario:

Greetings from the Ecology Center!

Please be informed that based on inspection conducted in your facility last December 04, 2014, some observations were made by our personnel which requires some specific action from your part. Such action is required based on particular environmental laws, rules and regulations also mentioned below:

DEFICIENCIES NOTED	BASIS	REQUIRED ACTION
1. Business activities "to develop, construct, lease out, operate and maintain property, structures, machineries in the freeport" not included in your issued environmental permit; 2. Old company address is reflected in the environmental permit	Condition No. 1 of the General Condition of issued Environmental Compliance Certificate (EC-SBFZ-ECC-56-24-365) states that "any expansion and/or modification/alteration shall be subject to a separate Environmental Impact Assessment (EIA) requirements.	Secure an amendment of environmental permit to reflect the following: 1. Additional business activity; 2. Change of business address.

For any inquiries on the matter, kindly contact Mr. Rommel R. dela Cruz, Engineer IV at telephone no. 252-4416.

Thank you very much.

Very truly yours,

ANGEL P. BAGALOYOS

SUBJECT: REQUEST POWER CONNECTION FOR AIR QUALITY MONITORING STATION (AQMS) AT THE REMY FIELD

Dear Mr. Sario,

This is to officially request **Subic Enerzone Corporation** to install permanent electrical power for SBMA's newly installed Air Quality Monitoring Station (AQMS) at the Remy Field.

The account shall be under the SBMA Ecology Center.

Should you require coordination from our end, please contact the following; Ms. Lilia Alcazar or Ms. Rossell L. Abuyo at 252-4416.

For your usual assistance.

Thank you.

In accordance with Republic Act No. 7227, known as the Bases Conversion and Development Act of 1992, and the powers vested on the Subic Bay Metropolitan Authority ("SBMA") in accordance with Section 12 of the Act, and the Rules and Regulations Implementing the Provisions Relative to the Subic Special Economic and Freeport Zone, this Authority hereby certifies that:

Business Name: CARMEL LIGHTS MANPOWER & ALLIED SERVICES INC.
Business Address: Blk. 5, Lot 9, Platinum Street, San Rafael Village, Maa Davao City
Nature of Business: LINE CLEARING MAINTENANCE

Shall be classified as a Subic Bay Freeport CANDIDATE FOR ACCREDITATION and is hereby granted this PROVISIONAL PERMIT for the limited operation of the aforementioned business in accordance with SBMA Office Order Nos. 14-04-0592 and 14-04-0593 Series of 2014.

Throughout the six (6) month provisional period of this permit or upon compliance with the requirements of FULL ACCREDITATION, the candidate shall be in accord with the following stipulations:

1. Acceptance of responsibility for the risks associated with the performance of the urgently required business process in terms of security, health, safety, and other controlled work practices rests entirely on the Candidate.
2. SBMA shall be free from liability which may result from any misconduct, misrepresentation, damage or incident occurring during the entire execution of the registered business activity.
3. This permit shall not serve as an exemption from compliance with applicable National laws and regulations.
4. Concerned SBMA Offices shall have the unimpeded right to inspect the conduct of business for the entire duration of activities.
5. Non-compliance with the conditions conveyed by SBMA herein or in other issuances shall be sufficient cause for the ineligibility of the Candidate for "full" accreditation.

FULL ACCREDITATION status shall automatically take effect in the event that the necessary criteria relevant to all policy guidelines, administrative orders and circulars promulgated by SBMA governing the operation of the registered business activity inside the Subic Bay Freeport Zone have been successfully secured.

Issued this 18th day of January 2016, Subic Bay Freeport Zone.

DANTE T. POLLESCAS
General Manager
Subic Enerzone Corporation
Tel. No.: 252-7392

SUBJECT : PERMIT TO TRIM TREES

Mr. Pollescas,

The Ecology Center hereby granted this permit to Subic Enerzone Corporation to trim trees that obstruct and touch the power distribution lines of SBMA covering the areas of Central Business District, Kalayaan and Binictican Housing, Cubi Point, and Naval Magazine area subject to existing and applicable laws, rules and regulations and the following conditions:

1. This permit is for **tree trimming only**. Cutting of trees to their trunk is strictly prohibited unless it is really justified to do so and unless a written permit from this Office has been obtained for this purpose;
2. Enamel paint shall be applied on the cut/exposed portion (>15 cm in diameter) to avoid fungal and bacterial attack on the tree. Good aesthetics and well-groomed trimming of trees shall be observed at all times;
3. The trimmed branches shall be cut into smaller pieces and disposed of in the SBMA Landfill. A permit has to be obtained from this Office prior to disposal of the same. In cases of trimming in forested areas, cut branches may be left on site to rot, however, these shall be done properly to prevent damage to wildlife and property;
4. Hunting and collection of any species of wild plants and animals (dead or alive) from the forest and bay shall not be allowed at all times. In the event that any of the staff, officials and subcontractors of Subic Enerzone Corporation are caught fishing and collecting any species of plants and animals or have caused deaths of any wildlife species, the company (Subic Enerzone Corporation) shall be held liable. They shall pay the corresponding fines and penalties to be imposed by the SBMA in accordance with the Subic Bay Protected Area Management Plan (SBPAMP) and its Rules and Regulations and other pertinent Philippine Environmental Laws;
5. Staff, officials, and subcontractors of Subic Enerzone Corporation are prohibited from smoking, cooking, and establishing makeshift huts in the forest;
6. The Subic Enerzone Corporation shall notify our Office prior and after completion of the trimming operation for each major area, i.e. Kalayaan Housing, Binictican Housing, Central Business District,, etc.;

AGENDA

- (1) Environmental permit for Raymundo Street
- (2) For confirmation of Environmental permit to include the PCBs condition.

MINUTES

The Subic Freezone will submit a letter to DENR and Ecology Dept R. III to consolidate and re-confirm the environmental permit.

One of the conditions to be included is the PCB's inventory under Subic Freezone and their current operation.

5. All workers shall be provided with appropriate Personal Protective Equipment (PPE) to protect them from occupational hazards and health risks. As such, the Contractor shall develop and implement an Occupational Safety and Health Program that shall include electrical safety, lock-out and tag-out procedures and Emergency Response Plan to be submitted for approval by SBMA Health and Welfare Department;
6. An effective ~~proper~~ scheduling of power interruptions and notification of concerned SBMA Departments and SBFZ locators ~~for power outage~~ shall be implemented by the Proponent/Contractor; ~~for maintenance & operations~~ ^{during};
7. All "hot works" (welding, cutting, lead melting, soldering, blow torch, etc.) performed during maintenance operation shall be covered by a valid permit from Fire Department prior to operation. Fire extinguisher shall be provided at all times in the operation site especially during hot works activities. Fire watch shall be trained in the use of fire equipment that must be provided during and 30 minutes after hot work operation;
8. A Traffic Management Plan to ease traffic congestion and reduce road accident/hazards during maintenance activities shall be prepared by the Proponent/Contractor and submit to the Ecology Center and concerned SBMA Departments within one (1) week upon issuance of this Certificate for approval. Safety and road signs shall be posted and installed visible to motorists and pedestrians where activity is in progress;
9. No tree may be cut, pruned unless a joint inspection with the Proponent/Contractor, Utilities Department and Ecology Center shall be done and a permit to do so has been issued by the Ecology Center; ~~The Proponent shall comply with the SBMA Guidelines for Allowable Tree Cutting & Tree Pruning with in SBFZ;~~
10. The Proponent/Contractor shall ensure that no fishing, hunting or collection and/or buying of wild plants and animals is undertaken by its staff or its Sub-contractors;
11. The Proponent/Contractor shall be held liable for any damage to life, property and the environment as a result of the company's regular and maintenance operation and shall pay just and reasonable compensation to the aggrieved party;
12. Should there be any complaint related to environmental problems brought about by the project, the Proponent shall be held responsible to address such problems;
13. Any misleading/false information submitted to this Office shall be sufficient cause for the cancellation of this Certificate;
14. The Ecology Center shall have the authority to conduct on the spot inspection at any time to monitor compliance with all the conditions cited in this Certificate;

Non-compliance with any the above stipulations shall be sufficient cause for the suspension or cancellation of this certificate and/or a penalty in the amount not to exceed Fifty Thousand Pesos (PhP 50,000.00) for every violation thereof at the discretion of the EC,

11. All ^{transformers containing} polychlorinated biphenyls ~~containing~~ shall be handled, stored & disposed in compliance with RA 6969 otherwise known as the Toxic Substances & Hazardous & Nuclear Waste Control Act of 1990.

AGENDA

- 1) Environmental permit for Raymundo Street.
- 2) For confirmation of Environmental permit to include the PCBs condition.

MINUTES

The Subic Freezone will submit a letter to DENR and Ecology Dept R. (I) to consolidate and re-confirm the environmental permit.

One of the conditions to be included is the PCB's inventory under Subic Freezone and their current operation.

Blank lined area for additional notes or minutes.

**SUBIC BAY FREEPORT ZONE
CERTIFICATE OF NON-COVERAGE
EC-SBFZCNC-309-22-223**

DRAFT

The Subic Bay Metropolitan Authority (SBMA) through the Ecology Center (EC) hereby grants this Subic Bay Freeport Zone Certificate of Non-Coverage (SBFZCNC) for the operation of

*april 9/22
ADR*

SUBIC ENERZONE CORPORATION

with office address at Building No. 502, Dewey Avenue, Subic Bay Freeport Zone after complying with the application for Certificate of Non-Coverage (CNC) requirements as prescribed pursuant to SBMA Environmental Impact Statement (EIS) System and the Department of Environment and Natural Resources Administrative Order No. 96-37, series of 1996.

RM/29/22

This Certificate is being issued subject to existing and applicable laws, rules and regulations and the following conditions:

*pre 9/22
-etc*

1. This Certificate is valid only for the ^{rehabilitation} and operation of the ^{existing} SBMA Power Distribution System, which include the following activity:

- Annual preventive maintenance of all substations
- Upgrading of all rotten electrical poles
- Tree trimming and cutting as part of the regular maintenance
- Extension of power lines to new locators.

and that any expansion and/or modification shall be subject to a separate Environmental Impact Assessment (EIA) requirements;

2. The Proponent shall be responsible in ensuring strict compliance at all times by its employees, agents, consultants, contractors and subcontractors with the SBMA Environmental Rules and Regulations, Likewise, they shall conform with all the conditions cited in this Certificate;;

3. The Proponent shall secure from appropriate SBMA Departments and other national government agencies all the necessary permits and approval prior to commencement of any activity. The Proponent/Contractor shall obtain and keep current all permits related to the Company's operation;

4. All solid wastes and other replaced electrical parts, electrical poles, equipment, etc. identified for disposal shall be properly contained, handled and disposed off at the SBMA landfill through the services rendered by the Ecology Center's Waste Management Division, following the SBMA Waste Management Guidelines (see Attachment A);

*replacement of those no longer needed cables in related areas
i.e. installation of new overhead & underground
lines, extension of power
lines, expansion of
substations, etc.*

13. Should there be any complaint related to environmental problems brought about by the project, the Proponent shall be held responsible to address such problems;
14. Any misleading/false information submitted to this Office shall be sufficient cause for the cancellation of this Certificate;
15. The Ecology Center shall have the authority to conduct on the spot inspection at any time to monitor compliance with all the conditions cited in this Certificate;

Non-compliance with any the above stipulations shall be sufficient cause for the suspension or cancellation of this certificate and/or a penalty in the amount not to exceed Fifty Thousand Pesos (PHP 50,000.00) for every violation thereof at the discretion of the EC, pursuant to the SBMA EIS System and all other applicable Philippine environmental laws, rules and regulations.

The SBMA reserves the right to amend this SBFZCNC should additional information become available or if circumstances should so warrant.

Signed this SEP 23 2003

4. All solid wastes and other replaced electrical parts, electrical poles, equipment, etc. identified for disposal shall be properly contained, handled and disposed off at the SBMA landfill through the services rendered by the Ecology Center's Waste Management Division, following the SBMA Waste Management Guidelines (*see Attachment A*);
5. All workers shall be provided with appropriate Personal Protective Equipment (PPE) to protect them from occupational hazards and health risks. As such, the Contractor shall develop and implement an Occupational Safety and Health Program that shall include electrical safety, lock-out and tag-out procedures and Emergency Response Plan to be submitted for approval by SBMA Health and Welfare Department;
6. An effective scheduling of power interruptions and notification of concerned SBMA Departments and SBFZ locators for power outage shall be implemented by the Proponent/Contractor during maintenance and operations;
7. All "hot works" (welding, cutting, lead melting, soldering, blow torch, etc.) performed during maintenance operation shall be covered by a valid permit from Fire Department prior to operation. Fire extinguisher shall be provided at all times in the operation site especially during hot works activities. Fire watch shall be trained in the use of fire equipment that must be provided during and 30 minutes after hot work operation;
8. A Traffic Management Plan to ease traffic congestion and reduce road accident/hazards during maintenance activities shall be prepared by the Proponent/Contractor and submit to the Ecology Center and concerned SBMA Departments within one (1) week upon issuance of this Certificate for approval. Safety and road signs shall be posted and installed visible to motorists and pedestrians where activity is in progress;
9. No tree may be cut, pruned unless a joint inspection with the Proponent/Contractor, Utilities Department and Ecology Center shall be done and a permit to do so has been issued by the Ecology Center. Hence, the Proponent shall comply with the SBMA Guidelines for allowable Tree Cutting and Tree Trimming with in SBFZ;
10. The Proponent/Contractor shall ensure that no fishing, hunting or collection and/or buying of wild plants and animals is undertaken by its staff or its Sub-contractors;
11. All transformers containing polychlorinated biphenyls shall be handled, stored and disposed in compliance with R.A. 6969 otherwise known as the Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990 and DENR Administrative Order (DAO) 29, Series of 1992;
12. The Proponent/Contractor shall be held liable for any damage to life, property and the environment as a result of the company's regular and maintenance operation and shall pay just and reasonable compensation to the aggrieved party;

Dear Ms. Dela Llana,

This is in connection with our request for the amendment of Certificate of Non-Coverage released by your office. We are forwarding to you the completed documents required for the issuance of Environmental Compliance Certificate. This is for the projects stated in the Distribution Management Service Agreement. Please refer to the attached folders.

We hope for the immediate action on this matter.

Thank you and God Bless.

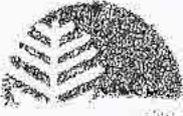

Respectfully yours,

Subject: Request for SEZ Environmental Compliance Certificate (ECC) Confirmation

Dear Madam,

This is to respectfully request your good office for the confirmation of **Subic Enerzone Corporation's** Environmental Compliance Certificate (ECC) issued by Subic Bay Metropolitan Authority (SBMA) Ecology Center with Reference No. EC-SBFZECC-56-24-365 for the location, Canal Road. cor. Labitan St., Central Business District (CBD) Area, Subic Bay Freeport Zone.

This confirmation is pertinent to SEZ Hazardous Waste Registration application. Also, attached herewith are the documents related to this request.

Your usual support and consideration would be very much appreciated.

Thank you very much!

Respectfully yours,

ENVIRONMENTAL COMPLIANCE CERTIFICATE

CAR 1109 – 139 – 4021

The Department of Environment and Natural Resources (DENR) thru the Environmental Management Bureau – Cordillera Administrative Region (EMB-CAR) hereby grants this Environmental Compliance Certificate (ECC) to **HEDCOR SABANGAN, INC.** for the proposed **SABANGAN HYDROELECTRIC POWER PROJECT** covering the Barangays of Namatec and Napua, Sabangan, Mt. Province, after complying with the Environmental Impact Assessment (EIA) requirements as prescribed in the promulgated guidelines implementing section 3 (b) of P.D. 1586.

This Certificate is further specified as follows:

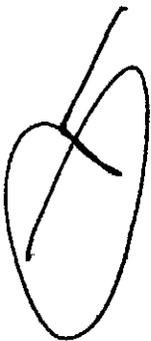

A. Scope:

1. This Certificate is valid only for the development and operation of the abovementioned project including, among others, the installation of transmission lines, the construction of access roads and/or, as described in the submitted documents;
2. This Certificate does not exempt the project from the legal requirements of other concerned agencies;

B. Conditions:

1. The development and operation of the power plant and its appurtenant facilities shall be in accordance with the submitted documents. Any major modification and/or expansion shall be subject to the Environmental Impact Statement (EIS) System requirement;
2. The legal requirements pursuant to RA 8749 or the Philippine Clean Air Act of 1999, RA 9275 or otherwise known as The Philippine Clean Water Act and, RA 6969, The Toxic Substances, Hazardous Waste, and Nuclear Waste Control Act of 1990, where applicable, shall be secured consistent to the operation of the project. Compliance to said requirements shall be coordinated with the EMB-CAR;

3. The project shall undergo the permitting requirements of P.D. 705 otherwise known as the Forestry Code of the Philippines and the latest DENR issuances relative thereto with regard to the trees affected;
4. The designated earth/construction spoils disposal site shall be developed, prior to dumping, as an engineered earth dump provided with, but not limited to, surface run-off drainage system, toe/retaining walls, to be maintained in a stable and non-pollutive condition;
5. The volume of earth materials to be impounded in the designated disposal site/facility shall at no time be in excess of the volume warranted by the computed carrying capacity of said dump facility. The proponent shall secure clearance from EMB-CAR prior to the use of disposal site(s) outside the designated disposal facility;
6. Earth and other construction spoils, solid wastes and other form of wastes shall be prevented from deposition to and along the course of Chico River and other environmentally sensitive areas;
7. The proponent shall effect solid waste management at source encompassing, the segregation, recycling and composting of wastes;
8. The proponent shall properly restore/rehabilitate any damage(s) to the environment as a result of project related activities;
9. Consistent with the project operation, a watershed management and enhancement plan shall be formulated and implemented in coordination with the DENR;
10. HEDCOR-Sabangan, Inc. shall within ninety (90) days from the issuance of this Certificate cause the formation, through a Memorandum of Agreement (MOA), of a Multipartite Monitoring Team (MMT) consisting, among others, of representatives from the proponent, EMB/DENR, stakeholder, LGUs, communities and a local NGO. The MMT shall primarily oversee the compliance of the proponent to the ECC conditions, EMP and, relevant rules and regulations;
11. HEDCOR-Sabangan shall set up an Environmental Monitoring Fund (EMF) to cover reasonable expenses for environmental monitoring undertaken by the MMT. The amount and mechanics of the EMF shall be proposed by the proponent and affirmed by the EMB-CAR following existing guidelines and procedures on the same;
12. The proponent shall submit to EMB-CAR one (1) year prior to the final shutdown of the facility a comprehensive abandonment plan. In relation,

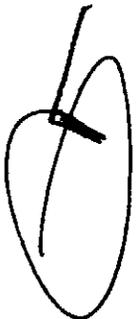

the EMB shall first review and approve the environmental aspects/components of the plan consistent with EMB functions prior to implementation;

13. The proponent shall submit to EMB-CAR a quarterly report, providing for, among others, the status of project implementation, the project compliance to ECC conditions and, the proponent's response to related issues/concerns arising thereof;
14. The project is subject to on-the-spot monitoring/inspection at any reasonable time by the EMB-CAR which may be in coordination with concerned groups;
15. The proponent shall cause the implementation of any undertaking which may be imposed by the EMB-CAR as a result of Technical Conference/s called relative hereof;
16. This Certificate shall be deemed automatically expired if the project is not implemented within five (5) years from the date of issuance; and
17. Any transfer of project proprietorship or project name carries the same conditions in this ECC for which notification to the EMB-CAR shall be made by the proponent within fifteen (15) days from such transfer.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate, administrative sanctions against the office head and/or imposition of fine in the amount not to exceed Fifty Thousand Pesos (₱ 50,000.00) for every violations thereof, at the discretion of the DENR (Section 9 of P. D. 1586).

C. Recommendations (for the consideration of the proponent, Local Government Unit concerned and, other concerned agencies in the issuance of applicable permits/authorities):

1. The recommendation(s) cited in the Engineering Geological and Geohazard Assessment Report undertaken for the said project should be given preferential attention;
2. The appurtenant physical structures of the project where applicable, are subject to the requirements of the National Building Code of the Philippines. Compliance to the same should be coordinated with the concerned Local Building Official;
3. The implementation and operation of the project should include a provision for the adoption and implementation of a solid wastes

A handwritten signature in cursive script, appearing to be 'J. M. S.' or similar, located at the bottom center of the page.

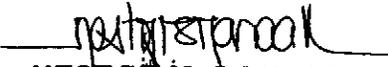

(garbage) collection and disposal scheme consistent with the provisions of RA 9003 (The Ecological Solid Waste management Act of 2000);

4. The proponent should coordinate with the surrounding stakeholder communities and concerned government agencies for the development and implementation of a doable watershed/forest resource management program to maintain and enhance the hydrological and ecological system of the project watershed;
5. Qualified local residents should be given priority employment during the development and operation of the project; and
6. Use of explosives should be covered by license/s to be issued by the concerned government agency/ies.

Issued this 20 day of OCT, 2011, Year Two Thousand Eleven.

Dear Mr. Batiquin,

This refers to your application for an Environmental Compliance Certificate (ECC) for the proposed **BAKUN A/C HYDROELECTRIC POWER PROJECT** to be located in the municipalities of Bakun, Benguet and Alliem, Ilocos Sur.

After evaluation of the documents submitted on the aforesaid project, this Office has decided to grant the same an Environmental Compliance Certificate (ECC).

You may proceed with the project implementation after securing all the necessary permits from the pertinent government agencies. Please be advised, however, that the Department of Environment and Natural Resources will be monitoring the project periodically to ensure compliance with the stipulations cited in the attached ECC. Further, any expansion and/or modification of currently approved operations will be subjected to new Environmental Impact Assessment requirements.

Very truly yours,

V. Ramos
VICTOR O. RAMOS
 Secretary

cc: DENR-CAR
 DENR-Region 1

Grow a Tree for Legacy

9. Proper collection and disposal of solid wastes especially during construction shall be effected;
10. All construction spoils during tunnel and road construction shall be strictly contained in the pre-determined site stated in the submitted Environmental Impact Statement (EIS);
11. Passage/lifts for migratory fish/aquatic species in the Bakun River shall be provided to ensure the uninterrupted life cycles of these species ;
12. All measures to mitigate disruption of important ecological processes shall be undertaken. Affected aquatic and terrestrial habitats shall be turned into productive and stable ecosystems;
13. All other mitigating measures stated in the submitted EIS document, modifications to it and as approved by the EMB shall be strictly implemented;
14. A Memorandum of Agreement (MOA) shall be forged between the proponent and the two host municipalities within ninety (90) days of the issuance of this Certificate. The MOA shall detail the monetary and non-monetary benefits (e.g. missionary electrification, generation of employment and other social benefits) that shall be provided to the host municipalities as stipulated in Section 5.1 of RA 7638 (Department of Energy Act of 1992);
15. A Social Development Plan which provides for a continuing dialogue/participation of the local constituents in the project shall be formulated and implemented;
16. The proponent shall undertake an effective Information Education and Communication (IEC) program to explain publicly its mitigative measures as well as the conditions of the ECC. It shall open opportunities to educate the local residents, LGUs and other interested parties on the environment and human health safety features of the project. To ensure objectivity of presentation, the IEC activities shall be funded by the proponent and implemented by a joint team composed of the proponent, the DENR and DENR's selected NGO;
17. A Comprehensive Watershed Management Plan with specific evaluation and monitoring system shall be formulated, properly endorsed by the DENR-CAR and submitted to the EMB within sixty (60) days from receipt of the ECC;
18. The proponent shall initiate within thirty (30) days after receipt of this Certificate the creation of a Multipartite Monitoring Team (MMT) through a MOA with the DENR, the LGUs, a local environmental NGO and the affected communities. The MMT shall primarily oversee the compliance of the proponent with the ECC conditions, the Environmental Management Plan and applicable laws, rules and regulations;
19. The proponent shall set aside an Environmental Monitoring Fund (EMF) to support the activities of the MMT such as training, meals, accommodation, transportation etc.;
20. On-the-spot monitoring and inspection can be initiated by the DENR-Region 1, DENR-CAR or EMB anytime in coordination with concerned groups;
21. An Environmental Unit (EU) shall be created to oversee the implementation of the Comprehensive Watershed Management Plan, Social Development Plan and Monitoring

✓

[Handwritten signature]

Program. It shall likewise ensure the quarterly reporting and monitoring activities to the EMB, DENR-CAR, DENR-Region 1 and establish coordination with the MMT;

- 22. The proponent shall set up an Environmental Guarantee Fund (EGF) to cover expenses for indemnification of damages caused by the project, including rehabilitation and/or restoration of areas affected by the project's implementation. The amount and mechanics of the EGF shall be determined by the DENR and the proponent within ninety (90) days after the issuance of this Certificate;
- 23. All other required government permits shall be secured by the proponent prior to the project's construction and operation;
- 24. Any expansion/modification of approved operations will be subjected to a new environmental impact assessment requirement; and
- 25. The transfer of ownership of this project carries the same conditions in the ECC for which written notification shall be made within fifteen (15) days from such transfer.

Non-compliance with any of the above conditions shall be sufficient cause for the suspension of this Certificate and/or imposition of fine in the amount not to exceed Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the EMB (Section 9 of P. D. 1586).

Recommending Approval:

DELFIN J. GANAPIN, JR.
 Undersecretary for Environment and
 Programs Development

Republic of the Philippines
Department of Environment and Natural Resources
ENVIRONMENTAL MANAGEMENT BUREAU
Cordillera Administrative Region

ENVIRONMENTAL COMPLIANCE CERTIFICATE

Car 0403 - 030 - 201

The Department of Environment and Natural Resources (DENR) thru the Environmental Management Bureau-Cordillera Administrative Region (EMB-CAR), hereby grants this Environmental Compliance Certificate (ECC) for the **proposed Kayapa water Diversion Project of Luzon Hydro Corporation (LHC)** to be located at Kayapa, Bakun, Benguet, after complying with the Environmental Impact Assessment (EIA) requirement as prescribed in the promulgated guidelines implementing Section 3(b) of P.D. 1121 and P.D. 1586.

This Certificate is being issued subject to the following conditions:

1. The Certificate is valid only for the proposed Kayapa Water Diversion Project with the following components:
 - a) Poy-oacan River Intake Weir and Kayapa River Intake Weir;
 - b) Desanders;
 - c) One (1) km. long surface conveyance pipes/channels from the Poy-oacan intake weir to the tunnel inlet portal;
 - d) Four (4) Km. long and 3.5 m. in diameter tunnel;
 - e) Two (2) km. conveyance pipes/channels from the Kayapa intake weir (tunnel outlet portal) to the vertical drop shaft;
 - f) 300-m. deep and 2.0-m. diameter vertical drop shaft;
 - g) Mini Power Plant with a maximum capacity of 10MW; and
 - h) Access (Barangay) roads and bridges
and/or as described in the submitted documents.

✓

2. The proponent shall strictly implement the Environmental Management Plan/Program (EMP) and, all other LHC commitments as described in the submitted documents;
3. The final design of the project components shall take into consideration the recommendations provided in the Engineering Geological and Geohazard Assessment Report (EGGAR) and other geology related concerns. The determination of proponent's compliance with the recommendations contained in the EGGAR shall be the sole responsibility of its preparer and/or the Mines and Geo-sciences Bureau-CAR;
4. Aggregate requirement for the project shall only be sourced from quarries granted ECCs by the EMB/DENR;
5. The proponent shall implement appropriate slope protection measures along the inlet and outlet areas of the tunnel. A slope stability analysis shall be conducted prior to initial development to determine the appropriate protection measures to be undertaken;
6. The proponent shall secure all pertinent permits/clearances from appropriate/concerned government agencies/units prior to project implementation;
7. Water diversion shall be in accordance with the permitting requirements of the National Water Resources Board (NWRB);
8. The communities downstream the intake weirs shall have priority use of the river waters specially during seasons of low flow. The proponent shall cease diverting water to their power station should the downstream flow be critical to the actual water needs of the downstream residents/communities;

8

9. Inventory of all the affected* trees shall be conducted prior to project implementation and shall be disposed off in accordance with the existing Forestry Laws, Rules and Regulations; *o/c DENR - DENR/US*

10. Passage/lifts for migratory fish/aquatic species in the affected rivers shall be provided to ensure the uninterrupted life cycles of these species;

11. The proponent shall provide a water quality/quantity monitoring station for tunnel effluents;

12. The proponent shall submit to EMB-CAR every after three (3) years an aerial photograph of the ground surface along the route of the tunnel taken towards the end of May or during the dry season;

13. Excess excavated earth materials shall be disposed of only at pre-designated disposal site(s) and shall be maintained in a non-pollutive and stable condition; and

14. The proponent shall form, prior to project implementation, a Multi-Partite Monitoring Team (MMT) through a Memorandum of Agreement (MOA) with the DENR thru the EMB-CAR, the LGU concerned, a local environmental NGO, concerned indigenous peoples organization and the affected communities. The MMT shall primarily oversee the compliance of the proponent with the conditions of the ECC, the EMP and other applicable laws, rules and regulations.

15. The proponent shall set aside an Environmental Monitoring Fund (EMF) to cover costs attendant to the operation of the MMT.

The proponent shall submit an EMF proposal (with supporting computations) based on existing/relevant guidelines within thirty (30) days from the receipt of the ECC. The said amount shall be incorporated in the EMF-MMT MOA to be discussed among the signatories and the final draft should be submitted

o

to EMB-CAR within sixty (60) days from receipt of this ECC;

16. The proponent shall set up an Environmental Guarantee Fund (EGF) to cover expenses for indemnification of damages caused by the project's implementation. The amount and mechanics of the EGF shall be determined by the EMB/DENR and the proponent within ninety (90) days after the issuance of this ECC;
17. EMB/DENR shall conduct on-the-spot inspection/monitoring at reasonable time which may be in coordination with other concerned groups;
18. Any expansion and/or modification/deviation in the submitted documents shall be subject to the Environmental Impact Assessment requirement prior to its implementation;
19. The proponent shall be solely responsible for the resolution of any legal issues resulting from project implementation;
20. The proponent shall cause the implementation of any undertaking imposed by the EMB-CAR as a result of a Technical Conference called relevant hereof;
21. Any transfer of ownership of the project carries the same conditions in this ECC for which a written notification to the EMB-CAR shall be made within fifteen (15) days from such transfer; and
22. This ECC shall form part of the Terms of Reference (TOR) of the contractor(s) of the project.

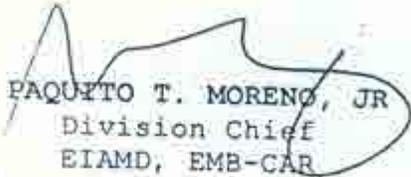

OK

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate, administrative sanctions against the proponent and/or imposition of fine in an amount not to exceed Fifty Thousand Pesos (PhP 50,000.00) for any violation thereof at the discretion of the DENR (Section 9 of PD 1586).

ENVIRONMENTAL COMPLIANCE CERTIFICATE CAR 0403-030-201 (Amended)

AMENDING the Environmental Compliance Certificate (ECC) issued by the DENR-CAR on April 16, 2004 to the Kayapa Creek Water Diversion project of Luzon Hydro Corporation (LHC) located at Kayapa, Bakun, Benguet pursuant to Section 8.3 of DAO 2003-30 (Implementing Rules and Regulations (IRR) for the Philippine Environmental Impact Statement (EIS) System:

I, JOEL G. SALVADOR, Regional Director, EMB-CAR, by virtue of the powers vested in me by law, do hereby order:

Section 1. Amendment

- I. Condition No. 1 of the ECC describing its scope and validity is amended and shall now read as follows:

This certificate is valid only for the Kayapa creek water diversion project with the following components:

- a. Desander;
- b. About 1.1 km long conveyance pipes/channels from the Kayapa intake weir to the drop shaft;
- c. 300-m deep and 0.70-m diameter vertical drop shaft;
- d. Mini Power plant with a maximum capacity of 10 MW; and
- e. About 6-km access (barangay) road from Pilpil, Amilongan to Kayapa weir,

and/or as described in the submitted documents.

- II. Condition numbers 5, 11, and 12 of the same ECC owing to its inapplicability, are deleted.

Section 2. Applicability

All provisions of the ECC numbered CAR 0403-030-201 issued on April 16, 2004 to the project not hereto amended shall remain valid and existing.

Section 3. Effectivity

This Amendment is issued in the interest of all concerned parties and shall take effect immediately.

Done in the City of Baguio, Philippines, this 01 JUN 2005 day of _____ Year Two Thousand Five.

Environmental Management Bureau

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The Environmental Management Bureau (EMB) hereby grants this Environmental Compliance Certificate (ECC) to the proposed Amphobaw Mini Hydro Power Project of HYDRO ELECTRIC DEVELOPMENT CORP. (HEDECOR) to be located in Amphobaw R. at Barangay Bannogbang, Bagong and Battuay, Municipality of Sablan, Benguet, after complying with the Environmental Impact Assessment (EIA) requirement as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and 1586.

This Certificate is being issued subject to the following conditions:

1. That the plant's power capacity and annual energy production shall not exceed 3,000 kilowatts and 14,650,020 kw-hrs. respectively;
2. That the stability of the dam/weir shall be monitored and ensured;
3. That in the event the proposed construction of an access road commence, necessary permits from government agencies shall be secured;
4. That proper mitigating measures shall be undertaken to minimize water, air, noise and dust pollution generated during the construction of the road and dam facilities;
5. That fish screens and trash racks shall be properly installed to protect the entry of fishes and surface debris into the reservoir/forebay;
6. That the noise generated from the churning of the turbines shall be kept within the prescribed limits;
7. That mechanical and biological rehabilitation of affected soils and rivers e.g. riprapping, concreting works, reforestation, etc. shall be effected;
8. That an appropriate compensation scheme shall be devised and implemented for damaged crops and properties;
9. That contingency plans shall be provided in case of accidents e.g. dam failure, etc.; and
10. That proper maintenance of access roads shall be effected and that measures be adopted to minimize dust; and
11. That appropriate mitigating measures shall be devised and effected to minimize any adverse impacts of the project on the uses of the river downstream the project site.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or a fine in an amount not to exceed Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Sec. 8 of P.D. 1586).

Given this 4th day of May, Nineteen Hundred and Ninety.

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The Department of Environment and Natural Resources - Cordillera Administrative Region (DENR-CAR), hereby grants this Environmental Compliance Certificate (ECC) to the Amphohaw Minihydro Expansion Project of Hydro Electric Development Corporation (HEDCOR) located at Benengneng, Sablan, Benguet, after complying with the Environmental Impact Assessment (EIA) requirement as prescribed in the promulgated guidelines implementing Section 3(b) of P.D. 1121 and 1586.

This Certificate is being issued subject to the following conditions:

1. That this Certificate shall only be valid for the expansion of the Amphohaw Mini-Hydro Power system. All activities to be undertaken in relation thereto shall be limited only and in accordance to the Project Description and other pertinent submissions filed at the DENR-CAR;
2. That this Certificate carries all the pertinent conditions of the Environmental Compliance Certificate (ECC) issued for the development and operations of the Amphohaw Mini-Hydro Power System;
3. That on the spot monitoring and inspection shall be initiated by DENR-CAR anytime in coordination with concerned groups;
4. That the transfer of ownership of this project carries the same conditions in this ECC for which written notification shall be made within fifteen (15) days from such transfer.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and /or a fine in the amount not to exceed Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Section 9 P.D. 1586).

ENVIRONMENTAL COMPLIANCE CERTIFICATE

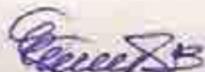

The Department of Environment and Natural Resources - Cordillera Administrative Region (DENR-CAR), through its Environmental Management and Protected Areas Service (EMFAS) hereby grants this Environmental Compliance Certificate (ECC) for the Proposed Amphohaw Minihydro Expansion Project of the Hydro Electric Development Corporation (HEDCOR) to be located along the Bagulin River at Barangay Banengbeng, Sablan, Benguet, after complying with the Environmental Impact Assessment requirement as prescribed in the promulgated guidelines implementing Section 3(b) of E.D. 1121 and P.D. 1586.

This Certificate is issued subject to the following conditions:

1. That this certificate shall be valid only for the proposed upgrading/expansion of the project's power output of 4000 kws from 5000 kws to 9000 kws thru the rehabilitation/expansion of the project's weir and the replacement of the turbines at the power house site as embodied in their Project Description (PD);
2. That all activities to be undertaken in relation thereto shall be limited only and in accordance to the Project Description (PD) and other pertinent instruments filed at the DENR-CAR; and
3. That this certificate carries all the pertinent conditions of the Environmental Compliance Certificates (ECCs) previously issued by the EMF and the DENR-CAR for the development and operations of the Amphohaw Minihydro Power System.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or a fine in an amount not to exceed fifty thousand pesos (P50,000.00) for every violation thereof, at the discretion of the RED DENR (Section 9 of P.D. 1586).

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The Department of Environment and Natural Resources - Cordillera Administrative Region (DENR-CAR) hereby grants this Environmental Compliance Certificate (ECC) to the proposed Bineng 3 Mini-hydroelectric Plant Expansion Project, a component of the Bineng Minihydro Power System of the Hydro Electric Development Corporation (HEDCOR), located at Bineng, LA Trinidad, Benguet, after complying with the Environmental Impact Assessment (EIA) requirement as prescribed in the promulgated guidelines implementing Section 3 (b) of PD 1121 and 1586.

This Certificate is issued subject to the following conditions:

1. That this certificate is valid only for the proposed expansion of the Bineng 3 Mini-hydroelectric Plant from its present capacity of 3500.00 KWS to 4500.00KWS for an estimated added annum generation of 3,898,000.00 KW-hrs. It shall cover only those activities/modification as stipulated in the Project Description (PD) and other supporting documents submitted to EMPAS, DENR-CAR;
2. Except for the increase in capacity of the Bineng 3 Plant, this Certificate carries all the pertinent conditions of the Environmental Compliance Certificate (ECC) previously issued for the development and operation of the Bineng Minihydro Power System of HEDCOR;
3. That for any change or modification of the submitted development plan, the proponent shall first secure approval from the DENR-CAR prior to implementation;
4. That all mitigating measures for the identified adverse impacts as stipulated in the submitted PD shall be strictly implemented by the proponent;
5. That the proponent shall submit a quarterly progress report to EMPAS, DENR-CAR reckoned from the start of construction;
6. That the proposed expansion shall be subject to on-the-spot monitoring and inspection by DENR-CAR within any reasonable time in coordination with concerned groups;
7. That for any damage/loss to life and/or property/improvements attributed to the implementation of the proposed expansion project, payment of just compensation to the aggrieved parties shall be the obligation of the proponent;
8. That this certificate does not exempt the project from regulatory requirements of other agencies concerned; and

9. That transfer of ownership of the project carries the same condition in this ECC for which a written notification to EMPAS, DENR-CAR shall be made within fifteen (15) days from such transfer.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or a fine in the amount not to exceed Fifty thousand pesos (P50,000.00) for any violation thereof at the discretion of the DENR (Section 9 of PD 1586).

Issued this 23rd day of November, Nineteen Hundred and Ninety Five.

ECC Ref. Code: ECC No. CAR 1305 – 0078

MR. BENJAMIN BARTOLOME

Electrical Manager
HEDCOR, Inc.
Ambuklao Road, Obulan
Beckel, Benguet

Subject: **ENVIRONMENTAL COMPLIANCE CERTIFICATE (ECC)**

Dear **Sir Bartolome**:

This refers to your ECC application for the Banengbeng Main Substation to be located at Sablan, Benguet.

After a careful evaluation of the documents submitted for the aforesaid project, this office has decided to grant the an Environmental Compliance Certificate (ECC) which contains our findings and recommendations as a result of evaluation of the EIA document you have submitted to EMB – CAR. All the findings and recommendations shall be integrated by relevant Government Agencies in their decision making prior to the issuance of clearances, permits and licenses under their mandates.

Please be informed however, that this ECC, is not a permit per se and/or the sole requirement needed for project implementation but, a document to show that your project has undergone the Environmental Impact Assessment (EIA) process as required by law (P.D. 1586). In effect, the ECC when faithfully complied with, shall help in enhancing the environmental sustainability of your project. Thus, the need to secure all the other necessary permits from pertinent government agencies/units concerned prior to project implementation. Further, we will be monitoring the project periodically to ensure your compliance to the conditions stipulated in the attached ECC.

May we also remind you to abide with all the conditions stated in your ECC. A penalty of not less than Ten Thousand Pesos (₱ 10,000.00) for every violation of minor conditions and Twenty Five Thousand Pesos (₱ 25,000.00) for very violation of major conditions will be imposed on all types of FIRST Offenses. These penalties are based on the revised Procedural Manual for DAO 2003-30 or the Implementing Rules and Regulations of P.D. 1586. Likewise, penalties for succeeding offenses will also be based on the said manual.

Please be guided accordingly.

Very truly yours,

OSCAR C. CABANAYAN, CESO VI

ENVIRONMENTAL COMPLIANCE CERTIFICATE

(Issued under Presidential Decree 1586)
ECC No. CAR 1305 – 0078

This is to certify that the **HEDCOR, INC.** is granted this ECC for the proposed **BANENGBENG MAIN SUBSTATION** located at Banengbeng, Sablan, Benguet by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau –Cordillera Administrative Region (EMB-CAR) **SUBJECT ONLY** to the conditions and restrictions set-out in this Certificate.

PROJECT DESCRIPTION

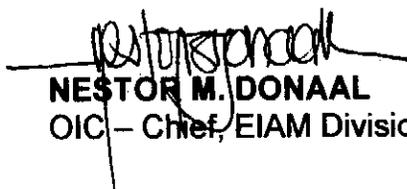

(Group II, C. Other Power Plants and Power Facilities)

The project involves the development of a main substation and its appurtenances including, among others, an access road, control room, oil & water separator, and/or, as described in the submitted documents. The main substation is approximately located in the intersection of geographical coordinates 16°30'50.56" North Latitude and 120°32'20.17" East Longitude.

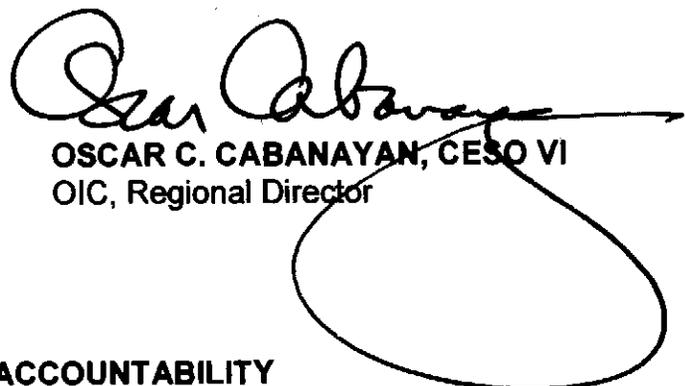

This ECC is issued in compliance to the requirements of Presidential Decree No. 1586 in accordance to Department Administrative Order No. 2003-30. EMB, DENR – CAR, however, is not precluded from reevaluating, adding, removing and correcting any deficiencies or errors that may be found to be inconsistent with the Revised Procedural Manual for DAO 2003-30 after issuance of this Certificate.

Issued on MAY 21 2013 .

RECOMMENDING APPROVAL:

NESTOR M. DONAAL
OIC – Chief, EIAM Division

APPROVED BY:

OSCAR C. CABANAYAN, CESO VI
OIC, Regional Director

STATEMENT OF ACCOUNTABILITY

HEDCOR, INC., the proponent of the above mentioned project located at Banengbeng, Sablan, Benguet, takes full responsibility in complying with all conditions stipulated in this Environmental Compliance Certificate (ECC) as well as in the Impact Assessment and Mitigation Section as contained in the Initial Environmental Examination Checklist. Further, I HEREBY CERTIFY that the information provided to the EMB, DENR – CAR pertaining to this project are true and correct to the best of my personal knowledge and based on the records on my possession.

MR. BENJAMIN BARTOLOME

I. CONDITIONS

ENVIRONMENTAL MANAGEMENT

The proponent shall strictly implement/comply the following mitigating, enhancement and rehabilitating measures:

1. The proponent shall ensure that all commitments, mitigating/enhancement measures described in the EIA documents and other submissions shall be instituted and strictly implemented throughout the project implementation;
2. Earth materials and other construction spoils shall be disposed-off properly in an appropriate disposal site(s) and to be maintained in a stable and non-pollutive condition. The same shall be prevented from deposition to and along public roads, natural water ways, and water bodies; and
3. The proponent shall, among others, restore/affected areas for the watershed to function effectively.

GENERAL CONDITIONS

Further administrative conditions for the grant of this Certificate shall be strictly complied:

1. The legal requirements pursuant to RA 6969 also known as the Toxic Substances and Hazardous and Nuclear Waste Control Act of 1990, RA 9275 or The Philippine Clean Water Act of 2004 and, RA 8749 also called The Philippine Clean Air Act of 1999 shall be secured whenever applicable consistent to the implementation of the project. Compliance to said requirements shall be coordinated with the Pollution Control Division (PCD) of EMB-CAR;
2. Secure necessary permit(s)/clearances relative the project implementation as required by other concerned agencies;
3. The proponent shall allow entry of EMB-CAR field personnel into the project site at all times to conduct tangible monitoring and to validate project's compliance to the ECC conditions stipulated therein, the EMP and, proposed mitigating measures;
4. The proponent shall submit semi – annually to EMB-CAR a Compliance Monitoring Report one month (1) after every semester. Compliance to the said requirements shall be coordinated with EMB- CAR;
5. The proponent shall cause the implementation of any undertaking which may be imposed by EMB-CAR as a result of Technical Conference/s called relative to environmental issues arising from the implementation of the project;
6. The proponent shall, in coordination with EMB, DENR-CAR, participate in the adopt an Estero/River and/or the Water Quality Management Area (WQMA) Program of EMB-CAR;
7. For the information of the public, a billboard of appropriate size containing this message “**Notice to the Public, This project (title of the project) of**

ECC No.	:	CAR 1305 - 0078
Project Name	:	Banengbeng Main Substation
Project Proponent	:	HEDCOR, INC.

(Name of the proponent) has been issued an Environmental Compliance Certificate (ECC Number) by the Environmental Management Bureau of the Department of Environment and Natural Resources – Cordillera Administrative Region on (date)” shall be installed, during the construction/development phase, along places visible to the public. A picture(s) showing the same shall be attached to the compliance report as proof of its compliance; and

8. The proponent, where applicable, shall undergo the requirements of DENR-CAR including, but not limited to, those under PD 705 otherwise known as the Forestry Code of the Philippines and the latest issuances relative thereto with regard to the trees to be affected.

II. RESTRICTIONS:

The proponent is strictly subjected to the following restrictions:

1. Project development shall be in accordance with the submitted documents. Major modifications and/or expansion shall be subject to the Environmental Impact Statement (EIS) System requirement;
2. Any transfer of project proprietorship carries the same conditions and restriction in this ECC for which a written notification to the EMB-CAR shall be made by the transferee within fifteen (15) days from such transfer; and
3. This Certificate shall be considered automatically expired if the project construction has not commenced within a period of five (5) years from the issuance thereof. Request for extension of the same shall be made within three months from its expiration.

Non-compliance with any of the conditions shall be a sufficient cause for the cancellation or suspension of this Certificate and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (50,000) for every violation thereof.

PROJECT ASSESSMENT PLANNING TOOL

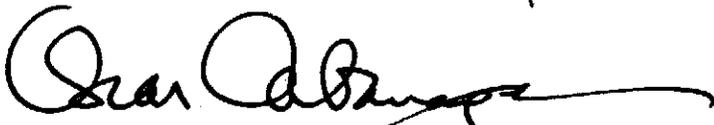

For the assistance of the Proponent, other DENR Divisions/Bureau's, other concerned government agencies and LGUs in the management of the project and for better coordination in mitigation on the impact of the project on its surrounding areas and to the environment.

By way of recommendation, the following have been taken notice by the EIA case handler and are forwarding these recommendations to the parties and authorities concerned for proper appreciation and action, and integration into their decision – making process.

1. Priority employment of qualified local residents during the development and operation of the project;
2. The project should be undertaken properly during reasonable time periods so as not to cause undue disturbance;
3. Tight supervision of the development of the project by competent technical personnel to ensure that standards and requirements of sound engineering, safety and health practices are strictly followed;
4. The recommendation(s) cited in the Geohazard Identification Report prepared for the said project should be given preferential consideration;
5. Adoption of a sewage treatment facility not limited to the utilization of a three (3) – chambered septic tank instead of the usual two (2) – chambered septic tank of which the regular de-sludging of the same by legal entities should be ensured purposed on protecting the receiving ecosystems. and
6. Development should be undertaken on geologically stable areas.

Environmental Management Bureau

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The Environmental Management Bureau (EMB) hereby grants this Environmental Compliance Certificate (ECC) to the proposed Irian Mini Hydro Power Project of HYDRO ELECTRIC DEVELOPMENT CORP. (HEADCOR) to be located in Aguyao, Tadiangan, Tuba, Benguet, after complying with the Environmental Impact Assessment (EIA) requirement as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and 1500.

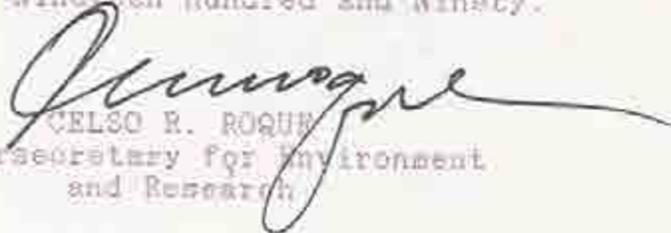

This Certificate is being issued subject to the following conditions:

1. That the plant's power capacity and annual energy production shall not exceed 1,000 kilowatts and 4,533,00 kw-hrs. respectively;
2. That the stability of the dam/weir shall be monitored and ensured;
3. That proper mitigating measures shall be undertaken to minimize water, air, noise and dust pollution generated during the project facilities construction i.e. weir, power conduits, forebay, penstocks, power house and transmission lines;
4. That no construction of an access road shall be undertaken;
5. That the noise generated from the churning of the turbines shall be kept within the prescribed limits;
6. That fish screens shall be properly installed to protect the fish from entering the reservoir;
7. That a just appropriate compensation scheme shall be devised and implemented for damaged crops and/or properties;
8. That contingency plans shall be provided in case of accidents e.g. dam failure, etc.; and
9. That appropriate mitigating measures shall be devised and effected to minimize any adverse impacts of the project on the uses of the river downstream the project site.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this

Certificate and/or a fine in an amount not to exceed Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Sec. 9 of P.D. 1586).

Given this 3rd day of May, Nineteen Hundred and Ninety.

CELSO R. ROQUE
Undersecretary for Environment
and Research

ENVIRONMENTAL COMPLIANCE CERTIFICATE

CAR 1006 – 101 – 4021

The Department of Environment and Natural Resources (DENR) thru the Environmental Management Bureau – Cordillera Administrative Region (EMB-CAR) hereby grants this Environmental Compliance Certificate (ECC) to **HEDCOR, INC.** for the proposed **IRISAN 1 HYDROELECTRIC POWER PLANT (run-of-river) PROJECT** located at Tadiangan, Tuba, Benguet, after complying with the Environmental Impact Assessment (EIA) requirements as prescribed in the promulgated guidelines implementing section 3 (b) of P.D. 1586.

This Certificate is further specified as follows:

A. Scope:

1. This Certificate is valid only for the development and operation of the abovementioned project including, among others, the installation of transmission lines, the construction of access roads and/or, as described in the submitted documents;
2. This Certificate does not exempt the project from the legal requirements of other concerned agencies;

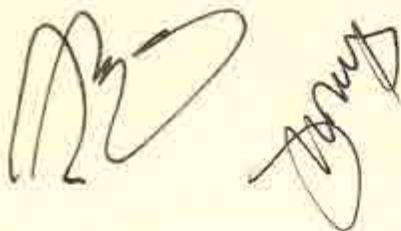

B. Conditions:

1. The development and operation of the power plant and its appurtenant facilities shall be in accordance with the submitted documents. Any major modification and/or expansion shall be subject to the Environmental Impact Statement (EIS) System requirement;
2. Earth materials and other construction spoils shall be disposed off properly in pre-determined appropriate disposal area(s) and to be maintained in a stable and non-pollutive condition;
3. Earth and other construction spoils, solid wastes and other form of wastes shall be prevented from deposition to and along the Elew Creek and other areas outside of the designated disposal site;
4. The legal requirements pursuant to RA 8749 or the Philippine Clean Air Act of 1999, RA 9275 or otherwise known as The Philippine Clean Water

Act and, RA 6969, The Toxic Substances, Hazardous Waste, and Nuclear Waste Control Act of 1990, where applicable, shall be secured consistent to the operation of the project. Compliance to said requirements shall be coordinated with the EMB-CAR;

5. The project, where applicable, shall undergo the permitting requirements of P.D. 705 otherwise known as the Forestry Code of the Philippines and the latest DENR issuances relative thereto with regard to the trees affected;
6. The proponent shall properly restore/rehabilitate any environmental damage(s) resulting from project related activities;
7. Consistent with the project operation, a watershed management and enhancement plan shall be formulated and implemented in coordination with the DENR;
8. The proponent shall submit to EMB-CAR one (1) year prior to the final shutdown of the facility a comprehensive abandonment plan. In relation, the EMB shall first review and approve the environmental aspects/components of the plan consistent with EMB functions prior to implementation;
9. The proponent shall submit to EMB-CAR a quarterly report, providing for, among others, the status of project implementation, the project compliance to ECC conditions and, the proponent's response to related issues/concerns arising thereof;
10. The project is subject to on-the-spot monitoring/inspection at any reasonable time by the EMB-CAR which may be in coordination with concerned groups;
11. The proponent shall cause the implementation of any undertaking which may be imposed by the EMB-CAR as a result of Technical Conference/s called relative hereof;
12. This Certificate shall be deemed automatically expired if the project is not implemented within five (5) years from the date of issuance; and
13. Any transfer of project proprietorship or project name carries the same conditions in this ECC for which notification to the EMB-CAR shall be made by the proponent within fifteen (15) days from such transfer.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate, administrative sanctions against the office head and/or imposition of fine in the amount not to exceed Fifty Thousand Pesos (P 50,000.00) for every violations thereof, at the discretion of the DENR (Section 9 of P. D. 1586).

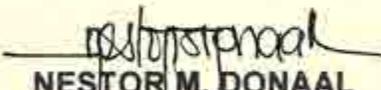

C. Recommendations (for the consideration of the proponent, Local Government Unit concerned and, other concerned agencies in the issuance of applicable permits/authorities):

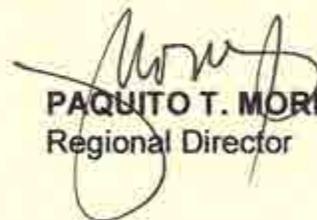

1. The appurtenant physical structures of the project where applicable, are subject to the requirements of the National Building Code of the Philippines. Compliance to the same should be coordinated with the concerned Local Building Official;
2. The implementation and operation of the project should include a provision for the adoption and implementation of a solid wastes (garbage) collection and disposal scheme consistent with the provisions of RA 9003 (The Ecological Solid Waste management Act of 2000);
3. The proponent should coordinate with the surrounding stakeholder communities and concerned government agencies for the development and implementation of a doable watershed/forest resource management program to maintain and enhance the hydrological and ecological system of the project watershed;
4. Qualified local residents should be given priority employment during the development and operation of the project;
5. Water to be used for power generation should be limited to the volume specified in the permit issued by the National Water Resources Board; and
6. Use of explosives should be covered by license/s to be issued by the concerned government agency/ies.

Issued this 07 day of JULY, Year Two Thousand Ten.

Subject: **ENVIRONMENTAL COMPLIANCE CERTIFICATE AMENDMENT**

Dear Ms. Arguelles:

This refers to the application for the amendment of the Environmental Compliance Certificate (ECC) issued on May 3, 1990 for the Irisan 3 Hydroelectric Power Project located at Barangay Tadiangan, Tuba, Benguet.

After careful evaluation of the submitted documents to support the said request and in consideration of the payment of PHP 2,050 under O.R. number 267392/1700 dated MAY 24 2019, this office has decided to grant the ECC amendment. This ECC supercedes the original ECC issued on May 3, 1990.

With the issuance of this ECC, you are expected to implement the measures intended to protect and mitigate the project's adverse impacts on community health, welfare and the environment. Environmental considerations shall be incorporated in all phases and aspects of the project and all the necessary permits must be secured from other pertinent Government agencies. This Office will be monitoring the project periodically to ensure your compliance with stipulations cited in the attached ECC.

Please be guided accordingly.

Very truly yours,

MA. VICTORIA V. ABRERA
Regional Director

ENVIRONMENTAL COMPLIANCE CERTIFICATE

(1st Amendment)
ECC-CAR-1905-0001

This is to certify that the proponent, **Hedcor, Inc.**, represented by **Ms. Darlene C. Arguelles**, Vice President for Corporate and Regulatory Affairs, is granted this Environmental Compliance Certificate (ECC) for the **1.8-MW Irian 3 Hydroelectric Power Project** located along the **Elew River at Barangay Tadiangan, Municipality of Tuba, Province of Benguet** by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau (EMB).

SUBJECT ONLY to the conditions and restrictions set in this ECC and in the attached document labeled as Annexes "A", "B" and "C".

This Certificate is issued with the following details:

PROJECT DESCRIPTION

The ECC covers the operation of the 1.8-MW Irian 3 Hydroelectric Power Project located along the Elew River at Barangay Tadiangan, Municipality of Tuba, Province of Benguet.

Its main facilities are located at Tadiangan, Tuba, Benguet, approximately at the intersection of the following geographical coordinates:

- Weir/intake 16°26'4.17"N, 120°31'51.38"E.
- Powerhouse 16°25'43.88"N, 120°31'32.69"E.

The other project components is attached at Annex "C" hereof.

This Certificate is issued in compliance with the requirements of Presidential Decree No. 1586, and in accordance to DENR Administrative Order (D.A.O.) No. 2003-30. The EMB, however, is not precluded from reevaluating and correcting any deficiencies or errors that may be found after issuance of this Certificate.

This ECC supercedes the original ECC issued on May 3, 1990.

Issued at EMB-CAR, DENR Compound, Gibraltar, Baguio City this MAY 28 2019

Recommending Approval:

NESTOR M. DONAAL

OIC-Chief, Clearance & Permitting Division

Approved:

MA. VICTORIA V. ABRERA
Regional Director

L. CONDITIONS

ENVIRONMENTAL MANAGEMENT

All commitments, mitigating measures and monitoring requirements, contained in the Initial Environmental Examination Checklist Report for the hydroelectric power project, particularly in the Environmental Management Plan/ Environmental Monitoring Plan, including any modifications and/or additional information as approved by the EMB, shall be instituted to minimize any adverse impact of the project to the environment throughout its implementation, which shall include among others, to wit:

1. Timely construction of applicable slope stabilization measures along affected and geologically unstable areas to protect adjacent properties/environment from erosion; and
2. The implementation and operation of the project should include a provision for the adoption and implementation of a solid wastes collection and disposal scheme consistent with the provisions of RA 9003 (The Ecological Solid Waste Management Act of 2000);

GENERAL CONDITIONS

3. The legal requirements pursuant to RA 6969 (The Toxic Substances and Hazardous and Nuclear Waste Control Act of 1990), RA 8749 (The Philippine Clean Air Act of 1999), RA 9003 (Ecological Solid Waste Management Act of 2000) and RA 9275 (The Philippine Clean Water Act of 2004) shall be secured whenever applicable consistent with the operation of the project. Compliance with the said requirements shall be coordinated with the Clearance and Permitting Division of EMB-CAR.
4. Secure necessary permit(s)/clearances/authority as may be required relative to project implementation/ operation, including its support facilities and construction materials needing permit from concerned local and national agencies;
5. The proponent shall allow entry of EMB-CAR personnel into the project site at all times to conduct monitoring and to validate the project's compliance with the ECC conditions stipulated herein;
6. Preservation of existing vegetation within the project areas shall be instituted as an essential component of the development/improvement. However, if the cutting thereof is inevitable, 100% tree inventory shall be conducted and applicable permits should first be secured from the DENR;
7. The proponent shall submit to EMB-CAR a Compliance Monitoring Report (CMR) within fifteen (15) days after every semester;
8. The proponent shall cause the implementation of any undertaking which may be imposed by EMB-CAR as a result of Technical Conference/s called relative to environmental issues arising from the operation of the project;

9. Any transfer of project ownership carries the same conditions and restrictions in this ECC for which a written notification to the EMB-CAR shall be made by the transferee/transferee within fifteen (15) days from such transfer;
10. The proponent shall submit to EMB-CAR one (1) year prior to the final shutdown of the facility a comprehensive decommissioning plan. In relation, the EMB shall first review and approve the environmental aspects/components of the plan consistent with the EMB functions prior to implementation;
11. This certificate shall neither be construed as a grant of title nor conferment of any ownership rights to the proponent relative to the land area where the project is located, and
12. EMB-CAR reserves the right to cancel or withdraw this certificate for any misrepresentation of facts vital to the issuance of this certificate and for any violation of the conditions stipulated hereof;
13. Excess earth materials and other construction spoils shall be disposed-off properly in pre-designated disposal site/s;
14. Project development shall be in accordance with the submitted documents. Major modifications and/or expansion shall be subject to a new Environmental Impact Assessment (EIA) requirement; and
15. All temporary facilities/structures should be properly demolished and debris deposited along water channels as deemed caused by the proponent/contractor shall be removed in order not to impede the natural flow of the water

Non-compliance with any of the provisions of this Certificate shall be a sufficient cause for the cancellation of this Certificate and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (P50, 000.00) for every violation thereof without prejudice to imposition of fines and penalties under other environmental laws.

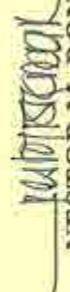

PROJECT ASSESSMENT PLANNING TOOL

For the assistance of the Proponent and the Government agencies concerned in the management of the Project and for better coordination in mitigation of the impacts of the Project on its surrounding areas and the environment, and by way of recommendation, forwarding these recommendations to the parties and authorities concerned for appropriate action.

OTHER REGULATORY REQUIREMENTS/CONDITIONS	CONCERNED GOVERNMENT AGENCIES/ENTITIES
1. Compliance with the latest Labor Code of the Philippines	DOLE – Bureau of Working Condition
2. Compliance with the latest Sanitation Code of the Philippines	Department of Health (DOH)
3. Compliance with the Ecological Solid Waste Management Act.	Local Government Unit
4. Compliance with the latest Building Code of the Philippines and the National Structural Code of the Philippines (2010 Edition)	LGU Concerned / DPWH
5. Compliance with the Zoning Ordinance of the Municipality of La Trinidad	LGU Concerned
6. Secure Tree Cutting Permit/Special Land Use Permit (SLUP)/Forest Land Agreement (FLAG)	DENR

ENVIRONMENTAL PLANNING RECOMMENDATION FOR THE PROPONENT

1. The appurtenant physical structures of the project shall be subject to the requirements of the National Building Code and the National Structural Code of the Philippines (2010 Edition). Compliance to the same should be coordinated with the Tuba Building Official.
2. Preferential employment shall be given to qualified, competent and physically fit local residents. Adequate public information for jobs available to local residents in the affected areas shall be provided.
3. Construction activities employing the use of heavy equipment shall be undertaken at reasonable time periods so as not to cause undue disturbance to nearby residents especially during night time;
4. Strict supervision of the project implementation shall be employed to ensure that standards and requirements of sound engineering, safety and health practices are strictly followed;
5. Working areas should have appropriate warning signs, lighting during night time and adequate railings/barricade to prevent accident; and
6. The project engineer and the contractor shall strictly comply with the conditions of this ECC and of the Environmental Management Plan during construction phase to ensure environmentally sound implementation of the project.

 Hedcor, Inc.
 214 Ambuklao Rd., Beckel, La Trinidad, Benguet

SUBJECT : AMENDMENT OF ECC NO. ECC-CAR-1703-0001 ISSUED TO HEDCOR, INC. ON APRIL 28, 2017 FOR THE PROPOSED 19 MW BINENG COMBINED HYDROELECTRIC POWER PROJECT SPANNING THREE BARANGAYS NAMED BINENG, ALAPANG AND ALNO, LOCATED IN THE MUNICIPALITY OF LA TRINIDAD, BENGUET

Dear Engr. Faelnar:

This has reference to the letter dated March 20, 2018, received by this Office on March 27, 2018, requesting for an amendment of the Environmental Compliance Certificate (ECC) numbered ECC-CAR-1703-0001 issued on April 28, 2017 for the change in the project name from '19 MW Bineng Combined Hydroelectric Power Project' to '19 MW La Trinidad Hydroelectric Power Project'. The said change of project name was officially approved by the Department of Energy per the letter dated January 22, 2018 of Secretary Alfonso G. Cusi.

After careful evaluation of the submitted documents and in consideration of the payment of Php 1,050.00 under O.R. numbers 2673603 and 7643508 dated April 12, 2018, this Office has decided to grant the ECC amendment. The introductory paragraph of the ECC shall now read as follows:

"THIS IS TO CERTIFY THAT the Hedcor, Inc. herein represented by its Senior Vice President, Engr. Chris Fernando B. Faelnar, is granted this ECC for the proposed 19 MW La Trinidad Hydroelectric Power Project located along the stretch of Balili River within the jurisdiction of Barangays Bineng, Alno and Alapang, Municipality of La Trinidad, Benguet by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau (EMB)."

All other provisions of the ECC numbered ECC-CAR-1703-0001 issued on April 28, 2017 and its approved amendment (change in project design) issued on September 18, 2017 not herein amended shall remain valid and existing. Consequently, non-compliance with the said conditions shall be sufficient cause for the imposition of fines in accordance with the penal provisions of PD 1586 and/or cancellation of the ECC.

This letter shall be attached to and shall form part of the aforementioned ECC.

For information and record.

Very truly yours,

ENGR. CHRIS FERNANDO B. FAELNAR
Senior Vice President
Hedcor, Inc.
214 Ambuklao Rd., Beckel, La Trinidad, Benguet

Subject: **ENVIRONMENTAL COMPLIANCE CERTIFICATE**

Dear Engr. Faelnar:

This refers to the Environmental Compliance Certificate (ECC) application for the **19 MW Bineng Combined Hydroelectric Power Project** described by its geographical coordinates approximately within $120^{\circ}35'E$ to $120^{\circ}34'E$ and $16^{\circ}27'N$ to $16^{\circ}28'N$ spanning three barangays namely Bineng, Alapang and Alno, located in the Municipality of La Trinidad.

After satisfying the requirements of the said application, this Bureau has decided to grant an ECC for the above-mentioned project.

With the issuance of this ECC, you are expected to implement the measures presented in the Environmental Impact Statement (EIS), intended to protect and mitigate the project's adverse impacts on community health, welfare and the environment. Environmental considerations shall be incorporated in all phases and aspects of the project. You may proceed with the project implementation after securing all the necessary permits from other pertinent Government agencies. This Office will be monitoring the project periodically to ensure your compliance with stipulations cited in the attached ECC.

Please be guided accordingly.

ENVIRONMENTAL COMPLIANCE CERTIFICATE

(Issued under Presidential Decree 1586)

ECC-CAR-1703-0001

This is to certify that the **Hedcor, Inc.** herein represented by its Senior Vice President, **Engr. Chris Fernando B. Faelnar**, is granted this ECC for the proposed **19 MW Bineng Combined Hydroelectric Power Project** located along the stretch of Balili River within the jurisdiction of Barangays Bineng, Alno and Alapang, Municipality of La Trinidad, Benguet by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau (EMB).

SUBJECT ONLY to the conditions and restrictions set in this ECC and in the attached document labelled as Annexes A and B.

This Certificate is issued with the following details:

PROJECT DESCRIPTION

The ECC covers the development and operation of the 19 MW Bineng Combined Hydroelectric Power Project, which comprises a total area of 31.5373 hectares, to be located along the Balili River within the jurisdiction of Barangays Bineng, Alno and Alapang, Municipality of La Trinidad, Benguet. The project involves the integration of the three existing Bineng Plants (Bineng 1, Bineng 2 and Bineng 2b) to a single 19 MW capacity hydropower plant.

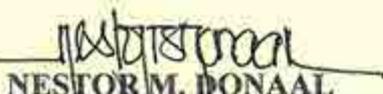

The project development will entail the abandonment/decommissioning/rehabilitation of the three existing plants and, the construction of a new weir, headrace pipe, desander, penstock powerhouse, and access roads. It will also involve the improvement of existing access roads and upgrading of the existing 23 kVA transmission line to 69 kVA.

The project components is attached as Annex 'C' hereof.

This Certificate is issued in compliance with the requirements of Presidential Decree No. 1586, and in accordance to DENR Administrative Order (D.A.O.) No. 2003-30. The EMB, however, is not precluded from reevaluating and correcting any deficiencies or errors that may be found after issuance of this Certificate.

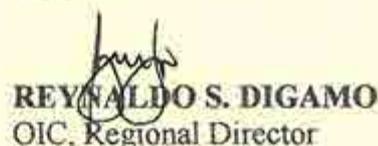

Issued at EMB-CAR, DENR Compound, Gibraltar, Baguio City this April 28, 2017.

L CONDITIONS**ENVIRONMENTAL MANAGEMENT**

All commitments, mitigating measures and monitoring requirements, contained in the Environmental Impact Statement (EIS) for the proposed 19 MW Bineng Combined Hydroelectric Power Project, particularly in the Environmental Management Plan/ Environmental Monitoring Plan, including any modifications and/or additional information as approved by the EMB, shall be instituted to minimize any adverse impact of the project to the environment throughout its implementation, which shall include among others, to wit:

1. Timely construction of applicable slope stabilization measures along affected and geologically unstable areas to protect adjacent properties/environment from erosion;
2. The implementation and operation of the project should include a provision for the adoption and implementation of a solid wastes collection and disposal scheme consistent with the provisions of RA 9003 (The Ecological Solid Waste Management Act of 2000); and
3. Consistent with the project development, a watershed management and enhancement plan shall be formulated, submitted and implemented during the construction and operation stages of the project in coordination with the DENR.

GENERAL CONDITIONS

4. The legal requirements pursuant to RA 6969 (The Toxic Substances and Hazardous and Nuclear Waste Control Act of 1990), RA 8749 (The Philippine Clean Air Act of 1999), RA 9003 (Ecological Solid Waste Management Act of 2000) and RA 9275 (The Philippine Clean Water Act of 2004) shall be secured whenever applicable consistent with the implementation/operation of the project. Compliance with the said requirements shall be coordinated with the Clearance and Permitting Division of EMB-CAR;
5. Regularly secure necessary permit(s)/clearances/authority as may be required relative to project implementation/ operation, including its support facilities and construction materials needing permit from concerned local and national agencies;
6. The proponent shall allow entry of EMB-CAR personnel into the project site at all times to conduct monitoring and to validate the project's compliance with the ECC conditions stipulated herein;
7. Preservation of the trees along the road right-of-way shall be instituted as an essential component of the development/improvement. However, if the cutting thereof is inevitable, 100% tree inventory shall be conducted and CUTTING PERMIT should be secured first from the DENR;
8. The proponent shall submit to EMB-CAR within fifteen (15) days after every quarter a Self-monitoring Report (SMR) and, a Compliance Monitoring Report (CMR) semi-annually;

9. The proponent shall cause the implementation of any undertaking which may be imposed by EMB-CAR as a result of Technical Conference/s called relative to environmental issues arising from the implementation of the project;
10. Any transfer of project ownership carries the same conditions and restrictions in this ECC for which a written notification to the EMB-CAR shall be made by the transferee/transferor within fifteen (15) days from such transfer;
11. The proponent shall submit to EMB-CAR one (1) year prior to the final shutdown of the facility a comprehensive decommissioning plan. In relation, the EMB shall first review and approve the environmental aspects/components of the plan consistent with the EMB functions prior to implementation;
12. The project shall undergo the requirements specified in the implementing guidelines of the Department Administrative Order No. 2003-30 if the project is not implemented within five (5) years from the issuance thereof; and
13. This certificate shall neither be construed as a grant of title nor conferment of any ownership rights to the proponent relative to the land area where the project is located.

II. RESTRICTIONS

14. Excess earth materials and other construction spoils shall be disposed-off properly in a pre-designated disposal site/s (with geographical coordinates/geotags) and to be maintained in a stable and non-pollutive condition. Any modifications in the predesignated disposal sites or outside of the SLUP shall require approval by the EMB;
15. Project development shall be in accordance with the submitted documents. Major modifications and/or expansion shall be subject to a new Environmental Impact Assessment (EIA) requirement;
16. All temporary facilities/structures should be properly demolished and debris deposited along water channel as deemed caused by the proponent/contractor shall be removed in order not to impede the natural flow of the water;
17. Employment of controlled blasting and, the use of explosives should be covered by license/s to be issued by the concerned government agency/ies;
18. The proponent shall comply with the provisions of the abandonment/rehabilitation plan contained in the EIS for the existing Bineng 1, 2 and 2b hydropower facilities; and
19. All existing conveyance pipe lines that will not be included in the new plan shall be properly removed and to be secured by the proponent. In case such facility/ies will be requested to be turned-over to the landowner/s, such transfer shall be covered by proper documentation.

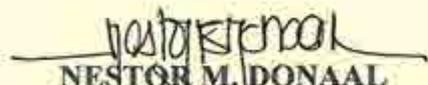

Non-compliance with any of the provisions of this Certificate shall be a sufficient cause for the cancellation of this Certificate and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (P50, 000.00) for every violation thereof without prejudice to imposition of fines and penalties under other environmental laws.

PROJECT ASSESSMENT PLANNING TOOL

For the assistance of the Proponent and the Government agencies concerned in the management of the Project and for better coordination in mitigation of the impacts of the Project on its surrounding areas and the environment, and by way of recommendation, forwarding these recommendations to the parties and authorities concerned for appropriate action.

OTHER REGULATORY REQUIREMENTS/CONDITIONS	CONCERNED GOVERNMENT AGENCIES/ENTITIES
1. Compliance with the latest Labor Code of the Philippines	DOLE – Bureau of Working Condition
2. Compliance with the latest Sanitation Code of the Philippines	Department of Health (DOH)
3. Compliance with the Ecological Solid Waste Management Act.	Local Government Unit
4. Compliance with the latest Building Code of the Philippines and the National Structural Code of the Philippines (2010 Edition)	LGU Concerned / DPWH
5. Compliance with the Zoning Ordinance of the Municipality of La Trinidad	LGU Concerned
6. Secure Tree Cutting Permit/Special Land Use Permit (SLUP)/Forest Land Agreement (FLAG)	DENR
7. Secure Water Permit	NWRB
8. Compliance with the IPRA Law	NCIP
ENVIRONMENTAL PLANNING RECOMMENDATIONS FOR THE PROPONENT	
<ol style="list-style-type: none"> 1. The appurtenant physical structures of the project where applicable are subject to the requirements of the National Building Code and the National Structural Code of the Philippines (2010 Edition). Compliance to the same should be coordinated with the La Trinidad Building Official; 2. Preferential employment shall be given to qualified, competent and physically fit local residents. Adequate public information for jobs available to local residents in the affected areas shall be provided; 3. Construction activities employing the use of heavy equipment shall be undertaken at reasonable time periods so as not to cause undue disturbance to nearby residents especially during night time; 4. Dust and soil spillages along roads which are associated with the earthworks and, hauling and delivery of concrete and aggregates should be controlled and should not be a source of nuisance to nearby residents; 	

5. Strict supervision of project implementation by competent technical personnel to ensure that standards and requirements of sound engineering, safety and health practices are strictly followed;
6. Working areas should have appropriate warning signs, lighting during night time and adequate railings/barricade to prevent accident; and
7. The project engineer and the contractor shall strictly comply with the conditions of this ECC and of the Environmental Management Plan during construction phase to ensure environmentally sound implementation of the project.

SUBJECT: AMENDMENT OF ECC NO. ECC-CAR-1703-0001 ISSUED TO HEDCOR, INC. ON APRIL 28, 2017 FOR THE PROPOSED 19 MW BINENG COMBINED HYDROELECTRIC POWER PROJECT SPANNING THREE BARANGAYS NAMEDLY BINENG, ALAPANG AND ALNO, LOCATED IN THE MUNICIPALITY OF LA TRINIDAD, BENGUET

Dear Engr. Faelnar:

This has reference to your online application for an amendment of the Environmental Compliance Certificate (ECC) numbered ECC-CAR-1703-0001 issued on April 28, 2017. The subject of the amendment is the increase in plant capacity from 19MW to 20.4 MW due to the actual manufacturing and test results of the generating units that was conducted last June 2019,

After careful evaluation of the submitted documents and in consideration of the payment of Php 2,050.00 under sequence number 32200 dated September 5, 2019, this Office has decided to grant the ECC amendment. The introductory paragraph and the project description of the ECC shall now read as follows:

"THIS IS TO CERTIFY THAT the Hedcor, Inc. herein represented by its Senior Vice President, Engr. Chris Fernando B. Faelnar, is granted this ECC for the proposed 20.4 MW La Trinidad Hydroelectric Power Project located along the stretch of Balili River within the jurisdiction of Barangays Bineng, Alno and Alapang, Municipality of La Trinidad, Benguet by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau (EMB)."

This Certificate is issued with the following details:

PROJECT DESCRIPTION

The ECC covers the development and operation of the 20.4 MW La Trinidad Hydroelectric Power Project, which comprises a total area of 31.5373 hectares, to be located along the stretch of Balili River within the jurisdiction of Barangays Bineng, Alno and Alapang, Municipality of La Trinidad, Benguet. The project involves the integration of the three existing Bineng Plants (Bineng 1, Bineng 2 and Bineng 2b) to a single 20.4 MW capacity hydropower plant.

The project development will entail the abandonment/decommissioning/rehabilitation of the three existing plants, the construction of a new weir and intake, installation of new penstock pipes, construction of a new powerhouse, and construction of access roads. It will also involve the improvement of existing access roads and the upgrading of the existing 23 kVA transmission line to 69 kVA.

The project components is attached as Annex "A" hereof.

Environmental Compliance Certificate
La Trinidad Hydro Electric Power Project
Bineng La Trinidad, Benguet
Hedcor, Inc.

This Certificate supersedes the earlier ECC amendments issued on April 13, 2018 (2nd amendment-change of project name) and August 22, 2018 (3rd amendment-changes in project design - which superseded the 1st amendment dated September 18, 2017).

All other provisions of the original ECC numbered ECC-CAR-1703-0001 issued on April 28, 2017 not herein amended shall remain valid and existing. Consequently, non-compliance with the said conditions shall be sufficient cause for the imposition of fines in accordance with the penal provisions of PD 1586 and/or cancellation of the ECC.

This letter shall be attached to and shall form part of the aforementioned ECC.

For information and record.

Very truly yours,

MA. VICTORIA V. ABRERA
Regional Director

Environmental Management Bureau

ENVIRONMENTAL COMPLIANCE CERTIFICATE

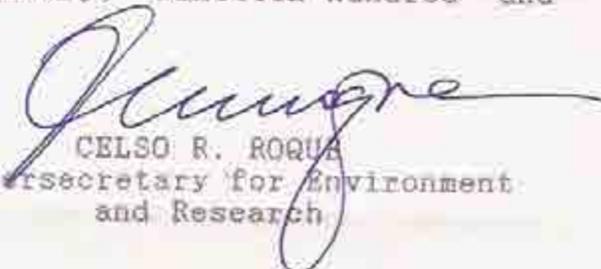

The Environmental Management Bureau (EMB) hereby grants this Environmental Compliance Certificate (ECC) to the proposed mini hydro plant of HYDRO ELECTRIC DEVELOPMENT CORP. to be located at Salangan and Ampucao, Itogon, Benguet, after complying with the Environmental Impact Assessment (EIA) as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and 1586.

This Certificate is being issued subject to the following conditions:

1. That the dam's estimated power capacity shall not exceed two thousand (2,000) kilowatts;
2. That the stability of the dam shall be monitored and ensured;
3. That in the installation of a conveyance line, bolting of foundation to the side of slope shall be undertaken to firmly install the footings to the bedrock;
4. That proper mitigating measures shall be implemented to minimize water, air, noise and dust pollution during the construction, operation and/or maintenance phases of the project;
5. That mechanical and biological rehabilitation of disturbed areas shall be effected to avoid soil erosion and siltation of the rivers; e.g. grouted riprapping and concreting works, reforestation, etc.;
6. That noise from moving turbines shall be confined within the wells of the power plant itself; and
7. That contingency plans shall be provided in case of accidents e.g. dam failure.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or a fine in an amount not to exceed Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Sec. 9 of P.D. 1586).

Given this 18th day of January, Nineteen Hundred and
Ninety.

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The Department of Environment and Natural Resources - Cordillera Administrative Region (DENR-CAR), through its Environmental Management and Protected Areas Service (EMPAS) hereby grants this Environmental Compliance Certificate (ECC) for the Proposed Sal-angan II Minihydro Expansion Project of the Hydro Electric Development Corporation (HEDCOR) to be located along the Sal-angan River at Barangay Sal-angan Itogon, Benguet, after complying with the Environmental Impact Assessment requirement as prescribed in the promulgated guidelines implementing Section 3(b) of P.D. 1121 and P.D. 1586.

This Certificate is issued subject to the following conditions:

1. That this certificate shall be valid only for the construction and operation of the Proposed Sal-angan II Minihydro Expansion Project having a plant capacity of 10,000 kws.;
2. That the proponent shall submit to the DENR-CAR 60 days prior to the project's implementation the detailed design and working drawings of the different components/appurtenances of the proposed project, including the proposed access roads, the details of its Environmental Protection and Enhancement Programs which shall include among others, an abandonment scheme/contingency plan in case of abandonment of the project and dam failure;
3. That all activities and installations to be undertaken in relation thereto shall be in accordance to the Project Description (PD) and other pertinent instruments filed at the DENR-CAR;

4. That the different components/appurtenances of the project and other related civil works shall be designed, constructed, rehabilitated and operated in accordance with accepted Engineering practices and specifications and shall be governed by the PD and all other pertinent documents submitted;
5. That for any damage/loss to life or property resulting from or attributable to the implementation and operation of the project, just compensation to the aggrieved parties shall be the obligation of the proponent;
6. That the proponent shall strictly comply with the mitigating measures stipulated in the PD covering the project including all measures to mitigate air, noise, water and dust pollution generated during the implementation of the project;
7. That the proponent shall institute control measures for the abatement of erosion and siltation during the construction and operation/maintenance of access roads;
8. That the implementation of the project shall commence only after all pertinent permits, clearances and endorsements have been secured from other government agencies;
9. That the proponent shall negotiate for the acquisition/compensation of properties and improvements that are to be affected by the project prior to implementation;
10. That for any modification, expansion and/or deviation from the PD and the subsequent submitted instruments, the proponent shall first inform the DENR-CAR prior to implementation;
11. That the Progress of Work relative to the implementation of the project be submitted periodically to the DENR-CAR;
12. That on-the-spot monitoring be conducted by the DENR-CAR in coordination with other concerned groups and agencies; and

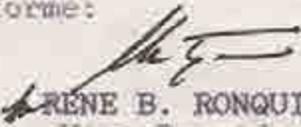

13. That the transfer of ownership of this project carries the same conditions in this ECC for which written notification shall be made within fifteen (15) days from such transfer.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or a fine in an amount not to exceed fifty thousand pesos (P50,000.00) for every violation thereof, at the discretion of the RED DENR (Section 9 of P.D. 1586).

Given this 31st day of July Nineteen Hundred and Ninety Five.

Subject: **Certificate of Environmental Compliance Certificate (ECC)**

Sir:

This refers to your Environmental Compliance Certificate (ECC) application for the Manolo Fortich Hydroelectric Power System Project in Manolo Fortich and Impasug-ong, Bukidnon.

After satisfying the requirements in the said application and after substantive review of the submitted documents for the said project, this Office has decided to grant the necessary Environmental Compliance Certificate (ECC).

With the issuance of this ECC, you are expected to implement the measures presented in the Initial Environmental Examination (IEE) Report intended to protect and mitigate the project's adverse impacts on the environment. You may proceed with project implementation after securing all the necessary permits from other pertinent government agencies and providing them copies of this approved ECC and the EIS/IEE Report. This office will be monitoring the project periodically to ensure your compliance with stipulations cited in the attached ECC.

Please be guided accordingly.

Very truly yours,

DR. ABDULLAH C. ABUBACAR, CESO IV
Regional Director

Environmental Compliance Certificate

(Issued under Presidential Decree 1586)

ECC-B10-1402-0036

THIS IS TO CERTIFY THAT THE PROPONENT, **HEDCOR BUKIDNON, INC.** is granted this Environmental Compliance Certificate (ECC), for the proposed **68.8 MW MANOLO FORTICH HYDROELECTRIC POWER SYSTEM PROJECT** located in Barangays Guilang-guilang, Santiago, Maluko and Dalirig of Manolo Fortich and Barangay Guihean of Impasug-ong, all in the province of Bukidnon by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau (EMB), Region 10.

SUBJECT ONLY to the conditions and restrictions set-out in this certificate.

This certification is issued for the **68.8 MW MANOLO FORTICH HYDROELECTRIC POWER SYSTEM PROJECT**, with the following details:

PROJECT DESCRIPTION

This ECC shall cover the construction and operation of the 68.8 MW **MANOLO FORTICH HYDROELECTRIC POWER SYSTEM (RUN-OF-RIVER HYDROELECTRIC POWER)** that will have two (2) main components: Manolo Fortich 1 HPP and Manolo Fortich 2 HPP to be located in Barangays Guilang-guilang, Santiago, Maluko and Dalirig of Manolo Fortich and in Barangay Guihean of Impasug-ong all in the province of Bukidnon. The Hydroelectric Power Plants shall have the following appurtenant structures:

• Weir Intake 1-Tanaon River	• Silt Basin/Forebay
• Weir Intake 2- Guihean River	• Box Culvert
• Weir Intake 3- Upper Amusig River	• Water Conveyance Tunnel
• Desander 1,2 & 3	• Turbine
• Water Conveyance Pipeline 1,2,& 3	• Generator
• Surge Tank	• Powerhouse & Tailrace
• Headpond	• Switchyard
• Penstock 1 & 2	Access roads, Substation & Transmission Line

This certification is issued in compliance to the requirements of Presidential Decree No. 1586, in accordance to Department Administrative Order No. 2003-30. The Bureau, however, is not precluded from reevaluating, adding, removing, and correcting any deficiencies or errors that may be found after issuance of this certificate.

Issued at EMB - 10 Cagayan de Oro City this MAR 07 2014 day of _____, 2014.

I. CONDITIONS

ENVIRONMENTAL MANAGEMENT

The proponent shall strictly implement the following mitigating enhancement, and rehabilitating measures:

1. Measures to minimize soil erosion, siltation and turbidity of affected water body during construction and operation shall be undertaken;
2. Noise, dust emission, and other forms of nuisance emitted during project implementation shall be adequately controlled/isolated within the project site. Dump trucks loaded with filling materials shall be covered with tarpaulin canvas or jute sacks to prevent dust and spillage along road routes;
3. Waste materials generated during construction and installation shall be disposed of properly and never to be dumped on any waterbody;
4. All effluents and emissions shall conform with the EMB-DENR Standards and will be subjected to monitoring by this Office;
5. Appropriate flow control measures shall be installed in the affected area to attain the minimum riparian flow;
6. Conduct Information, Education and Communication (IEC) Program to inform and educate all stakeholders about the mitigating measures embodied in the submitted EIS;

GENERAL CONDITIONS

Further administrative conditions for the grant of this certificate shall be strictly complied:

7. Annual Detailed Watershed Management Plan/Program e.g. engineering & vegetative measures, riverbank stabilization, reforestation, strategies to protect against illegal tree cutting and mining activities along the riverbanks and riparian zone management strategies shall be submitted to this Office before project construction and every 15th of January onwards;
8. A Detailed Emergency Preparedness and Response Plan indicating preventive measures against accidents resulting from penstock burst, flooding and earthquake shall be submitted to EMB-10 office prior to project operation;
9. The structural design or component structures of the project shall conform with the design guidelines and approved by the concerned government agency/ies;

10. The local qualified residents shall be given priority for employment;
11. Implement the Social Development Program that will be anchored to the Barangay Development Plan of the Communities affected;
12. Submit Self Monitoring report (SMR) and Compliance Monitoring Report (CMR) to this Office on a semi-annual basis;
13. The proponent shall put up a replenishable Environmental Guarantee Fund (EGF) to cover the following expenses:
 - a. for further environmental assessments, compensation/indemnification for whatever damages to life and property that may be caused by the project;
 - b. Rehabilitation and/or restoration of areas affected by the project's implementation; and
 - c. Abandonment/decommissioning of the project facilities related to the prevention of possible negative impacts and as a source of fund for contingency and clean-up activities;
14. The proponent shall initiate to put-up an Environmental Monitoring Fund (EMF) for the use of Multi-Partite Monitoring Team in monitoring compliance to ECC;
15. A Multipartite Monitoring Team (MMT) composed of representative(s) from the proponent, EMB Region 10, a local environmental Non-Government Organization (NGO), DOE and the LGUs concerned shall be organized. The MMT shall primarily oversee the compliance of the proponent with the Environmental Management Plan/Environmental Monitoring Plan as well as the conditions of this ECC;
16. An Environmental Unit (EU) shall be created prior to project construction phase;
17. The DENR-EMB-10 and/or multi-partite team can initiate an on-the-spot monitoring and inspection anytime without prior notice;
18. In case of abandonment, the Proponent shall notify the EMB Regional Office concerned within three (3) months prior to the abandonment and the Proponent shall submit its abandonment mitigation plan;

II. RESTRICTIONS

The proponent is strictly subject to the following restrictions:

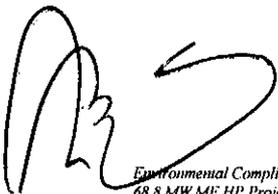

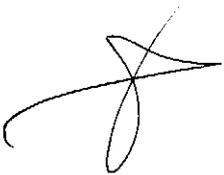

19. No other activities should be undertaken other than what was stipulated in the Environmental Impact Statement (EIS) document. Should there be an expansion of the project beyond the project description, or any significant change in the activity beyond those stated in the EIS document; shall be made subject to a new Environmental Impact Assessment;
20. All other permits from the concerned government agencies especially from NWRB, NCIP, Special Land Use Permit (SLUP) & Tree Cutting Permit from DENR and Road-Right-of-Way Permit shall be secured prior to project construction, otherwise this ECC shall be considered null and void. Further, these permits shall be submitted to this Office prior to project construction; and

21. In case of transfer of ownership of this project, these same conditions and restrictions shall apply and the transferee shall be required to notify the EMB Regional Office concerned within fifteen (15) days as regards to the transfer of ownership.

Non-compliance with any of the provisions of this certificate shall be a sufficient cause for the cancellation or suspension of this certificate and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (50,000.00) for every violation thereof.

MR. ABE P. NISNISAN
Vice President
Therma Power - Visayas, Inc.
Old Veco Compound, Brgy. Ermita, Cebu City

Subject: Environmental Compliance Certificate ECC-R07-2007-0004

Dear Mr. Nisnisan,

This refers to the Environmental Compliance Certificate (ECC) application of Therma Power - Visayas, Inc. for the **Remediation and Clean-Up of the Naga Power Plant Complex** located in Barangay Colon, City of Naga, Province of Cebu, Region VII.

After satisfying the requirements of the said application, this Bureau has decided to grant an ECC for the above-mentioned project.

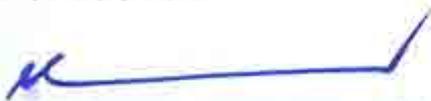

With the issuance of this ECC, you are expected to implement the measures presented in the Environmental Impact Assessment (EIA) document, intended to protect and mitigate the project's adverse impacts on community health, welfare and the environment. Environmental considerations shall be incorporated in all phases and aspects of the project.

This Certificate does not create any right nor be used as an authorization to implement the project. Therefore, you are hereby reminded to secure all the necessary permits from other pertinent government agencies but not limited to as stated in Annex B.

For further inquiries, please use the Document IS No. and/or Company ID indicated at the upper left portion of this document for faster tracking of your case.

Please be guided accordingly.

Very truly yours,

LORMELYN E. CLAUDIO, CESO IV
Regional Director

ENVIRONMENTAL COMPLIANCE CERTIFICATE

(Issued under Presidential Decree 1586)

ECC-R07-2007-0004

THIS IS TO CERTIFY THAT THE PROPONENT, **Therma Power-Visayas, Inc. (TPVI)**, represented by its Vice President, Mr. Abe P. Nisnisan, is granted this Environmental Compliance Certificate (ECC) for **Remediation and Clean-Up of the required areas for diesel operations (areas 4,5,6,7,8,9,10,11 and 12) within the Naga Power Plant Complex** located in Barangay Colon, City of Naga, Province of Cebu, Region VII by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau Region VII.

SUBJECT ONLY to the conditions and restrictions set-out in this ECC and in attached document labeled as Annex A, Recommendations have been provided in Annex B as guidance to concerned government agencies and local government units for consideration in the decision making process.

PROJECT DESCRIPTION

The ECC covers the dismantling, removal, remediation, and clean up of toxic and hazardous materials and equipment in an area of One Hundred Forty Four Thousand One Hundred Twenty Two (144,122) square meters located in required areas for diesel operations (4 to 12) within the Naga Power Plant Complex, Barangay Colon, City of Naga, Province of Cebu, Region VII with geographical coordinates 10°133.518'N and 123°45'29.348'E.

Project Components	Estimated Quantity
Removal of non-friable and friable asbestos containing materials (ACM);	To be determined
Dismantling/Removal of polychlorinated biphenyls (PCB) contaminated transformers and equipment;	To be determined
Dismantling/Removal of hazardous wastes, other materials and equipment contaminated with toxic and hazardous chemicals regulated under RA 6969;	To be determined
Removal, decontamination, and remediation of contaminated soil;	To be determined
Establishment of temporary holding/staging area for collected hazardous materials/wastes and decontaminated hazardous materials;	To be determined

This ECC is issued in compliance to the requirements of Presidential Decree No. 1586, in accordance to Department Administrative Order No. 2003-30. The Bureau, however, is not precluded from reevaluating, adding, removing, and correcting any

deficiencies or errors that may be inconsistent with the Revised Procedural Manual of
DAO 2003-30 after issuance of this ECC:

Issued at EMB Region VII, Bantad, Mandaue City this 10 5 AUG 2020 day of
 , 2020.

I. CONDITIONS

A. ENVIRONMENTAL IMPACT AND MANAGEMENT

1. All mitigating measures in the Environmental Site Assessment/Remediation Plan, Environmental Management and Monitoring Plan and other pertinent documents shall be implemented;
2. Implement waste minimization, segregation, re-use, and other ecological waste management practices;
3. Groundwater, surface water, and oil sampling tests and analyses for contaminants of concern (COC) such as polychlorinated biphenyls (PCB), total petroleum hydrocarbon (TPH), heavy metals, and other applicable parameters shall be undertaken before and after the remediation and clean-up process. The sampling stations shall be based on the pre-identified sites stated in the environmental site assessment (ESA). Sampling test results shall be submitted to this Office after three (3) months from receipt hereof;
4. Establish temporary storage areas for hazardous waste contaminated materials and decontaminated materials and implement appropriate storage practices, i.e. labeling/installation of signages or placards and segregation according to compatibilities of hazardous wastes;
5. System of controls and protective barrier surrounding the designated holding/staging area shall be provided to prevent possible liquid seep out;
6. The demolition or dismantling of asbestos containing materials (ACM) and ten (10) transformers containing polychlorinated biphenyls (PCB) shall be guided by the procedures in accordance with the provisions of DENR Administrative Order No. 02-2000 and DENR Administrative Order No. 01-2004 otherwise known as *The Chemical Control Order (CCO) for Asbestos and The Chemical Control Order (CCO) for PCB*, respectively;
7. Submit a comprehensive Remediation Plan for the arsenic-contaminated ash pond, seawater intake and tank farm areas within sixty (60) days from receipt hereof;

B. GENERAL CONDITIONS

8. The proponent shall comply with the requirements of other environmental laws: RA 6969 (Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990), RA 8749 (Philippine Clean Air Act of 1999), RA 9003 (Ecological Solid Waste Management Act of 2000), RA 9275 (Philippine Clean Water Act of 2004), and Other relevant policies, rules and regulations such as stated in Annex B;
 - a. Designate pollution control and safety officer (PCSO);
 - b. Submit monthly progressive report activities undertaken and completed;
 - c. Secure Notice to Proceed for asbestos dismantling;
 - d. Secure Permit to Transport for all hazardous wastes to be hauled, transported, and treated by accredited Treatment Storage Disposal (TSD) facility;

9. The proponent shall establish an Environmental Guarantee Fund/Environmental Liability Fund to cover costs of remediation and rehabilitation of affected areas and compensation of damages caused during the operation and abandonment phases of the project;
10. A Report shall be submitted to EMB Region VII for evaluation and approval upon completion of the remediation and clean-up activities;
11. A mechanism to ensure the effective transport and treatment of hazardous wastes shall be carried out;
12. That should there be any complaint from the community related to environmental pollution, nuisance, risks, and sanitation problems brought about by the project's operation, the proponent shall be held responsible to address such concerns;
13. The proponent shall allow the conduct of tangible monitoring by this Office anytime to validate the project's compliance to the ECC conditions stipulated therein;
14. All hazardous waste-contaminated materials for off-site treatment and decontaminated materials shall be temporarily stored in the designated storage/holding area. Transport of these materials shall be covered by Permit to Transport secured from EMB Regional Office where the Treatment, Storage, Disposal (TSD) facility is located.
15. Dismantling of structures shall be covered by a Demolition Permit issued by the City Engineer's Office of the City of Naga;

II. RESTRICTIONS

The proponent is strictly subject to the following restrictions:

16. This project shall cover exclusively the removal and clean-up of hazardous materials inside the required areas for diesel operations (4,5,6,7,8,9,10,11 and 12) within the Naga Power Plant Complex located in Barangay Colon, City of Naga, Province of Cebu, Region VII;
17. No activity shall be undertaken other than what were stipulated in the ECC. Should there be any expansion of the project beyond the project description or any change in the activity or transfer of location, the same shall be subject to a new Environmental Impact Assessment; and
18. In case of transfer of ownership of this project, these same conditions and restrictions shall apply and the transferee shall be required to notify the EMB Region VII within fifteen (15) days from the transfer of ownership to allow the necessary changes brought about by such transfer.

Pursuant to Section 9.0 of P.D. 1586, non-compliance with any of the provisions of this ECC shall be sufficient cause for its cancellation or suspension and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (Php50,000.00) thereof.

PROJECT ASSESSMENT PLANNING TOOL

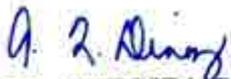

This is for the assistance of the Proponent and government agencies concerned in the management of the project and for better coordination in mitigating the impact of the project on its surrounding areas and to the environment.

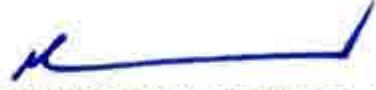

By way of recommendation, the following have been taken notice. We are forwarding these recommendations to the parties and authorities concerned for proper appreciation and action, and integration into their decision-making process.

Any issue and/or complaint arising from the following condition/ requirements shall be resolved by the concerned Government Agency/Entity:

OTHER REGULATORY REQUIREMENTS/CONDITIONS	CONCERNED GOVERNMENT AGENCIES/ENTITIES
1. Compliance with the Sanitation Code of the Philippines;	DOH
2. Compliance with the Labor Code of the Philippines	DOLE - Bureau of working condition
3. Compliance with the Building Code of the Philippines and LGU Zoning Board	LGU Concerned
4. Compliance with the Ecological Solid Waste Management Act	LGU Concerned
5. Secure tree cutting permit if there are trees affected	DENR7-CENRO
6. Implementation of land classification to minimize the significant impact on the conflict with project boundary pursuant to P.D. 705; legal Easement/salvage zones and protected area policies	DENR - LMS/CENRO
7. Compliance with BFP policies and guideline; Provide firefighting equipment;	Bureau of Fire Protection (BFP) Proponent
8. Issuance of Certificate of Compliance (COC) for power supply agreement between the company and the local government; Other DOE related permits;	DOE/Energy Regulation Board
ENVIRONMENTAL PLANNING RECOMMENDATIONS FOR THE PROPONENT	
9. Formulate and implement an Emergency Preparedness, Contingency and Preventive Measures and Maintenance Program to address possible case of explosion, fire, accidental spill of dangerous goods/hazardous wastes while in transit and during remediation and clean-up activities and other nuisance.	
10. Undertake close monitoring of the project to maintain a high level of safety and efficiency and immediately address any environmental hazard that may take place.	

For dissemination and proper action of the parties concerned.

10. Health and sanitation practices shall be observed at all times and protective gadgets/devices shall be provided to all workers to prevent accidents or minimize hazards posed by the project;
11. An Environmental Risk Assessment (ERA) inclusive of but not limited to natural hazards shall be conducted and the same shall be submitted to the DENR-EMB for approval not later than six (6) months after receipt of this ECC. An environmental risk auditing report shall be submitted to the EMB and the DENR Regional Units annually;
12. The proponent's shall submit to EMB a detailed oil spill contingency plan which includes the proponent's and supplier's responsibilities in the clean-up in case of oil spills, fire and leakages during transport and handling of the fuel oil within ninety (90) days after the issuance of ECC;
13. Qualified local residents including women in the impact areas shall be given priority for employment;
14. The proponent shall assist the LGUs in the provision of medical/dental, education and other social services to residents in the area and its vicinities in coordination with the Department of Health (DOH), the Department of Social Welfare and Development (DSWD) and the Department of Education, Culture and Sports (DECS);

The proponent in coordination with local health officials shall conduct an annual medical check-up and monitoring on the health of the workers and affected residents and submit report to EMB and the DENR Regional Units;
16. The proponent shall maintain a quarterly consultation with the nearby residents, concerned LGUs and representatives of the Carbon Market Management, the report of which shall be submitted to the DENR Regional Units;
17. The proponent shall set-up an Environmental Guarantee Fund (EGF) to cover the expenses for indemnification of damages to life and property that might be caused by the project including rehabilitation and/or restoration of areas affected by the project's implementation and decommissioning of the activities related to the prevention of possible negative impacts including its required monitoring. It shall be set up within thirty (30) days from the receipt of this ECC through a separate MOA with the DENR Region VII and the EMB. The absence of this shall cause cancellation of this ECC;
18. A Multipartite Monitoring Team (MMT) to be composed of the representatives of the proponent, the DENR, the LGUs, a local environmental NGO and the affected communities shall be organized through a MOA within thirty (30) days from receipt of this ECC. The MMT shall monitor weekly the impacts of the project and the proponent's compliance with the ECC conditions and applicable laws, rules and regulations.

Within thirty (30) days upon receipt of the ECC, an Environmental Monitoring Fund (EMF) shall be established to cover all costs attendant to the operation of the MMT such as training, accommodation, transportation, etc.

19. An Environmental Unit (EU) shall be created by the management to handle the environment-related aspects of the project. The EU shall submit environmental/monitoring reports to the EMB and the DENR Regional Units on a quarterly basis and coordinate with the MMT;
20. The proponent shall undertake an effective Information Education Campaign (IEC) to explain publicly its mitigative measures as well as the conditions of this ECC. It shall open opportunities to educate the public, interested academic institutions and other parties on the environment and human health safety features of the project.

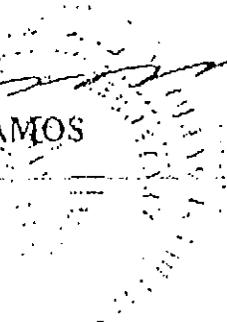

To assure the objectivity of presentation, the IEC activities shall be funded by the proponent but implemented by a joint team of the proponent, the DENR and an NGO. The proponent shall submit a detailed IEC Program to the EMB, the DENR Regional Units and the LGUs annually and a report of its implementation bi-annually;
21. On-the-spot monitoring and inspection may be conducted by the EMB and/or the DENR Regional Units in coordination with the concerned groups;
22. All other necessary permits from concerned government agencies shall be secured prior to the operation of the power plant;
23. Any expansion/modification of drilling operations will be subjected to a new environmental impact assessment requirements; and
24. The transfer of ownership of this project carries the same conditions in this Certificate for which written notification shall be made to the DENR-EMB within fifteen (15) days from such transfer;

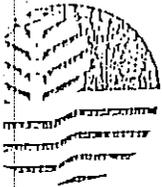

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or a fine in an amount not to exceed Fifty Thousand Pesos (P 50,000.00) for every violation thereof, at the discretion of the Bureau (Section 9 of P.D. 1586).

Gentlemen :

This has reference to your proposed 50 MW DIESEL/DUNKER-
FIRED POWER PLANT located at Mactan Export Processing Zone,
Mactan, Cebu.

After evaluation of the documents submitted on the aforesaid
project, this Office has decided to grant the same an
Environmental Compliance Certificate (ECC).

You may proceed with project implementation after securing
the necessary permits from the pertinent government agencies.
Please be advised, however, that this Office will be monitoring
the project periodically to ensure your compliance with the
stipulations cited in the attached Environmental Compliance
Certificate (ECC). Further, any expansion of currently approved
operations will be subject to the Environmental Impact Assessment
(EIA) requirement.

Very truly yours,

ANGEL C. ALCALA
Secretary

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The Environmental Management Bureau hereby grants this Environmental Compliance Certificate (ECC) to the 50 MW DIESEL/BUNKER-FIRED POWER PLANT of MACTAN POWER CORPORATION located at Mactan Export Processing Zone, Mactan, Cebu, after complying with the Environmental Impact Assessment (EIA) requirement as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and 1506.

This Certificate is being issued subject to the following conditions:

1. OPERATION PHASE :

1. This Certificate shall cover the construction and operation of a 50 MW Diesel-Fired Power Plant to be located at Lot No. 9 and 10, Block 3 within the Mactan Export Processing Zone, Mactan, Cebu;
2. Plant operation shall commence only after all necessary permits from the government agencies including Local Government Units (LGU) endorsement have been secured for the project. DENR-EMB shall be informed of the date when operation commences;
3. The plant shall be designed, constructed and operated in conformity with the National Structural Code of the Philippines and with the submitted Environmental Impact Statement (EIS);
4. Revegetation shall be undertaken immediately upon completion of construction activities;
5. Proper solid waste management and disposal shall be implemented in conformity to the Code on Sanitation of the Philippines (P.D. 856);
6. That all plant effluents and emissions including noise shall conform with the DENR Standards;
7. Appropriate species should be planted around the project perimeter to serve as a buffer zone to attenuate the noise generated by plant operation and absorb SO emissions;

DEPARTMENT OF
ENVIRONMENT AND
NATURAL RESOURCES

II. OPERATIONS PHASE :

8. Fuel specification must meet the requirements set by the DENR Administrative Order No. 14;
9. The smoke stack shall have a minimum height of forty (40) meters with the provision to upgrade further should the dispersion of emission and assimilative capacity of air atmosphere requires;
10. Air and water pollution control devices shall be installed and maintained effectively. Emissions and effluents including noise shall meet the DENR air/water quality standards;
11. During the construction and operation of the plant, utmost regard must be given to the safety of workers by providing them with safety gadgets and following safety rules that minimize work-related risks and hazards.
12. The proponent shall regulate and continuously monitor the groundwater extraction to prevent saltwater intrusion;
13. Proper mitigating measures shall be effected to prevent oil spills and leakages and used oil shall be disposed of properly;
14. All other mitigating measures indicated in the EIS shall be complied with in addition to the specific measures indicated above.

III. ENVIRONMENTAL MONITORING :

15. An Environmental Monitoring Plan shall be submitted to this Office sixty (60) days from receipt hereof. The same shall be implemented upon approval of this Office.
16. Monitoring of stack emissions and ambient air quality (TSP, SO₂, NO_x) shall be conducted at least twice a month during the first six months of operation and once every quarter thereafter. The results of which shall be submitted to EMB and DENR Region VII;
17. Should effluents and emissions exceed the standards as determined by the monitoring team, operations shall be suspended after prior notice and due

DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES

IV. OTHERS :

- 18. The MPC shall formulate and pursue a program for awareness and preparedness for emergency events resulting from fire, explosion, spills or release of hazardous materials;
- 19. That transfer of ownership of this project carries the same conditions in this Certificate for which written notification shall be made to the DENR-EMB within fifteen (15) days from such transfer;

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or a fine in an amount not to exceed Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Section 9 of P.D. 1586).

SUBJECT: Approval of ECC

Mr. Emilio H. Javier
Senior Vice President - Operations
EAST ASIA POWER UTILITIES
Ibo, Lapu-lapu City

Dear Mr. Javier:

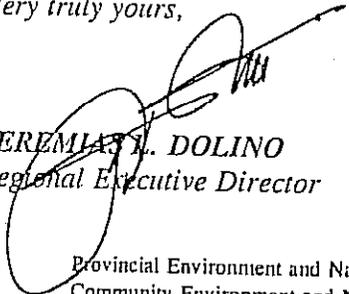

This has reference to your proposed Mooring and Fuel Oil receiving facility for the 50 MW Mactan Diesel Power Plant located at Barangay Ibo, Lapu-lapu City.

After evaluating the Initial Environmental Examination (IEE) document you submitted and with the favorable recommendation from the engineer who evaluated the document, this Office has determined that the same may be granted an Environmental Compliance Certificate (ECC).

You are advised to read carefully the conditions in the attached ECC and to secure all the necessary permits from other concerned government agencies. Please note that this Office will be conducting periodic ocular inspection to monitor the said ECC conditions. Be further reminded that any changes in your project in the future will be subject to the Environmental Impact Assessment (EIA) requirements.

Please be guided accordingly.

Very truly yours,

JEREMIAS L. DOLINO
Regional Executive Director

ENVIRONMENTAL COMPLIANCE CERTIFICATE
(ECC-97L-07CE-146)

The **ENVIRONMENTAL MANAGEMENT AND PROTECTED AREAS SERVICES** of the **DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES**, Region VII hereby grants this **ENVIRONMENTAL COMPLIANCE CERTIFICATE (ECC)** to **EAST ASIA POWER UTILITIES** for the Proposed Mooring and Fuel Oil receiving facility for the 50 MW Mactan Diesel Power Plant located in Barangay Ibo, Lapu-lapu City after complying with the **ENVIRONMENTAL IMPACT ASSESSMENT (EIA)** requirements as prescribed in the promulgated guidelines implementing the revised rules and regulations of P.D. 1586.

This Certificate is being issued subject to the following conditions:

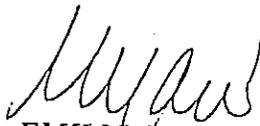

1. *This certificate is valid only for the installation of concrete anchors and deadman for anchoring purposes and the 200 mm. diameter by 260 meters submarine pipeline and its appurtenant connections for the transport of fuel oil from the tankers to the tank from the power plant.*
2. *Turbidity during construction of the trench using backhoe and air flushing shall be controlled so as not to affect adjoining areas.*
3. *Installation of the pipeline shall be in accordance with the norms of the oil industry and safety code requirements.*
4. *Pumping of fuel oil shall be conducted in a secured manner to prevent overflowing in the tank farm and spills/leaks on hose connections going into the surface waters.*
5. *Delivery of fuel-oil shall be scheduled at daytime to facilitate unloading and to minimize potential accident spillage. Where necessary, delivery during nighttime should be fully supervised by trained operators with adequate lighting, security and two-way communication system.*
6. *To ensure sanitation, dumping of solid and liquid waste overboard from the tankers should be restricted.*
7. *Periodic checking as to the mechanical integrity of the mooring and receiving facility should be implemented.*
8. *Oil containment and collection equipment to contain and collect accident spills should be ready and functional throughout the life of the project.*
9. *At no time will sludges from the tank farm be disposed to the sea via the pipeline.*

- 10. No other structure shall be constructed except these mentioned in the report that will constrict normal seawater circulation.
- 11. All other permits from concerned agencies shall be complied with prior to implementation of the project.
- 12. Transfer of ownership of this project carries the same conditions in this Certificate for which written notification shall be made by herein grantee to this Office within fifteen (15) days from such transfer.

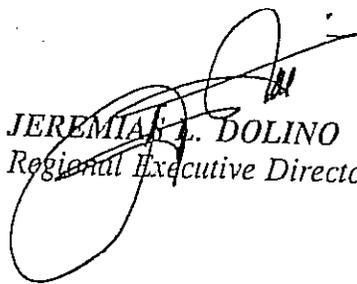

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of this Office (Section 9 of P.D. 1586).

Given this 18th day of December, 1997.

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The Environmental Management Bureau hereby grants this Environmental Compliance Certificate (ECC) to the proposed 2x100 MW MINDANAO DIESEL POWER BARGE PROJECT OF THE NATIONAL POWER CORPORATION to be located in Nasipit, Agusan del Norte and Maco, Davao del Norte, after complying with the Environmental Impact Assessment (EIA) requirement as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and 1586.

This Certificate is being issued subject to the following conditions:

1. That this Certificate shall cover the installation and operation of 2x100 MW diesel power barges with one (1) unit to be located in Nasipit, Agusan del Norte and one (1) unit to be located in Maco, Davao del Norte;
2. That bilge water shall meet the prescribed effluent standards before being discharged into any receiving stream;
3. That plant emissions including noise shall meet the prescribed emission standards and that design of pollution control facilities shall consider the impending revision of air quality standards;
4. That proper solid waste management and disposal shall be implemented;
5. That there shall be provision of contingency equipment/materials in the barge for use in case of accidental oil spillage;
6. That permits from other government agencies concerned shall be secured prior to project operation; and
7. That all mitigating measures indicated in the EIS shall be properly implemented;
8. That transfer of ownership of this project carries the same conditions in this ECC for which written notification shall be made within fifteen (15) days from such transfer.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or a fine in an amount not to exceed Fifty

Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Section 9 of P.D. 1586).

OCT 04 2010

Mr. Jose Venancio P. Batiquin

Executive Vice President/CEO

THERMA MARINE, INC.

Aboitiz Corporate Center, Gov. Manuel A. Cuenco Ave.
Banilad, Cebu City

Subject: ECC TRANSFER OF OWNERSHIP (ECC-CO-9206-018-120)

Dear Mr. Batiquin:

This refers to the request for the transfer of the Environmental Compliance Certificate (ECC-CO-9206-018-120) issued to National Power Corporation for the **2x100 MW Mindanao Diesel Power Barge Project** located in Nasipit, Agusan del Norte and Maco, Compostela Valley, Davao del Norte.

Based on the review of documents received on 09 September 2010, the request for the transfer of ECCs for the above projects is hereby granted. As such, the proponent's name is changed from **National Power Corporation** to **THERMA Marine, Inc.** with office address stated above for the projects namely:

- a) 100 MW Mindanao Diesel Power Barge 117 (PB 117) located in Barangay San Ana, Nasipit Agusan del Sur.
- b) 100 MW Mindanao Diesel Power Barge 118 (PB 118) located in Barangay San Roque, Maco, Davao del Norte.

All other conditions stipulated in the abovementioned ECC shall remain in force unless revised/revoked in writing. Please be reminded however that the approved Environmental Management Plan (EMP) which is part of your commitments to the ECC are subject to compliance monitoring and evaluation of this Office.

Any expansion or modification of currently approved project components shall be subject to a new EIA evaluation. Also, you are required to accomplish and submit to this Office, copy furnish the respective EMB Region, the semi-annual ECC Compliance Monitoring Report as specified under Section 9 of DAO 30-03.

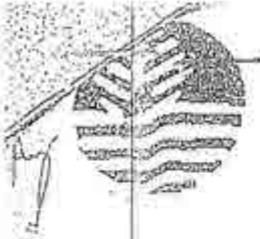

Please be guided accordingly.

Very truly yours,

ATTY. JUAN MIGUEL T. CUNA
OIC-Director

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The DENR through the Environmental Management Bureau (EMB) hereby grants this Environmental Compliance Certificate (ECC) to the proposed 2 X 60 MW POWER BARGE PROJECT of the EAST ASIA POWER CORPORATION, under a Build-Operate-Own (BOO) Agreement with the National Power Corporation, to be located in Navotas, Metro Manila, after complying with the Environmental Impact Assessment (EIA) requirement, as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and P.D. 1386.

This Certification is being issued subject to the following conditions:

1. This Certificate shall cover the installation and operation of two power barges with a total generating capacity of 120 MW to be moored offshore the Navotas Fish Port Complex. It shall also include the installation of a 4-kilometer 115 kV transmission line and construction of support/mooring facilities;
2. A multiple source air quality modelling shall be undertaken, the report of which shall be submitted to the EMB within sixty (60) days from receipt of the ECC. A validation study in coordination with EMB and/or DENR-NCR, on the results of the air quality modelling shall be conducted, commencing on the third month of project operations and a report on the same shall be provided the EMB;
3. All emissions including noise and effluents of the power barges shall conform to DENR set standards;
4. All mitigating measures as stated in the EIS including those for noise abatement shall be undertaken;
5. The revised Environmental Monitoring Program (EMP) shall be strictly carried out to minimize degradation of the terrestrial and marine ecosystems. It shall additionally integrate the following:
 - 5.1 Installation of a continuous recording instrument for water temperature;
 - 5.2 Regular monitoring of the following parameters:
oil and grease, temperature, pH, DO - daily

[Handwritten signature]

noise levels - weekly for the first three months and monthly thereafter

SO₂, NO₂, CO, (HC), particulates - quarterly at receptor locations of Ground Level Concentrations (GLCs).

- 5/3 Creation of an Environmental Unit (EU) headed by a qualified Pollution Control Officer charged with overseeing the EMP, installation, operation and maintenance of pollution control equipment and facilities, as well as, coordination with the National Power Corporation, Philippine Coast Guard, Philippine Ports Authority and pollution control officers of power barges in the Manila Bay Region;
6. An Environmental Guarantee Fund (EGF) shall be put up to cover the expenses of environmental monitoring and surveillance, indemnification of damages caused by the project, immediate rehabilitation and/or restoration of areas affected by the project and research on acid rain, electromagnetic effects of the transmission line and health effects of the emissions on surrounding communities. The amount and mechanics of the EGF shall be in accordance with DENR-EMB guidelines and shall be submitted sixty (60) days from receipt hereof;
7. A more detailed Contingency Plan shall be submitted to EMB for approval within thirty (30) days from receipt hereof. It shall include the establishment of an effective communication system and emergency response plan in case of sabotage and fire;
8. On-the-spot monitoring and inspections shall be initiated by the EMB-DENR NCR in coordination with concerned groups;
9. All other pertinent government permits shall be secured prior to project implementation;
10. Transfer of ownership of this project carries the same conditions in this ECC for which written notification shall be made within fifteen (15) days from such transfer; and
- _____*

11. Transfer of location of the power barge operation during or after the 5-year project lifespan shall be subjected to another ECC application.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or a fine in an amount not to exceed Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Section 9 of P.D. 1586).

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The DENR through the Environment Environmental Management Bureau (EMB) hereby grants this Environmental Compliance Certificate (ECC) to the proposed two (2) Additional Power Barges of the East Asia / Duracom Power Corporation to be located in Navotas, Metro Manila after complying with Environmental Impact Assessment (EIA) requirement, as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and P.D. 1586.

This certificate is being issued subject to the following conditions:

1. This certificate shall cover the installation and operation of two (2) power barges namely DURA I (11 units of Wartsila Engines) with generating capacity of 66 MW and 67.5 MW for DURA II (6 units of Sulzer Engines). It shall include the installation of a 600 meter 115 KV transmission line and construction of support/mooring facilities;
2. Validation of the air quality modelling must be made as soon as the proposed power barges are in operation, a report of which shall be submitted to EMB within sixty (60) days after the conduct of validation;
3. All mitigating measures as stated in the approved submitted documents including those for noise abatement shall be undertaken;
4. All emissions including noise and effluent of the power barges shall conform to DENR set standards;
5. The revised Environmental Monitoring Program (EMP) shall be strictly carried out and shall additionally integrate the following:
 - 5.1 Regular monitoring of the following parameters :

temperature, pH	-	Daily
oil and grease, noise levels	-	Weekly for the first three (3) months and monthly thereafter
 - 5.2 Automatic air sampling instruments for SO₂, NO_x & particulate shall be installed and operated continuously in at least two (2) verified sampling sites as approved by the EMB - DENR;
 - 5.3 Creation of an Environmental Unit (EU) headed by a qualified Pollution Control Officer ~~in charge with~~ overseeing the EMP;
6. The proponent together with NAPOCOR, PPA and owners of existing and proposed barges and other relevant entities shall become a member of the Working Group that would be set up by the DENR-NCR to address the water quality problem in the area;

7. An Environmental Guarantee Fund (EGF) shall be put up to cover the expenses of environmental monitoring and surveillance, indemnification of damages and immediate rehabilitation and/or restoration of areas affected by the project. The amount and mechanics of the EGF shall be in accordance with DENR-EMB guidelines and shall be submitted sixty (60) days from receipt hereof;
8. A more detailed Contingency Plan containing an emergency response plan in case of fire & other hazards shall be submitted within thirty (30) days upon receipt of the ECC. It shall include the establishment of an effective communication system and an emergency response plan in case of said hazards;
9. The proponent shall be required to submit a preliminary Environmental Risk Assessment Study to be submitted to the EMB and the DENR-NCR within ninety (90) days upon receipt of this ECC. A Risk Assessment Report shall be submitted, thereon, on an annual basis;
10. All other pertinent government permits shall be secured prior to project implementation;
11. On-the-spot monitoring and inspections shall be initiated by the EMB-DENR NCR in coordination with concerned groups;
12. Transfer of ownership of this project carries the same conditions in this ECC for which written notification within fifteen (15) days from such transfer; and
13. Any expansion and/or modification of currently approved operations will be subject to a new EIA requirement.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or imposition of fine in the amount of Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Section 9 of PD 1586).

ENVIRONMENTAL COMPLIANCE CERTIFICATE

DENR-NCR hereby grants Environmental Compliance Certificate (ECC) for the Maintenance Workshop and Office Building Project of DURACOM MOBILE POWER CORPORATION located in a 1,790.5 square meters of lot at Navotas Fishport Complex, Navotas Metro Manila City, after complying with the Environmental Impact Statement (EIS) System requirements as prescribed in the guidelines of the Implementing Rules and Regulations of Presidential Decree No. 1586.

This Certificate is issued subject to the following conditions:

1. That this Certificate covers the maintenance workshop and office building, any modification from the approved project scope shall be officially relayed to this Office for information, evaluation and approval;
2. That all the proposed mitigation measures contained in the Environmental Management Plan (EMP) shall be effected;
3. That should adverse environmental impacts occur as a result of project operations, all the activities causing the same shall be temporarily stopped until such time that remedial measures have been effected;
4. That the project proponent shall allow DENR-EMB-NCR personnel with proper identification card and travel/mission order to conduct inspection/ monitoring in the entire premises without prior notice to oversee compliance to ECC conditions;
5. That the transfer of ownership and/or change of name of the project carries the same conditions in this ECC for which written agreement shall be made, copy furnish this Office of the said document for record purposes;
6. That this Certificate shall be posted in a conspicuous place in the Administration's Office for easy reference and guidance;
7. That a report under oath on the results of monitoring proposed under the Environmental Monitoring Plan of the IEE and on compliance with each of the conditions shall be submitted to this Office annually;
8. That a written notification shall be made to the DENR-EMB-NCR, for approval, in case the project proponent cannot comply with any of the conditions for

Abelardo

Duracom Mobile Power Corp.

The President / General Manager
THERMA MOBILE, INC.
Navotas Fishport Complex,
Navotas City

Sir:

This has reference to your request for amendment of the Environmental Compliance Certificate (ECC-NCR-2002-12-09-543-120) previously issued for your Maintenance Workshop and Office Building project located at Navotas Fishport Complex, Navotas City.

After evaluation of the documents submitted, this Office has decided to grant the said request to reflect the new name, Therma Mobile, Inc. instead of Duracon Mobile Power Corporation.

With the issuance of this amended ECC, you are expected to implement the measures presented in the Initial Environmental Examination (IEE), intended to protect and mitigate the project's adverse impacts on community health, welfare and the environment. Environmental considerations shall be incorporated in all phases and aspects of the project. You may proceed with project implementation after securing all the necessary permits from other pertinent government agencies. This Office will be monitoring the project periodically to ensure your compliance with stipulations cited in the attached ECC.

Be further informed that you have to pay the amount of **Three Hundred Pesos (Php. 300.00)** representing post-ECC processing services and **Fifteen Pesos (Php. 15.00)** for documentary stamp tax before the said certificate could be released to your favor.

Very truly yours,

ROBERTO D. SHEEN

PROJECT ASSESSMENT PLANNING TOOL

For the assistance of the Proponent, other DENR Divisions/Bureaus, other concerned government agencies and LGUs in the management of the project and for better coordination in mitigation on the impact of the project on its surrounding areas and to the environment.

By way of recommendation, the following have been taken notice of by the EIA Review Committee and are forwarding these recommendations to the parties and authorities concerned for proper appreciation and action, and integration into their decision-making process.

A. RECOMMENDATIONS TO CONCERNED GOVERNMENT AGENCIES/LGUS	CONCERNED PERMITTING, DECIDING MONITORING ENTITIES
THERMA MOBILE, INC shall :	
1. Ensure that a social participation process is undertaken with the local government units and stakeholders.	LGU-City of Navotas
2. Implement segregation, collection, recycling, and disposal mechanism for solid waste.	LGU-City of Navotas
3. Implement safety rules and regulations in the project area	DOLE
4. Coordinate for the traffic management in the area affected in anticipation of the growth of traffic caused by the project.	LGU-City of Navotas
5. Implement fire and earthquake management plan	LGU-City of Navotas
6. Shall comply with the fire safety protection requirements of the Fire Code of the Philippines	LGU-City of Navotas
B. ENVIRONMENTAL PLANNING RECOMMENDATIONS FOR THE PROPONENT	
7. THERMA MOBILE, INC shall undertake close monitoring of the project to maintain a high level of safety and efficiency at all stages of the construction and operation, and to immediately address any environmental hazard/ change that may take place. It is strongly recommended that the same be strictly complied.

(Environmental Compliance Certificate)
(Issued under Presidential Decree 1586)
ECC-NCR-0212-0543
(Amending ECC-2002-06-267-NV-120)

THIS IS TO CERTIFY THAT PROPONENT THERMA MOBILE, INC. represented by its President, is granted this Environmental Compliance Certificate (ECC) for the Maintenance Workshop and Office Building Project located at Navotas Fishport Complex, Navotas City, by the Department of Environment and Natural Resources (DENR), through the Environmental Management Bureau, National Capital Region.

SUBJECT ONLY to the conditions and restrictions set-out in this ECC and by the attached document labeled as Annex A. Recommendations have been provided in Annex B as guidance to concerned government agencies and local government units for consideration in their decision making process.

PROJECT DESCRIPTION

The ECC covers the Maintenance Workshop and Office Building Project of Therma Mobile, Inc. located in a 1,790.50 square meters of lot at Navotas Fishport Complex, Navotas City.

This ECC is issued pursuant to the provisions of Presidential Decree No. 1586, in accordance to Department Administrative Order No. 2003-30. Non-compliance with any of the provisions of this ECC shall be sufficient cause for its cancellation or suspension and/or imposition of a fine in an amount not to exceed Fifty Thousand Pesos (PhP 50,000.00) for every violation thereof. The Bureau, however, is not precluded from reevaluating, adding, removing, and correcting any deficiencies or errors that may be found to be inconsistent with the Revised Procedural Manual of DAO 2003-30 after issuance of this ECC.

Issued at EMB-NCR, 5th Floor, Hizon Bldg., No. 29, Quezon Avenue, Quezon City this _____

Approved:

ROBERTO D. SHEEN
OIC, Regional Director

Recommending Approval:

EMILIANO P. KEMPIS, JR.
Chief, EIAM Division

1. CONDITIONS

A. ENVIRONMENTAL MANAGEMENT and MONITORING PLAN (EMMoP)

1. The proponent shall ensure that all commitments, appropriate mitigating/enhancement measures and monitoring requirements especially those contained in the EMMoP in the Initial Environmental Examination (IEE) Report, its modifications and additional information as approved by the EMB-NCR during the EIA Report review shall be instituted and strictly implemented throughout the project implementation.
2. Submit an Abandonment Plan to the EMB-NCR at least 30 days prior to the project's abandonment. The plan shall include rehabilitation measures / clean-up, remediation of areas affected by the project and proposed alternative projects in the area.

B. GENERAL CONDITIONS

3. The operations shall conform to the applicable provisions of RA 6969 (Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990), RA 8749 (Philippine Clean Air Act of 1999), RA 9003 (Ecological Solid Waste Management Act of 2000), and RA 9275 (Philippine Clean Water Act of 2004).
4. An Environmental Unit (EU) / Pollution Control Officer (PCO) must be established / appointed to handle the environment-related aspects of the project in addition to the monitoring requirements as specified in the Environmental Management Plan (EMP) / Environmental Monitoring Plan (EMoP). The EU / PCO shall:
 - 4.1 Monitor actual project impacts vis-à-vis the predicted impacts and management measures in the IEE Report.
 - 4.2 Submit semi-annually an ECC Compliance Report to the EMB-NCR, on or before 15 February and 15 August of each year. Each report must show the summary of cumulative performance of Proponent against previous years' requirements and commitments.
5. That the project proponent shall allow EMB-NCR personnel with proper identification card and mission/travel order to conduct inspection/monitoring in the entire premises without prior notice to oversee compliance to ECC conditions.

II. RESTRICTIONS

6. In case of transfer of ownership of this project, these same conditions and restrictions shall apply and the transferee shall be required to notify the EMB-NCR within fifteen (15) days as regards to the transfer of ownership.
7. No other activities should be undertaken other than what was stipulated in the IEE Report. Should there be any planned expansion of the project beyond the project description in the submitted documents; or any planned change in the activity, a request for an ECC amendment must be made prior to implementation of any project expansion/ modification.

Subject: **Transfer of Environmental Compliance Certificate (ECC Reference No. 9507-002-207) for the 2x60MW Power Barge Project of East Asia Power Corporation**

Dear *Mr. Batiquin*:

This refers to the request for transfer of ECC Reference No. 9507-002-207 issued in favor of East Asia Power Corporation for its 2x60MW Power Barge Project in Navotas Fish Port Complex, Navotas City, Metro Manila to Therma Mobile Inc.

Based on review and evaluation of the submitted documents, said request is hereby granted. Please be advised that this transfer shall carry with it the environmental liabilities and obligations including ECC compliance reporting requirements for the above mentioned project. Further, all conditions stipulated in the ECC shall remain in force unless otherwise revised in writing. Any expansion and/or modification of currently approved project operations/coverage shall be subject to a new Environmental Impact Assessment (EIA) requirement.

For your information and guidance.

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The DENR through the Environmental Management Bureau (EMB) hereby grants this Environmental Compliance Certificate (ECC) to the proposed 2 X 60 MW POWER BARGE PROJECT of the EAST ASIA POWER CORPORATION, under a Build-Operate-Own (BOO) Agreement with the National Power Corporation to be located in Navotas, Metro Manila, after complying with the Environmental Impact Assessment (EIA) requirement, as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and P.D. 1884.

This Certification is being issued subject to the following conditions:

1. This Certificate shall cover the installation and operation of two power barges with a total generating capacity of 120 MW to be moored offshore the Navotas Fish Port Complex. It shall also include the installation of a 4-kilometer 115 kV transmission line and construction of support/mooring facilities;
2. A multiple source air quality modelling shall be undertaken, the report of which shall be submitted to the EMB within sixty (60) days from receipt of the ECC. A validation study in coordination with EMB and/or DENR-NCR, on the results of the air quality modelling shall be conducted, commencing on the third month of project's operations and a report on the same shall be provided the EMB;
3. All emissions including noise and effluents of the power barges shall conform to DENR set standards;
4. All mitigating measures as stated in the EIS including those for noise abatement shall be undertaken;
5. The revised Environmental Monitoring Program (EMP) shall be strictly carried out to minimize degradation of the terrestrial and marine ecosystems. It shall, additionally integrate the following:
 - 5.1 Installation of a continuous recording instrument for water temperature;
 - 5.2 Regular monitoring of the following parameters:
oil and grease, temperature, pH, DO - daily

noise levels - weekly for the first three months and monthly thereafter

SO₂, NO₂, CO, (HC), particulates - quarterly at receptor locations of Ground Level Concentrations (GLCs).

- 5.3 Creation of an Environmental Unit (EU) headed by a qualified Pollution Control Officer charged with overseeing the EMP, installation, operation and maintenance of pollution control equipment and facilities, as well as, coordination with the National Power Corporation, Philippine Coast Guard, Philippine Ports Authority and pollution control officers of power barges in the Manila Bay Region;
6. An Environmental Guarantee Fund (EGF) shall be put up to cover the expenses of environmental monitoring and surveillance, indemnification of damages caused by the project, immediate rehabilitation and/or restoration of areas affected by the project and research on acid rain, electromagnetic effects of the transmission line and health effects of the emissions on surrounding communities. The amount and mechanics of the EGF shall be in accordance with DENR-EMB guidelines and shall be submitted sixty (60) days from receipt hereof;
7. A more detailed Contingency Plan shall be submitted to EMB for approval within thirty (30) days from receipt hereof. It shall include the establishment of an effective communication system and emergency response plan in case of sabotage and fire;
8. On-the-spot monitoring and inspections shall be initiated by the EMB-DENR NCR in coordination with concerned groups;
9. All other pertinent government permits shall be secured prior to project implementation;
10. Transfer of ownership of this project carries the same conditions in this ECC for which written notification shall be made within fifteen (15) days from such transfer; and

ke

11. Transfer of location of the power barge operation during or after the 5-year project lifespan shall be subjected to another ECC application.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or a fine in an amount not to exceed Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Section 9 of P.D. 1586).

Mr. Jose Venancio A. Batiquin
Executive Vice President/ COO
THERMA MOBILE, INC.
Aboitiz Corp. Center, Gov. Manuel A.
Cuenco Ave., Banilad, Cebu City

Subject: **Transfer of Environmental Compliance Certificate (ECC Reference No. 9508-002-207) for the Two (2) Additional Power Barges (Dura I - 66MW and Dura II - 67.5MW) of East Asia/ Duracom Power Corporation**

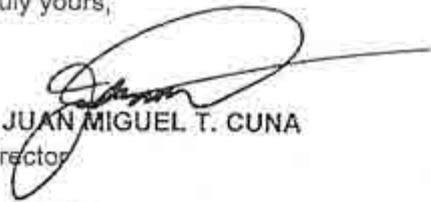

Dear *Mr. Batiquin*:

This refers to the request for transfer of ECC Reference No. 9508-002-207 issued in favor of East Asia/ Duracom Power Corporation for its Two (2) Additional Power Barges (Dura I - 66MW and Dura II-67.5MW) project in Navotas Fish Port Complex, Navotas City, Metro Manila to Therma Mobile Inc.

Based on review and evaluation of the submitted documents, said request is hereby granted. Please be advised that this transfer shall carry with it the environmental liabilities and obligations including ECC compliance reporting requirements for the above mentioned project. Further, all conditions stipulated in the ECC shall remain in force unless otherwise revised in writing. Any expansion and/or modification of currently approved project operations/coverage shall be subject to a new Environmental Impact Assessment (EIA) requirement.

For your information and guidance.

Very truly yours,

DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The DENR through the Environment Environmental Management Bureau (EMB) hereby grants this Environmental Compliance Certificate (ECC) to the proposed two (2) Additional Power Barges of the East Asia / Duracom Power Corporation to be located in Navotas, Metro Manila after complying with Environmental Impact Assessment (EIA) requirement, as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and P.D. 1586.

This certificate is being issued subject to the following conditions:

1. This certificate shall cover the installation and operation of two (2) power barges namely DURA I (11 units of Wartsila Engines) with generating capacity of 66 MW and 67.5 MW for DURA II (6 units of Sulzer Engines). It shall include the installation of a 600 meter 115 KV transmission line and construction of support/mooring facilities;
2. Validation of the air quality modelling must be made as soon as the proposed power barges are in operation, a report of which shall be submitted to EMB within sixty (60) days after the conduct of validation;
3. All mitigating measures as stated in the approved submitted documents including those for noise abatement shall be undertaken;
4. All emissions including noise and effluent of the power barges shall conform to DENR set standards;
5. The revised Environmental Monitoring Program (EMP) shall be strictly carried out and shall additionally integrate the following:
 - 5.1 Regular monitoring of the following parameters :

temperature, pH	-	Daily
oil and grease, noise levels	-	Weekly for the first three (3) months and monthly thereafter
 - 5.2 Automatic air sampling instruments for SO₂, NO_x & particulate shall be installed and operated continuously in at least two (2) verified sampling sites as approved by the EMB - DENR;
 - 5.3 Creation of an Environmental Unit (EU) headed by a qualified Pollution Control Officer ~~in charge with~~ overseeing the EMP;
6. The proponent together with NAPOCOR, PPA and owners of existing and proposed barges and other relevant entities shall become a member of the Working Group that would be set up by the DENR-NCR to address the water quality problem in the area;

7. An Environmental Guarantee Fund (EGF) shall be put up to cover the expenses of environmental monitoring and surveillance, indemnification of damages and immediate rehabilitation and/or restoration of areas affected by the project. The amount and mechanics of the EGF shall be in accordance with DENR-EMB guidelines and shall be submitted sixty (60) days from receipt hereof;
8. A more detailed Contingency Plan containing an emergency response plan in case of fire & other hazards shall be submitted within thirty (30) days upon receipt of the ECC. It shall include the establishment of an effective communication system and an emergency response plan in case of said hazards;
9. The proponent shall be required to submit a preliminary Environmental Risk Assessment Study to be submitted to the EMB and the DENR-NCR within ninety (90) days upon receipt of this ECC. A Risk Assessment Report shall be submitted, thereon, on an annual basis;
10. All other pertinent government permits shall be secured prior to project implementation;
11. On-the-spot monitoring and inspections shall be initiated by the EMB-DENR NCR in coordination with concerned groups;
12. Transfer of ownership of this project carries the same conditions in this ECC for which written notification within fifteen (15) days from such transfer; and
13. Any expansion and/or modification of currently approved operations will be subject to a new EIA requirement.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or imposition of fine in the amount of Fifty Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Section 9 of PD 1586).

ENVIRONMENTAL COMPLIANCE CERTIFICATE

The Environmental Management Bureau hereby grants this Environmental Compliance Certificate (ECC) to the proposed 2x100 MW MINDANAO DIESEL POWER BARGE PROJECT OF THE NATIONAL POWER CORPORATION to be located in Nasipit, Agusan del Norte and Maco, Davao del Norte, after complying with the Environmental Impact Assessment (EIA) requirement as prescribed in the promulgated guidelines implementing Section 3 (b) of P.D. 1121 and 1586.

This Certificate is being issued subject to the following conditions:

1. That this Certificate shall cover the installation and operation of 2x100 MW diesel power barges with one (1) unit to be located in Nasipit, Agusan del Norte and one (1) unit to be located in Maco, Davao del Norte;
2. That bilge water shall meet the prescribed effluent standards before being discharged into any receiving stream;
3. That plant emissions including noise shall meet the prescribed emission standards and that design of pollution control facilities shall consider the impending revision of air quality standards;
4. That proper solid waste management and disposal shall be implemented;
5. That there shall be provision of contingency equipment/materials in the barge for use in case of accidental oil spillage;
6. That permits from other government agencies concerned shall be secured prior to project operation; and
7. That all mitigating measures indicated in the EIS shall be properly implemented;
8. That transfer of ownership of this project carries the same conditions in this ECC for which written notification shall be made within fifteen (15) days from such transfer.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate and/or a fine in an amount not to exceed Fifty

Thousand Pesos (P50,000.00) for every violation thereof, at the discretion of the Bureau (Section 9 of P.D. 1586).

Given this 29th day of June 1992.

OCT 04 2010

Mr. Jose Venancio P. Batiquin

Executive Vice President/CEO

THERMA MARINE, INC.

Aboitiz Corporate Center, Gov. Manuel A. Cuenco Ave.
Banilad, Cebu City

Subject: ECC TRANSFER OF OWNERSHIP (ECC-CO-9206-018-120)

Dear Mr. Batiquin:

This refers to the request for the transfer of the Environmental Compliance Certificate (ECC-CO-9206-018-120) issued to National Power Corporation for the **2x100 MW Mindanao Diesel Power Barge Project** located in Nasipit, Agusan del Norte and Maco, Compostela Valley, Davao del Norte.

Based on the review of documents received on 09 September 2010, the request for the transfer of ECCs for the above projects is hereby granted. As such, the proponent's name is changed from **National Power Corporation** to **THERMA Marine, Inc.** with office address stated above for the projects namely:

- a) 100 MW Mindanao Diesel Power Barge 117 (PB 117) located in Barangay San Ana, Nasipit Agusan del Sur.
- b) 100 MW Mindanao Diesel Power Barge 118 (PB 118) located in Barangay San Roque, Maco, Davao del Norte.

All other conditions stipulated in the abovementioned ECC shall remain in force unless revised/revoked in writing. Please be reminded however that the approved Environmental Management Plan (EMP) which is part of your commitments to the ECC are subject to compliance monitoring and evaluation of this Office.

Any expansion or modification of currently approved project components shall be subject to a new EIA evaluation. Also, you are required to accomplish and submit to this Office, copy furnish the respective EMB Region, the semi-annual ECC Compliance Monitoring Report as specified under Section 9 of DAO 30-03.

Please be guided accordingly.

Very truly yours,

ATTY. JUAN MIGUEL T. CUNA
OIC-Director

JUL 10 2007

CNC NO. 0707-009-020

Mr. Rodolfo T. Azanza, Jr.
Manager
SN ABOITIZ POWER, INC.
9/F Tower 1 Ayala Avenue
Makati City

Subject : **Certificate of Non-Coverage (CNC)**

Dear Mr. Azanza:

This refers to your request for a **Certificate of Non Coverage (CNC)** for the **360 MW Magat Hydroelectric Power Plant (MHEP)** located in Barangay Aguinaldo, Municipality of Ramon, Province of Isabela and Barangay Sto. Domingo, Municipality of Alfonso Lista, Province of Ifugao.

After evaluation of your submitted documents, it was determined that the plant has been operational prior to the implementation of the Philippine Environmental Impact Statement (EIS) System in 1982. As such, the said plant is not covered by the EIA requirement based on the Procedural Manual for DENR Administrative Order No. 30 Series of 2003 "Implementing Rules and Regulations (IRR) of the Philippine Environmental Impact Statement (EIS) System".

Please be reminded, however, that the Certificate of Non-Coverage will apply only if the plant's existing capacity of 360 MW will remain. An increase in the capacity would subject the plant and its expansion to the EIA requirement.

Further, you are advised to comply with other environmental regulations such as the RA 9275 (Philippine Clean Water Act of 2004) and RA 8749 (Philippine Clean Air Act of 1999). You may proceed with the project implementation after securing all the necessary permits from concerned agencies.

Very truly yours,

DR. ELY ANTHONY R. OUANO
OIC-Director

ENVIRONMENTAL COMPLIANCE CERTIFICATE

CAR 0808 – 077 – 4021

The Department of Environment and Natural Resources (DENR) thru the Environmental Management Bureau-Cordillera Administrative Region (EMB-CAR) hereby grants this Environmental Compliance Certificate (ECC) for the proposed rehabilitation and upgrade of the **Ambuklao Hydroelectric Power Plant** by the **SN Aboitiz Power-Benguet, Inc. (SNAPB)** located at Ambuklao, Bokod, Benguet, after complying with the Environmental Impact Assessment (EIA) requirements as prescribed in the promulgated guidelines implementing Section (b) of P. D. 1121 and P. D. 1586.

This Certificate is further specified as follows:

A. Scope:

1. This Certificate covers the construction of new headrace/ intake and tailrace/outlet structures, refurbishing of plant equipment and appurtenances and/or, as described in the submitted documents;
2. This Certificate does not exempt the project from the requirements of other concerned agencies;

B. Conditions:

1. Project development shall be in accordance with the submitted documents. Major modifications and/or expansion shall be subject to the Environmental Impact Statement (EIS) System requirement;
2. The proponent shall cause the implementation of the Environmental Management Plan (EMP) and all other SNAPB commitments described in the submitted EIA documents;
3. Earth materials and other construction spoils shall be disposed off properly in designated disposal site(s) and to be maintained in a stable and non-pollutive condition;

4. The legal requirements pursuant to RA 6969 also known as the Toxic Substances and Hazardous and Nuclear Waste Control Act of 1990, RA 9275 or the Philippine Clean Water Act of 2004 and, RA 8749 or the Philippine Clean Air Act of 1999 shall be secured consistent with the implementation of the project. Compliance to said requirements shall be coordinated with the EMB-CAR;
5. The proponent shall submit to EMB-CAR two (2) years prior to the final shutdown of the facility a comprehensive abandonment and decommissioning plan;
6. SN-Aboitiz shall within ninety (90) days from the issuance of this Certificate cause the formation, through a Memorandum of Agreement (MOA), of a Multipartite Monitoring Team (MMT) consisting of representatives from the proponent, EMB/DENR, stakeholder LGUs/communities and a local NGO. The MMT shall primarily oversee the compliance of the proponent to the ECC conditions, EMP and, relevant rules and regulations;
7. SN-Aboitiz shall set up an Environmental Monitoring Fund (EMF) to cover reasonable expenses for environmental monitoring undertaken by the MMT. The amount and mechanics of the EMF shall be determined by the proponent and EMB following existing guidelines and procedures on the same;
8. The resolution of all legal issues arising from the implementation of the project shall be the sole responsibility of the proponent;
9. The project is subject to on-the-spot monitoring/inspection at any reasonable time by the EMB-CAR which may be in coordination with concerned groups.
10. The proponent shall cause the implementation of any undertaking which may be imposed by the DENR-CAR as a result of Technical Conference/s called relative to environmental issues arising from the implementation of the project; and
11. Any transfer of project proprietorship or change of project name carries the same conditions in this ECC for which notification to the EMB-CAR shall be made by the proponent within fifteen (15) days from such transfer.

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate, administrative sanctions against the office head and/or imposition of fine in the amount not to exceed Fifty Thousand Pesos (₱ 50,000.00) for every violations thereof, at the discretion of the DENR (Section 9 of P. D. 1586).

C. Recommendations (for the consideration of other concerned agencies in the issuance of applicable permits/authorities):

1. The construction of appurtenant physical structures where applicable, are subject to the requirements of the National Building Code of the Philippines. Compliance to the same should be coordinated with the concerned Local Building Official;
2. Supplemental to relevant and existing NPC watershed functions, SN-Aboitiz should consult and coordinate with the surrounding stakeholder communities and concerned government agencies for the development and implementation of a comprehensive/detailed watershed/forest resource management program to maintain and enhance the hydrological and ecological function of the Ambuklao-Binga watershed;
3. Qualified local residents should be given priority employment during the development and operation of the project;

Given this _____ day of 12 AUG 2008, Two Thousand Eight.

ENVIRONMENTAL COMPLIANCE CERTIFICATE

0903 – 032 – 4021

The Department of Environment and Natural Resources (DENR) thru the Environmental Management Bureau-Cordillera Administrative Region (EMB-CAR) hereby grants this Environmental Compliance Certificate (ECC) to **SM Aboitiz Power-Benguet, Inc. (SNAPBI)** for the proposed rehabilitation and upgrade of the **BINGA Hydroelectric Power Plant** located at Tinongdan, Itogon, Benguet, after complying with the Environmental Impact Assessment (EIA) requirements as prescribed in the promulgated guidelines implementing Section (b) of P. D. 1121 and P. D. 1586.

This Certificate is further specified as follows:

A. Scope:

1. This Certificate covers the construction of new headrace/ intake and tailrace/outlet structures, refurbishing of plant equipment and appurtenances and/or, as described in the submitted documents;
2. This Certificate does not exempt the project from the requirements of other concerned agencies such as, but not limited to, DENR (permit requirements under The Forestry Code of the Philippines and the latest issuances relative thereto);

B. Conditions:

1. Project development and operations shall be in accordance with the submitted EPRMP, detailed plans and specifications, and other related documents. Major modifications and/or expansion shall be subject to the Environmental Impact Statement (EIS) System requirement;
2. The proponent shall cause the implementation of the Environmental Management Plan (EMP) and all other SNAPB commitments described in the submitted EIA documents;
3. The designated earth/construction spoils disposal site shall be developed, prior to dumping, as an engineered earth dump provided with, but not limited to, surface run-off drainage system, toe/retaining walls, to be maintained in a stable and non-pollutive condition;

4. The volume of earth materials to be impounded in the designated disposal site/facility shall at no time be in excess of the volume warranted by the computed carrying capacity of said dump facility. The proponent shall secure clearance from EMB-CAR prior to the use of disposal site(s) outside the designated disposal facility;
5. The legal requirements pursuant to RA 6969 also known as the Toxic Substances and Hazardous and Nuclear Waste Control Act of 1990, RA 9275 or the Philippine Clean Water Act of 2004 and, RA 8749 or the Philippine Clean Air Act of 1999 shall be secured consistent with the implementation of the project. Compliance to said requirements shall be coordinated with the EMB-CAR;
6. The proponent, upon the start of project rehabilitation, shall plant appropriate tree species within the project vicinity and along access roads, and to be maintained throughout the project;
7. The proponent shall submit to EMB-CAR one (1) year prior to the final shutdown of the facility a comprehensive abandonment plan. In relation, the EMB shall first review and approve the environmental aspects/components of the plan consistent with EMB functions prior to implementation;
8. SN-Aboitiz shall within ninety (90) days from the issuance of this Certificate cause the formation, through a Memorandum of Agreement (MOA), of a Multipartite Monitoring Team (MMT) consisting of representatives from the proponent, EMB/DENR, stakeholder LGUs/ communities and a local NGO. The MMT shall primarily oversee the compliance of the proponent to the ECC conditions, EMP and, relevant rules and regulations;
9. SN-Aboitiz shall set up an Environmental Monitoring Fund (EMF) to cover reasonable expenses for environmental monitoring undertaken by the MMT. The amount and mechanics of the EMF shall be proposed by the proponent and affirmed by the EMB-CAR following existing guidelines and procedures on the same;
10. The project is subject to on-the-spot monitoring/inspection at any reasonable time by the EMB-CAR which may be in coordination with concerned groups.
11. The proponent shall comply with any order imposed by the DENR as a result of Technical Conference/s called relative to environmental issues arising from the implementation of the project; and
12. Any transfer of project proprietorship or change of project name carries the same conditions in this ECC for which notification to the EMB-CAR shall be made by the proponent within fifteen (15) days from such transfer.

MB

Non-compliance with any of the above stipulations will be sufficient cause for the suspension or cancellation of this Certificate, administrative sanctions against the office head and/or imposition of fine in the amount not to exceed Fifty Thousand Pesos (P 50,000.00) for every violations thereof, at the discretion of the DENR (Section 9 of P. D. 1586).

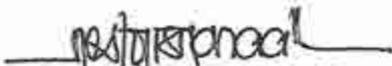

C. Recommendations (for the consideration of other concerned agencies in the issuance of applicable permits/authorities):

1. The construction of appurtenant physical structures, where applicable, are subject to the requirements of the National Building Code of the Philippines. Compliance to the same should be coordinated with the concerned Local Building Official;
2. Supplemental to relevant and existing NPC watershed functions, SN-Aboitiz should consult and coordinate with the surrounding stakeholder communities and concerned government agencies for the development and implementation of a comprehensive/detailed watershed/forest resource management program to maintain and enhance the hydrological and ecological function of the Ambuklao-Binga watershed. If possible, SNAPBI should enter into a Memorandum of Agreement (MOA) with NPC and other stakeholders as to the extent of the participation of the proponent with respect to watershed management;
3. Qualified local residents should be given priority employment during the development and operation of the project; and
4. Construction works should be under the tight supervision of a technical personnel to ensure that standards and requirements of sound engineering, safety and health practices are strictly followed.

ENVIRONMENTAL COMPLIANCE CERTIFICATE

CAR 0903 - 032 - 4021 (Amended)

AMENDING the Environmental Compliance Certificate (ECC) No. CAR 0903 - 032 - 4021 issued by the EMB, DENR-CAR on April 21, 2009 to **SN Aboitiz Power-Benguet, Inc. (SNAPBI)** for the proposed rehabilitation and upgrade of the **Binga Hydroelectric Power Plant** located at Tinongdan, Itogon, Benguet, pursuant to Section 8.3 of DAO 2003-30.

I, **PAQUITO T. MORENO, JR.**, Regional Director, EMB-CAR, by virtue of the powers vested in me by law, do hereby order:

Section 1. Amendment

Item 1 of the Scope of the ECC No. CAR 0903 - 032 - 4021, is amended and shall now read as follows:

"This Certificate covers the construction of new high level intake/headrace, refurbishing of plant equipment and appurtenances and/or, as described in the submitted documents;"

Section 2. Applicability

All provisions of the ECC No. CAR 0903 - 032 - 4021 issued on April 21, 2009 for the project not hereto amended shall remain valid and existing.

Section 3. Effectivity

This Amendment is issued in the interest of all concerned parties and shall take effect immediately.

Done in the City of Baguio, Philippines, this _____
day of _____, Year Two Thousand Eleven.

Subject: **Amendment of Certificate of Environmental Compliance Certificate (ECC) No. ECC-R02-1502-0003**

Dear *Mr. Yu*:

This has reference to your amendment application for ECC No. **ECC-R02-1502-0003** issued to the **SN Aboitiz Power-Magat, Inc. (SNAPM)** for the **MARIS SOUTH CANAL HYDRO-ELECTRIC POWER PLANT** Project located at Barangay Ambatali, Ramon, Isabela.

After satisfying the requirements in the said application and upon recommendation of the Environmental Impact Assessment Section (EIAS) under the Clearance and Permitting Division (CPD), the Department of Environment and Natural Resources (DENR) through the Environmental Management Bureau (EMB) hereby grants the abovementioned application for amendment of ECC. Consistent with the mandate of this Bureau to continuously reevaluate the project's performance and commitments, make the necessary addition, removal and correction of any deficiencies or errors that may be inconsistent with the issued ECC, pursuant to the Revised Procedural Manual of DAO 2003-30, based on the document submitted, this Office incorporated additional conditions and deleted inconsistent items in the ECC in accordance with the latest policies and issuances of the Department. As such, **ECC-R02-1701-0001** will finally read as follows:

ORIGINAL STATEMENT	AMENDED STATEMENT
ECC Reference Number	
ECC-R02-1502-0003	ECC-R02-1502-0003 (B)
Project Name	
MARIS SOUTH CANAL HYDRO ELECTRIC POWER PLANT (HEPP)	MARIS MAIN CANAL 1 HYDROELECTRIC POWER PLANT (HEPP)
Project Description	
Total Power Generating Capacity of 8MW	Total Power Generating Capacity of 8.5MW

CS

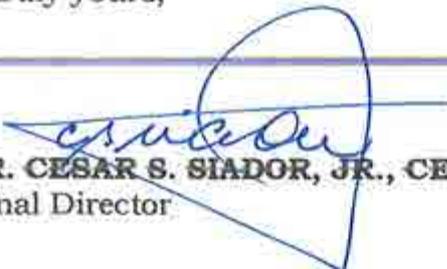

Additional Conditions:

1. Implement an Energy Conservation Program (ECP) (eg. use of alternative fuels, LED lighting fixtures, energy-efficient equipment, etc.) that aims to reduce emissions of greenhouse gases and provide Emergency Preparedness Response / Contingency Plan (EPR/CP) to provide resilience to climate change, and shall be included in the Compliance Monitoring Report (CMR);
2. The proponent shall plant additional five hundred (500) appropriate tree (endemic or indigenous) species or at least one hundred (100) trees per year for five (5) consecutive years along the perimeter of the area and in areas to be rehabilitated as part of its environmental commitment and shall register the same in the National Greening Program (NGP) of the Government. In case tree planting of tree is not feasible within or near the project site, the proponent shall coordinate with the DENR for the latter to identify and provide/designate an area for planting under the NGP.

Please be informed that all conditions stipulated in the original ECC should be strictly complied.

BPI Capital Corporation ("BPI Capital"), a private financial institution, duly organized and existing under and by virtue of the laws of the Republic of the Philippines and authorized to operate as an investment house in the Philippines, with principal office address at 11F, Tower One, Ayala North Exchange, 6796 Ayala Avenue, Makati City, Philippines, under oath, hereby certifies that:

1. BPI Capital has been appointed as a **Joint Lead Underwriter** for the public offer and sale of Philippine Peso-denominated fixed rate bonds to be issued by **Aboitiz Power Corporation ("Issuer")** in the aggregate amount of up to Eight Billion Pesos (Php8,000,000,000.00), consisting of a base offer of up to Four Billion Pesos (Php4,000,000,000.00) (the "**Base Offer**"), with an over-subscription option of up to Four Billion Pesos (Php4,000,000,000) (the "**Oversubscription Option**"), to be issued and offered under the Issuer's Thirty Billion Pesos (Php30,000,000,000.00) shelf registration to be registered with the Securities and Exchange Commission ("**SEC**").
2. In the performance by BPI Capital of its mandate as a **Joint Lead Underwriter**, BPI Capital has exercised due diligence required by regulations applicable under Philippine law in a manner sufficient to ensure that all material representations contained in the prospectus are true and correct and that no material information was omitted, which was necessary to make the statements contained in the Issuer's prospectus or offering supplement not misleading.

This Certification is issued in compliance with the requirements of the SEC and the Philippine Dealing & Exchange Corp.

ABOITIZ POWER CORPORATION

NAC Tower, 32nd Street
Bonifacio Global City
1634 Taguig City

Attention: **Ms. Liza Luz T. Montelibano**
Senior Vice President and Chief Financial Officer

Ms. Maria Veronica C. So
First Vice President and Group Treasurer

Subject: **Aboitiz Power Corporation's Offer of Fixed Rate Bonds for up to ₱4,000,000,000.00 with an Oversubscription Option of up to ₱4,000,000,000.00 under its ₱30,000,000,000 Shelf Registration**

Ladies and Gentlemen:

This letter confirms the engagement of BDO Capital & Investment Corporation ("**BDO Capital**"), BPI Capital Corporation ("**BPI Capital**"), China Bank Capital Corporation ("**China Bank Capital**"), and First Metro Investment Corporation ("**First Metro**") as the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners (the "**Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners**") for the offering and issue by **Aboitiz Power Corporation** (the "**Company**") of fixed rate bonds in the principal amount of up to ₱4,000,000,000 (the "**Base Offer**"). We understand that the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners will be given the option, subject to consultation with the Company and with the Company's written consent, to increase the Base Offer by up to an additional ₱4,000,000,000 fixed rate bonds (the "**Oversubscription Option**"; the fixed rate bonds covered by the Oversubscription Option, the "**Oversubscription Option Bonds**"; the exercised portion of the Oversubscription Option together with the Base Offer, the "**Offer**"; and the fixed rate bonds subject of the Offer, the "**First Tranche Bonds**"). The First Tranche Bonds will constitute the first tranche of the Company's ₱30,000,000,000 shelf-registration to be registered by the Company with the Securities and Exchange Commission of the Philippines (the "**SEC**").

Capitalized terms used but not otherwise defined herein shall have the meanings ascribed to them in the Indicative Terms and Conditions of the Offer attached hereto as **Annex "A"**.

For this Offer, BDO Capital, BPI Capital, China Bank Capital, and First Metro, as Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners, agree to render the following key services:

- (a) act as Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners of the Offer;
- (b) provide guidance on the structure, timing, organization and terms of the Offer (including time of launch, size of issue, pricing and maturity);
- (c) assist with the preparation of the documentation required for the Offer in conjunction with legal counsels, which documents shall be executed in form and substance reasonably satisfactory to the Company and the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners;

Aboitiz Power Corporation
Fixed Rate Bonds
December 18, 2020

- (d) work and coordinate with the legal counsel of the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners and the legal counsel of the Company on the finalization and execution of the Offer documents;
- (e) coordinate the marketing, virtual roadshow and book-building process for the Offer;
- (f) work with the Company and legal counsel to obtain from the SEC, a registration order and permit to sell for the First Tranche Bonds;
- (g) work with the Company and its legal counsel to obtain a listing and/or admission to trading of the First Tranche Bonds on the Philippine Dealing & Exchange Corporation;
- (h) as set out in the immediately succeeding paragraph and subject to the conditions stated therein, underwrite the First Tranche Bonds on a firm commitment basis.
- (i) as may be determined by the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners, form a syndicate of sub-underwriters and/or selling agents for the Offer and coordinate with the syndicate members; and
- (j) provide such other services as may be agreed with the Company in writing to achieve the successful completion of the Offer.

As set out in item (h) above, the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners seek the mandate to offer and procure investors to purchase the First Tranche Bonds, and to underwrite the Base Offer and, in case the Oversubscription Option is exercised, the Oversubscription Option Bonds, on a firm commitment basis following a successful bookbuild with investors, the execution of the relevant agreements with financial institutions, as applicable (which may or may not also carry the title "*Joint Issue Manager, Joint Lead Underwriter and Joint Bookrunner*"), and subject to (i) satisfactory due diligence by the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners, (ii) compliance with all required regulatory and listing notices and filings, (iii) receipt of all regulatory and internal approvals (including internal committee approvals of the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners and any relevant sub-underwriter, engaged with the consent of the Company), (iv) agreement on customary documentation, (v) signing of underwriting agreements and other necessary agreements on mutually acceptable terms and conditions, and (vi) compliance with (or as applicable, waiver of) conditions precedent as may be specified in the said agreements.

The obligations of the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners are joint, and not solidary, and no Joint Issue Manager, Joint Lead Underwriter and Joint Bookrunner shall be responsible or liable for any act or omission of any other Joint Issue Manager, Joint Lead Underwriter and Joint Bookrunner. The rights expressed to be in favor of more than one Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners shall be exercisable by them individually and separately and are not required to be exercised by them collectively. This letter is not an underwriting agreement and does not obligate the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners or the Company to enter into an underwriting agreement or otherwise proceed with the Offer. The indicative terms of the Offer and of the services are neither complete nor final and are subject to further negotiation and final documentation in the form to be agreed between the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners and the Company. This letter does not create any legally binding obligations on the Joint Issue Managers, Joint Lead Underwriters and Joint Bookrunners and the Company and/or their respective affiliates with respect to the Offer.

Should the foregoing accurately reflect our understanding of the arrangements in respect of the mandate to underwrite the Offer, kindly affix your signature in the space provided in the duplicate copy of this letter enclosed herewith and return such signed copy to us.

This letter may be executed in any number of counterparts each of which shall be an original with the same effect as if the signatures thereto and hereto were upon the same instrument.

Sincerely,

For and on behalf of

BDO Capital & Investment Corporation

**CERTIFICATION
(RE: LEGAL PROCEEDINGS)**

I, **MAILENE M. DE LA TORRE**, Filipino, of legal age, and with office address at NAC Tower, 32nd Street, Bonifacio Global City, 1634 Taguig City, after having been duly sworn in accordance with law, hereby certify that:

1. I am the Assistant Corporate Secretary of **Aboitiz Power Corporation** (the "**Corporation**"), a corporation duly organized and existing under the laws of the Republic of the Philippines, with principal office address at 32nd Street, Bonifacio Global City, 1634 Taguig City.
2. As Assistant Corporate Secretary, I have in my custody, and/or have access to, the records of the Corporation.
3. Other than as disclosed in the Prospectus in relation to the registration statement (the "**Registration Statement**") for the issuance and registration of the Corporation's fixed-rate retail bonds to be registered under the shelf registration program of the Securities and Exchange Commission, and attached hereto as **Annex "A"**, there have been no new developments to the material legal proceedings to which the Corporation or any of its subsidiaries or affiliates is a party or of which any of their respective property is the subject.
4. The foregoing is true and correct, and in accordance with the records of the Corporation.
5. This certification is issued in relation to the filing of the Registration Statement with the SEC.

(Space below intentionally left blank. Signature page follows.)

IN WITNESS WHEREOF, I have hereunto set my hand this 16 December 2020 in Taguig City, Metro Manila.

Annex "A"

GR No. 244450 and GR No. 244659 (formerly CTA En Banc Case No. 1020; CBAA Case No. L-57 and L-59) entitled "*National Power Corporation vs. Luzon Hydro Corporation (LHC), Banggay T. Alwis, Municipal Assessor, Manuel C. Bagayao, Municipal Treasurer of Bakun, Benguet, Erlinda Estepa, Provincial Assessor and Mauricio B. Ambanloc, Provincial Treasurer of the Province of Benguet*", 24 May 2013

The Municipality of Bakun, Province of Benguet issued an assessment against LHC for deficiency RPT for the year 2002 on its machineries in the amount of approximately ₱11 Nn, inclusive of interests and penalties. LHC appealed the assessment to the LBAA. NPC intervened in the proceedings before the LBAA arguing that: (i) the liability for the payment of RPT over the machineries is assumed by NPC under Section 8.6(b) of the Bakun PPA dated 24 November 1996; and (ii) NPC is exempted from the payment of RPT under Section 234 of the LGC, which provides that machineries which are actually, directly and exclusively used by government-owned and controlled corporations engaged in the generation and transmission of electric power are not subject to RPT. The LBAA ruled in favor of the Municipality of Bakun on the ground that NPC could not invoke the exception under Section 234 of the LGC because the machineries covered by the assessment are not yet owned by NPC.

NPC appealed the ruling of the LBAA to the Central Board of Assessment Appeals ("CBAA"), which appeal was docketed as CBAA Case No. L-57/59. The Province of Benguet, through the Office of the Governor, and LHC negotiated to arrive at a possible settlement. In December 2009, NPC moved for the issuance of a decision based on a compromise agreement. The Province of Benguet opposed NPC's motion and prayed that the CBAA continue hearing the case and resolve the same on the merits. LHC filed its reply to the Province of Benguet's opposition.

On 03 July 2012, CBAA dismissed the appeals of LHC and NPC for lack of merit. LHC then filed its Motion for Reconsideration. The CBAA noted both LHC and NPC's motions, and gave the Province of Benguet ten days to file its comment/opposition.

On 11 October 2013, LHC, NPC, and the Province of Benguet filed a Joint Motion for Judgment based on a Compromise Agreement with the Court of Tax Appeals ("CTA"). The CTA En Banc ("CTA EB") ordered the parties to submit additional documents in support of the Joint Motion for Judgment, and held in abeyance the resolution of the Joint Motion for Judgment based on Compromise pending the submission of certain documents.

On 02 September 2015, LHC received a Manifestation from the Province of Benguet stating that the: (i) Sangguniang Panlalawigan of Benguet's Resolution authorizing their Provincial Governor to enter into the 29 January 2004 Compromise Agreement; and (ii) Sangguniang Bayan of Bakun, Benguet's Resolution authorizing its Municipal Mayor Marcelo Contada to enter into the December 2007 Compromise Agreement and 18 January 2008 MOA, do not exist.

Despite close coordination with both the Province of Benguet and the Municipality of Bakun for the issuance of the necessary resolutions to ratify the actions previously taken by their respective Sanggunian, no such action has been taken by the Sangguniang Panlalawigan of Benguet and the Sangguniang Bayan of Bakun. Given the foregoing and in the interest of substantial justice, LHC filed a Motion to Resolve the Joint Motion for Judgment based on Compromise Agreement on 29 December 2015, attesting that the Province of Benguet and the Municipality of Bakun made representations that they were authorized to execute the

Compromise Agreement and that they accepted the Compromise Payments made by LHC pursuant thereto. As a consequence, the Province of Benguet and the Municipality of Bakun are estopped from assailing the Compromise Agreement.

In March 2016, the CTA EB denied LHC's Motion to Resolve the Joint Motion for Judgment based on Compromise. The CTA EB also denied LHC's subsequent Motion for Reconsideration.

On 12 December 2016, LHC filed with the SC a Petition for Certiorari assailing the above resolutions of the CTA. On 07 June 2017, the SC dismissed LHC's Petition for Certiorari and in December 2019, issued the Entry of Judgment.

On 16 January 2020, the Municipal Treasurer of Bakun issued RPT Bills for the period covering 2002 to 2019 amounting to ₱284,448,073.24.

On 03 February 2020, LHC wrote to the Provincial Governor requesting for the amendment of the RPT Bills to align with the MOA dated 20 December 2012 by and between LHC and the Province of Benguet. In the same letter, LHC also cited EO No. 88, Series of 2019, which reduced the liability for RPT of IPPs such as LHC with BOT Agreements with Government Owned and Controlled Corporations (GOCCs) to an amount equivalent to the tax due if computed at 15% assessment level and condoned all interest and penalties for all years up to 2018.

On 14 September 2020, LHC filed a Petition with the RTC of La Trinidad, Benguet, praying for the issuance of a writ of mandamus to compel the Province of Benguet to comply with the provisions of the EO and recompute the RPT liabilities of LHC.

On 28 September 2020, the RTC of La Trinidad issued an Order directing the respondents to comment on LHC's petition within ten (10) days from receipt thereof.

Supreme Court GR No. 223403 and 223460-61 (formerly CTA En Banc Case Nos. 1024 and 1096; CBAA Case Nos. L-96 and L-99) "*Luzon Hydro Corporation and the National Power Corporation vs. The Local Board of Assessment Appeals of the Province of Ilocos Sur, Fatima Tenorio, in her official capacity as the Provincial Assessor of the Province of Ilocos Sur, Antonio A. Gundran, in his capacity as the Provincial Treasurer of the Province of Ilocos Sur*", 02 July 2003

LHC has an RPT dispute with the Province of Ilocos Sur and the Municipality of Alilem since 2003 when the Municipality assessed LHC for RPT over the portions of the Bakun Hydro Electric Plant located within the territorial jurisdiction of the Municipality. LHC protested the assessment, with NPC intervening in the proceedings since it had contractually assumed the obligation to pay RPT in the PPA. LHC escalated the protest to the CTA EB on the issue of which between NPC and LHC is obligated to pay the RPT. The CTA EB ruled that LHC, being the actual, direct and exclusive user of the subject properties, is the one obligated to pay RPT. This ruling was sustained by the SC with finality in a resolution dated 24 September 2018.

Meanwhile in 2014, while the case was pending before the CTA EB, then President Aquino issued EO No. 173, which reduced the liability for RPT of IPPs such as LHC to an amount equivalent to the tax due if computed at 15% assessment level and condoned all interest and penalties for all years up to 2014. More EOs of the same nature were subsequently issued, the latest being, EO No. 88 Series of 2019, dated 13 August 2019 ("EO 88") issued by President Duterte.

With the finality of the SC's determination that it is liable to pay RPT, LHC wrote to Gov. Singson on 18 December 2018 signifying its willingness to settle the outstanding RPT obligation, but at the reduced amount pursuant to the EOs. There was no response until 13 August 2019, when LHC received a Notice of Tax Delinquency from the Municipality with respect to four properties, computed based on an 80% assessment level. LHC received a second Tax Delinquency Notice on 18 September 2019 for seven other properties. The second tax delinquency notice covered the lodging house, admin buildings, warehouses, tunnel steel lining and industrial switchyard. Thereafter, the Municipality of Alilem issued warrants of levy for the properties covered by the notices, and scheduled them for auction sale.

LHC filed two separate "Petitions for Prohibition and Mandamus with prayer for TRO and Preliminary Injunction" to cover the two notices of auction sale, challenging the correctness of the amount assessed as RPT and to prevent the auction sale of the assets. The actions also sought the enforcement of the EOs directing the reduction of RPT on property, machinery and equipment actually and directly used by IPPs under BOT contracts (however denominated), and condoning related RPT interest and penalties.

The RTC of Tagudin, Ilocos Sur acting on both Petitions, issued two TROs enjoining the Municipality of Alilem from selling at public auction LHC's real properties for a period of 20 days. LHC, on its part, filed its Position Paper on 12 December 2019 and Supplemental Position Paper 19 December 2019, in compliance with the aforesaid court orders. On 11 February 2020, LHC filed its Memorandum. On 14 February 2020, the case was deemed submitted for resolution.

On 17 April 2020, LHC filed a Manifestation to inform the RTC of Tagudin, Ilocos Sur about the parties' renewed attempt to forge a settlement.

On 22 July 2020, LHC and the Province of Ilocos Sur entered into a Compromise Agreement ("CA"). On 23 July 2020, the Parties filed a Joint Motion to Render Judgment Based on Compromise. The RTC of Tagudin, Ilocos Sur approved the CA and promulgated the Judgment Based on Compromise Agreement on 27 July 2020.

On 4 August 2020, LHC complied with its obligation under the CA by paying the amounts stipulated therein.

On 17 August 2020, LHC filed with the RTC of Tagudin, Ilocos Sur a Manifestation (Re Payment of Amounts Stated in the Compromise Agreement) With Motion To Release TRO Bond. In the Manifestation with Motion, LHC asked the RTC of Tagudin, Ilocos Sur to: (a) note the payments made on 4 August 2020 by LHC to Ilocos Sur of the four amounts mentioned in the CA; (b) declare that LHC has fully complied with its obligation under the CA to pay the said amounts; and (c) release the TRO bond of ₱200,000.00 posted by LHC on 16 December 2019.

On 11 September 2020, the RTC of Tagudin, Ilocos Sur issued an Order noting LHC's full compliance with its obligations under the Compromise Agreement and directing the release to LHC of the TRO bond previously posted.

G.R. No. 210245 entitled "*Bayan Muna Representative Neri Javier Colmenares, et al. vs. Energy Regulatory Commission, et al.*", Supreme Court; 19 December 2013

G.R. No. 210255 entitled "*National Association of Electricity Consumers for Reforms, et al. vs. Manila Electric Company, et al.*", Supreme Court; 20 December 2013

G.R. No. 210502 entitled "*Manila Electric Company, et al. v Philippine Electricity Market Corporation, et al.*", Supreme Court; 08 January 2014

On 19 December 2013, Bayan Muna representatives filed a Petition for Certiorari against ERC and Meralco with the SC, questioning the alleged substantial increase in Meralco's power rates for the billing period of November 2013. These cases raised, among others, the: (i) legality of Sections 6, 29 and 45 of the EPIRA, (ii) failure of ERC to protect consumers from high prices of electricity, and (iii) alleged market collusion by the generation companies. These cases were consolidated by the SC, which issued a TRO preventing Meralco from collecting the increase in power rates for the billing period of November 2013. The TRO was subsequently extended by the SC for another 60 days, or until 22 April 2014. On 22 April 2014, the SC extended the TRO indefinitely.

Meralco filed a counter-petition impleading all generation companies supplying power to the WESM to prevent the generation companies from collecting payments on power purchased by Meralco from the WESM during the contested billing period. The SC also ordered other power industry participants (DOE, ERC, PEMC, PSALM, and the generation companies) to respond to Meralco's counter-petition.

The SC set the consolidated cases for oral arguments on 21 January 2014, 04 and 11 February 2014. After oral arguments, all parties were ordered to file their comments and/or memoranda. Meralco has been prevented from collecting the differential increase of the price hike. Because of Meralco's counter-petition against the generation companies, PEMC withheld settlement of the power purchases during the covered period.

On 07 February 2019, petitioners in G.R. No. 210245 filed their Motion for Directions, Status Updates and Immediate Resolution. As of 30 September 2020, these cases before the Supreme Court are still pending resolution and the Supreme Court has not lifted the TRO.

SC GR No. 224341 entitled "*Philippine Electricity Market Corporation vs. Therma Mobile, Inc.*", Supreme Court

[CA G.R. SP No. 140177 entitled "*PEMC v. Therma Mobile Inc.*", Court of Appeals, Manila

SP Proc. No. 12790 entitled "*Therma Mobile Inc. vs. PEMC*", Regional Trial Court Branch 157-Pasig City

PEMC ECO-2014-0009 entitled "*Therma Mobile, Inc. (TMO Power Plants Units 1-4) Possible Non-Compliance with Must-Offer-Rule, Investigation Summary Report, dated 04 August 2014*"

The Enforcement and Compliance Office of the Philippines Electricity Market Corporation (PEMC-ECO) conducted an investigation on TMO for possible non-compliance with the Must-Offer-Rule for the period 26 October 2013 to 25 December 2013. PEMC-ECO concluded that TMO was non-compliant with the Must-Offer-Rule for 3,578 intervals and recommended a penalty of ₱234.9 mn.

TMO filed its letter request for reconsideration on 05 September 2014, contending that it did not violate the Must-Offer Rule because its maximum available capacity was limited to 100 MW due to: (i) the thermal limitations of the old TMO 115-kV transmission line, and (ii) the technical and mechanical constraints of the old generating units and the component engines of the TMO power plants which were under various stages of rehabilitation after having been non-operational for five years. Although TMO's rated capacity is 234 MW (net), it could only

safely and reliably deliver 100 MW during the November and December 2013 supply period because of limitations of its engines and the 115-kV transmission line. This temporary limitation of TMO's plant was confirmed during a dependable capacity testing conducted on 21 November 2013.

In its letter dated 30 January 2015, the PEMC Board of Directors denied TMO's request for reconsideration and confirmed its earlier findings. On 13 February 2015, TMO filed a Notice of Dispute with PEMC to refer the matter to dispute resolution under the WESM Rules, WESM Dispute Resolution Market Manual and the ERC-PEMC Protocol.

On 16 February 2015, TMO filed a petition for TRO before the Pasig City RTC. In its Order dated 24 February 2015, the RTC granted TMO a 20-day temporary order of protection and directed PEMC to: (i) refrain from demanding or collecting the amount of ₱234.9 mn as financial penalty; (ii) refrain from charging interest on the financial penalty and having the same accrue; and (iii) refrain from transmitting PEMC-ECO's investigation report to the ERC. TMO posted a bond in the amount of ₱234.9 mn to answer for any damage that PEMC may suffer as a result of the Order. On 01 April 2015, the RTC rendered a Decision in favor of TMO. PEMC appealed the RTC decision before the Court of Appeals ("CA") and sought to reverse and set aside the decision of the RTC.

On 14 December 2015, the CA rendered a Decision denying PEMC's Petition for Review and affirming the 01 April 2015 Decision of RTC in favor of TMO. On 06 June 2016, PEMC filed a Petition for Review on Certiorari with the SC to assail the 14 December 2015 CA Decision. TMO filed its Comment to PEMC's Petition for Review and PEMC filed a Reply. In its 29 March 2017 Resolution, the SC noted TMO's Comment and PEMC's Reply.

As of 30 September 2020, PEMC's Petition is still pending before the Supreme Court.

G.R. No. 24449 and 244455-56 entitled "*Energy Regulatory Commission vs. Therma Mobile, Inc., Manila Electric Company, and AP Renewables, Inc.*", SC, First Division;

[CA G.R. SP. No. 152588 entitled "*Therma Mobile, Inc. vs. Energy Regulatory Commission, Atty. Alfredo P. Vergara, Jr. and Engr. Nelson D. Canlas, in their capacity as Investigating Officers (IOs) of the Investigatory Unit constituted by the Honorable Commission pursuant to its Office Order No. 38, Series of 2013 dated 26 December 2013, as amended by Office Order No. 82, Series of 2017*", Court of Appeals, Manila;

ERC Case No. 2015-025 MC entitled "*Atty. Isabelo Joseph P. Tomas II, in his capacity as the Investigating Officer of the Investigatory Unit constituted by the Honorable Commission pursuant to its Office Order No. 38, Series of 2013 dated December 26, 2013 vs Meralco and Therma Mobile, Inc. [For Violation of Section 45 of RA 9136, otherwise known as EPIRA, Rule 11, Section 1 of IRR of the EPIRA (Commission of an Anti-Competitive Behavior, particularly Economic Withholding)]*", ERC Pasig City, 04 June 2015;

ERC Case No. 2015-027 MC entitled "*Atty. Isabelo Joseph P. Tomas II, in his capacity as the Investigating Officer of the Investigatory Unit constituted by the Honorable Commission pursuant to its Office Order No. 38, Series of 2013 dated 26 December 2013 vs Therma Mobile, Inc. [For Violation of Section 45 of RA 9136, otherwise known as EPIRA, Rule 11, Section 1 and 8(e) of IRR of the EPIRA (Commission of an Anti-Competitive Behavior, particularly Physical Withholding)]*", ERC, Pasig City, 04 June 2015]

Pursuant to the allegations in the Bayan Muna SC case, the Investigation Unit of ERC (“ERC-IU”) conducted investigations on the alleged anti-competitive behavior and market abuse committed by some participants of the WESM, including TMO.

On 24 January 2014, ERC issued a Subpoena Ad Testificandum and Duces Tecum directing TMO’s representative to give clarification on matters pertaining to offers per trading interval involving the November to December 2013 supply months and provisions on the PSA between Meralco and TMO. The representative was likewise directed to bring relevant documents.

On 29 January 2014, TMO filed its Compliance and Submission to the Subpoena Duces Tecum. Further, on 11 March 2014, TMO filed its Memorandum, arguing that it did not commit any act constituting anti-competitive behavior and/ or misuse of market power. TMO then requested ERC-IU to terminate and close the investigation.

On 20 May 2015, ERC-IU issued its report and found that in bidding the way they did for the November and December 2013 supply months, TMO and Meralco allegedly committed Economic Withholding, and TMO committed Physical Withholding, and thus recommended the filing of cases for Anti-Competitive Behavior against TMO and Meralco.

On 23 June 2015, ERC ordered Meralco and TMO to file their respective Answers to the Complaint. On 24 August 2015, TMO filed its Answers praying for the dismissal of the Complaints.

In its Manifestation dated 07 October 2016, ERC-IU manifested the resignation of Atty. Isabelo Tomas as Investigating Officer (IO) and the appointment of Director Alfredo Vergara, Jr. and Engr. Nelson Canlas as new IOs. In a separate pleading, the new IOs filed their Reply to various motions filed by TMO.

On 27 July 2016, Meralco filed in ERC Case No. 2015-025MC an Urgent Motion to Dismiss with Motion to Suspend Proceedings on the ground that ERC has no jurisdiction over anti-competitive behavior cases, and that jurisdiction is with Philippine Competition Commission (PCC). TMO filed in the same case a Manifestation and Motion adopting Meralco’s Urgent Motion to Dismiss, and sought the dismissal of ERC Case No. 2015-027MC for lack of jurisdiction.

In an Order dated 02 February 2017, ERC denied Meralco’s and TMO’s motions to dismiss for lack of jurisdiction. TMO filed its Motion for Reconsideration, which the ERC subsequently denied.

On 18 September 2017, TMO filed a Petition for Certiorari with the CA, praying that the CA: (i) issue a TRO commanding the ERC to desist from conducting further proceedings in ERC Case No. 2015-025MC and ERC Case No. 2015-027MC; (ii) after proceedings, issue a Writ of Preliminary Injunction; and (iii) annul and set aside the 02 February 2017 and 20 June 2017 ERC Orders.

In a Resolution dated 02 October 2017, the CA directed the respondents to file their comment on TMO’s Petition for Certiorari and denied TMO’s prayer for a TRO. TMO filed a Motion for Partial Reconsideration of the CA’s 02 October 2017 Resolution, which the CA denied. In a Resolution dated 28 January 2019, the CA denied the motions for reconsideration filed by TMO, Meralco and APRI and the motion for partial reconsideration filed by the ERC.

Subsequently, ERC filed a Petition dated 21 February 2019 with the SC via Rule 45 of the Rules of Court. In the Petition, ERC challenged the CA Decision and Resolution insofar as the CA ruled that the Philippine Competition Act (“PCA”) repealed the parts of the EPIRA that granted jurisdiction to ERC over anti-competition matters in the energy sector, and that PCC has original and exclusive jurisdiction over anti-competition matters, including those affecting the energy sector after the effectivity of the PCA.

In a Resolution dated 30 July 2019, the SC directed the respondents to file their Comments on ERC’s Petition. On 25 November 2019, TMO filed its Manifestation with the SC.

As of 30 September 2020, ERC’s Petition is still pending with the SC.

G.R. No. 24449 and 244455-56 entitled “Energy Regulatory Commission vs. Therma Mobile, Inc., Manila Electric Company, and AP Renewables, Inc.”, SC, First Division;

[CA G.R. SP. No. 152613 entitled, “AP Renewables, Inc. vs. Energy Regulatory Commission and Directors Alfredo P. Vergara, Jr. and Engr. Nelson Canlas, in their capacity as the Investigating Officers of the Investigatory Unit of the Energy Regulations Commission”, Court of Appeals, Manila;

ERC Case No. 2015-038 MC entitled “Energy Regulatory Commission vs. AP Renewables, Inc. ([Violation of Section 45 of EPIRA, Rule 11, Sec. 1 and 8 (E) of the Implementing Rules and Regulations (Commission of an Anti-Competitive Behavior, particularly, Physical Withholding)]”, ERC, Pasig City, 09 June 2015]

ERC-IU conducted investigations on the alleged anti-competitive behavior and market abuse committed by some participants of the WESM, including APRI. On 20 May 2015, ERC-IU released its report holding that APRI’s non-compliance with the Must-Offer Rule for four intervals is tantamount to Physical Withholding which, it alleged, is a form of anti-competitive behavior.

On 09 June 2015, complainant Atty. Isabelo Joseph Tomas, III, Investigating Officer of the IU, filed the complaint for Anti-Competitive Behavior against APRI. On 23 June 2015, ERC issued an Order directing APRI to file its answer within 15 days from notice.

On 01 July 2015, APRI received the summons and complaint. Subsequently, on 07 July 2015, APRI filed a Motion praying that: (a) the Complainant serve upon APRI the complete copy of the complaint and its annexes; (b) the Complainant clarify and put on record the answer to the following issues: (i) which of Makban Plants’ generating units is the subject of the complaint; and (ii) the dates and times of the four intervals mentioned in the complaint during which APRI allegedly offered “less than its total registered capacity.” Meanwhile, on 29 July 2015, APRI filed its Answer *ad cautelam*.

In its Manifestation dated 07 October 2016, ERC-IU manifested the resignation of Atty. Isabelo Tomas as IO and the appointment of new IOs. The new IOs filed their Reply to various motions filed by APRI.

Subsequently, APRI filed a Motion to Dismiss dated 29 July 2016, arguing that jurisdiction over the case is vested in the PCC. APRI also filed its Ad Cautelam Pre-Trial Brief and Judicial Affidavits. ERC denied APRI’s Motion to Dismiss, and APRI’s subsequent Motion for Reconsideration.

On 19 September 2017, APRI filed a Petition for Certiorari (with application for TRO and Writ of Preliminary Injunction) with the CA (CA G.R. SP. No. 152613), praying for the CA to: (i) issue a TRO commanding ERC to desist from conducting further proceedings in ERC Case. No. 2015-038MC; (ii) after proceedings, issue a Writ of Preliminary Injunction; and (iii) annul and set aside the 02 February 2017 and 20 June 2017 ERC Orders, and dismiss the complaint and ERC proceedings with prejudice.

On 06 November 2017, the IOs filed a Motion for Consolidation seeking to consolidate CA G.R. SP. No. 152613 with TMO's Petition in CA GR. No. 152588. Thereafter, the CA issued its Notice of Judgment and Decision dated 23 May 2018, which denied APRI's Petition. On 18 June 2018, APRI filed its Motion for Reconsideration of the CA's Decision dated 23 May 2018.

In a Resolution dated 28 January 2019, the CA denied the motions for reconsideration filed by APRI, Meralco, and TMO and the motion for partial reconsideration filed by ERC.

Subsequently, ERC filed a Petition dated 21 February 2019 with the SC via Rule 45 of the Rules of Court. In the Petition, ERC challenged the CA Decision and Resolution insofar as the CA ruled that the PCA repealed the parts of the EPIRA that granted to ERC jurisdiction over anti-competition matters in the energy sector, and that the PCC has original and exclusive jurisdiction over anti-competition matters including those affecting the energy sector after the effectivity of the PCA.

In a Resolution dated 30 July 2019, the SC directed the respondents to file their Comments on ERC's Petition. On 4 November 2019, APRI filed its Comment with the SC. As of 30 September 2020, ERC's Petition is still pending with the Supreme Court.

G.R. No. 246621-30, entitled "*Energy Regulatory Commission vs. San Miguel Energy Corporation, et al*" SC, Third Division; G.R. Nos 247352-61, entitled "*Manila Electric Company vs. San Miguel Energy Corporation, et al.*" SC, Third Division.

[CA-G.R. Nos. 138120, 138223, 138272, entitled "*AP Renewables, Inc. vs. Energy Regulatory Commission*", "*Therma Luzon, Inc. vs. Energy Regulatory Commission*", and "*Therma Mobile, Inc. vs. Energy Regulatory Commission*", Petition for Review on Certiorari, Court of Appeals, Manila;

ERC Case No. 2014-021 MC entitled "*In the Matter of the Prices in the WESM for the Supply Months of November and December 2013 and the Exercise by the Commission of its Regulatory Powers to Intervene and Direct the Imposition of Regulated Prices therein without Prejudice to the On-going Investigation on the Allegation of Anti- Competitive Behavior and Possible Abuse of Market Power Committed by Some WESM Participants*", 28 March 2014]

ERC conducted an investigation on the alleged collusion by the generation companies to raise the WESM prices. Subsequently, ERC issued an Order in ERC Case No. 2014-021 MC dated 03 March 2014 (the "ERC Order"), declaring as void the Luzon WESM prices during the November and December 2013 supply months. ERC also declared the imposition of regulated prices for such billing periods and directed PEMC to calculate the regulated prices and implement the same in the revised November and December 2013 WESM bills of the concerned distribution utilities in Luzon, except for Meralco whose November 2013 WESM bill was maintained in compliance with the TRO issued by the Supreme Court.

ERC also ordered PEMC, through its Enforcement and Compliance Office (“ECO”) to conduct an investigation, within a period of no less than 90 days, on the alleged violation of the Must-Offer-Rule.

Pursuant to the ERC Order, on 18 March 2014, PEMC issued adjusted billing statements for all generators trading in the WESM, including Cebu-based EAUC and CPPC, recalculating the WESM prices.

The Company’s Affiliates and Subsidiaries, APRI, TLI, TMO, AESI, AdventEnergy, SNAP-Magat, SNAP-Benguet, CPPC, and EAUC filed their respective Motions for Reconsideration, questioning the validity of the ERC Order on the ground of lack of due process, among others. In its 27 March 2014 Order, ERC ordered deferral of PEMC’s implementation of the adjusted billing statements for forty 45 days. This was subsequently extended with no clear timeline by ERC in its Order dated 06 June 2014.

ERC, in its Order dated 15 October 2014, denied said Motions for Reconsideration. SNAP-Benguet, SNAP-Magat, APRI, TLI, and TMO filed their Petitions for Review (the “Petitions”) before the CA on 19 and 24 November, 01 and 04 December 2014, respectively. The CA ordered the consolidation of the Petitions on 09 October 2015.

On 07 November 2017, the CA granted the Petitions. ERC’s 03 March 2014 Order, among other orders, were declared null and void, and the Luzon WESM market prices in November and December 2013 were declared valid and therefore reinstated.

Thereafter, ERC and Meralco filed their respective motions for reconsideration. Several entities also filed motions to intervene in the case. APRI, TLI, and TMO filed their oppositions to the motions for reconsideration and motions to intervene. The CA denied the motions to intervene filed by several entities, which thereafter filed their motions for reconsideration. In an Omnibus Resolution dated 29 March 2019, the CA denied the motions for reconsideration by ERC and Meralco, as well as the motions for reconsideration filed by several entities that wanted to intervene in the case.

In June 2019, ERC, Meralco, and several entities filed their Petitions for Review on Certiorari with the Supreme Court, asking the latter to reverse and set aside the CA Decision dated 7 November 2017 and the CA Omnibus Resolution dated 29 March 2019. They also prayed that the SC reinstate the ERC Orders.

In September to October 2019, the Supreme Court issued Resolutions denying the Petitions for Review on Certiorari filed by several entities, including Calco Industries Inc., Paperland, Alyansa ng mga Grupong Haligi at Teknolohiya Para sa Mamamayan (AGHAM), Ateneo de Manila University, Citizenwatch, Riverbanks Dev’t. Corp., Steel Angles Shapes & Sections Manufacturers, for failure to show any reversible error on the part of the CA in promulgating the Decision dated 07 November 2017 and Omnibus Resolution dated 29 March 2019.

In a Resolution dated 11 September 2019, the SC required respondents to file their Comments to ERC’s Petition for Review on Certiorari in G.R. No. 246621-30 (“ERC Case”). On 28 January 2020, TMO and TLI filed their Consolidated Comment (to the Petition for Review on Certiorari dated 13 June 2019); whereas APRI filed its Comment (on the Petition for Review on Certiorari dated 13 June 2019) on 11 February 2020.

In June 2020, APRI, TMO and TLI received an SC Resolution requiring the respondents to file their Comments to Meralco’s Petition in G.R. Nos 247352-61 (“Meralco Case”). On July 9,

2020, TMO and TLI filed their Consolidated Comment. On the same day, APRI filed its Comment to Meralco's Petition and a Motion to Consolidate the cases involving ERC and Meralco Petitions.

In September 2020, APRI, TMO and TLI received an SC Resolution in the ERC Case requiring the respondents to file their respective comments on the Motion for Leave to Intervene and to Admit Attached Petition-in-Intervention filed by San Beda University. On October 2, 2020, APRI filed its Opposition to San Beda University's motion; while TMO and TLI filed their Opposition on October 21, 2020.

ERC Case No. 2013-077 MC entitled "*In Re: Petition for Dispute Resolution: Manila Electric Company (Meralco) vs. South Premier Power Corporation (SPPC), Masinloc Power Partners Company, Ltd. (MPPCL), AP Renewables, Inc. (APRI), Therma Luzon, Inc. (TLI), San Miguel Energy Corporation (SMEC) and SEM-Calaca Power Corporation (SCPC)*", 29 August 2013

On 29 August 2013, Meralco filed a petition before ERC against TLI and APRI, among other Successor Generating Companies (SGCs), docketed as ERC Case No. 2013-077 MC, where Meralco prayed that it be refunded by the respondent-SGCs of the transmission line losses. The petition arose from a claim of refund on account of the alleged over-recoveries of transmission line losses.

The petition was filed by Meralco pursuant to ERC Order dated 04 March 2013 and 01 July 2013 in ERC Case No. 2008- 083 MC where the SGCs were not parties to.

On 20 September 2013, APRI and TLI, together with the other SGCs, filed a Joint Motion to Dismiss arguing that Meralco's petition should be dismissed for failure to state a cause of action and ERC's lack of jurisdiction over the subject matter of the case. The motion argued that: (i) Meralco cannot base its cause of action against the SGCs on a decision issued by ERC in another case where none of the SGCs were made parties to the case; and (ii) Meralco's claim is in a nature of a claim for sum of money which is properly within the jurisdiction of regular courts. The Joint Motion to Dismiss has since then been submitted for resolution with ERC.

As of 30 September 2020, ERC has yet to render its decision on the Joint Motion to Dismiss.

STATEMENT OF MANAGEMENT'S RESPONSIBILITY
FOR FINANCIAL STATEMENTS

The management of Aboitiz Power Corporation is responsible for the preparation and fair presentation of the Parent financial statements including the schedules attached therein, for the years ended December 31, 2019, 2018 and 2017, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

The Board of Directors reviews and approves the financial statements including the schedules attached therein, and submits the same to the stockholders.

SyCip Gorres Velayo & Co., the independent auditor appointed by the stockholders, has audited the financial statements of the Company in accordance with Philippine Standards on Auditing, and its report to the stockholders, has expressed its opinion on the fairness of presentation upon completion of such audit.

INDEPENDENT AUDITOR'S REPORT

The Board of Directors and Stockholders
Aboitiz Power Corporation
32nd Street, Bonifacio Global City
Taguig City, Metro Manila
Philippines

Report on the Audit of the Parent Company Financial Statements

Opinion

We have audited the parent company financial statements of Aboitiz Power Corporation (the Company), which comprise the parent company balance sheets as at December 31, 2019 and 2018, and the parent company statements of income, parent company statements of comprehensive income, parent company statements of changes in equity and parent company statements of cash flows for each of the three years in the period ended December 31, 2019, and notes to the parent company financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying parent company financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2019 and 2018, and its financial performance and its cash flows for each of the three years in the period ended December 31, 2019 in accordance with Philippine Financial Reporting Standards (PFRSs).

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Parent Company Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the parent company financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Parent Company Financial Statements

Management is responsible for the preparation and fair presentation of the parent company financial statements in accordance with PFRSs, and for such internal control as management determines is necessary to enable the preparation of parent company financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Parent Company Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent company financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the parent company financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the parent company financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the parent company financial statements, including the disclosures, and whether the parent company financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on the Supplementary Information Required Under Revenue Regulations 15-2010

Our audits were conducted for the purpose of forming an opinion on the parent company financial statements taken as a whole. The supplementary information required under Revenue Regulations 15-2010 in Note 22 to the parent company financial statements is presented for purposes of filing with the Bureau of Internal Revenue and is not a required part of the basic financial statements. Such information is the responsibility of the management of the Company. The information has been subjected to the auditing procedures applied in our audit of the parent company financial statements. In our opinion, the information is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

The engagement partner on the audit resulting in this independent auditor's report is Maria Veronica Andresa R. Pore

ABOITIZ POWER CORPORATION

NOTES TO PARENT COMPANY FINANCIAL STATEMENTS

1. Corporate Information

Aboitiz Power Corporation (the Company) was incorporated in the Philippines and registered with the Securities and Exchange Commission on February 13, 1998. The Company is a publicly-listed holding company of the entities engaged in power generation and power distribution in the Aboitiz Group. As of December 31, 2019, Aboitiz Equity Ventures, Inc. (AEV, a publicly-listed Company incorporated in the Philippines) owns 76.98% of the Company. The Company's ultimate parent is Aboitiz & Company, Inc. (ACO).

The Company's registered office address is 32nd Street, Bonifacio Global City, Taguig City, Metro Manila.

The parent company financial statements were approved and authorized for issue in accordance with a resolution by the Board of Directors (BOD) of the Company on March 6, 2020.

2. Basis of Preparation, Statement of Compliance and Summary of Significant Accounting Policies

Basis of Financial Statement Preparation

The accompanying parent company financial statements have been prepared on a historical cost basis, except for derivative financial instruments and financial assets at FVTPL which are measured at fair value. The parent company financial statements are presented in Philippine peso which is the Company's functional currency.

Statement of Compliance

The parent company financial statements are prepared in compliance with Philippine Financial Reporting Standards (PFRSs).

Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year, except for the new and revised standards and Philippine Interpretations which were applied starting January 1, 2019. The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

• *PFRS 16, Leases*

PFRS 16 was issued in January 2016 and it replaces Philippine Accounting Standard (PAS) 17, *Leases*, IFRIC 4, *Determining whether an Arrangement contains a Lease*, SIC-15, *Operating Leases-Incentives* and SIC-27, *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*. PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under PAS 17.

Lessor accounting under PFRS 16 is substantially unchanged from PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases. Therefore, PFRS 16 did not have an impact for leases where the Company is the lessor.

The Company adopted PFRS 16 using the modified retrospective method of adoption with the date of initial application of January 1, 2019. Under this method, the standard is applied retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application without restating comparative information. The Company has elected to apply PFRS 16 transition relief to contracts that were previously identified as leases applying PAS 17 and IFRIC 4. The Company will therefore not apply PFRS 16 to contracts that were not previously identified as containing a lease applying PAS 17 and IFRIC 4.

The Company has elected to use the exemption proposed by the standard on the lease contracts for which the lease terms end within 12 months from the date of initial application. Lease payments on short term leases are recognized as expense on a straight-line basis over the lease term.

The effects of adoption on the financial statements are as follows:

	As at January 1, 2019
Increase (decrease) in balance sheets:	
Other current assets	(₱5,021,619)
Property and, plant and equipment	46,702,778
Total Assets	₱41,681,159
Lease liabilities	₱64,347,091
Retained earnings	(22,665,932)
Total Liabilities and Equity	₱41,681,159

Based on the above, as at January 1, 2019:

- Property and equipment were recognized amounting to ₱46.7 million representing the amount of right-of-use assets set up on transition date.
- Additional lease liabilities of ₱64.4 million were recognized.
- Prepayments of ₱5.0 million related to previous operating leases were derecognized.
- The net effect of these adjustments had been adjusted to retained earnings amounting to ₱22.7 million.

Prior to adoption of PFRS 16, the Company classified each of its leases (as lessee) at the inception dates as either a finance lease or an operating lease. A lease was classified as a finance lease if it transferred substantially all of the risks and rewards incidental to ownership of the lease asset to the Company; otherwise it was classified as an operating lease. Finance leases were capitalized at the commencement of the lease at the inception date fair value of the lease property or, if lower, at the present value of the minimum lease payments. Lease payments were apportioned between interest (recognized as finance costs) and reduction of the lease liability. In an operating lease, the leased property was not capitalized and the lease payment

were recognized as rent expense in the statements of comprehensive income on a straight-line basis over the lease term. Any prepaid rent was recognized under "Other current assets."

Upon adoption of PFRS 16, the Company applied a single recognition and measurement approach for all leases, except for short-term leases. The standard provides specific transition requirements and practical expedients, which have been applied by the Company.

Leases previously accounted for as operating leases

The Company recognized right-of-use assets and lease liabilities for those leases previously classified as operating leases, except for short-term leases. The right-of-use assets for most leases were recognized based on the carrying amount as if the standard had always been applied, apart from the use of incremental borrowing rate at the date of initial application. Lease liabilities were recognized based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application.

The Company also applied the following practical expedients provided by the standard:

- Use of a single discount rate to a portfolio of leases with reasonably similar characteristics, and
- Apply the short-term leases exemptions to leases with lease term that ends within 12 months of the date of initial application (short-term leases).

The lease liabilities as at January 1, 2019 can be reconciled to the operating lease commitments as of December 31, 2018 as follows:

Operating lease commitments as at December 31, 2018	₱77,469,182
Incremental borrowing rate as at January 1, 2019	8.52%
<u>Lease liabilities as at January 1, 2019</u>	<u>₱64,347,091</u>

- *Amendments to PFRS 9, Prepayment Features with Negative Compensation*

Under PFRS 9, a debt instrument can be measured at amortized cost or at fair value through other comprehensive income, provided that the contractual cash flows are 'solely payments of principal and interest on the principal amount outstanding' (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to PFRS 9 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract.

This amendment does not have an impact on the financial statements.

- Amendments to PAS 19, *Employee Benefits, Plan Amendment, Curtailment or Settlement*

The amendments to PAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event
- Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognized in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognized in other comprehensive income.

Since the Company's current practice is in line with these amendments, these amendments do not have any effect on its financial statements.

- Amendments to PAS 28, *Long-term Interests in Associates and Joint Ventures*

The amendments clarify that an entity applies PFRS 9 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). This clarification is relevant because it implies that the expected credit loss model in PFRS 9 applies to such long-term interests. The amendments also clarified that, in applying PFRS 9, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognized as adjustments to the net investment in the associate or joint venture that arise from applying PAS 28, *Investments in Associates and Joint Ventures*.

Since the Company does not have such long-term interests in associates and joint ventures, the amendments do not have an impact on its financial statements.

- Philippine Interpretation IFRIC-23, *Uncertainty over Income Tax Treatments*

The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12, *Income Taxes*, and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

The entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments and use the approach that better predicts the resolution of the uncertainty. The entity shall assume that the taxation authority will examine amounts that it has a right to examine and have full knowledge of all related information when making those examinations. If an entity concludes that it is not probable that the taxation authority will accept an uncertain tax treatment, it shall reflect the effect of the uncertainty for each uncertain tax treatment using the method the entity expects to better predict the resolution of the uncertainty.

Upon adoption of the Interpretation, the Company has assessed whether it has any uncertain tax position. The Company applies significant judgement in identifying uncertainties over its income tax treatments. The Company determined, based on its assessment, that it is probable that its uncertain tax treatments will be accepted by the taxation authorities. Accordingly, the interpretation did not have an impact on the financial statements.

- *Annual Improvements to PFRSs 2015-2017 Cycle*
 - *Amendments to PFRS 3, Business Combinations, and PFRS 11, Joint Arrangements, Previously Held Interest in a Joint Operation*

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in PFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

These amendments are currently not applicable to the Company but may apply to future transactions.

- Amendments to PAS 12, *Income Tax Consequences of Payments on Financial Instruments Classified as Equity*

The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognizes the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events.

These amendments are not relevant to the Company because dividends declared by the Company do not give rise to tax obligations under the current tax laws.

- Amendments to PAS 23, *Borrowing Costs, Borrowing Costs Eligible for Capitalization*

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments.

Since the Company's current practice is in line with these amendments, these amendments do not have any effect on its financial statements.

New Standards and Interpretation Issued and Effective after December 31, 2019

The Company will adopt the standards enumerated below when these become effective. Except as otherwise indicated, the Company does not expect the adoption of these new and amended PFRSs, PAS and Philippine Interpretations to have significant impact on its financial statements.

Effective beginning on or after January 1, 2020

- Amendments to PFRS 3, *Definition of a Business*

The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

These amendments will apply on future business combinations of the Company.

- Amendments to PAS 1, *Presentation of Financial Statements*, and PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material*

The amendments refine the definition of material in PAS 1 and align the definitions used across PFRSs and other pronouncements. They are intended to improve the understanding of the existing requirements rather than to significantly impact an entity's materiality judgements.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

Effective beginning on or after January 1, 2021

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

PFRS 17 is effective for reporting periods beginning on or after January 1, 2021, with comparative figures required. Early application is permitted.

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3, *Business Combinations*. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

Summary of Significant Accounting Policies

Current versus Noncurrent Classification

The Company presents assets and liabilities in the parent company balance sheet based on current/noncurrent classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after reporting period

All other assets are classified as noncurrent.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period or
- There is no unconditional right to defer settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as noncurrent.

Deferred income tax assets and liabilities are classified as non-current assets and liabilities.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participants ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the parent company financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the parent company financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Foreign Currency Translation

The Company's financial statements are presented in Philippine Peso, which is the Company's functional currency. Transactions in foreign currencies are recorded using the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are restated using the rate of exchange at balance sheet date. Exchange gains and losses arising from foreign currency transactions and translations of foreign currency denominated monetary assets and liabilities are credited to or charged against current operations. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions

Cash and Cash Equivalents

Cash and cash equivalents in the parent company balance sheet consist of cash on hand and with banks, and short-term, highly liquid investments that are readily convertible to known amounts of cash and subject to insignificant risk of changes in value. They are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

For the purpose of the parent company statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

Financial Instruments - Classification and Measurement in Accordance with PFRS 9 (applicable in 2019 and 2018)

Classification of financial assets

Financial assets are classified in their entirety based on the contractual cash flows characteristics of the financial assets and the Company's business model for managing the financial assets. The Company classifies its financial assets into the following measurement categories:

- financial assets measured at amortized cost
- financial assets measured at fair value through profit or loss
- financial assets measured at fair value through other comprehensive income, where cumulative gains or losses previously recognized are reclassified to profit or loss
- financial assets measured at fair value through other comprehensive income, where cumulative gains or losses previously recognized are not reclassified to profit or loss

Financial assets at amortized cost

A financial asset is measured at amortized cost if (i) it is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and (ii) the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI on the principal amount outstanding. These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at amortized cost using the effective interest method, less any impairment in value. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an integral part of the effective interest method. The amortization is included in 'Interest income' in the statement of income and is calculated by applying the effective interest method to the gross carrying amount of the financial asset, except for (i) purchased or originated credit-impaired financial assets and (ii) financial assets that have subsequently become credit-impaired, where, in both cases, the effective interest method is applied to the amortized cost of the financial asset. Losses arising from impairment are recognized in 'Provision for credit and impairment losses' in the parent company statement of income.

The Company's financial assets at amortized cost as of December 31, 2019 and 2018 consist of cash in banks, cash equivalents and trade and other receivables (see Note 18). The Company assessed that the contractual cash flows of these financial assets are SPPI and are expected to be held to collect all contractual cash flows until their maturity. As a result, the Company concluded these financial assets are to be measured at amortized cost.

Financial assets at Fair Value through Other Comprehensive Income (FVOCI)

A financial asset is measured at FVOCI if (i) it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and (ii) its contractual terms give rise on specified dates to cash flows that are SPPI on the principal amount outstanding. These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income within a separate component of equity. Impairment losses or reversals, interest income and foreign exchange gains and losses are recognized in profit and loss until the financial asset is derecognized. Upon derecognition, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss. This reflects the gain or loss that would have been recognized in profit or loss upon derecognition if the financial

asset had been measured at amortized cost. Impairment is measured based on the expected credit loss (ECL) model.

The Company may also make an irrevocable election to measure at FVOCI on initial recognition investments in equity instruments that are neither held for trading nor contingent consideration recognized in a business combination in accordance with PFRS 3. Amounts recognized in OCI are not subsequently transferred to profit or loss. However, the Company may transfer the cumulative gain or loss within equity. Dividends on such investments are recognized in profit or loss, unless the dividend clearly represents a recovery of part of the cost of the investment.

Dividends are recognized in profit or loss only when:

- the Company's right to receive payment of the dividend is established
- it is probable that the economic benefits associated with the dividend will flow to the Company; and
- the amount of the dividend can be measured reliably.

The Company does not have any financial asset at FVOCI as of December 31, 2019 and 2018.

Financial assets at Fair Value through Profit or Loss (FVTPL)

Financial assets at FVTPL are measured as at unless these are measured at amortized cost or at FVOCI. Included in this classification are equity investments held for trading and debt instruments with contractual terms that do not represent SPPI. Financial assets held at FVTPL are initially recognized at fair value, with transaction costs recognized in the parent company statement of income as incurred. Subsequently, they are measured at fair value and any gains or losses are recognized in the parent company statement of income.

Additionally, even if the asset meets the amortized cost or the FVOCI criteria, the Company may choose at initial recognition to designate the financial asset at FVTPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) that would otherwise arise from measuring financial assets on a different basis.

Trading gains or losses are calculated based on the results arising from trading activities of the Company, including all gains and losses from changes in fair value for financial assets and financial liabilities at FVTPL, and the gains or losses from disposal of financial investments.

The Company's investments in unquoted equity shares are measured at FVTPL as of December 31, 2018 (see Note 18).

Classification of financial liabilities

Financial liabilities are measured at amortized cost, except for the following:

- financial liabilities measured at fair value through profit or loss;
- financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the Company retains continuing involvement;
- financial guarantee contracts;
- commitments to provide a loan at a below-market interest rate; and
- contingent consideration recognized by an acquirer in accordance with PFRS 3.

A financial liability may be designated at fair value through profit or loss if it eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) or:

- if a host contract contains one or more embedded derivatives; or
- if a Company of financial liabilities or financial assets and liabilities is managed and its performance evaluated on a fair value basis in accordance with a documented risk management or investment strategy.

Where a financial liability is designated at fair value through profit or loss, the movement in fair value attributable to changes in the Company's own credit quality is calculated by determining the changes in credit spreads above observable market interest rates and is presented separately in other comprehensive income.

The Company's financial liabilities measured at amortized cost which comprise of trade and other payables, bank loans, long-term debts and lease liability (see Note 18).

Reclassifications of financial instruments

The Company reclassifies its financial assets when, and only when, there is a change in the business model for managing the financial assets. Reclassifications shall be applied prospectively by the Company and any previously recognized gains, losses or interest shall not be restated. The Company does not reclassify its financial liabilities.

The Company does not reclassify its financial assets when:

- A financial asset that was previously a designated and effective hedging instrument in a cash flow hedge or net investment hedge no longer qualifies as such;
- A financial asset becomes a designated and effective hedging instrument in a cash flow hedge or net investment hedge; and
- There is a change in measurement on credit exposures measured at fair value through profit or loss.

Financial Instruments - Initial Recognition and Subsequent Measurement in Accordance with PAS 39 (applicable in 2017)

Date of recognition

The Company recognizes a financial asset or a financial liability in the parent company balance sheet on the date when it becomes a party to the contractual provisions of the instrument. All regular way purchases and sales of financial assets are recognized on trade date, which is the date that the Company commits to purchase the asset. Regular way purchases or sales of financial assets are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace. Derivatives are recognized on a trade date basis.

Initial recognition of financial instruments

All financial assets and financial liabilities are recognized initially at fair value. Except for financial assets at fair value through profit or loss (FVPL), the initial measurement of financial assets includes transaction costs. The Company classifies its financial assets in the following categories: financial assets at FVPL, loans and receivables, held-to-maturity (HTM) investments and AFS investments. For financial liabilities, the Company also classifies them into financial liabilities at FVPL and other financial liabilities. The classification depends on the purpose for which the investments were

acquired and whether they are quoted in an active market. The Company determines the classification of its financial assets at initial recognition and, where allowed and appropriate, re-evaluates such designation at every balance sheet date.

'Day 1' difference

Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Company recognizes the difference between the transaction price and fair value (a 'Day 1' difference) in the parent company statement of income unless it qualifies for recognition as some other type of asset. In cases where use is made of data which is not observable, the difference between the transaction price and model value is only recognized in the parent company statement of income when the inputs become observable or when the instrument is derecognized. For each transaction, the Company determines the appropriate method of recognizing the 'Day 1' difference amount.

(a) Financial assets or financial liabilities at FVPL

Financial assets and liabilities at FVPL include financial assets and liabilities held for trading purposes and financial assets and liabilities designated upon initial recognition as at FVPL. Financial assets and liabilities are classified as held for trading if they are acquired for the purpose of selling and repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated and considered as hedging instruments in an effective hedge.

Financial assets and liabilities may be designated at initial recognition as at FVPL if the following criteria are met: (i) the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities, or recognizing gains or losses on them on a different basis; (ii) the assets and liabilities are part of a group of financial assets, liabilities or both, which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk managing strategy; or (iii) the financial instruments contains an embedded derivative that would need to be recorded separately, unless the embedded derivative does not significantly modify the cash flow or it is clear, with little or no analysis, that it would not be separately recorded.

Where a contract contains one or more embedded derivatives, the entire hybrid contract may be designated as financial asset or financial liability at FVPL, except where the embedded derivative does not significantly modify the cash flows or it is clear that separation of the embedded derivative is prohibited.

Financial assets and liabilities at FVPL are recorded at the parent company balance sheet at fair value. Subsequent changes in fair value are recognized in the parent company statement of income. Interest earned or incurred is recorded as interest income or expense, respectively, while dividend income is recorded as other income when the right to receive payments has been established.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These are not entered into with the intention of immediate or short-term resale and are not classified or designated as AFS investments or financial assets at FVPL. Loans and receivables are carried at amortized cost less allowance for

impairment. Amortization is determined using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are integral to the effective interest rate. Gains and losses are recognized in the parent company statement of income when the loans and receivables are derecognized or impaired, as well as through the amortization process.

(c) HTM investments

HTM investments are quoted non-derivative financial assets which carry fixed or determinable payments and fixed maturities and which the Parent has the positive intention and ability to hold to maturity. After initial measurement, HTM investments are measured at amortized cost using the effective interest method. This method uses an effective interest rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are integral to the effective interest rate. Where the Parent sells other than an insignificant amount of HTM investments, the entire category would be tainted and would have to be reclassified as AFS investments. Gains and losses are recognized in the parent company statement of income when the investments are derecognized or impaired, as well as through the amortization process.

(d) AFS investments

AFS investments are non-derivative financial assets that are either designated as AFS or not classified in any of the other categories. They are purchased and held indefinitely, and may be sold in response to liquidity requirements or changes in market conditions. Quoted AFS investments are measured at fair value with gains or losses being recognized as other comprehensive income, until the investments are derecognized or until the investments are determined to be impaired at which time, the accumulated gains or losses previously reported in other comprehensive income are included in the parent company statement of income. Unquoted AFS investments are carried at cost, net of impairment. Interest earned or paid on the investments is reported as interest income or expense using the effective interest rate. Dividends earned on investments are recognized in the parent company statement of income when the right of payment has been established.

(e) Other financial liabilities

This category pertains to issued financial liabilities or their components that are neither held for trading nor designated as at FVPL upon the inception of the liability and contain contractual obligations to deliver cash or another financial asset to the holder or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares. The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

Other financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable financing costs. Deferred financing costs are amortized, using the effective interest rate method, over the term of the related long-term liability. After initial recognition, interest-bearing loans and other borrowings are subsequently measured at amortized cost using the effective interest rate method.

Gains and losses are recognized in the parent company statement of income when liabilities are derecognized, as well as through amortization process.

Derivative financial instruments

Initial recognition and subsequent measurement

Derivative financial instruments, including embedded derivatives, are initially recognized at fair value on the date in which a derivative transaction is entered into or bifurcated, and are subsequently remeasured at FVTPL, unless designated as effective hedge. Changes in fair value of derivative instruments not accounted as hedges are recognized immediately in the consolidated statement of income. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

The Company assesses whether embedded derivatives are required to be separated from host contracts when the Company first becomes party to the contract. An embedded derivative is separated from the host financial or non-financial contract and accounted for as a separate derivative if all of the following conditions are met:

- the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics of the host contract;
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- the hybrid or combined instrument is not recognized as at FVPL.

Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

Embedded derivatives that are bifurcated from the host contracts are accounted for either as financial assets or financial liabilities at FVPL. The Company uses derivative financial instruments, such as short-term forward contracts and interest rate swaps (IRS) to hedge its foreign currency risks and interest rate risk, respectively.

For the purpose of hedge accounting, the Company's hedge are classified as cash flow hedges. Hedges are classified as cash flow hedge when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognized firm commitment.

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

Under PAS 39, the documentation includes identification of the hedging instrument, the hedge item or transaction, the nature of the risk being hedged and how the Company will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting period for which they were designated.

Under PFRS 9, the documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Company will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Company actually hedges and the quantity of the hedging instrument that the Company actually uses to hedge that quantity of hedged item.

The Company's hedges that meet all the qualifying criteria for hedge accounting are accounted for, as described below:

Cash flow hedge

The effective portion of the gain or loss on the hedging instrument is recognized in the cash flow hedge reserve, while any ineffective portion is recognized immediately in the parent company statement of income. The cash flow hedge reserve is adjusted to the lower of the cumulative gain or loss on the hedging instrument and the cumulative change in fair value of the hedged item.

The Company uses IRS contracts to manage its floating interest rate exposure on its loans. The ineffective portion relating to these contracts are recognized in other operating income or expenses as realized gain or loss on derivative instruments.

The Company designated its IRS as hedging instrument. The amounts accumulated in other comprehensive income are accounted for, depending on the nature of the underlying hedged transaction. If the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is removed from the separate component of equity and included in the initial cost or other carrying amount of the hedged asset or liability. This is not a reclassification adjustment and will not be recognized in other comprehensive income for the period. This also applies where the hedged forecast transaction of a non-financial asset or non-financial liability subsequently becomes a firm commitment for which fair value hedge accounting is applied.

For any other cash flow hedges, the amount accumulated in other comprehensive income is reclassified to profit or loss as a reclassification adjustment in the same period or periods during which the hedged cash flows affect profit or loss.

If cash flow hedge accounting is discontinued, the amount that has been accumulated in other comprehensive must remain in accumulated other comprehensive income if the hedged future cash flows are still expected to occur. Otherwise, the amount will be immediately reclassified to profit or loss as a reclassification adjustment. After discontinuation, once the hedged cash flow occurs, any amount remaining in accumulated other comprehensive must be accounted for depending on the nature of the underlying transaction as described above.

As of December 31, 2019 and 2018, the Company has derivative assets classified as financial asset at FVTPL (see Note 19).

Derecognition of Financial Assets and Liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a Company of similar financial assets) is derecognized when, and only when:

- the rights to receive cash flows from the asset expires;
- the Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the Company has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company retains the contractual rights to receive the cash flows of a financial asset but assumes a contractual obligation to pay those cash flows to one or more entities, the Company treats the transaction as a transfer of a financial asset if the Company:

- has no obligation to pay amounts to the eventual recipients unless it collects equivalent amounts from the original asset;
- is prohibited by the terms of the transfer contract from selling or pledging the original asset other than as security to the eventual recipients for the obligation to pay them cash flows; and
- has an obligation to remit any cash flows it collects on behalf of the eventual recipients without material delay.

In transactions where the Company neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset and it retains control over the financial asset, the financial asset is recognized to the extent of the Company's continuing involvement in the financial asset. The extent of the Company's continuing involvement in the transferred asset is the extent to which it is exposed to changes in the value of the transferred asset. When the Company's continuing involvement takes the form of guaranteeing the transferred asset, the extent of the Company's continuing involvement is the lower of (i) the amount of the asset and (ii) the maximum amount of the consideration received that the Company could be required to repay ('the guarantee amount'). When the Company's continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the extent of the Company's continuing involvement is the amount of the transferred asset that the Company may repurchase. However, in the case of a written put option on an asset that is measured at fair value, the extent of the Company's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price. When the Company's continuing involvement takes the form of a cash-settled option or similar provision on the transferred asset, the extent of the Company's continuing involvement is measured in the same way as that which results from non-cash settled options.

Modification of contractual cash flows

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset, the Company recalculates the gross carrying amount of the financial asset as the present value of the renegotiated or modified contractual cash flows discounted at the original effective interest method

(or credit-adjusted effective interest method for purchased or originated credit-impaired financial assets) and recognizes a modification gain or loss in the parent company statement of income.

When the modification of a financial asset results in the derecognition of the existing financial asset and the subsequent recognition of the modified financial asset, the modified asset is considered a 'new' financial asset. Accordingly, the date of the modification shall be treated as the date of initial recognition of that financial asset when applying the impairment requirements to the modified financial asset.

Financial liabilities

A financial liability (or a part of a financial liability) is derecognized when the obligation under the liability is discharged, cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability or a part of it are substantially modified, such an exchange or modification is treated as a derecognition of the original financial liability and the recognition of a new financial liability, and the difference in the respective carrying amounts is recognized in the parent company statement of income.

Impairment of Financial Assets in Accordance with PFRS 9 (applicable in 2019 and 2018)

PFRS 9 introduces the single, forward-looking "expected loss" impairment model, replacing the "incurred loss" impairment model under PAS 39.

The Company recognizes expected credit losses (ECL) for the following financial assets that are not measured at FVTPL:

- debt instruments that are measured at amortized cost and FVOCI;
- loan commitments; and
- financial guarantee contracts.

ECLs are measured in a way that reflects the following:

- an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and
- reasonable and supportable information that is available without undue cost or effort at the balance sheet date about past events, current conditions and forecasts of future economic conditions.

Financial assets migrate through the following three stages based on the change in credit quality since initial recognition:

Stage 1: 12-month ECL

For credit exposures where there have not been significant increases in credit risk since initial recognition and that are not credit-impaired upon origination, the portion of lifetime ECLs that represent the ECLs that result from default events that are possible within the 12-months after the balance sheet date are recognized.

Stage 2: Lifetime ECL - not credit-impaired

For credit exposures where there have been significant increases in credit risk since initial recognition on an individual or collective basis but are not credit-impaired, lifetime ECLs representing the ECLs that result from all possible default events over the expected life of the financial asset are recognized.

Stage 3: Lifetime ECL - credit-impaired

Financial assets are credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of those financial assets have occurred. For these credit exposures, lifetime ECLs are recognized and interest revenue is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset.

A financial asset is considered to have low credit risk if:

- the financial instrument has a low risk of default
- the borrower has a strong capacity to meet its contractual cash flow obligations in the near term
- adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

Determining the stage for impairment

At each balance sheet date, the Company assesses whether there has been a significant increase in credit risk for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the balance sheet date and the date of initial recognition. The Company considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analysis.

The simplified approach, where changes in credit risk are not tracked and loss allowances are measured at amounts equal to lifetime ECL, is applied to 'Trade receivables'. The Company has established a provision matrix for customer segments that is based on historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Impairment of Financial Assets in Accordance with PAS 39 (applicable in 2017)

The Company assesses at each balance sheet date whether a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if and only if, there is an objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Loans and receivables

For loans and receivables carried at amortized cost, the Company first assesses individually whether objective evidence of impairment exists for financial assets that are individually significant, or

collectively for financial assets that are not individually significant. If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the parent company statement of income. Interest income continues to be accrued on the reduced carrying amount based on the original EIR of the financial asset. Loans and receivables together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been transferred to the Company. If, in a subsequent period, the amount of the impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or decreased by adjusting the allowance account. Any subsequent reversal of an impairment loss is recognized in the parent company statement of income, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

Assets carried at cost

If there is objective evidence that an impairment loss on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such an unquoted equity instrument has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

AFS investments

For AFS investments, the Company assesses at each balance sheet date whether there is objective evidence that an investment or group of investments is impaired.

In the case of equity investments classified as AFS, objective evidence of impairment would include a significant or prolonged decline in the fair value of the investments below its cost. Where there is evidence of impairment, the cumulative loss (measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the consolidated statement of income) is removed from other comprehensive income and recognized in the parent company statement of income. Impairment losses on equity investments are not reversed through the parent company statement of income. Increases in fair value after impairment are recognized directly in other comprehensive income.

In the case of debt instruments classified as AFS, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on rate of interest used to discount future cash flows for measuring impairment loss. Such accrual is recorded as part of "Interest income" in the parent company statement of income. If, in subsequent period, the fair value of a debt instrument increased and the increase can be objectively related to an event

occurring after the impairment loss was recognized in the parent company statement of income, the impairment loss is reversed through the parent company statement of income.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the parent company balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements whereby the related assets and liabilities are presented gross in the parent company balance sheet.

Classification of financial instruments between liability and equity

A financial instrument is classified as liability if it provides for a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Company; or
- satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Company does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as income or expense. Distributions to holders of financial instruments classified as equity are charged directly to equity net of any related income tax benefits.

The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

Investments in Subsidiaries and Associates

A subsidiary is an entity over which the Company has the power to govern the financial and operating policies generally accompanying a shareholding of more than half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity.

An associate is an entity in which the Company has significant influence and which is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decision of the investee, but is not control or joint control over those policies.

Investments in subsidiaries and associates are carried at cost, less impairment in value, in the parent company financial statements.

The Company recognizes income from the investments only to the extent that the Company receives distributions or establishes a right to receive distributions from accumulated profits of the subsidiaries and associates arising after the date of acquisition. Distributions received in excess of such profits are regarded as a recovery of investment and are recognized as a reduction of the cost of the investment.

Property and Equipment

Property and equipment are stated at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment in value, if any. The initial cost of property and equipment comprises its purchase price, including import duties, if any, nonrefundable taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Such cost includes the cost of replacing parts of such property and equipment when that cost is incurred if the recognition criteria are met. Repairs and maintenance costs are recognized in the parent company statement of income as incurred.

Depreciation is computed using the straight-line method over the useful lives of the assets as follows:

<u>Category</u>	<u>Number of years</u>
Transportation equipment	5
Office equipment	3
Communication equipment	3
Leasehold improvements	10

Leasehold improvements are amortized over the shorter of the lease terms and the lives of the improvements.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the parent company statement of income in the year the asset is derecognized.

The carrying values of property and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying values may not be recoverable. The assets' residual values, useful lives and depreciation method are reviewed, and adjusted if appropriate, at each financial year-end to ensure that the periods, residual values and method of depreciation are consistent with the expected pattern of economic benefit from the items of property and equipment.

When each major inspection is performed, its cost is recognized in the carrying amount of the property and equipment as a replacement if the recognition criteria are satisfied.

Fully depreciated assets are retained in the accounts until these are no longer in use. When assets are retired or otherwise disposed of, both the cost and related accumulated depreciation and amortization and any allowance for impairment losses, if any, are removed from the accounts, and any resulting gain or loss is credited or charged to current operations.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is fair value as at the date of the acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the parent company statement of income in the year in which the expenditure is incurred.

Computer software license

Computer software license is initially recognized at cost. Following initial recognition, the computer software license cost is carried at cost less accumulated amortization and any accumulated impairment in value, if any.

The computer software license is amortized on a straight-line basis over its estimated useful economic life of three to five years and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization commences when the computer software license is available for use. The amortization period and the amortization method for the license are reviewed at each financial year end. Changes in the estimated useful life is accounted for by changing the amortization period or method, as appropriate, and treating them as changes in accounting estimates. The amortization expense is recognized in the parent company statement of income in the expense category consistent with the function of the computer software license.

Project Development Costs

Project development costs include power plant projects in the development phase which meet the “identifiability” requirement under PAS 38, *Intangible Assets*, as they are separable and susceptible to individual sale and are carried at acquisition cost. These assets are transferred to “Property and equipment” when construction of each power plant commences. During the period of development, the asset is tested for impairment annually.

Research and Development Expenditure

The Company’s policy is to record research expenses in the parent company statement of income in the period when they are incurred.

Development costs are recognized as an intangible asset on the parent company balance sheet if the Company can identify them separately and show the technical viability of the asset, its intention and capacity to use or sell it, and how it will generate probable future economic benefits.

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized over the period of expected future benefit. During the period of development, the asset is tested for impairment annually.

Impairment of Nonfinancial Assets

Other current assets, project development costs, property and equipment and other noncurrent assets

The Company assesses at each balance sheet date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset’s recoverable amount. An asset’s

recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognized in the parent company statement of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each balance sheet date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the parent company statement of income unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Investments and advances

The Company performs impairment review on its investments and advances whenever an impairment indicator exists. This requires an estimation of the value in use of the investees. Estimating the value in use requires the Company to make an estimate of the future cash flows of the investees and to use a suitable discount rate to calculate the present value of those future cash flows. Impairment losses, if any, are recognized in the statement of income.

Capital Stock and Additional Paid-in Capital

Capital stock is measured at par value for all shares issued. When the Company issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued. Capital stock includes common stock and preferred stock.

When the shares are sold at premium, the difference between the proceeds and the par value is credited to the "Additional paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case the shares are issued to extinguish or settle the liability of the Company, the shares shall be measured either at the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Direct costs incurred related to equity issuance, such as underwriting, accounting and legal fees, printing costs and taxes are debited to the "Additional paid-in capital" account. If additional paid-in capital is not sufficient, the excess is charged against an equity reserve account.

Retained Earnings

The amount included in retained earnings includes accumulated earnings of the Company and reduced by dividends on capital stock. Dividends on capital stock are recognized as a liability and deducted from equity when they are approved by the BOD. Dividends for the year that are approved after the financial balance sheet date are dealt with as an event after the financial balance sheet date. Retained earnings may also include effect of changes in accounting policy as may be required by the transition provisions of new and amended standards.

Revenue Recognition

Revenue from contracts with customers under PFRS 15 is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. Under PAS 18, revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Under PAS 18, revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. The Company assesses its revenue arrangements against specific criteria in order to determine if it is acting as a principal or an agent.

The following specific recognition criteria must also be met before revenue is recognized:

Dividend income

Dividend income is recognized when the Company's right to receive payment is established.

Technical, management and service fees

Technical, management and other fees are recognized when the related services are rendered.

Interest income

Interest is recognized as it accrues taking into account the effective interest method.

Expenses

Expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Expenses are recognized when incurred.

Leases (prior to adoption of PFRS 16)

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset. A reassessment is made after inception of the lease only if one of the following applies:

- (a) there is a change in contractual terms, other than a renewal or extension of the arrangement;
- (b) a renewal option is exercised or extension granted, unless the term of the renewal or extension was initially included in the lease term;
- (c) there is a change in the determination of whether fulfillment is dependent on a specific asset; or
- (d) there is a substantial change to the asset.

Where a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gives rise to the reassessment for scenarios (a), (c) or (d) above, and at the date of renewal or extension period for scenario (b).

Operating lease

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating lease. Operating lease payments are recognized as an expense in the statement of income on a straight-line basis over the lease term.

Leases (upon adoption of PFRS 16)

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

Effective January 1, 2019, it is the Company's policy to classify right-of-use assets as part of property and equipment. Prior to that date, all of the Company's leases are accounted for as operating leases in accordance with PAS 17, hence, not recorded on the balance sheet. The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets only pertain to office spaces and are depreciated on a straight-line basis over the shorter of the lease term of 5 to 10 years and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Short-term leases

The Company applies the short-term lease recognition exemption to its short-term leases of conference rooms (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). Lease payments on short-term leases and leases of low value assets are recognized as expense on a straight-line basis over the lease term.

Pension benefits

The Company has defined benefit pension plans which require contributions to be made to separately administered funds. The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the parent company statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to parent company statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Company, nor can they be paid directly to the Company. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Company's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

Borrowing Costs

Borrowing costs are capitalized if they are directly attributable to the acquisition, construction or production of a qualifying asset. To the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalization on that asset shall be determined as the actual borrowing costs incurred on that borrowing during the period less any investment income on the temporary investment of those borrowings. To the extent that funds are borrowed generally, the amount of borrowing costs eligible for capitalization shall be determined by applying a capitalization rate to the expenditures on that asset. The capitalization rate shall be the weighted average of the borrowing costs applicable to the borrowings of the Company that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset. The amount of borrowing costs capitalized during a period shall not exceed the amount of borrowing costs incurred during that period.

Taxes

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as of the balance sheet date.

Current income tax relating to items recognized directly in equity is recognized in the parent company statement of comprehensive income and not in the parent company statement of income.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax

Deferred income tax is provided using the liability method on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction affects neither the accounting profit nor taxable profit or loss.

Deferred income tax assets are recognized for all deductible temporary differences, carryforward benefits of unused net operating loss carryover (NOLCO) and excess minimum corporate income tax (MCIT), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward benefits of unused NOLCO and excess MCIT can be utilized in the future, except where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the account profit nor taxable profit or loss.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred income tax asset to be recovered, except where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the balance sheet date. Income tax relating to items recognized directly in other comprehensive income is also recognized in other comprehensive income and not in the parent company statement of income.

Value-added Tax (VAT)

Revenues, expenses, and assets are recognized net of the amount of VAT, if applicable.

When VAT from sales of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the parent company balance sheet. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the parent company balance sheet to the extent of the recoverable amount.

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the parent company statement of income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the

risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

Contingencies

Contingent liabilities are not recognized in the parent company financial statements but are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized but are disclosed in the parent company financial statements when an inflow of economic benefits is probable.

Events After the Reporting Period

Post year-end events that provide additional information about the Company's position at balance sheet date (adjusting events) are reflected in the parent company financial statements. Post year-end events that are not adjusting events are disclosed when material.

Earnings Per Common Share

Basic earnings per common share are computed by dividing net income for the year by the weighted average number of common shares issued and outstanding during the year, after retroactive adjustments for any stock dividends declared and stock rights exercised during the year.

Diluted earnings per share amounts are calculated by dividing the net income for the year by the weighted average number of common shares outstanding during the year plus the weighted average number of common shares that would be issued for outstanding common stock equivalents. The Company does not have dilutive common stock equivalents.

3. Significant Accounting Judgment, Estimates and Assumptions

The preparation of the Company's parent company financial statements requires management to make judgments, estimates and assumptions that affect the amounts reported in the financial statements and related notes. The judgment, estimates and assumptions used in the parent company financial statements are based upon management's evaluation of relevant facts and circumstances as of the date of the Company's parent company financial statements. Actual results could differ from such estimates. Judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The following items are those matters which the Company assess to have significant risk arising from judgement and estimation uncertainty:

Judgments

In the process of applying the Company's accounting policies, management has made judgments, apart from those involving estimations which have the most significant effect on the amounts recognized in the Company's financial statements.

Classification of financial instruments

The Company exercises judgment in classifying a financial instrument, or its component parts, on initial recognition as either a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definition of a financial

asset, a financial liability or an equity instrument. The substance of a financial instrument, rather than its legal form, governs its classification in the parent company balance sheet.

Contractual cash flows characteristics under PFRS 9 in 2019 and 2018

If the financial asset is held within a business model whose objective is to hold assets to collect contractual cash flows or within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, the Company assesses whether the cash flows from the financial asset represent solely payments of principal and interest (SPPI) on the principal amount outstanding.

In making this assessment, the Company determines whether the contractual cash flows are consistent with a basic lending arrangement, i.e., interest includes consideration only for the time value of money, credit risk and other basic lending risks and costs associated with holding the financial asset for a particular period of time. In addition, interest can include a profit margin that is consistent with a basic lending arrangement. The assessment as to whether the cash flows meet the test is made in the currency in which the financial asset is denominated. Any other contractual terms that introduce exposure to risks or volatility in the contractual cash flows that is unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are SPPI on the principal amount outstanding.

Evaluation of business model in managing financial instruments under PFRS 9 in 2019 and 2018

The Company determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. The Company's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed; and
- The expected frequency, value and timing of sales are also important aspects of the Company's assessment.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realized in a way that is different from the Company's original expectations, the Company does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Identifying performance obligations under PFRS 15 in 2019 and 2018

The Company identifies performance obligations by considering whether the promised goods or services in the contract are distinct goods or services. A good or service is distinct when the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Company's promise to transfer the good or service to the customer is separately identifiable from the other promises in the contract.

The Company assesses performance obligations as a series of distinct goods and services that are substantially the same and have the same pattern of transfer if i) each distinct good or services in the series are transferred over time and ii) the same method of progress will be used (i.e., units of delivery) to measure the entity's progress towards complete satisfaction of the performance obligation.

Revenue recognition under PFRS 15 in 2019 and 2018

The Company recognizes revenue when it satisfies an identified performance obligation by transferring a promised good or service to a customer. A good or service is considered to be transferred when the customer obtains control. The Company determines, at contract inception, whether it will transfer control of a promised good or service over time. If the Company does not satisfy a performance obligation over time, the performance obligation is satisfied at a point in time.

The Company will continue to recognize revenue from rendering of services over time, since customers simultaneously receives and consumes the benefits as the Company provides the services.

Identifying methods for measuring progress of revenue recognized over time under PFRS 15 in 2019 and 2018

The Company determines the appropriate method of measuring progress which is either through the use of input or output methods. Input method recognizes revenue on the basis of the entity's efforts or inputs to the satisfaction of a performance obligation while output method recognizes revenue on the basis of direct measurements of the value to the customer of the goods or services transferred to date.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Measurement of expected credit losses under PFRS 9 in 2019 and 2018

ECLs are derived from unbiased and probability-weighted estimates of expected loss. Financial assets that are not credit-impaired at the balance sheet date are measured as the present value of all cash shortfalls over the expected life of the financial asset discounted by the effective interest rate. The cash shortfall is the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive.

The Company leverages existing risk management indicators (e.g., internal credit risk classification and restructuring triggers), credit risk rating changes and reasonable and supportable information which allows the Company to identify whether the credit risk of financial assets has significantly increased.

No allowance for expected credit losses was recognized in 2019 and 2018. Trade and other receivables amounted to ₱1.1 billion and ₱1.0 billion as of December 31, 2019 and 2018, respectively (see Note 5).

Inputs, assumptions and estimation techniques under PFRS 9 in 2019 and 2018

The ECL is measured on either a 12-month or lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD), defined as follows:

- *PD*
The PD represents the likelihood of a borrower defaulting on its financial obligation, either over the next 12 months, or over the remaining life of the obligation. PD estimates are estimates at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. If a counterparty or exposure migrates between rating classes, then this will lead to a change in the estimate of the associated PD. PDs are estimated considering the contractual maturities of exposures. The 12-months and lifetime PD represent the expected point-in-time probability of a default over the next 12 months and remaining lifetime of the financial instrument, respectively, based on conditions existing at the balance sheet date and future economic conditions that affect credit risk.
- *LGD*
Loss Given Default represents the Company's expectation of the extent of loss on a defaulted exposure, taking into account the mitigating effect of collateral, its expected value when realized and the time value of money. LGD varies by type of counterparty, type of seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of EAD.
- *EAD*
EAD is based on the amounts the Company expects to be owed at the time of default, over the next 12 months or over the remaining lifetime.

The ECL is determined by projecting the PD, LGD, and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e., the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the balance sheet date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

The lifetime PD is developed by applying a maturity profile to the current 12-month PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis. The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by counterparty.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. LGDs are typically set at product level due to the limited differentiation in recoveries achieved across different borrowers. These LGD's are influenced by collection strategies.

The assumptions underlying the ECL calculation such as how the maturity profile of the PDs change are monitored and reviewed on a quarterly basis.

Simplified approach for trade receivables under PFRS 9 in 2019 and 2018

The Company uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for various customer segments that have similar loss patterns.

The provision matrix is initially based on the Company's historical observed default rates. The Company will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the industrial segment, the historical default rates are adjusted. At every balance sheet date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

There have been no significant changes in estimation techniques or significant assumptions made during the reporting period.

Incorporation of forward-looking information under PFRS 9 in 2019 and 2018

The Company incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL.

The Company has identified and documented key drivers of credit risk and credit losses of each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

Predicted relationship between the key indicators and default and loss rates on various portfolios of financial assets have been developed based on analyzing historical data over the past 5 years. The methodologies and assumptions including any forecasts of future economic conditions are reviewed regularly.

The Company has not identified any uncertain event that it has assessed to be relevant to the risk of default occurring but where it is not able to estimate the impact on ECL due to lack of reasonable and supportable information.

Estimating allowance for impairment of losses on investment in and advances to subsidiaries and associates

Investments in and advances to subsidiaries and associates are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. No impairment loss recognized in 2019 and 2018. The aggregate carrying amount of the investments in and advances to subsidiaries and associates amounted to ₱120.6 billion and ₱88.9 billion as of December 31, 2019 and 2018, respectively (see Note 7).

Estimating impairment of project development costs

Impairment is determined for development costs by assessing the recoverable amount of each projects. Where the recoverable amount of the project is less than the carrying amount, an impairment loss is recognized. When calculating recoverable amount, the future cash flow is discounted by a discount factor that takes into consideration risk free interest and the risk associated with the specific project.

The Company did not recognize impairment loss on project development costs in 2019 and 2018. The carrying amount of the Company's project development costs amounted to ₱623.3 million and ₱388.5 million as of December 31, 2019 and 2018, respectively (see Note 10).

Estimating useful lives of property and equipment

The Company estimates the useful lives of property and equipment based on the period over which assets are expected to be available for use. The estimated useful lives of property and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, the estimation of the useful lives of property and equipment is based on collective assessment of internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in the factors and circumstances mentioned above. As of December 31, 2019 and 2018, the net book values of property and equipment amounted to ₱105.0 million and ₱65.6 million, respectively (see Note 8).

Estimating residual value of property and equipment

The residual value of the Company's property and equipment is estimated based on the amount that would be obtained from disposal of the asset, after deducting estimated costs of disposal, if the asset is already of the age and in the condition expected at the end of its useful life. Such estimation is based on the prevailing price of property and equipment of similar age and condition. The estimated residual value of each asset is reviewed periodically and updated if expectations differ from previous estimates due to changes in the prevailing price of a property and equipment of similar age and condition. As of December 31, 2019 and 2018, the aggregate net book values of property and equipment amounted to ₱105.0 million and ₱65.6 million, respectively (see Note 8).

Assessing impairment of nonfinancial assets

The Company assesses whether there are any indicators of impairment for nonfinancial assets at each balance sheet date. These nonfinancial assets (property and equipment and other current and noncurrent assets) are tested for impairment when there are indicators that the carrying amounts may not be recoverable.

Determining the recoverable amount of the assets, which require the determination of future cash flows expected to be generated from the continued use and ultimate disposition of such assets, requires the Company to make estimates and assumptions that can materially affect its financial statements. Future events could cause the Company to conclude that these assets are impaired. Any resulting impairment loss could have a material adverse impact on the financial condition and results of operations.

As of December 31, 2019, the carrying values of property and equipment and other current and noncurrent assets amounted to ₱105.0 million, ₱889.9 million, and ₱16.4 million, respectively. As of December 31, 2018, the carrying values of property and equipment and other current and noncurrent assets amounted to ₱65.6 million, ₱941.8 million, and ₱89.1 million, respectively (see Notes 6, 8, and 9).

Estimating the incremental borrowing rate

The Company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure its lease liability. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Company 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates. The Company's lease liability amounted to ₱51.6 million as of December 31, 2019 (see Note 20).

Pension benefits

The cost of defined benefit pension plans, as well as the present value of the pension obligation, are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each balance sheet date.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future inflation rates for the specific country.

Further details about the assumptions used are provided in Note 15.

Net benefit expense amounted to ₱29.8 million in 2019, ₱41.9 million in 2018 and ₱50.0 million in 2017. Net pension liability amounted to ₱219.7 million as of December 31, 2019. Net pension asset amounted to ₱38.1 million as of December 31, 2018 (see Note 15).

Recognition of deferred income tax assets

The Company reviews the carrying amounts of deferred income tax assets at each balance sheet date and reduces deferred income tax assets to the extent that it is no longer probable that sufficient income will be available to allow all or part of the deferred income tax assets to be utilized. Deferred income tax asset amounted to ₱130.3 million and ₱202.3 million as of December 31, 2019 and 2018, respectively (see Note 16).

No deferred income tax assets were recognized for deductible temporary difference and carryforward benefit from unused NOLCO and excess MCIT as disclosed in Note 16.

Legal contingencies

The estimate of probable costs for the resolution of possible claims has been developed in consultation with outside counsels handling the Company's defense in these matters and is based upon an analysis of potential results. No provision for probable losses arising from legal contingencies was recognized in the Company's parent company financial statements for the years ended December 31, 2019 and 2018.

4. Cash and Cash Equivalents

	2019	2018
Cash on hand and in banks	₱25,680,412	₱33,107,511
Short-term deposits	4,184,384,000	11,842,080,800
	₱4,210,064,412	₱11,875,188,311

Cash in banks earn interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods depending on the immediate cash requirements of the Company and earn interest at the respective short-term deposits rates.

Interest income earned from cash in banks and short-term deposits amounted to ₱163.4 million, ₱137.3 million and ₱147.6 million in 2019, 2018 and 2017, respectively.

5. Trade and Other Receivables

	2019	2018
Trade (see Note 17)	₱1,027,767,981	₱617,445,732
Nontrade	18,428,595	18,406,566
Interest (see Note 17)	11,816,301	43,777,681
Dividends	-	288,579,777
Others	15,481,598	13,254,002
	₱1,073,494,475	₱981,463,758

Trade receivables are non-interest bearing and are generally on 30 days' term.

For terms and conditions relating to related party receivables, refer to Note 17.

6. Other Current Assets

	2019	2018
Prepaid tax	₱878,228,543	₱926,898,393
Others	11,625,845	14,879,787
	₱889,854,388	₱941,778,180

7. Investments and Advances

The details of the Company's investments and advances follow:

	2019	2018
<i>Investments in Subsidiaries</i>		
Therma Power, Inc. (TPI)	₱30,116,058,873	₱30,116,058,873
Aboitiz Renewables, Inc. (ARI)	25,172,988,814	25,172,988,814
Therma Visayas, Inc. (TVI)	7,118,681,570	7,118,681,570
Hedcor Bukidnon, Inc. (Hedcor Bukidnon)	2,997,000,000	2,794,460,000
Hedcor Sabangan, Inc. (Hedcor Sabangan)	1,732,643,142	1,732,643,142
Lima Enerzone Corporation (LEZ)	1,329,696,667	1,329,696,667
Hedcor, Inc. (HI)	974,875,000	605,125,000
Therma South, Inc. (Therma South)	877,892,679	877,892,679
Therma Mobile, Inc. (Therma Mobile)	742,400,000	742,400,000
Davao Light & Power Co., Inc. (DLPC)	738,472,506	738,472,506
Visayan Electric Co., Inc. (VECO)	665,438,202	665,438,202
Hedcor Tudaya, Inc. (HTI)	656,250,000	656,250,000
Mactan Enerzone Corporation (MEZC)	609,532,287	609,532,287
Balamban Enerzone Corporation (BEZC)	444,869,161	444,869,161
Subic Enerzone Corporation (SEZC)	227,000,000	227,000,000
Cotabato Light & Power Co. (CLPC)	214,047,443	214,047,443
Retensol, Inc. (RI)	135,000,000	135,000,000

	37,020,755,778	5,943,160,402
Less allowance for impairment loss	1,071,358,480	1,071,358,480
	111,071,558,652	79,369,173,276
<i>Advances</i>	9,562,649,989	9,562,649,989
	₱120,634,208,641	₱88,931,823,265

Investment in Malvez

The Company subscribed additional 47.61 million and 17.8 million Redeemable Preferred Shares (RPS) for ₱47.6 million and ₱17.8 million, in 2019 and 2018 respectively.

Investment in HI

The Company subscribed additional 369.75 million RPS for ₱369.75 million and 360.1 million RPS for ₱360.1 million in 2019 and 2018, respectively.

Investment in Hedcor Bukidnon

In 2019, the Company subscribed additional 202.5 million RPS for ₱202.5 million.

Investment in AA Thermal, Inc.

On May 2, 2019, the Company completed its acquisition of a 49% voting stake and a 60% economic stake in AA Thermal, Inc., AC Energy's thermal platform in the Philippines.

This follows the execution of a share purchase agreement for the transaction in 2018, and the completion of all conditions precedent. The Philippine Competition Commission approved the transaction last February 28, 2019. The transaction is valued at ₱30.2 billion, after adjustments.

AA Thermal has interests in GMCP, the owner and operator of an operating 2x316 MW coal plant in Mariveles, Bataan, and in GNPD, the developer and owner of a 2x668 MW supercritical coal plant project in Dinginin, Bataan, which is currently under construction.

The completion of the transaction increases the Company's economic interests in GMCP, and GNPD to 78.3%, and 70%, respectively.

In 2019, the Company subscribed additional RPS amounting to USD 18.1 million (₱929.3 million)

Investment in AAI

AAI redeemed shares attributable to the Company at 5,340 RPS for ₱5.34 million and 80,216 RPS for ₱80.2 million in 2019 and 2018, respectively at ₱1,000 per share

Investment in RI

In 2018, the Company subscribed 135.0 million RPS for ₱135.0 million.

Investment in BEZC

In 2018, BEZC redeemed shares attributable to the Company at 42.0 million RPS for ₱42.0 million at ₱1 per share.

In 2018, it was determined that the carrying value of the investment in BEZC exceeded its recoverable amount. The recoverable amount of the investment has been determined based on a value-in-use calculation using cash flow projections based on financial budgets approved by senior management covering a five-year period.

The discount rates applied to cash flow projections are from 10.63% to 14.80% in 2018 and cash flows beyond the five-year period are extrapolated using a zero percent growth rate. As a result, an impairment loss amounting to ₱45.9 million was recognized.

Investment in APREC

In 2018, the Company subscribed 25.0 million RPS for ₱25.0 million.

Investment in PEI

In 2018, PEI advances were reclassified to investment amounting to ₱11.9 million.

Investment in VECO

In 2018, the Company subscribed 0.0005 million RPS for ₱0.05 million.

Investment in TVI

The Company subscribed additional 8.8 million RPS for ₱5.38 billion in 2018.

Investment in ARI

In 2018, ARI redeemed shares attributable to the Company at 200.0 million RPS for ₱2.00 billion at ₱10 per share.

Advances

These advances include advances to subsidiaries that will be applied against future subscriptions of the Company to the shares of stock of the subsidiaries.

In 2018, the Company has additional advances to TPI amounting to ₱5.14 billion.

The Company's subsidiaries, all incorporated in the Philippines except for AP Int which was incorporated in Singapore, and the corresponding percentage equity ownership are as follows:

Name of Company	Nature of Business	2019		2018

Others	945,518	688,252
	₱627,503,138	₱356,110,573

Trade payables are noninterest-bearing and generally on 30-day term. Accrued taxes and fees represent taxes withheld on compensation, benefits, interests and other fees.

12. Bank Loans and Long-term Debts

Bank Loans

The Company obtained unsecured bank loans from financial institutions with a total principal amount of ₱4.70 billion at an annual interest rate ranging from 3.25% to 5.20% for working capital purposes in 2018. These loans are covered by the respective borrower's existing credit lines with the banks and are not subject to any significant covenants and warranties. These have been fully paid in 2019.

Interest expense on bank loans amounted to ₱380.3 million and ₱140.9 million in 2019 and 2018, respectively.

Long-Term Debts

	Interest Rate	2019	2018
Financial and non-financial institutions - unsecured			
2014 7-year retail bonds	5.21%	₱6,600,000,000	₱6,600,000,000
2014 12-year retail bonds	6.10%	3,400,000,000	3,400,000,000
2017 10-year retail bonds	5.34%	3,000,000,000	3,000,000,000
2018 5.25-year retail bonds	7.51%	7,700,000,000	7,700,000,000
2018 10-year retail bonds	8.51%	2,500,000,000	2,500,000,000
2019 5-year long-term loan	LIBOR + 1.20%	15,190,500,000	-
2019 7-year retail bonds	5.28%	7,250,000,000	-
2019 7-year long-term loan	5.28%	5,000,000,000	-
		50,640,500,000	23,200,000,000
Less deferred financing costs		560,674,933	202,178,708
		₱50,079,825,067	₱22,997,821,292

Long-term Loan - ₱5.0 billion

In November 2019, the Company obtain a ₱5.0 billion 7-year long term loan from the BDO Unibank, Inc. at a fixed rate of 5.28% p.a.

Under the facility agreement, the Company shall not incur any obligation with a maturity of more than 1 year, if on the date of such borrowing, the net debt to consolidated equity ratio will exceed 3:1. The Company is in compliance with the debt covenants as of December 31, 2019.

Dollar Loan - \$300 million

On April 2019, the Company executed and availed a US\$300,000,000 syndicated bridge loan facility loan agreement with DBS Bank Ltd., Mizuho Bank, Ltd., MUFG Bank, Ltd., and Standard Chartered Bank as lead arrangers and bookrunners to finance the AA Thermal, Inc. acquisition. The loan bears a floating interest based on credit spread over applicable LIBOR plus 1.2% margin. The loan will mature on the 5th anniversary of the first utilization date.

Under the facility agreement, the Company shall ensure that the net consolidated debt to net consolidated equity ratio is not more than 3:1 at all times and the leverage ratio is not more than 5:50:1 at all times. The Company is in compliance with the debt covenants as of December 31, 2019.

Retail Bonds - ₱7.25 billion

In October 2019, the Company issued ₱7.25 billion 7-year bond due 2026 at a fixed rate of 5.28% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Retail Bonds - ₱10.2 billion

In October 2018, the Company issued a total of ₱10.2 billion bonds, broken down into a ₱7.7 billion 5.25-year bond due 2024 at a fixed rate equivalent to 7.51% p.a. and a ₱2.5 billion 10-year bond due 2028 at a fixed rate equivalent to 8.51% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Retail Bonds - ₱3.0 billion

In July 2017, the Company issued ₱3.0 billion 10-year bond due 2027 at an annual fixed rate of 5.34% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Retail Bonds - ₱10.0 billion

In September 2014, the Company issued a total of ₱10.0 billion bonds, broken down into a ₱6.6 billion 7-year bond due 2021 at a fixed rate equivalent to 5.21% p.a. and a ₱3.4 billion 12-year bond due 2026 at a fixed rate equivalent to 6.10% p.a. The bonds have been rated PRS Aaa by PhilRatings.

The principal amount of these bonds shall be payable on a lump sum basis on the respective maturity date at its face value. These bonds may be redeemed in advance by the Company based on stipulated early redemption option dates and on agreed early redemption price.

Under the bond trust agreements, the Company shall not permit its debt-to-equity ratio to exceed 3:1 calculated based on the year-end debt and consolidated equity. The Company is in compliance with the debt covenants as of December 31, 2019.

Unamortized deferred financing cost reduced the carrying amount of long-term debt by ₱560.7 million and ₱202.2 million as of December 31, 2019 and 2018, respectively.

Total interest expense recognized amounted to ₱2.1 billion, ₱858.2 million and ₱630.5 million in 2019, 2018 and 2017, respectively.

13. Equity and Earnings per Common Share

a. Paid-in Capital

	2019	2018
Capital Stock:		
Authorized - ₱1 par value:

	₱19,947,498,639	₱19,947,498,639

On May 25, 2007, the Company listed with the Philippine Stocks Exchange its 7,187,664,000 common shares with a par value of ₱1.00 to cover the initial public offering (IPO) of 1,787,664,000 common shares at an issue price of ₱5.80 per share. On March 17, 2008, the Company listed an additional 170,940,307 common shares, which it issued pursuant to a share swap agreement at the IPO price of ₱5.80 per share. The total proceeds from the issuance of new shares amounted to ₱10.37 billion. The Company incurred transaction costs incidental to the initial public offering amounting to ₱412.4 million, which is charged against "Additional paid-in capital" in the parent company balance sheet.

As of December 31, 2019, 2018 and 2017, the Company has 631, 629 and 629 shareholders, respectively.

Preferred shares are non-voting, non-participating, non-convertible, redeemable, cumulative, and may be issued from time to time by the BOD in one or more series. The BOD is authorized to issue from time to time before issuance thereof, the number of shares in each series, and all the designations, relative rights, preferences, privileges and limitations of the shares of each series. Preferred shares redeemed by the Company may be reissued. Holders thereof are entitled to receive dividends payable out of the unrestricted retained earnings of the Company at a rate based on the offer price that is either fixed or floating from the date of the issuance to final redemption. In either case, the rate of dividend, whether fixed or floating, shall be referenced, or be a discount or premium, to market-determined benchmark as the BOD may determine at the time of issuance with due notice to the SEC.

In the event of any liquidation or dissolution or winding up of the Company, the holders of the preferred stock shall be entitled to be paid in full the offer price of their shares before any payment in liquidation is made upon the common stock.

There are no preferred shares issued and outstanding as of December 31, 2019 and 2018.

b. Retained Earnings

As of December 31, 2019 and 2018, the Company has an appropriated retained earnings amounting to ₱33.66 billion and ₱34.06 billion, respectively, with regards to the development and construction of power plants. The BOD has approved the appropriation of ₱13.16 billion and ₱20.90 billion on November 24, 2016 and November 27, 2014, respectively.

On March 7, 2017, the BOD approved the declaration of regular cash dividends of ₱1.36 per share (₱10.01 billion) to all stockholders of record as of March 21, 2017. These dividends were paid on April 10, 2017.

On March 8, 2018, the BOD approved the declaration of regular cash dividends of ₱1.39 per share (₱10.23 billion) to all stockholders of record as of March 22, 2018. These dividends were paid on April 12, 2018.

On March 7, 2019, the BOD approved the declaration of regular cash dividends of ₱1.47 per share (₱10.82 billion) to all stockholders of record as of March 21, 2019. These dividends were paid on April 5, 2019.

On March 7, 2019, the BOD also approved the following:

- Appropriation of ₱11.90 billion retained earnings for the equity infusion into GNPD to fund the construction of GNPD units 1 & 2, which is expected to have full commercial operations by end of 2020.
- Reversal of ₱12.30 billion retained earnings appropriation that was set up in 2014 for the equity requirements of the 300 MW Davao Coal and 14 MW Sabangan Hydro projects.

To comply with the requirements of Section 43 of the Corporation Code, on March 6, 2020, the BOD approved the declaration of regular cash dividends of ₱1.18 a share (₱8.68 billion) to all stockholders of record as of March 20, 2020. The cash dividends are payable on April 3, 2020.

c. Earnings per Common Share

Earnings per common share amounts were computed as follows:

	2019	2018	2017
a. Net income	₱12,304,362,581	₱8,995,307,128	₱9,212,273,716
b. Weighted average number of common shares issued and outstanding	7,358,604,307	7,358,604,307	7,358,604,307
c. Earnings per common share (a/b)	₱1.67	₱1.22	₱1.25

14. Personnel Costs

	2019	2018	2017
Salaries and wages	₱572,060,660	₱562,610,627	₱533,005,712
Employee benefits	239,240,032	351,449,279	307,935,888
Retirement benefit costs (see Note 15)	29,846,722	41,895,414	49,974,029
	₱841,147,414	₱955,955,320	₱890,915,629

15. Retirement Costs

The Company has a funded, non-contributory, defined benefit pension plan (the “Plan”) covering all regular and full-time employees and requiring contributions to be made to separately administered fund. This retirement benefit fund (the “Fund”) is in the form of a trust being maintained and managed by AEV, under the supervision of the Board of Trustees (BOT) of the Plan. The BOT, whose members are also officers of AEV, is responsible for the investment of the Fund assets. Taking into account the Plan’s objectives, benefit obligations and risk capacity, the BOT periodically defines the investment strategy in the form of a long-term target structure.

The following tables summarize the components of net benefit expense recognized in the parent company statements of income and the funded status and amounts recognized in the parent company balance sheets for the plan.

Net benefit expense (recognized as part of personnel costs):

	2019	2018	2017
Retirement expense to be recognized in the parent company statements of income:			
Current service cost	₱32,960,153	₱42,726,275	₱48,922,746
Net interest cost (income)	(3,113,431)	(830,861)	1,051,283
	₱29,846,722	₱41,895,414	₱49,974,029

Remeasurement effect to be recognized in other comprehensive income:

	2019	2018	2017
Actuarial gains (loss) due to:			
Experience adjustments	(₱197,172,700)	(₱4,861,370)	(₱43,972,045)
Changes in financial assumptions	(61,716,402)	44,542,333	1,172,525
Actual return excluding amount included in net interest cost	(20,314)	(13,774,100)	9,300,494
Changes in demographic assumptions	–	–	78,205,006
	(₱258,909,416)	₱25,906,863	₱44,705,980

Pension liability (asset)

	2019	2018
Present value of obligation	₱533,382,355	₱402,201,925
Fair value of plan assets	(313,637,886)	(440,263,429)
	₱219,744,469	(₱38,061,504)

Changes in the present value of the defined benefit obligation are as follows:

	2019	2018
At January 1	₱402,201,925	₱633,459,869
Net benefit expense:		
Current service cost	32,960,153	42,726,275
Interest cost	32,900,117	32,496,491
	65,860,270	75,222,766
Benefits paid	(207,506,511)	(252,616,884)
Employee transfers	13,937,569	(14,182,863)
Remeasurements in other comprehensive income:		
Actuarial gain (loss) due to:		
Experience adjustments	197,172,700	4,861,370
Changes in financial assumptions	61,716,402	(44,542,333)
	258,889,102	(39,680,963)
At December 31	₱533,382,355	₱402,201,925

Changes in the fair value of plan assets are as follows:

	2019	2018
At January 1	₱440,263,429	₱649,655,975
Actual contributions	30,950,165	37,853,949
Interest income included in net interest cost	36,013,548	33,327,352
Benefits paid	(207,506,511)	(252,616,884)
Transfers	13,937,569	(14,182,863)
Actual return excluding amount included in net interest cost	(20,314)	(13,774,100)
At December 31	₱313,637,886	₱440,263,429

Changes in pension liability (asset) recognized in the parent company balance sheets are as follows:

	2019	2018
At January 1	(₱38,061,504)	(₱16,196,106)
Actual contributions	(30,950,165)	(37,853,949)
Actuarial loss (gain) recognized for the year	258,909,416	(25,906,863)
Retirement expense for the year	29,846,722	41,895,414
At December 31	₱219,744,469	(₱38,061,504)

The fair value of plan assets by each class at the end of the reporting period are as follows:

	2019	2018
Assets:		
Financial assets at FVOCI	₱278,197,078	₱278,119,312
Equity instruments - financial institution:		
Financial assets at amortized cost	65,141,440	79,558,475
Holding	5,305	56,066,878
Power	56,654,455	49,415,685
Financial institution	11,190,644	12,686,517
Others	191,025,973	195,487,284
	602,214,895	671,334,151
Liability:		
Financial liability	(288,577,009)	(231,070,722)
Fair value of plan assets	₱313,637,886	₱440,263,429

All equity instruments held have quoted prices in active market. The remaining plan assets do not have quoted market prices in active market.

The plan assets have diverse investments and do not have any concentration risk.

The principal assumptions used as of December 31, 2019, 2018 and 2017 in determining net pension liability for the Company's Plan is shown below:

	2019	2018	2017
Discount rate	4.92%	8.18%	5.13%
Salary increase rate	6.00%	7.00%	6.00%

The sensitivity analysis below has been determined based on reasonable possible changes of each significant assumption on the defined benefit obligation as of December 31, 2019 and 2018, respectively, assuming all other assumptions were held constant:

	Increase (decrease) in basis points	Effect on defined benefit obligation	
		2019	2018
Discount rates	100	(₱30,900,955)	(₱18,442,461)
	(100)	35,877,896	21,068,425
Future salary increases	100	37,627,187	23,118,029
	(100)	(33,087,992)	(20,609,365)

The Company's defined benefit pension plan is funded by the Company.

The Company expects to contribute ₱37.3 million to the defined benefit plans in 2020. The average duration of the defined benefit obligation as of December 31, 2019 and 2018 is 14.86 and 12.94 years respectively.

The BOT reviews the performance of the plans on a regular basis. It assesses whether the retirement plans will achieve investment returns which, together with contributions, will be sufficient to pay retirement benefits as they fall due. The Company also reviews the solvency position of the different member companies on an annual basis and estimates, through the actuary, the expected contribution to the Plan in the subsequent year.

16. Income Tax

Details of provision for income tax are as follows:

	2019	2018	2017
Current:			
Corporate income tax	₱21,180,971	₱23,267,247	₱18,946,168
Final	26,101,092	15,959,091	10,440,532
	47,282,063	39,226,338	29,386,700
Deferred	12,100,043	(37,853,440)	7,066,011
	₱59,382,106	₱1,372,898	₱36,452,711

The provision for corporate income tax represents MCIT in 2019, 2018 and 2017.

Reconciliation between the statutory income tax rate and the Company's effective income tax rates follows:

	2019	2018	2017
At statutory rate of 30%	₱3,709,123,406	₱2,699,004,008	₱2,774,617,928
<i>Additions to (reductions in)</i>			
<i>income tax resulting from:</i>

(Forward)

	2019	2018	2017
Nondeductible expenses:			
Interest expense	₱15,570,740	₱13,590,499	₱14,607,592
Project and bidding expenses	-	15,336,715	23,051,869
Others	14,986,699	14,363	5,921
Dividend income	(4,195,623,259)	(2,920,812,882)	(2,937,677,410)
Interest income already subjected to final tax at a lower rate	(47,184,062)	(41,183,329)	(44,265,429)
Others	(1,114,532)	551,819	-
	₱59,382,106	₱1,372,898	₱36,452,711

The components of the Company's net deferred income tax assets (liability) are as follows:

	2019	2018
Deferred income taxes recognized in the parent company statement of income:		
Deferred income tax assets:		
NOLCO	₱130,308,641	₱-
Unamortized past service cost	-	61,464,468
Unrealized foreign exchange loss	-	51,420,259
	130,308,641	112,884,727
Deferred income tax liabilities:		
Unrealized foreign exchange gain	(130,308,641)	-
Pension liability	-	(100,784,684)
	(130,308,641)	(100,784,684)
Deferred income tax asset related to remeasurement effects in the parent company statements of other comprehensive income	-	89,366,223
	₱-	₱101,466,266

As of December 31, 2019, the Company has MCIT that can be claimed as deduction from regular income tax liability as follows:

Period of Recognition	Availment Period	Amount	Applied	Expired	Balance
2016	2017-2019	₱22,262,045	₱-	₱22,262,045	₱-
2017	2018-2020	10,440,532	-	-	10,440,532
2018	2019-2021	15,959,089	-	-	15,959,089
2019	2020-2022	21,180,971	-	-	21,180,971
		₱69,842,637	₱-	₱22,262,045	₱47,580,592

As of December 31, 2019, the Company has NOLCO which can be claimed as deduction against the regular taxable income as follows:

Period of Recognition	Availment Period	Amount	Applied	Expired	Balance
2017	2018-2020	₱419,615,728	₱-	₱-	₱419,615,728
2018	2019-2021	606,218,323	-	-	606,218,323
2019	2020-2022	2,327,888,945	-	-	2,327,888,945
		₱3,353,722,996	₱-	₱-	₱3,353,722,996

No deferred income tax assets have been recognized in 2019 and 2018 on the following temporary differences as it is probable that no sufficient taxable income will be available to allow the benefit of the net deferred income tax assets to be utilized:

	2019	2018
NOLCO	₱2,919,360,861	₱1,025,834,051
Pension liability	219,744,469	-
Unamortized past service cost	164,662,418	-
MCIT	47,580,592	48,661,666

No deferred income tax has been recognized on the impairment of investment in subsidiaries amounting to ₱1.1 billion as of December 31, 2019 and 2018 as management's intention of recovering this amount through future dividend which exempt from income tax.

The Company has unrecognized deductible and taxable temporary differences that arises from the initial recognition of the lease liability and the right-of-use asset upon adoption of PFRS 16 which affects neither the accounting profit nor taxable profit or loss as at January 1, 2019 amounting to ₱64.4 million and ₱46.7 million, respectively.

17. Related Party Disclosures

Parties are considered to be related if one party has the ability to control, directly or indirectly, the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Related parties may be individuals or corporate entities.

The sales to and purchases from related parties are made on terms equivalent to those that prevail in arm's length transactions.

The Company, in its normal course of business, has transactions with its related parties, which principally consist of the following:

- a. The Company has management agreements with each of the following subsidiaries: CLPC, Cotabato Ice Plant, Inc. (CIPI), DLPC, and CPPC for which it is entitled to management fees.
- b. The Company renders various services to related parties such as technical and legal assistance for various projects, trainings and other services, for which it bills technical and service fees.

- c. The Company obtained standby letters of credit (SBLC) and is acting as surety for the benefit of certain subsidiaries, associates and joint ventures in connection with certain loans and credit accommodations. As of December 31, 2019, the Company provided SBLCs for AP Renewables, Inc. (APRI), Cebu Energy Development Corporation (CEDC), Luzon Hydro Corporation (LHC), SN Aboitiz Power-Benguet, Inc. (SNAP B), Therma South, Pagbilao Energy Corporation (PEC), Hedcor Bukidnon, STEAG, and TVI in the amount of ₱6.43 billion. As of December 31, 2018, the Company provided SBLCs for APRI, CEDC, LHC, SNAP B, Therma South, STEAG, and TVI in the amount of ₱4.51 billion.
- d. AEV provides human resources, internal audit, legal, treasury and corporate finance services, among others, to the Company and shares with the member companies the business expertise of its highly qualified professionals. Transactions are priced based on agreed rates, and billed costs are always benchmarked to third party rates to ensure competitive pricing. Service Level Agreements are in place to ensure quality of service. This arrangement enables the Company to maximize efficiencies and realize cost synergies.
- e. Cash deposits and money market placements with Union Bank of the Philippines (UBP), an associated of AEV. At prevailing rates, these fixed-rate investments earned interest income amounting to ₱106.7 million and ₱64.34 million in 2019 and 2018, respectively. Outstanding balances amounted ₱22.8 million and ₱6.11 billion as of December 31, 2019, and 2018, respectively.
- f. Rentals paid at current market rates to Cebu Praedia Development Corporation (CPDC) for the use of CPDC's properties by the Company's officers and employees.
- g. Aviation service fees paid at arm's length basis to AAI for the use of aircraft during travel of the Company's officers and employees.

The Company's balance sheets and statements of income include the following accounts resulting from the above transactions with related parties:

	₱192,752,870	₱299,760,000	₱324,510,000

18. Financial Risk Management Objectives and Policies

The Company's principal financial instruments comprise of cash and cash equivalents and long-term debts. The main purpose of these financial instruments is to raise financing for the Company's operations. The Company has various other financial instruments such as trade and other receivables, AFS investment and trade and other payables which arise directly from its operations.

The Company also enters into derivative transactions, particularly foreign currency forwards, to economically hedge its foreign currency risk from foreign currency denominated liabilities and purchases (see Note 19).

Risk Management Structure

The BOD is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Company.

Financial risk committee

The Financial Risk Committee has the overall responsibility for the development of risk strategies, principles, frameworks, policies and limits. It establishes a forum of discussion of the Company's approach to risk issues in order to make relevant decisions.

Treasury service group

The Treasury Service Group is responsible for the comprehensive monitoring, evaluating and analyzing of the Company's risks in line with the policies and limits.

The main risks arising from the Company's financial instruments are credit risk involving possible exposure to counter party default on its cash and cash equivalents, and trade and other receivables; liquidity risk in terms of the proper matching of the type of financing required for specific investments; and foreign exchange risk in terms of foreign exchange fluctuations that may significantly affect its foreign currency denominated placements.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flow of financial instrument will fluctuate because of the changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to its long-term debt with a floating interest rate and to its derivative asset.

The Company's policy is to manage its interest cost using effective hedging derivatives subject to BOD approval.

The following tables demonstrate the sensitivity to a reasonably possible change in rates, with all other variables held constant, of the Company's income before tax (through the impact on floating rate borrowings). The effect on equity pertains to the impact of the Company's derivative designated under cash flow hedge accounting:

2019	Increase (decrease) in basis points	Effect on income before tax	Effect on equity before tax
	+200	₱312,630,000	₱156,315,000
	-100	(156,315,000)	(78,157,500)

Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company.

The Company's credit risk on cash in banks and cash equivalents and trade and other receivables pertains to possible default by the counterparty, with a maximum exposure equal to the carrying amount of these assets. With respect to cash in banks and cash equivalents, the risk is mitigated by the short-term and/or liquid nature of its short-term deposits mainly in bank deposits and placements, which are placed with financial institutions of high credit standing. With respect to trade and other receivables, credit risk is controlled by the application of credit approval, limit and monitoring procedures. It is the Company's policy that all debtors who wish to trade on credit terms are subject to credit procedures. In addition, receivable balances are monitored on an ongoing basis with the result that the Company's exposure to bad debts is not significant.

The Company has no significant concentration risk to a counterparty or group of counterparties. The credit quality per class of financial assets as of December 31 is as follows (amounts in thousands):

2019

	Neither past due nor impaired			Past due but not impaired	Total
	High Grade	Standard	Sub-standard		
Cash and cash equivalents*	₱4,208,752	₱-	₱-	₱-	₱4,208,752
Trade and other receivables	570,285	-	-	503,209	1,073,494
Derivative asset	80,134	-	-	-	80,134
Total	₱4,859,171	₱-	₱-	₱503,209	₱5,362,380

*Excluding cash on hand

2018

	Neither past due nor impaired			Past due but not impaired	Total
	High Grade	Standard	Sub-standard		
Cash and cash equivalents*	₱11,874,257	₱-	₱-	₱-	₱11,874,257
Trade and other receivables	660,535	-	-	320,929	981,464
Derivative asset	855	-	-	-	855
Financial assets at FVPTL	97,535	-	-	-	97,535
Total	₱12,633,182	₱-	₱-	₱320,929	₱12,954,111

*Excluding cash on hand

High grade pertains to receivables from customers with good favorable credit standing and have no history of default.

Standard grade pertains to those customers with history of sliding beyond the credit terms but pay a week after being past due.

Sub-standard grade pertains to those customers with payment habits that normally extend beyond the approved credit terms, and has high probability of being impaired.

The aging analyses of financial assets as of December 31 are as follows (amounts in thousands):

2019

	Total	Neither past due nor impaired	Past due but not impaired		
			30 days	30 - 60 days	More than 60 days

Liquidity risk

Liquidity risk is the potential of not meeting obligations as they come due because of an inability to liquidate assets or obtain adequate funding. The Company maintains sufficient cash and cash equivalents to finance its operations. Any excess cash is invested in short-term money market placements. These placements are maintained to meet maturing obligations and pay dividend declarations.

In managing its short-term fund requirements, the Company's policy is to ensure that there are sufficient working capital inflows to match repayments of short-term borrowings. With regard to its long-term financing requirements, the Company's policy is that not more than 25% of long-term borrowings should mature in any 12-month period.

The following tables summarize the maturity profile of the Company's financial liabilities based on contractual undiscounted payments as of December 31 (amounts in thousands):

2019

	Total Carrying Value	Contractual undiscounted payments				
		Total	On Demand	Less than 1 year	1 to 5 years	More than 5 years
<i>Financial liabilities:</i>						
Trade and other payables*	₱476,018	₱476,018	₱-	₱476,018	₱-	₱-
Long-term debts	50,079,825	65,046,411	-	2,649,800	39,724,703	22,671,908
Lease liabilities	51,602	59,644	-	17,858	41,786	-

*Excluding output VAT, withholding tax and other statutory liabilities

Market Risk

The risk of loss, immediate or over time, due to adverse fluctuations in the price or market value of instruments, products, and transactions in the Company's overall portfolio (whether on or off-balance sheet) is market risk. These are influenced by foreign and domestic interest rates, foreign exchange rates and gross domestic product growth.

Foreign exchange risk

The foreign exchange risk of the Company pertains to its foreign currency-denominated cash and cash equivalents.

	2019		2018	
	US Dollar	Peso Equivalent	US Dollar	Peso Equivalent
Financial assets:				
Cash and cash equivalents	\$38,479,047	₱1,948,386,531	\$214,821,624	₱11,295,320,990
Financial liability:				
Long-term debt	(300,000,000)	(15,190,500,000)	-	-
Net foreign currency denominated asset (liability)	(\$261,520,953)	(₱13,242,113,469)	\$214,821,624	₱11,295,320,990

The exchange rate for December 31, 2019 and 2018 is ₱50.635:US\$1 and ₱52.58:US\$1, respectively. As a result of the translation of these foreign currency denominated assets, the Company reported net unrealized foreign exchange gain of ₱605.8 million in 2019 and net unrealized foreign exchange loss of ₱162.4 million in 2018.

The following tables demonstrate the sensitivity to a reasonable possible change in the US dollar exchange rates, with all other variables held constant, of the Company's income before income tax as of December 31, 2019 and 2018 (amounts in thousands).

	Increase (decrease) in US dollar	Effect on income before tax
2019		
US dollar-denominated accounts	5%	(₱662,106)
US dollar-denominated accounts	-5%	662,106
2018		
US dollar-denominated accounts	5%	564,766
US dollar-denominated accounts	-5%	(₱564,766)

There is no other impact on the Company's equity other than those already affecting the parent company statements of income.

Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Company considers equity as its capital.

The Company manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. Its policy is to keep the gearing ratio at 70% or below. The Company determines net debt as the sum of interest-bearing short-term and long-term loans less cash and short-term deposits.

	2019	2018
Bank loans	₱—	₱4,700,000,000
Long-term debts	50,079,825,067	22,997,821,292
Cash and cash equivalents	(4,210,064,412)	(11,875,188,311)
Net debt (a)	45,869,760,655	15,822,632,981
Equity	76,653,821,239	75,457,414,289
Equity and net debt (b)	₱122,523,581,894	₱91,280,047,270
Gearing ratio (a/b)	37.44%	17.33%

Part of the Company's capital management is to ensure that it meets financial covenants attached to long-term borrowings. Breaches in meeting the financial covenants would permit the banks to immediately call loans and borrowings. The Company is in compliance with the financial covenants attached to its long-term debts as of December 31, 2019 and 2018 (see Note 12).

No changes were made in the objectives, policies or processes during the years ended December 31, 2019 and 2018.

19. Financial Instruments

Fair Value of Financial Instruments

Fair value is defined as the amount at which the financial instrument could be sold in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

A financial instrument is regarded as quoted in an active market if quoted prices are readily available from an exchange, dealer, broker, pricing services or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. For a financial instrument with an active market, the quoted market price is used as its fair value. On the other hand, if transactions are no longer regularly occurring even if prices might be available and the only observed transactions are forced transactions or distressed sales, then the market is considered inactive. For a financial instrument with no active market, its fair value is determined using a valuation technique (e.g. discounted cash flow approach) that incorporates all factors that market participants would consider in setting a price (amounts in thousands).

Set out below is a comparison by category of carrying amounts and fair values of the Company's financial instruments whose fair values are different from their carrying amounts.

	2019		2018	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial liabilities:				
Long-term debts	₱50,079,825	₱49,456,980	₱22,997,821	₱20,671,106
Lease liabilities	51,602	54,628	—	—
	₱50,131,427	₱49,511,608	₱22,997,821	₱20,671,106

The following method and assumption are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, trade and other receivables and trade and other payables

The carrying amounts of cash and cash equivalents, trade and other receivables and trade and other payables approximate fair values due to the relatively short-term maturity of these financial instruments.

Financial assets at FVTPL

These equity securities are carried at fair value.

Long-term debts

The fair value of long-term debt is based on the discounted value of future cash flows using the applicable rates for similar types of loans. Discount rates used range from 5.14% to 5.89% in 2019 and 8.45% to 8.56% in 2018.

Lease liabilities

The fair values are computed using Level 3 of the fair value hierarchy and are based on the discounted value of expected future cash flows using the applicable credit-adjusted risk-free rates of 4.70% to 5.36% in 2019.

Derivative Financial Instruments

The Company entered into short-term forward contracts with counterparty banks to manage foreign currency risks associated with foreign currency-denominated liabilities and purchases.

The aggregate notional amount of the par forward contract is nil and \$50.0 million (₱2.63 billion) as of December 31, 2019 and 2018, respectively.

The Company recognized losses from the net fair value changes relating to the forward contracts amounting to ₱126.0 million and ₱11.5 million in 2019 and 2018, respectively, under the “Foreign exchange gains (loss)” account in the parent company statements of income.

IRS

On September 6, 2019, the Company entered into an IRS agreement effective September 30, 2019 to hedge \$150 million of its floating rate exposure on its loan (see Note 12). Under the IRS agreement, the Company, on a quarterly basis, pays a fixed rate of 1.449300% per annum and received variable interest at 3-month LIBOR, subject to a floor of 0%. The interest payments and receipts are based on the outstanding USD notional amount simultaneous with the interest payments on the hedged loan. Similar with the hedged loan, the IRS has amortizing notional amounts which cover a period of up to April 30, 2024. The Company designated the swap as a cash flow hedge.

Hedge Effectiveness Results

Since the critical terms of the hedged loan and the IRS match, the hedge was assessed to be highly effective. The effective portion of the changes in the fair value of the swap amounting to ₱80,134,271 in 2019 was deferred in equity under the “Cash flow hedge reserve” account.

The following is the maturity analysis of the notional amount and the corresponding average fixed interest rate as of December 31, 2019 (amounts in thousands):

	Maturity					Total
	Less than 3 months	3 to 6 months	6 to 12 months	1 to 2 years	More than 2 years	
IRS - Derivative asset						
Notional amount	₱-	₱-	₱-	₱-	₱7,595,250	₱7,595,250
Average fixed interest rate (%)	1.4493%	1.4493%	1.4493%	1.4493%	1.4493%	

The impact of the hedged item and hedging instrument in the parent company balance sheet as of December 31, 2019, and in the parent company statement of income and parent company statement of comprehensive income for the year ended December 31, 2019, is as follows:

	Carrying amount	Change in fair value used for measuring ineffectiveness	Total hedging gain recognized in other comprehensive income	Ineffectiveness recognized in other income (charges)
IRS - Derivative asset	₱80,134,271	₱80,134,271	₱80,134,271	₱-

Fair Value Hierarchy

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

For the years ended December 31, 2019 and 2018, there were no transfers between Level 1 and Level 2 fair value measurements, and no transfers into and out of Level 3 fair value measurements were made.

20. Lease Agreements

a. Operating Lease Agreement with Manta Equities, Inc. (MEI)

The Company entered into an operating lease agreement with MEI for its use of administrative office space and parking space for a period of ten (10) years from April 1, 2013 to May 31, 2023 and nine (9) years and three (3) months from and March 1, 2014 to May 31, 2023, respectively. Both lease contracts have an escalation rate of 5.0%.

Total prepaid rent pertaining to this agreement amounted to ₱5,021,619 as at December 31, 2018 which was recognized under "Other current assets" account in the balance sheets (see Note 6).

b. Operating Lease Agreement with Limketkai Sons, Inc. (LSI)

The Company entered into an operating lease agreement with LSI for its use of administrative and sales office space for a period of three (3) years from November 1, 2016 to October 31, 2019.

Lease Disclosure in Accordance with PAS 17 (applicable prior January 1, 2019)

Rent expense pertaining to the foregoing leased properties charged to operations amounted to ₱17.5 million and ₱16.5 million for the year ended December 31, 2018 and 2017, respectively.

Future minimum lease payments under the non-cancellable operating leases as of December 31, 2018 are as follows:

Not later than 1 year	₱17,825,546
Later than 1 year but not later than 5 years	59,643,634
	<u>₱77,469,180</u>

Lease Disclosure in Accordance with PFRS 16 (applicable beginning January 1, 2019)

Set out below, are the carrying amounts of the Company's lease liability and the movements during the year ended December 31, 2019:

Effect of Adoption - PFRS 16 (see Note 2)	₱64,347,091
Interest expense	5,080,616
Payment	(17,825,560)
	<hr/>
	₱51,602,147
	<hr/>

The Company also has certain leases of conference rooms with lease terms of 12 months or less. The Company applies the 'short-term lease' recognition exemptions of these leases.

Set out below, are the amounts recognized in the statements of income for the period ended December 31, 2019:

Amortization expense of right-of-use assets	₱11,490,685
Interest expense on lease liabilities	5,080,616
Rent expense - short-term leases	7,027,319
	<hr/>
	₱23,598,620
	<hr/>

21. Note to Statements of Cash Flows

The following are the cash flow movements of the Company's financing liabilities:

	January 1, 2019	Net cash flows	Non-cash Changes						December 31, 2019
			Adoption of PFRS 16 (see Note 2)	Dividend declaration	Amortized deferred financing costs	Foreign exchange movement	Interest expense	Others	
Lease liability	₱-	(₱17,825,560)	₱64,347,091	₱-	₱-	₱-	₱5,080,616	₱-	₱51,602,147
Current interest-bearing loans and borrowings, excluding obligations under finance leases	4,700,000,000	(4,700,000,000)	-	-	-	-	-	-	-

Interest on loans and borrowings	212,180,900	(2,301,301,047)	-	-	-	-	2,445,928,121	23,622,986	380,430,960
Dividend payable	-	(10,817,148,331)	-	10,817,148,331	-	-	-	-	-
Total liabilities from financing activities	₱27,910,002,192	₱9,613,828,705	₱64,347,091	₱10,817,148,331	₱72,900,132	(₱441,000,000)	₱2,451,008,737	₱23,622,986	₱50,511,858,174

	January 1, 2018	Net cash flows	Non-cash Changes				December 31, 2018
			Dividend declaration	Amortized deferred financing costs	Interest expense	Others	
Current interest-bearing loans and borrowings, excluding obligations under finance leases	₱-	₱4,700,000,000	₱-	₱-	₱-	₱-	₱4,700,000,000
Non-current interest-bearing loans and borrowings	12,901,981,643	10,078,075,748	-	17,763,901	-	-	22,997,821,292
Interest on loans and borrowings	66,285,228	(878,938,176)	-	-	999,180,246	25,653,602	212,180,900
Dividend payable	-	(10,228,459,986)	10,228,459,986	-	-	-	-
Total liabilities from financing activities	₱12,968,266,871	₱3,670,677,586	₱10,228,459,986	₱17,763,901	₱999,180,246	₱25,653,602	₱27,910,002,192

22. Supplementary Information Required Under Revenue Regulations (RR) 15-2010

The Company also reported and/or paid the following types of taxes for the year:

VAT

The Company's sales are subject to output value added tax (VAT) while its importations and purchases from other VAT-registered individuals or corporations are subject to input VAT. The VAT rate is 12.0%.

a. Net Receipts and Output VAT declared in the Company's VAT returns in 2019

	Net Sales/ Receipts	Output VAT
Taxable Sales:		
Sales of services	₱1,591,484,256	₱186,845,114

The Company's sales that are subject to VAT are reported under the following accounts:

- Service Income - Management fees
- Service Income - Professional fees
- Service Income - Technical fees
- Miscellaneous Income - Operating
- Miscellaneous Income - Non-operating

The Company's sales of services are based on actual collections received, hence, may not be the same as amounts accrued in the parent company statement of income.

b. Input VAT for 2019

Balance at January 1	₱10,585,384
Current year's domestic purchases/payments for:	
Goods other than for resale or manufacture	2,489,344
Capital goods subject to amortization	2,381,763
Capital goods not subject to amortization	135,352
Services lodged under the other accounts	32,915,519
	48,507,362
Claims for tax credit/refund and other adjustments	(29,245,183)
Balance at December 31	₱19,262,179

Other taxes and licenses

Taxes and licenses, local and national, include real estate taxes, licenses and permit fees for 2019:

License and permit fees	₱13,597,152
Documentary stamp taxes (DST)	59,894,045
Deficiency and amnesty taxes	22,037,395
Fringe benefit taxes	2,746,293
Others	2,458
	₱98,277,343

Withholding taxes

Final withholding taxes	₱511,358,438
Withholding taxes on compensation and benefits	200,160,545
Expanded withholding taxes	31,249,895
Withholding VAT	724,139
	<hr/>
	₱743,493,017
	<hr/> <hr/>

Tax Assessment and Cases

The Company has no pending tax cases outside of the administration of the BIR as of December 31, 2019.

STATEMENT OF MANAGEMENT'S RESPONSIBILITY
FOR FINANCIAL STATEMENTS

The management of Aboitiz Power Corporation is responsible for the preparation and fair presentation of the Parent financial statements including the schedules attached therein, for the years ended December 31, 2017 and 2016 in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

The Board of Directors reviews and approves the financial statements including the schedules attached therein, and submits the same to the stockholders.

SyCip Gorres Velayo & Co., the independent auditor, appointed by the stockholders, has audited the financial statements of the Company in accordance with Philippine Standards on Auditing, and in its report to the stockholders, has expressed its opinion on the fairness of presentation upon completion of such audit.

ENRIQUE M. ABOITIZ, JR.
Chairman of the Board

ERRAMON I. ABOITIZ
Chief Executive Officer

LIZA LUV T. MONTELIBANO

INDEPENDENT AUDITOR'S REPORT

The Board of Directors and Stockholders
Aboitiz Power Corporation
32nd Street, Bonifacio Global City
Taguig City, Metro Manila
Philippines

Report on the Audit of the Parent Company Financial Statements

Opinion

We have audited the parent company financial statements of Aboitiz Power Corporation (the Company), which comprise the parent company balance sheets as at December 31, 2017 and 2016, and the parent company statements of income, parent company statements of comprehensive income, parent company statements of changes in equity and parent company statements of cash flows for each of the three years in the period ended December 31, 2017, and notes to the parent company financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying parent company financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2017 and 2016, and its financial performance and its cash flows for each of the three years in the period ended December 31, 2017 in accordance with Philippine Financial Reporting Standards (PFRSs).

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Parent Company Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the parent company financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Parent Company Financial Statements

Management is responsible for the preparation and fair presentation of the parent company financial statements in accordance with PFRSs, and for such internal control as management determines is necessary to enable the preparation of parent company financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Parent Company Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent company financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the parent company financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the parent company financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the parent company financial statements, including the disclosures, and whether the parent company financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on the Supplementary Information Required Under Revenue Regulations 15-2010

Our audits were conducted for the purpose of forming an opinion on the parent company financial statements taken as a whole. The supplementary information required under Revenue Regulations 15-2010 in Note 22 to the parent company financial statements is presented for purposes of filing with the Bureau of Internal Revenue and is not a required part of the basic financial statements. Such information is the responsibility of the management of Aboitiz Power Corporation. The information has been subjected to the auditing procedures applied in our audit of the basic financial statements. In our opinion, the information is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

The engagement partner on the audit resulting in this independent auditor's report is Maria Veronica Andresa R. Pore.

ABOITIZ POWER CORPORATION
NOTES TO PARENT COMPANY FINANCIAL STATEMENTS

1. Corporate Information

Aboitiz Power Corporation (the Company) was incorporated in the Philippines and registered with the Securities and Exchange Commission on February 13, 1998. The Company is a publicly-listed holding company of the entities engaged in power generation and power distribution in the Aboitiz Group. As of December 31, 2017, Aboitiz Equity Ventures, Inc. (AEV, a publicly-listed Company incorporated in the Philippines) owns 76.88% of the Company. The Company's ultimate parent is Aboitiz & Company, Inc. (ACO).

The Company's registered office address is 32nd Street, Bonifacio Global City, Taguig City, Metro Manila.

The parent company financial statements were approved and authorized for issue in accordance with a resolution by the Board of Directors (BOD) of the Company on March 8, 2018.

2. Basis of Preparation, Statement of Compliance and Summary of Significant Accounting Policies

Basis of Preparation

The accompanying parent company financial statements have been prepared on a historical cost basis, except for derivative financial instruments and AFS investments which are measured at fair value. The parent company financial statements are presented in Philippine peso which is the Company's functional currency and all values are rounded to the nearest peso except for exchange rate and as otherwise indicated.

The Company also prepares and issues consolidated financial statements for the same period as the separate financial statements that are presented in compliance with Philippine Financial Reporting Standards (PFRSs). These may be obtained at 32nd Street, Bonifacio Global City, Taguig City, Metro Manila, Philippines.

Statement of Compliance

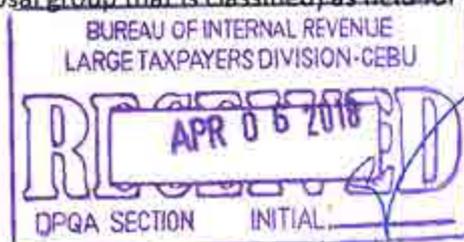

The parent company financial statements are prepared in compliance with PFRSs.

Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year, except for the following new and revised standards and Philippine Interpretations which were applied starting January 1, 2017. These new and revised standards and interpretations did not have any significant impact on the parent company financial statements:

- Amendment to PFRS 12, *Disclosure of Interests in Other Entities, Clarification of the Scope of the Standard* (Part of Annual Improvements to PFRSs 2014-2016 cycle)

The amendments clarify that the disclosure requirements in PFRS 12, other than those relating to summarized financial information, apply to an entity's interest in a subsidiary, a joint venture or an associate (or a portion of its interest in a joint venture or an associate) that is classified (or included in a disposal group that is classified) as held for sale.

Adoption of these amendments did not have any impact on the Company's financial statements.

- Amendments to Philippine Accounting Standards (PAS) 12, *Income Taxes, Recognition of Deferred Tax Assets for Unrealized Losses*

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount.

The Company applied the amendments retrospectively. However, their application has no effect on the Company's financial position and performance as the Company has no deductible temporary differences or assets that are in the scope of the amendments.

- Amendments to PAS 7, *Statement of Cash Flows, Disclosure Initiative*

The amendments require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses).

The Company has provided the required information in Note 21 to the parent company financial statements. As allowed under the transition provisions of the standard, the Company did not present comparative information for the year ended December 31, 2016.

New Standards and Interpretations Issued and Effective after December 31, 2017

The Company will adopt the standards enumerated below when these become effective. Except as otherwise indicated, the Company does not expect the adoption of these new and amended PFRSs, PAS and Philippine Interpretations to have significant impact on its financial statements.

Effective January 1, 2018

- Amendments to PFRS 2, *Share-based Payment, Classification and Measurement of Share-based Payment Transactions*

The amendments to PFRS 2 address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and the accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash settled to equity settled.

On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and if other criteria are met. Early application of the amendments is permitted.

These amendments will not be applicable to the Company since it has no share-based payment arrangements.

- Amendments to PFRS 4, *Insurance Contracts, Applying PFRS 9, Financial Instruments, with PFRS 4*

The amendments address concerns arising from implementing PFRS 9, the new financial instruments standard before implementing the new insurance contracts standard. The amendments introduce two options for entities issuing insurance contracts: a temporary exemption from applying PFRS 9 and an overlay approach. The temporary exemption is first applied for reporting periods beginning on or after January 1, 2018. An entity may elect the overlay approach when it first applies PFRS 9 and apply that approach retrospectively to financial assets designated on transition to PFRS 9. The entity restates comparative information reflecting the overlay approach if, and only if, the entity restates comparative information when applying PFRS 9.

The amendments are not applicable to the Company since it is not engaged in the insurance business.

- PFRS 15, *Revenue from Contracts with Customers*

PFRS 15 establishes a new five-step model that will apply to revenue arising from contracts with customers. Under PFRS 15, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The principles in PFRS 15 provide a more structured approach to measuring and recognizing revenue.

The new revenue standard is applicable to all entities and will supersede all current revenue recognition requirements under PFRSs. Either a full or modified retrospective application is required for annual periods beginning on or after January 1, 2018. Early adoption is permitted. The Company plans to adopt the new standard on the required effective date using the modified retrospective method. In 2016, the Company performed a preliminary assessment of PFRS 15, which was continued with a more detailed analysis in 2017

Based on its initial assessment, the requirement of PFRS 15 on identification of performance obligations may have an impact on the Company's financial position, performance and disclosures. For contract with customers in which the rendering of services is generally expected to qualify as a series of distinct services that are substantially the same and have the same pattern of transfer accounted for as one performance obligation, adoption of PFRS 15 is not expected to have significant impact on the Company's revenue and profit or loss. The Company expects the revenue recognition to occur over time wherein the customer simultaneously receives and consumes the benefits as the seller render the services.

In addition, as the presentation and disclosure requirements in PFRS 15 are more detailed than under current PFRSs, the Company is currently assessing what necessary changes it needs to make on its current systems, internal controls policies and procedures to enable the Company to collect and disclose the required information.

The recognition and measurement requirements in PFRS 15 also apply to gains or losses on disposal of nonfinancial assets (such as items of property and equipment and intangible assets), when that disposal is not in the ordinary course of business. However, on transition, the effect of these changes is not expected to be material for the Company

- PFRS 9, *Financial Instruments*

PFRS 9 reflects all phases of the financial instruments project and replaces PAS 39, *Financial Instruments: Recognition and Measurement*, and all previous versions of PFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. PFRS 9 is effective for annual periods beginning on or after January 1, 2018, with early application permitted. Retrospective application is required, but comparative information is not compulsory. For hedge accounting, the requirements are generally applied prospectively, with some limited exceptions.

The Company plans to adopt the new standard on the mandatory effective date and will not restate comparative information.

The Company has performed an assessment of the population of financial instruments impacted by the classification and measurement requirements of PFRS 9 and is in the process of developing impairment methodologies to support the calculation of expected credit losses (ECL) for qualified credit exposures.

(a) Classification and measurement

PFRS 9 requires that the Company classifies debt instruments based on the contractual cash flow characteristics of the assets and the business model for managing those assets. These factors determine whether the financial assets are measured at amortized cost, fair value through other comprehensive income (FVOCI), or fair value through profit or loss (FVTPL).

The Company assessed that the contractual cash flows of its debt financial assets are solely payments of principal and interest (SPPI) and are expected to be held to collect all contractual cash flows until their maturity. As a result, these debt financial assets are still expected to be measured at amortized cost.

Investments in unquoted equity shares currently carried at cost under PAS 39 are expected to be measured at FVTPL. The Company is in the process of determining how to measure the fair value of these unquoted investments.

(b) Impairment

PFRS 9 requires the Company record ECL for all loans and other debt financial assets not classified as at FVTPL, together with contract assets, loan commitments and financial guarantee contracts. The Company plans to apply the simplified approach and record lifetime ECL on all trade receivables and contract assets. For other debt financial assets measured at amortized cost, the general approach will be applied, measuring either a 12-month or lifetime expected losses, depending on the extent of the deterioration of their credit quality from origination. The Company is currently quantifying the impact of the change in measuring ECL.

(c) *Hedge accounting*

PFRS 9 introduces a new hedge accounting model which aims to reflect in the financial statements the effect of an entity's risk management activities that use financial instruments to manage exposures arising from particular risks that could affect profit or loss. The new hedge accounting model reduces restrictions on the classification and designation of hedged items and hedging instruments and provides a more principle-based criteria for measuring hedge effectiveness. The Company assessed that the adoption of the new hedge accounting requirements under PFRS 9 will have no impact in the 2018 financial statements since the Company does not designate hedging relationships on which PFRS 9 will apply.

The Company has applied its existing governance framework to ensure that appropriate controls and validations are in place over key processes and judgments in implementing PFRS 9. The Company is continuously refining its internal controls and processes which are relevant in the proper implementation of PFRS 9.

- Amendments to PAS 28, *Measuring an Associate or Joint Venture at Fair Value (Part of Annual Improvements to PFRSs 2014 - 2016 Cycle)*

The amendments clarify that an entity that is a venture capital organization, or other qualifying entity, may elect, at initial recognition on an investment-by-investment basis, to measure its investments in associates and joint ventures at fair value through profit or loss. They also clarify that if an entity that is not itself an investment entity has an interest in an associate or joint venture that is an investment entity, the entity may, when applying the equity method, elect to retain the fair value measurement applied by that investment entity associate or joint venture to the investment entity associate's or joint venture's interests in subsidiaries. This election is made separately for each investment entity associate or joint venture, at the later of the date on which (a) the investment entity associate or joint venture is initially recognized; (b) the associate or joint venture becomes an investment entity; and (c) the investment entity associate or joint venture first becomes a parent. The amendments should be applied retrospectively, with earlier application permitted.

These amendments are not applicable to the Company since it not a venture capital organization and has no interest in investment entity subsidiaries, associates or joint ventures.

- Amendments to PAS 40, *Investment Property, Transfers of Investment Property*

The amendments clarify when an entity should transfer property, including property under construction or development into, or out of investment property. The amendments state that a change in use occurs when the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use. A mere change in management's intentions for the use of a property does not provide evidence of a change in use. The amendments should be applied prospectively to changes in use that occur on or after the beginning of the annual reporting period in which the entity first applies the amendments. Retrospective application is only permitted if this is possible without the use of hindsight.

These amendments are not applicable to the Company since it does not own any investment property.

- Philippine Interpretation from International Financial Reporting Interpretations Committee (IFRIC)-22, *Foreign Currency Transactions and Advance Consideration*

The interpretation clarifies that in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognizes the nonmonetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine a date of the transactions for each payment or receipt of advance consideration. The interpretation may be applied on a fully retrospective basis. Entities may apply the interpretation prospectively to all assets, expenses and income in its scope that are initially recognized on or after the beginning of the reporting period in which the entity first applies the interpretation or the beginning of a prior reporting period presented as comparative information in the financial statements of the reporting period in which the entity first applies the interpretation.

Since the Company's current practice is in line with the clarifications issued, the Company does not expect any effect on its financial statements upon adoption of this interpretation.

Effective January 1, 2019

- PFRS 16, *Leases*

PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under PAS 17, *Leases*. The standard includes two recognition exemptions for lessees - leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognize a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognize the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under PFRS 16 is substantially unchanged from today's accounting under PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases.

PFRS 16 also requires lessees and lessors to make more extensive disclosures than under PAS 17. Early application is permitted, but not before an entity applies PFRS 15. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs.

The Company is currently assessing the impact of PFRS 16 and plans to adopt the new standard on the required effective date.

- Amendments to PFRS 9, *Prepayment Features with Negative Compensation*

The amendments to PFRS 9 allow debt instruments with negative compensation prepayment features to be measured at amortized cost or fair value through other comprehensive income. An entity shall apply these amendments for annual reporting periods beginning on or after January 1, 2019. Earlier application is permitted.

The Company expects that adoption of these amendments will not have any impact on the Company's financial statements and plans to adopt these on the required effective date.

- Philippine Interpretation IFRIC-23, *Uncertainty over Income Tax Treatments*

The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12 and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

An entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed.

The Company is currently assessing the impact of adopting this interpretation.

Deferred effectivity

- Amendments to PFRS 10 and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3, *Business Combinations*. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

Summary of Significant Accounting Policies

Current versus Noncurrent Classification

The Company presents assets and liabilities in the balance sheet based on current/noncurrent classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realized within twelve months after the reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as noncurrent.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as noncurrent.

Deferred income tax assets and liabilities are classified as noncurrent assets and liabilities.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participants ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the parent company financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the parent company financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Cash and Cash Equivalents

Cash and cash equivalents in the parent company balance sheet consist of cash on hand and with banks, and short-term, highly liquid investments that are readily convertible to known amounts of cash and subject to insignificant risk of changes in value. They are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

Financial Instruments

Date of recognition

The Company recognizes a financial asset or a financial liability in the parent company balance sheet on the date when it becomes a party to the contractual provisions of the instrument. All regular way purchases and sales of financial assets are recognized on trade date, which is the date that the Company commits to purchase the asset. Regular way purchases or sales of financial assets are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace. Derivatives are recognized on a trade date basis.

Initial recognition of financial instruments

All financial assets and financial liabilities are recognized initially at fair value. Except for financial assets at fair value through profit or loss (FVPL), the initial measurement of financial assets includes transaction costs. The Company classifies its financial assets in the following categories: financial assets at FVPL, loans and receivables, held-to-maturity (HTM) investments and available-for-sale (AFS) investments. For financial liabilities, the Company also classifies them into financial liabilities

at FVPL and other financial liabilities. The classification depends on the purpose for which the investments were acquired and whether they are quoted in an active market. The Company determines the classification of its financial assets at initial recognition and, where allowed and appropriate, re-evaluates such designation at every balance sheet date.

'Day 1' difference

Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Company recognizes the difference between the transaction price and fair value (a 'Day 1' difference) in the parent company statement of income unless it qualifies for recognition as some other type of asset. In cases where unobservable data is used, the difference between the transaction price and model value is only recognized in the parent company statement of income when the inputs become observable or when the instrument is derecognized. For each transaction, the Company determines the appropriate method of recognizing the 'Day 1' difference amount.

a. Financial asset or financial liability at FVPL

Financial assets and liabilities at FVPL include financial assets and liabilities classified as held for trading and financial assets and liabilities designated upon initial recognition as at FVPL. Financial assets and liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term or upon initial recognition if it is designated by management as at FVPL. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated and considered as hedging instruments in an effective hedge.

Financial assets may be designated at initial recognition as at FVPL if the following criteria are met: (i) the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or recognizing gains or losses on them on a different basis; (ii) the assets are part of a group of financial assets which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management strategy; or (iii) the financial asset contains an embedded derivative that would need to be separately recorded, unless the embedded derivative does not significantly modify the cash flow or it is clear, with little or no analysis, that it would not be separately recorded.

Where a contract contains one or more embedded derivatives, the entire hybrid contract may be designated as financial asset or financial liability at FVPL, except where the embedded derivative does not significantly modify the cash flows or it is clear that separation of the embedded derivative is prohibited.

Financial assets and liabilities at FVPL are recorded in the parent company balance sheet at fair value. Subsequent changes in fair value are recognized in the parent company statement of income. Interest earned or incurred is recorded as interest income or expense, respectively, while dividend income is recorded as other income when the right to receive payment has been established.

Included under this category is the Company's derivative asset (see Note 19).

b. Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are not entered into with the intention of immediate or short-term resale and are not reclassified or designated as AFS investments or financial assets at FVPL. After initial measurement, loans and receivables are subsequently carried at amortized cost using the effective interest method less any allowance for impairment. Amortized cost is calculated taking into account any discount or premium on acquisition and includes fees that are an integral part of the effective interest rate and transaction costs. Gains and losses are recognized in the parent company statement of income when the loans and receivables are derecognized or impaired, as well as through the amortization process.

Included under this category are the Company's cash and cash equivalents (excluding cash on hand) and trade other receivables.

c. HTM investments

HTM investments are quoted non-derivative financial assets which carry fixed or determinable payments and fixed maturities and which the Company has the positive intention and ability to hold to maturity. After the initial measurement, HTM investments are measured at amortized cost using the effective interest method. This method uses an effective interest rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are integral to the effective interest rate. Where the Company sells other than an insignificant amount of HTM investments, the entire category would be tainted and reclassified as AFS investments. Gains and losses are recognized in the parent company statement of income when the investments are derecognized or impaired, as well as through the amortization process.

The Company does not have any HTM investments at December 31, 2017 and 2016.

d. AFS investments

AFS investments are non-derivative financial assets that are either designated as AFS or not classified in any of the other categories. They are purchased and held indefinitely, and may be sold in response to liquidity requirements or changes in market conditions. Quoted AFS investments are measured at fair value with gains or losses being recognized as other comprehensive income, until the investments are derecognized or until the investments are determined to be impaired at which time, the accumulated gains or losses previously reported in other comprehensive income are included in the parent company statement of income. Unquoted AFS investments are carried at cost, net of impairment. Interest earned or paid on the investments is reported as interest income or expense using the effective interest rate. Dividends earned on investments are recognized in the parent company statement of income when the right of payment has been established.

Included under this category are the Company's investment in unquoted shares of stocks (see Note 18).

e. Other financial liabilities

This category pertains to issued financial liabilities or their components that are neither held for trading nor designated as at FVPL upon the inception of the liability and contain contractual obligations to deliver cash or another financial asset to the holder or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares. The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as fair value of the liability component on the date of issue. These include liabilities arising from operations or borrowings.

Other financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable financing costs. Deferred financing costs are amortized, using the effective interest rate method, over the term of the related long-term liability. After initial recognition, interest-bearing loans and other borrowings are subsequently measured at amortized cost using the effective interest rate method.

Gains and losses are recognized in the parent company statement of income when liabilities are derecognized, as well as through amortization process.

Included under this category are the Company's trade and other payables and long-term debts.

Derivative financial instruments

Derivative financial instruments, including embedded derivatives, are initially recognized at fair value on the date in which a derivative transaction is entered into or bifurcated, and are subsequently remeasured at FVPL, unless designated as effective hedge. Changes in fair value of derivative instruments not accounted as hedges are recognized immediately in the parent company statement of income. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

The Company assesses whether embedded derivatives are required to be separated from host contracts when the Company first becomes party to the contract. An embedded derivative is separated from the host financial or non-financial contract and accounted for as a separate derivative if all of the following conditions are met:

- the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics of the host contract;
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- the hybrid or combined instrument is not recognized as at FVPL.

Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

Embedded derivatives that are bifurcated from the host contracts are accounted for either as financial assets or financial liabilities at FVPL.

As of December 31, 2017 the Company has derivative assets classified as financial assets at FVPL (see Note 19).

Classification of financial instruments between liability and equity

A financial instrument is classified as liability if it provides for a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Company; or
- satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Company does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as income or expense. Distributions to holders of financial instruments classified as equity are charged directly to equity net of any related income tax benefits.

The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

Derecognition of Financial Assets and Liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized where:

- the rights to receive cash flows from the asset have expired;
- the Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the Company has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Company has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Company's continuing involvement in the asset.

Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or has expired.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new

liability, and the difference in the respective carrying amounts is recognized in the parent company statement of income.

Impairment of Financial Assets

The parent company assesses at each balance sheet date whether a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if and only if, there is an objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Loans and receivables

For loans and receivables carried at amortized cost, the Company first assesses individually whether objective evidence of impairment exists for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the parent company statement of income. Interest income continues to be accrued on the reduced carrying amount based on the original effective interest rate of the financial asset. Loans and receivables together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been transferred to the Company. If, in a subsequent period, the amount of the impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or decreased by adjusting the allowance account. Any subsequent reversal of an impairment loss is recognized in the parent company statement of income, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

Assets carried at cost

If there is objective evidence that an impairment loss on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such an unquoted equity instrument has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

AFS investments

For AFS investments, the Company assesses at each balance sheet date whether there is objective evidence that an investment or group of investments is impaired.

In the case of equity investments classified as AFS, objective evidence of impairment would include a significant or prolonged decline in the fair value of the investments below its cost. Where there is evidence of impairment, the cumulative loss (measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the parent company statement of income) is removed from the other comprehensive income and recognized in the parent company statement of income. Impairment losses on equity investments are not reversed through the parent company statement of income. Increases in fair value after impairment are recognized directly in the other comprehensive income.

In the case of debt instruments classified as AFS, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on rate of interest used to discount future cash flows for measuring impairment loss. Such accrual is recorded as part of "Interest income" in the parent company statement of income. If, in subsequent period, the fair value of a debt instrument increased and the increase can be objectively related to an event occurring after the impairment loss was recognized in the parent company statement of income, the impairment loss is reversed through the parent company statement of income.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the parent company balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements whereby the related assets and liabilities are presented gross in the parent company balance sheet. The Company assesses that it has a currently enforceable right of offset if the right is not contingent on a future event, and is legally enforceable in the normal course of business, event of default, and event of insolvency or bankruptcy of the Company and all of the counterparties.

Investments in Subsidiaries and Associates

A subsidiary is an entity over which the Company has the power to govern the financial and operating policies generally accompanying a shareholding of more than half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity.

An associate is an entity in which the Company has significant influence and which is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decision of the investee, but is not control or joint control over those policies.

Investments in subsidiaries and associates are carried at cost, less impairment in value, in the parent company financial statements.

The Company recognizes income from the investments only to the extent that the Company receives distributions or establishes a right to receive distributions from accumulated profits of the subsidiaries and associates arising after the date of acquisition. Distributions received in excess of such profits are regarded as a recovery of investment and are recognized as a reduction of the cost of the investment.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and accumulated impairment in value, if any. The initial cost of property and equipment comprises its purchase price, including import duties, if any, nonrefundable taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Such cost includes the cost of replacing parts of such property and equipment when that cost is incurred if the recognition criteria are met.

Depreciation is calculated on a straight-line basis over the useful lives of the assets as follows:

<u>Category</u>	<u>Number of Years</u>
Transportation equipment	5
Office equipment	3
Communication equipment	3
Leasehold improvements	10

Leasehold improvements are amortized over the period of the lease agreement or the estimated useful lives of the improvements, whichever is shorter.

Fully depreciated assets are retained in the accounts until these are no longer in use. When assets are retired or otherwise disposed of, both the cost and related accumulated depreciation and amortization and any allowance for impairment losses are removed from the accounts and any resulting gain or loss is credited or charged to current operations. An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the parent company statement of income in the year the asset is derecognized.

The carrying values of property and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

When each major inspection is performed, its cost is recognized in the carrying amount of the property and equipment as a replacement if the recognition criteria are satisfied.

The asset's useful lives and depreciation and amortization method are reviewed, and adjusted if appropriate, at each financial year-end.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is fair value as at the date of the acquisition.

Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the parent company statement of income in the year in which the expenditure is incurred.

Computer software license

Computer software license is initially recognized at cost. Following initial recognition, the computer software license cost is carried at cost less accumulated amortization and any accumulated impairment in value.

The computer software license is amortized on a straight-line basis over its estimated useful economic life of three to five years and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization commences when the computer software license is available for use. The amortization period and the amortization method for the license are reviewed at each financial year end. Changes in the estimated useful life is accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates. The amortization expense is recognized in the parent company statement of income in the expense category consistent with the function of the computer software license.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the parent company statement of income when the asset is derecognized.

Project Development Costs

Project development costs include power plant projects in the development phase which meet the "identifiability" requirement under PAS 38, *Intangible Assets*, as they are separable and susceptible to individual sale and are carried at acquisition cost. These assets are transferred to "Property and equipment" when construction of each power plant commences. During the period of development, the asset is tested for impairment annually.

Impairment of Nonfinancial Assets

The Company assesses at each balance sheet date whether there is an indication that assets may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use (VIU) and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing VIU, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognized in the parent company statement of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each balance sheet date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Company makes an estimates of the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the parent company statement of income unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation

increase. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Foreign Currency Transactions

The Company's financial statements are presented in Philippine Peso, which is the Company's functional currency. Transactions in foreign currencies are recorded using the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are restated using the rate of exchange at balance sheet date. Exchange gains and losses arising from foreign currency transactions and translations of foreign currency denominated monetary assets and liabilities are credited to or charged against current operations.

Capital Stock and Additional Paid-in Capital

Capital stock is measured at par value for all shares issued. When the Company issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued. Capital stock includes common stock and preferred stock.

When the shares are sold at premium, the difference between the proceeds and the par value is credited to the "Additional paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case the shares are issued to extinguish or settle the liability of the Company, the shares shall be measured either at the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Direct costs incurred related to equity issuance, such as underwriting, accounting and legal fees, printing costs and taxes are debited to the "Additional paid-in capital" account. If additional paid-in capital is not sufficient, the excess is charged against an equity reserve account.

Retained Earnings

The amount included in retained earnings includes accumulated earnings of the Company and reduced by dividends on capital stock. Dividends on capital stock are recognized as a liability and deducted from equity when they are approved by the BOD. Dividends for the year that are approved after the financial reporting date are dealt with as an event after the financial reporting date. Retained earnings may also include effect of changes in accounting policy as may be required by the transition provisions of new and amended standards.

Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty. The Company assesses its revenue arrangements against specific criteria in order to determine if it is acting as principal or agent.

The following specific recognition criteria must also be met before revenue is recognized:

Dividend income

Dividend income is recognized when the Company's right to receive payment is established.

Technical, management and service fees

Technical, management and services fees are recognized when the related services are rendered.

Interest income

Interest income is recognized as it accrues taking into account the effective interest method.

Expenses

Expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Expenses are recognized when incurred.

Pension Benefits

The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in the parent company statement of income. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the parent company statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to parent company statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Company, nor can they be paid directly to the Company. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined

benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Income Taxes

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as of the balance sheet date.

Deferred income tax

Deferred income tax is provided using the balance sheet liability method on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and,
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences, carryforward benefits of unused net operating loss carryover (NOLCO) and excess minimum corporate income tax (MCIT), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward benefits of unused NOLCO and excess MCIT can be utilized except:

- where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and,
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred income tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred income tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the balance sheet date.

Deferred income tax assets and deferred income tax liabilities are offset, if, and only if, a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

Value-added Tax (VAT)

Expenses and assets are recognized net of the amount of VAT, except:

- when the VAT incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the VAT is recognized as part of the cost of acquisition of asset or as part of the expense item, as applicable
- when receivables and payables are stated with the amount of VAT included

The net amount of VAT recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

Input VAT

Input VAT represents VAT imposed on the Company by its suppliers for the acquisition of goods and services as required by Philippine taxation laws and regulations.

Input VAT is recognized as an asset and will be used to offset the Company's current output VAT liabilities and or applied for claim for tax credit certificates. Input VAT is stated at its estimated net realizable value.

Output VAT

Output VAT represents VAT due on the sale, lease or exchange of taxable goods or properties or service by any person registered or required to register under Philippine taxation laws and regulations.

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the parent company statement of income, net of any reimbursement. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate,

the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as an interest expense.

Contingencies

Contingent liabilities are not recognized in the parent company financial statements but are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized but are disclosed in the parent company financial statements when an inflow of economic benefits is probable.

Events After the Reporting Period

Post year-end events that provide additional information about the Company's position at balance sheet date (adjusting events) are reflected in the parent company financial statements. Post year-end events that are not adjusting events are disclosed when material.

3. Significant Accounting Judgment, Estimates and Assumptions

The preparation of the parent company financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in the future periods.

Judgment

In the process of applying the Company's accounting policies, management has made a judgment, apart from those involving estimations, which have the most significant effect on the amounts recognized in the financial statements:

Capitalization of Project Development Costs

The application of the Company's accounting policy for capitalization of project development costs requires management's judgement about the confirmation of technological and economic feasibility of a project, usually when a project development has reached a defined milestone according to an established project management model. In determining the amounts to be capitalized, management makes assumptions regarding the expected future cash generation of the project, discount rates to be applied and the expected period of benefits.

Estimation Uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Estimating Impairment of Project Development Costs

Impairment is determined for development costs by assessing the recoverable amount of each projects. Where the recoverable amount of the project is less than the carrying amount, an impairment loss is recognized. When calculating recoverable amount, the future cash flow is discounted by a discount factor that takes into consideration risk free interest and the risk associated with the specific project.

The Company did not recognize impairment loss on project development costs in 2017 and 2016. The carrying amount of the Company's project development costs amounted to ₱262.6 million and ₱273.7 million as of December 31, 2017 and 2016, respectively (see Note 10).

Estimating allowance for impairment of trade and other receivables

The Company maintains allowance for impairment of receivables at a level considered adequate to provide for potential uncollectible receivables. The level of this allowance is evaluated by management on the basis of the factors that affect the collectability of the accounts. These factors include, but are not limited to, the Company's relationship with its debtors, debtor's current credit status and other known market factors. The Company reviews the age and status of receivables and identifies accounts that are to be provided with allowance either individually or collectively.

The amount and timing of recorded expenses for any period would differ if the Company made different judgment or utilized different estimates. An increase in the Company's allowance for impairment of receivables will increase the Company's recorded expenses and decrease current assets. No allowance for impairment of receivables was recognized as of December 31, 2017 and 2016. As of December 31, 2017 and 2016, the Company's receivables amounted to ₱519.6 million and ₱925.8 million, respectively (see Note 5).

Estimating allowance for impairment of losses on investment in and advances to subsidiaries and associates

Investments in and advances to subsidiaries and associates are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. In 2017, it was determined that the carrying value of the investment in Mactan Enerzone Corporation exceeded its recoverable amount. As a result, an impairment loss amounting to ₱169.5 million was recognized. In 2016, it was determined that the carrying value of the investment in AboitizPower International Pte. Ltd. exceeded its recoverable amount. As a result, an impairment loss amounting to ₱120.7 million was recognized. The aggregate carrying amount of the investments in and advances to subsidiaries and associates amounted to ₱80.0 billion and ₱83.1 billion as of December 31, 2017 and 2016, respectively (see Note 7).

Assessing impairment of nonfinancial assets

The Company assesses whether there are any indicators of impairment for nonfinancial assets at each balance sheet date. These nonfinancial assets (property and equipment and other current and noncurrent assets) are tested for impairment when there are indicators that the carrying amounts may not be recoverable. Determining the recoverable amount of the assets, which require the determination of future cash flows expected to be generated from the continued use and ultimate disposition of such assets, requires the Company to make estimates and assumptions that can materially affect its financial statements. Future events could cause the Company to conclude that these assets are impaired. Any resulting impairment loss could have a material adverse impact on the financial condition and results of operations.

As of December 31, 2017, the carrying values of property and equipment and other current and noncurrent assets amounted to ₱80.3 million, ₱797.0 million, and ₱14.9 million, respectively. As of December 31, 2016, the carrying values of property and equipment, other current assets, and other noncurrent assets amounted to ₱64.3 million, ₱521.0 million, and ₱16.8 million, respectively (see Notes 6, 8, and 9).

Estimating useful lives of property and equipment

The Company estimates the useful lives of property and equipment based on the period over which assets are expected to be available for use. The estimated useful lives of property and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, the estimation of the useful lives of property and equipment is based on collective assessment of internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in the factors and circumstances mentioned above. As of December 31, 2017 and 2016, the net book values of property and equipment amounted to ₱80.3 million and ₱64.3 million, respectively (see Note 8).

Pension costs

The costs of defined benefit pension plans, as well as the present value of the pension obligation, are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each balance sheet date.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future inflation rates for the specific country.

Further details about the assumptions used are provided in Note 15.

Net benefit expense amounted to ₱50.0 million in 2017, ₱58.3 million in 2016 and ₱38.7 million in 2015. Pension asset amounted to ₱16.2 million in 2017. Pension liability amounted to ₱20.7 million in 2016 (see Note 15).

Deferred income tax assets

The Company reviews the carrying amounts of deferred income tax assets at each balance sheet date and reduces deferred income tax assets to the extent that it is no longer probable that sufficient income will be available to allow all or part of the deferred income tax assets to be utilized. As of December 31, 2017 and 2016, deferred income tax assets amounted to ₱173.4 million and ₱196.2 million, respectively. No deferred income tax assets were recognized for MCIT amounting to ₱44.4 million and ₱43.8 million and NOLCO amounting to ₱647.7 million and ₱228.1 million as of December 31, 2017 and 2016, respectively (see Note 16).

Legal contingencies

The estimate of probable costs for the resolution of possible claims has been developed in consultation with outside counsel handling the Company's defense in these matters and is based upon an analysis of potential results. No provision for probable losses arising from legal contingencies was recognized as of December 31, 2017 and 2016.

4. Cash and Cash Equivalents

	2017	2016
Cash on hand and in banks	₱278,899,148	₱55,830,179
Short-term deposits	7,547,270,000	2,658,824,000
	₱7,826,169,148	₱2,714,654,179

Cash in banks earn interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods depending on the immediate cash requirements of the Company and earn interest at the respective short-term deposits rates.

Interest earned on cash and cash equivalents amounted to ₱147.6 million in 2017, ₱329.5 million in 2016 and ₱331.2 million in 2015.

5. Trade and Other Receivables

	2017	2016
Trade (see Note 17)	₱383,208,109	₱621,159,134
Dividends	94,300,000	149,358,000
Interest (see Note 17)	10,269,728	123,172,369
Nontrade	18,094,904	17,001,905
Others	13,773,417	15,093,884
	₱519,646,158	₱925,785,292

Trade receivables are non-interest bearing and are generally on 30 days' term.

For terms and conditions relating to related party receivables, refer to Note 17.

6. Other Current Assets

	2017	2016
Prepaid tax	₱784,917,756	₱511,455,599
Input VAT	7,093,225	4,535,355
Prepaid rent	5,021,619	5,021,619
	₱797,032,600	₱521,012,573

7. Investments and Advances

The details of the Company's investments and advances follow:

	2017	2016
<i>Investments in Subsidiaries</i>		
Therma Power, Inc. (TPI)	P30,116,058,873	P30,116,058,873
Aboitiz Renewables, Inc. (ARI)	27,172,988,814	36,654,338,814
Hedcor Bukidnon, Inc. (Hedcor Bukidnon)	2,794,460,000	1,923,460,000
Therma Visayas, Inc. (TVI)	P1,736,791,329	P173,114,630
Hedcor Sabangan, Inc. (Hedcor Sabangan)	1,732,643,142	1,732,643,142
Lima Enerzone Corporation (LEZ)	1,329,696,667	1,329,696,667
Therma South, Inc. (Therma South)	877,892,679	877,892,679
Therma Mobile, Inc. (Therma Mobile)	742,400,000	742,400,000
Davao Light & Power Co., Inc. (DLPC)	738,472,506	738,472,506
Visayan Electric Co., Inc. (VECO)	665,388,202	665,388,202
Hedcor Tudaya, Inc. (HTI)	656,250,000	656,250,000
Mactan Enerzone Corporation (MEZC)	609,532,287	609,532,287

Investment in EAUC

In April 2017, EAUC redeemed 21,690 Redeemable Preference Shares (RPS) at a redemption price of ₱63.3 million or ₱2,920 per share attributable to the Company. The book value of the redeemed shares amounted to ₱43.8 million. As a result, the Company recognized a "Gain on redemption of preferred shares" amounting to ₱19.6 million.

In April 2016, EAUC redeemed 36,600 Series A RPS attributable to the Company at ₱2,920 per share. The book value of the redeemed shares amounted to ₱35.9 million and was redeemed at a total redemption price amounting to ₱52.0 million. As a result, the Company recognized "Gain on redemption of preferred shares" amounting to ₱16.1 million.

In June 2016, TPI acquired for ₱509.4 million the remaining 50% ownership interest in EAUC. As a result, EAUC became a wholly-owned subsidiary of the Company. The transaction was accounted for as a business combination achieved in stages, and the investment in EAUC was presented as an investment in a subsidiary in 2016.

Investment in Hedcor Sabangan

In 2016, the Company subscribed additional 70.0 million RPS for ₱70.0 million.

Investment in Hedcor Bukidnon

The Company subscribed additional 871.0 million and 1.69 billion RPS for ₱871.0 million and ₱1.69 billion in 2017 and 2016, respectively.

Investment in TVI

In 2017, the Company subscribed additional 2.56 million RPS for ₱1.56 billion.

Investment in HI

In 2017, the Company subscribed 245.0 million RPS for ₱245.0 million.

Investment in Malvez

In 2017, the Company subscribed 0.1 million common shares for ₱0.1 million.

Investment in Therma South

In 2016, the Company subscribed additional 106.3 million RPS for ₱106.3 million.

Investment in TPI

In 2016, the Company subscribed additional 1.10 billion common shares for ₱1.10 billion and 9.90 billion RPS for ₱9.90 billion.

Investment in AP Int

In 2016, the Company subscribed 2.4 million common shares for ₱120.7 million.

It was determined on the same year that the carrying value of the investment in AP Int exceeded its recoverable amount. As a result, an impairment loss amounting to ₱120.7 million was recognized.

Investment in MEZC

In 2017, it was determined that the carrying value of the investment in MEZC exceeded its recoverable amount. As a result, an impairment loss amounting to ₱169.5 million was recognized.

Investment in ARI

In 2017, ARI redeemed shares attributable to the Company at 948.1 million RPS for ₱9.5 billion at ₱10 per share.

Investment in AAI

AAI redeemed shares attributable to the Company at 8,809 RPS for ₱8.8 million and 5,100 RPS for ₱5.1 million in 2017 and 2016, respectively, at ₱1,000 per share.

Investment in Hedcor Sibulan

Hedcor Sibulan redeemed shares attributable to the Company at 231.0 million RPS for ₱231.0 million in 2017 at ₱1 per share.

Advances

These advances include advances to subsidiaries that will be applied against future subscriptions of the Company to the shares of stock of the subsidiaries.

In 2017, the Company has advances to TPI amounting to ₱4.2 billion, AP Int amounting to ₱50.7 and PEI amounting to ₱9.6 million.

The Company's subsidiaries, all incorporated in the Philippines except for AP Int which was incorporated in Singapore, and the corresponding percentage equity ownership are as follows:

Net book values	₱9,424,010	₱10,999,907

10. Project Development Costs

	2017	2016
Balances at beginning of year	₱273,724,711	₱267,588,902
Additions	65,673,997	95,992,721
Transfers	-	(9,477,075)
Write-offs	(76,839,564)	(80,379,837)
Balances at end of year	₱262,559,144	₱273,724,711

Project development costs consist of rights, titles and interests for various power plant development projects.

In February 2016, ₱9.5 million project costs were transferred to AP Renewables, Inc.

11. Trade and Other Payables

	2017	2016
Accrued interest (see Note 12)	P66,285,228	P28,287,924
Output VAT	55,122,268	58,157,741
Trade payables (see Note 18)	39,132,317	226,466,838
Accrued taxes and fees	25,611,103	70,748,142
Nontrade payables	7,264,277	19,429,594
Others	524,170	474,298
	P193,939,363	P403,564,537

Trade payables are noninterest-bearing and generally on 30-day term.

Accrued taxes and fees represent taxes withheld on compensation, benefits and other fees.

12. Long-term Debts

	Interest Rate	2017	2016
Financial and non-financial institutions - unsecured			
2014 7-year retail bonds	5.21%	P6,600,000,000	P6,600,000,000
2014 12-year retail bonds	6.10%	3,400,000,000	3,400,000,000
2017 10-year retail bonds	5.34%	3,000,000,000	-
		13,000,000,000	10,000,000,000
Less deferred financing costs		98,018,357	77,846,635
		P12,901,981,643	P9,922,153,365

Retail Bonds - P3.0 billion

In July 2017, the Company issued P3.0 billion 10-year bond due 2027 at an annual fixed rate of 5.34% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Retail Bonds - P10.0 billion

In September 2014, the Company issued a total of P10.0 billion bonds, broken down into a P6.6 billion 7-year bond due 2021 at a fixed rate equivalent to 5.21% p.a. and a P3.4 billion 12-year bond due 2026 at a fixed rate equivalent to 6.10% p.a. The bonds have been rated PRS Aaa by PhilRatings.

The principal amount of these bonds shall be payable on a lump sum basis on the respective maturity date at its face value. These bonds may be redeemed in advance by the Company based on stipulated early redemption option dates and on agreed early redemption price.

Under the bond trust agreements, the Company shall not permit its debt-to-equity ratio to exceed 3:1 calculated based on the year-end debt and consolidated equity. The Company is in compliance with the debt covenants as of December 31, 2017.

Unamortized deferred financing cost reduced the carrying amount of long-term debt by ₱98.0 million and ₱77.8 million as of December 31, 2017 and 2016, respectively.

Total interest expense recognized amounted to ₱630.5 million, ₱550.9 million and ₱550.9 million in 2017, 2016 and 2015, respectively.

13. Equity

a. Capital Stock

Authorized - ₱1 par value

Preferred shares - 1,000,000,000 shares

Common shares - 16,000,000,000 shares

Issued

Common shares - 7,358,604,307 shares

₱7,358,604,307

On May 25, 2007, the Company listed with the PSE its 7,187,664,000 common shares with a par value of ₱1.00 to cover the initial public offering (IPO) of 1,787,664,000 common shares at an issue price of ₱5.80 per share. On March 17, 2008, the Company listed an additional 170,940,307 common shares, which it issued pursuant to a share swap agreement at the IPO price of ₱5.80 per share. The total proceeds from the issuance of new shares amounted to ₱10.37 billion. The Company incurred transaction costs incidental to the initial public offering amounting to ₱412.4 million, which is charged against "Additional paid-in capital" in the parent company balance sheet.

As of December 31, 2017, 2016 and 2015, the Company has 629, 628 and 608 shareholders, respectively.

Preferred shares are non-voting, non-participating, non-convertible, redeemable, cumulative, and may be issued from time to time by the BOD in one or more series. The BOD is authorized to issue from time to time before issuance thereof, the number of shares in each series, and all the designations, relative rights, preferences, privileges and limitations of the shares of each series. Preferred shares redeemed by the Company may be reissued. Holders thereof are entitled to receive dividends payable out of the unrestricted retained earnings of the Company at a rate based on the offer price that is either fixed or floating from the date of the issuance to final redemption. In either case, the rate of dividend, whether fixed or floating, shall be referenced, or be a discount or premium, to market-determined benchmark as the BOD may determine at the time of issuance with due notice to the SEC.

In the event of any liquidation or dissolution or winding up of the Company, the holders of the preferred stock shall be entitled to be paid in full the offer price of their shares before any payment in liquidation is made upon the common stock.

There are no preferred shares issued and outstanding as of December 31, 2017 and 2016.

b. Retained Earnings

On November 24, 2016, the BOD approved additional appropriation of ₱13.2 billion retained earnings for the following projects:

Projects	Full Commercial Operations by	Appropriation
300 MW Cebu Coal	1 st half of 2018	₱8,160,000,000
2x300 MW Coal-fired	End of 4 th quarter 2021	5,000,000,000
Total		₱13,160,000,000

On November 27, 2014, the BOD approved the appropriation of ₱20.9 billion retained earnings for the following projects:

Projects	Full Commercial Operations by	Appropriation
68 MW Manolo Fortich Hydro	End of 4 th quarter 2016	₱2,600,000,000
300 MW Davao Coal*	End of 1 st half 2015	9,500,000,000
14 MW Sabangan Hydro	End of 1 st half 2015	2,800,000,000
400 MW Coal Fired Pagbilao Unit3	End of 4 th quarter 2017	6,000,000,000
Total		₱20,900,000,000

* Full commercial operations by 1st quarter of 2016

On March 10, 2015, the BOD approved the declaration of regular cash dividends of ₱1.14 a share (₱8.39 billion) and special cash dividends of ₱0.52 a share (₱3.83 billion) to all stockholders of record as of March 24, 2015. The cash dividends were paid on April 20, 2015.

On March 8, 2016, the BOD approved the declaration of regular cash dividends of ₱1.20 a share (₱8.83 billion) and special cash dividends of ₱0.46 a share (₱3.38 billion) to all stockholders of record as of March 22, 2016. The cash dividends were paid on April 19, 2016.

On March 7, 2017, the BOD approved the declaration of regular cash dividends of ₱1.36 a share (₱10.01 billion) to all stockholders of record as of March 21, 2017. These dividends were paid on April 10, 2017.

To comply with the requirements of Section 43 of the Corporation Code, on March 8, 2018, the BOD approved the declaration of regular cash dividends of ₱1.39 a share (₱10.23 billion) to all stockholders of record as of March 22, 2018. The cash dividends are payable on April 12, 2018.

14. Personnel Costs

	2017	2016	2015
Salaries and wages	₱533,005,712	₱454,007,818	₱353,592,235
Employee benefits	307,935,888	273,559,833	222,196,454
Retirement benefit costs (see Note 15)	49,974,029	58,324,025	38,719,010
	₱890,915,629	₱785,891,676	₱614,507,699

15. Retirement Costs

The Company has a funded, noncontributory, defined benefit pension plan ("Plan") covering all regular and full-time employees and requiring contributions to be made to separately administered fund. This retirement benefit fund ("Fund") is in the form of a trust being maintained and managed by AEV, under the supervision of the Board of Trustees (BOT) of the Plan. The BOT, whose members are also officers of AEV, is responsible for the investment of the Fund assets. Taking into account the Plan's objectives, benefit obligations and risk capacity, the BOT periodically defines the investment strategy in the form of a long-term target structure.

The following tables summarize the components of net benefit expense recognized in the parent company statements of income and the funded status and amounts recognized in the parent company balance sheets for the plan.

Net benefit expense (recognized as part of personnel costs):

	2017	2016	2015
Retirement expense to be recognized in the parent company statement of income:			
Current service cost	P48,922,746	P46,153,534	P45,607,500
Net interest cost (income)	1,051,283	12,170,491	(6,888,490)
	P49,974,029	P58,324,025	P38,719,010

Remeasurement effect to be recognized in other comprehensive income:

	2017	2016	2015
Actuarial gains (loss) due to:			
Experience adjustments	(P43,972,045)	P-	(P295,832,497)
Changes in demographic assumptions	78,205,006	-	8,813,885
Changes in financial assumptions	1,172,525	-	36,532,907
Actual return excluding amount included in net interest cost	9,300,494	20,313,413	(14,572,966)
	P44,705,980	P20,313,413	(P265,058,671)

Pension liability (asset)

	2017	2016
Present value of obligation	(P633,459,869)	(P570,175,589)
Fair value of plan assets	649,655,975	549,521,704
	P16,196,106	(P20,653,885)

Changes in the present value of the defined benefit obligation are as follows:

	2017	2016
At January 1	P570,175,589	P504,401,129
Net benefit expense:		
Current service cost	48,922,746	46,153,534
Interest cost	29,021,938	25,674,017
	77,944,684	71,827,551
Employee transfers	22,366,125	(459,134)
Benefits paid	(1,621,043)	(5,593,957)
Remeasurements in other comprehensive income:		
Actuarial loss (gain) due to:		
Experience adjustments	43,972,045	-
Changes in demographic assumptions	(78,205,006)	-
Changes in financial assumptions	(1,172,525)	-
	(35,405,486)	-
At December 31	P633,459,869	P570,175,589

Changes in the fair value of plan assets are as follows:

	2017	2016
At January 1	P549,521,704	P265,295,223
Actual contributions	42,118,040	256,462,633
Actual return excluding amount included in net interest cost	9,300,494	20,313,413
Interest income included in net interest cost	27,970,655	13,503,526
Transfers	22,366,125	(459,134)
Benefits paid	(1,621,043)	(5,593,957)
At December 31	P649,655,975	P549,521,704

Changes in pension liability recognized in the parent company balance sheets are as follows:

	2017	2016
At January 1	(P20,653,885)	(P239,105,906)
Retirement expense for the year	(49,974,029)	(58,324,025)
Actuarial gain (loss) recognized for the year	44,705,980	20,313,413
Actual contributions	42,118,040	256,462,633
At December 31	P16,196,106	(P20,653,885)

The fair value of plan assets by each class at the end of the reporting period are as follows:

	2017	2016
Cash and fixed income investments	P235,140,145	P423,294,166
Equity instruments - financial institution	419,347,451	129,859,129
Fair value of plan assets	P654,487,596	P553,153,295

All equity instruments held have quoted prices in active market. The remaining plan assets do not have quoted market prices in active market.

The plan assets have diverse investments and do not have any concentration risk.

The principal assumptions used as of December 31, 2017, 2016 and 2015 in determining net pension liability for the Company's Plan is shown below:

	2017	2016	2015
Discount rate	5.13%	5.09%	5.09%
Salary increase rate	6.00%	6.00%	6.00%

The sensitivity analysis below has been determined based on reasonable possible changes of each significant assumption on the defined benefit obligation as of December 31, 2017, assuming all other assumptions were held constant:

	Increase (decrease) in basis points	Effect on defined benefit obligation
Discount rates	100	(P24,866,826)
	(100)	28,579,547
Future salary increases	100	31,793,587
	(100)	(28,398,059)

The Company's defined benefit pension plan is funded by the Company.

The Company expects to contribute P37.9 million to the defined benefit plans in 2018. The average duration of the defined benefit obligation as of December 31, 2017 is 12.94 years.

The BOT reviews the performance of the plans on a regular basis. It assesses whether the retirement plans will achieve investment returns which, together with contributions, will be sufficient to pay retirement benefits as they fall due. The Group (to which the Company belongs) also reviews the solvency position of the different member companies on an annual basis and estimates, through the actuary, the expected contribution to the Plan in the subsequent year.

16. Income Tax

Details of provision for income tax are as follows:

	2017	2016	2015
Current:			
Corporate income tax	P10,440,532	P22,262,045	P11,707,926
Final	18,946,168	59,664,111	61,308,261
	29,386,700	81,926,156	73,016,187
Deferred	7,066,011	(9,298,778)	(10,032,064)
	P36,452,711	P72,627,378	P62,984,123

The provision for corporate income tax represents MCIT in 2017, 2016 and 2015.

The reconciliation of income tax computed at the statutory tax rate to the provision for income tax reported in the parent company statements of income is as follows:

	2017	2016	2015
At statutory rate of 30%	₱2,774,617,928	₱8,024,797,636	₱1,933,082,125
<i>Additions to (reductions in) income tax resulting from:</i>			
Final tax on interest income	18,946,168	59,664,111	61,308,261
Nondeductible interest expense	14,607,592	32,617,674	32,788,428
Nondeductible expenses:			
Project and bidding expenses	23,051,869	96,972,291	-
Others	5,921	3,885,332	9,600
Unrecognized deferred income tax asset on:			
Provision for impairment loss on investment in a subsidiary	50,840,822	36,219,908	-
MCIT	10,440,532	22,262,045	11,707,926
NOLCO	125,884,718	-	87,006,767
Applied NOLCO	-	(62,639,409)	-
Interest income already subjected to final tax at a lower rate	(44,265,429)	(98,841,436)	(99,358,872)
Dividend income	(2,937,677,410)	(8,042,310,774)	(1,963,560,112)
	₱36,452,711	₱72,627,378	₱62,984,123

The components of the Company's net deferred income tax assets (liability) are as follows:

	2017	2016
Deferred income taxes recognized in statement of income:		
<i>Deferred income tax assets:</i>		
Unamortized past service cost	₱73,530,211	₱85,595,953
Unrealized foreign exchange losses	2,713,515	70,581
	76,243,726	85,666,534
Deferred income tax liability on pension liability	(101,997,123)	(104,353,920)
Deferred income tax asset related to remeasurement effects in other comprehensive income	97,138,282	110,550,076
	₱71,384,885	₱91,862,690

As of December 31, 2017, the Company has MCIT that can be claimed as deduction from regular income tax liability as follows:

Period of Recognition	Availment Period	Amount	Applied	Expired	Balance
2014	2015-2017	P9,830,618	P-	P9,830,618	P-
2015	2016-2018	11,707,926	-	-	11,707,926
2016	2017-2019	22,262,045	-	-	22,262,045
2017	2018-2020	10,440,532	-	-	10,440,532
		P54,241,121	P-	P9,830,618	P44,410,503

As of December 31, 2017, the Company has NOLCO which can be claimed as deduction against the regular taxable income as follows:

Period of Recognition	Availment Period	Amount	Applied	Expired	Balance
2015	2016-2018	P290,022,557	P61,947,637	P-	P228,074,920
2017	2018-2020	419,615,728	-	-	419,615,728
		P709,638,285	P61,947,637	P-	P647,690,648

The Company did not recognize deferred income tax assets on MCIT amounting to P44.4 million and P43.8 million as of December 31, 2017 and 2016, respectively, and NOLCO amounting to P647.7 million and P228.1 million as of December 31, 2017 and 2016, respectively, since management expects that it will not generate sufficient taxable income in the future that will be available to allow all of the deferred income tax assets to be utilized.

Republic Act No. 10963, Tax Reform for Acceleration and Inclusion Act (TRAIN)

TRAIN was signed into law on December 19, 2017 and took effect January 1, 2018, making the new tax law enacted as of the balance sheet date. Although the TRAIN changes existing tax law and includes several provisions that will generally affect businesses on a prospective basis, the management assessed that the same will not have any significant impact on the financial statement balance as of the balance sheet date.

17. Related Party Disclosures

Parties are considered to be related if one party has the ability to control, directly or indirectly, the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Related parties may be individuals or corporate entities.

The sales to and purchases from related parties are made on terms equivalent to those that prevail in arm's length transactions.

The Company, in its normal course of business, has transactions with its related parties, which principally consist of the following:

- a. The Company has management agreements with each of the following subsidiaries: CLPC, Cotabato Ice Plant, Inc. (CIPI), DLPC, and CPPC for which it is entitled to management fees.
- b. The Company renders various services to related parties such as technical and legal assistance for various projects, trainings and other services, for which it bills technical and service fees.

- c. The Company obtained standby letters of credit (SBLC) and is acting as surety for the benefit of certain subsidiaries, associates and joint ventures in connection with certain loans and credit accommodations. As at December 31, 2017, the Company provided SBLCs for AP Renewables, Inc. (APRI), Cebu Energy Development Corporation (CEDC), Luzon Hydro Corporation (LHC), SN Aboitiz Power-Benguet, Inc. (SNAP B), Therma South, STEAG, and TVI in the amount of ₱8.87 billion. As at December 31, 2016, the Company provided SBLCs for APRI, CEDC, LHC, SNAP B, Therma South, STEAG, and TVI in the amount of ₱10.72 billion.
- d. AEV provides human resources, internal audit, legal, treasury and corporate finance services, among others, to the Company and shares with the member companies the business expertise of its highly qualified professionals. Transactions are priced based on agreed rates, and billed costs are always benchmarked to third party rates to ensure competitive pricing. Service Level Agreements are in place to ensure quality of service. This arrangement enables the Company to maximize efficiencies and realize cost synergies.
- e. Cash deposits and money market placements with UBP. At prevailing rates, these fixed-rate investments earned interest income amounting to ₱52.09 million and ₱1.27 million in 2017 and 2016, respectively. Outstanding balances amounted ₱1.40 billion and ₱759.0 million as of December 31, 2017, and 2016, respectively.
- f. Rentals paid at current market rates to Cebu Praedia Development Corporation (CPDC) for the use of CPDC's properties by the Company's officers and employees.
- g. Aviation service fees paid at arm's length basis to AAI for the use of aircraft during travel of the Company's officers and employees.

The above transactions are expected to be settled in cash.

The Company's balance sheets and statements of income include the following accounts resulting from the above transactions with related parties:
 Technical, Management and other Service Fees

The Company obtained interest free temporary advances from TLI amounting to ₱12.3 billion in 2013. This shall be payable either one time or on a staggered basis, or such other receivables as may be due or demandable from TLI. In 2016, the advances were paid in full.

The Company's Fund is in the form of a trust being maintained and managed by AEV under the supervision of the BOT of the plan. In 2017 and 2016, other than contributions to the Fund, no transactions occurred between the Company or any of its subsidiaries and the Fund.

Total compensation and benefits of key management personnel of the Company are as follows:

	2017	2016	2015
Short-term benefits (see Note 15)	₱308,010,884	₱254,993,884	₱214,755,795
Post employment benefits (see Note 15)	16,499,116	12,036,116	18,224,205
	₱324,510,000	₱267,030,000	₱232,980,000

18. Financial Risk Management Objectives and Policies

The Company's principal financial instruments comprise of cash and cash equivalents and long-term debts. The main purpose of these financial instruments is to raise financing for the Company's operations. The Company has various other financial instruments such as trade and other receivables, AFS investment and trade and other payables which arise directly from its operations.

The Company also enters into derivative transactions, particularly foreign currency forwards, to economically hedge its foreign currency risk from foreign currency denominated liabilities and purchases (see Note 19).

Risk Management Structure

The BOD is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Company.

Financial risk committee

The Financial Risk Committee has the overall responsibility for the development of risk strategies, principles, frameworks, policies and limits. It establishes a forum of discussion of the Company's approach to risk issues in order to make relevant decisions.

Treasury service group

The Treasury Service Group is responsible for the comprehensive monitoring, evaluating and analyzing of the Company's risks in line with the policies and limits.

The main risks arising from the Company's financial instruments are credit risk involving possible exposure to counter party default on its cash and cash equivalents, and trade and other receivables; liquidity risk in terms of the proper matching of the type of financing required for specific investments; and foreign exchange risk in terms of foreign exchange fluctuations that may significantly affect its foreign currency denominated placements.

Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company.

The Company's credit risk on cash in banks and cash equivalents and trade and other receivables pertains to possible default by the counterparty, with a maximum exposure equal to the carrying amount of these assets. With respect to cash in banks and cash equivalents, the risk is mitigated by the short-term and/or liquid nature of its short-term deposits mainly in bank deposits and placements, which are placed with financial institutions of high credit standing. With respect to trade and other receivables, credit risk is controlled by the application of credit approval, limit and monitoring procedures. It is the Company's policy that all debtors who wish to trade on credit terms are subject to credit procedures. In addition, receivable balances are monitored on an ongoing basis with the result that the Company's exposure to bad debts is not significant.

The Company has no significant concentration risk to a counterparty or group of counterparties. The credit quality per class of financial assets as of December 31 is as follows (amounts in thousands):

2017

	Neither past due nor impaired			Past due but not impaired	Total
	High Grade	Standard	Sub-standard		
Cash and cash equivalents	₱7,825,333	₱-	₱-	₱-	₱7,825,333
Trade and other receivables	111,978	-	-	407,668	519,646
Derivative asset	42,510	-	-	-	42,510
AFS investment	99,375	-	-	-	99,375
Total	₱8,079,196	₱-	₱-	₱407,668	₱8,486,864

2016

	Neither past due nor impaired			Past due but not impaired	Total
	High Grade	Standard	Sub-standard		
Cash and cash equivalents	₱2,713,868	₱-	₱-	₱-	₱2,713,868
Trade and other receivables	446,380	-	-	479,405	925,785
AFS investment	96,689	-	-	-	96,689
Total	₱3,256,937	₱-	₱-	₱479,405	₱3,736,342

High grade pertain to receivables from customers with good favorable credit standing and have no history of default.

Standard grade pertain to those customers with history of sliding beyond the credit terms but pay a week after being past due.

Sub-standard grade pertain to those customers with payment habits that normally extend beyond the approved credit terms, and has high probability of being impaired.

The aging analyses of financial assets as of December 31 are as follows (amounts in thousands):

2017

	Total	Neither past due nor impaired	Past due but not impaired		
			30 days	30 - 60 days	More than 60 days
Cash and cash equivalents	₱7,825,333	₱7,825,333	₱-	₱-	₱-

AFS investment	96,689	96,689	-	-	-
Total	₱3,736,342	₱3,256,937	₱388,083	₱21,975	₱69,347

Liquidity risk

Liquidity risk is the potential of not meeting obligations as they come due because of an inability to liquidate assets or obtain adequate funding. The Company maintains sufficient cash and cash equivalents to finance its operations. Any excess cash is invested in short-term money market placements. These placements are maintained to meet maturing obligations and pay dividend declarations.

In managing its short-term fund requirements, the Company's policy is to ensure that there are sufficient working capital inflows to match repayments of short-term borrowings. With regard to its long-term financing requirements, the Company's policy is that not more than 25% of long-term borrowings should mature in any 12-month period.

The following tables summarize the maturity profile of the Company's financial liabilities based on contractual undiscounted payments as of December 31 (amounts in thousands):

2017

	Total Carrying Value	Contractual undiscounted payments				
		Total	On Demand	Less than 1 year	1 to 5 years	More than 5 years
<i>Other financial liabilities</i>						
Long-term debts	₱12,901,982	₱17,706,453	₱-	₱711,031	₱9,384,396	₱7,611,026
Trade and other payables*	167,804	167,804	-	167,804	-	-
Total	₱13,069,786	₱17,874,257	₱-	₱878,835	₱9,384,396	₱7,611,026

*excluding statutory liabilities

2016

	Total Carrying Value	Contractual undiscounted payments				
		Total	On Demand	Less than 1 year	1 to 5 years	More than 5 years
<i>Other financial liabilities</i>						
Long-term debts	₱9,922,153	₱13,675,018	₱-	₱558,582	₱8,939,262	₱4,177,174
Trade and other payables*	332,342	332,342	-	332,342	-	-
Total	₱10,254,495	₱14,007,360	₱-	₱890,924	₱8,939,262	₱4,177,174

*excluding statutory liabilities

Market Risk

The risk of loss, immediate or over time, due to adverse fluctuations in the price or market value of instruments, products, and transactions in the Company's overall portfolio (whether on or off-balance sheet) is market risk. These are influenced by foreign and domestic interest rates, foreign exchange rates and gross domestic product growth.

Foreign exchange risk

The foreign exchange risk of the Company pertains to its foreign currency-denominated cash and cash equivalents.

	2017		2016	
	US Dollar	Peso Equivalent	US Dollar	Peso Equivalent
Financial assets				
Cash and cash equivalents	\$40,158,320	₱2,005,104,918	\$4,211,282	₱209,381,461

The exchange rate for December 31, 2017 and 2016 is ₱49.93:US\$1 and ₱49.72:US\$1, respectively. As a result of the translation of these foreign currency denominated assets, the Company reported net unrealized foreign exchange loss of ₱8.8 million and ₱54.2 million in 2017 and 2016, respectively.

The following tables demonstrate the sensitivity to a reasonable possible change in the US dollar exchange rates, with all other variables held constant, of the Company's income before income tax as of December 31, 2017 and 2016 (amounts in thousands).

	Increase (decrease) in US dollar	Effect on income before tax
2017		
US dollar-denominated accounts	5%	₱100,255
US dollar-denominated accounts	(5%)	(100,255)
2016		
US dollar-denominated accounts	5%	₱10,476
US dollar-denominated accounts	(5%)	(10,476)

There is no other impact on the Company's equity other than those already affecting the parent company statements of income.

Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Company considers equity as its capital.

The Company manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. Its policy is to keep the gearing ratio at 70% or below. The Company determines net debt as the sum of interest-bearing short-term and long-term loans less cash and short-term deposits.

	2017	2016
Long-term debts	P12,901,981,643	P9,922,153,365
Cash and cash equivalents	(7,826,169,148)	(2,714,654,179)
Net debt (a)	5,075,812,495	7,207,499,186
Equity	76,672,432,344	77,433,880,700
Equity and net debt (b)	P81,748,244,839	P84,641,379,886
Gearing ratio (a/b)	6.21%	8.52%

Part of the Company's capital management is to ensure that it meets financial covenants attached to long-term borrowings. Breaches in meeting the financial covenants would permit the banks to immediately call loans and borrowings. The Company is in compliance with the financial covenants attached to its long-term debts as of December 31, 2017 and 2016 (see Note 12).

No changes were made in the objectives, policies or processes during the years ended December 31, 2017 and 2016.

19. Financial Instruments

Fair Value of Financial Instruments

Fair value is defined as the amount at which the financial instrument could be sold in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

A financial instrument is regarded as quoted in an active market if quoted prices are readily available from an exchange, dealer, broker, pricing services or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. For a financial instrument with an active market, the quoted market price is used as its fair value. On the other hand, if transactions are no longer regularly occurring even if prices might be available and the only observed transactions are forced transactions or distressed sales, then the market is considered inactive. For a financial instrument with no active market, its fair value is determined using a valuation technique (e.g. discounted cash flow approach) that incorporates all factors that market participants would consider in setting a price (amounts in thousands).

Set out below is a comparison by category of carrying amounts and fair values of the Company's financial instruments whose fair values are different from their carrying amounts.

	2017		2016	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial Liabilities				
Long-term debts	P12,901,982	P12,389,478	P9,922,153	P9,808,741

The following method and assumption are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, trade and other receivables and trade and other payables

The carrying amounts of cash and cash equivalents, trade and other receivables and trade and other payables approximate fair values due to the relatively short-term maturity of these financial instruments.

AFS investments

The fair value of AFS investments are based on quoted market prices.

Long-term debts

The fair value of long-term debt is based on the discounted value of future cash flows using the applicable rates for similar types of loans. Discount rates used range from 6.23% to 7.13% in 2017 and 5.98% to 6.15% in 2016.

Derivative Financial Instruments

The Company enters into short-term forward contracts with counterparty banks to manage foreign currency risks associated with foreign currency-denominated liabilities and purchases.

As of December 31, 2017 the aggregate notional amount of the par forward contract is US\$39.0 million. In 2016, the Company has no outstanding foreign currency forward exchange contracts.

The Company recognized a gain from the net fair value changes relating to the forward contracts amounting to ₱31.0 million in 2017 under the "Foreign exchange gain" in the parent company statements of income.

Fair Value Hierarchy

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

For the years ended December 31, 2017 and 2016, there were no transfers between Level 1 and Level 2 fair value measurements, and no transfers into and out of Level 3 fair value measurements were made.

20. Electric Power Industry Reform Act (EPIRA) of 2001

RA No. 9136 was signed into law on June 8, 2001 and took effect on June 26, 2001. The law provides for the privatization of National Power Corporation (NPC) and the restructuring of the electric power industry. The Implementing Rules and Regulations (IRR) were approved by the Joint Congressional Power Commission on February 27, 2002.

R.A. No. 9136 and the IRR impact the industry as a whole. The law also empowers the ERC to enforce rules to encourage competition and penalize anti-competitive behavior.

R.A. Act No. 9136, the EPIRA, and the covering IRR provides for significant changes in the power sector, which include among others:

- i. The unbundling of the generation, transmission, distribution and supply and other disposable assets of a company, including its contracts with independent power producers and electricity rates;
- ii. Creation of a Wholesale Electricity Spot Market; and
- iii. Open and non-discriminatory access to transmission and distribution systems.

The law also requires public listing of not less than 15% of common shares of generation and distribution companies within 5 years from the effectivity date of the EPIRA. It provides cross ownership restrictions between transmission and generation companies and a cap of 50% of its demand that a distribution utility is allowed to source from an associated company engaged in generation except for contracts entered into prior to the effectivity of the EPIRA.

There are also certain sections of the EPIRA, specifically relating to generation companies, which provide for a cap on the concentration of ownership to only 30% of the installed capacity of the grid and/or 25% of the national installed generating capacity.

21. Note to Statements of Cash Flows

The following are the cash flow movements of the Company's financing liabilities in 2017:

	January 1, 2017	Net cash flows	Non-cash Changes			December 31, 2017
			Amortized deferred financing costs	Interest expense	Others	
Non-current interest-bearing loans and borrowings	₱9,922,153,365	₱2,967,061,942	₱12,766,336	₱-	₱-	₱12,901,981,643
Interest on loans and borrowings	28,287,924	(699,256,650)	-	630,535,775	106,718,179	66,285,228
Total liabilities from financing activities	₱9,950,441,289	₱2,267,805,292	₱12,766,336	₱630,535,775	₱106,718,179	₱12,968,266,871

22. Supplementary Information Required Under Revenue Regulations (RR) 15-2010

The Company also reported and/or paid the following types of taxes for the year:

VAT

The Company's sales are subject to output value added tax (VAT) while its importations and purchases from other VAT-registered individuals or corporations are subject to input VAT. The VAT rate is 12.0%.

a. Net Receipts and Output VAT declared in the Company's VAT returns in 2017

	Net Sales/ Receipts	Output VAT
Taxable Sales:		
Sales of services	P1,444,799,575	P173,375,949

The Company's sales that are subject to VAT are reported under the following accounts:

- Service Income - Management fees
- Service Income - Professional fees
- Service Income - Technical fees
- Miscellaneous Income - Operating
- Miscellaneous Income - Non-operating

The Company's sales of services are based on actual collections received, hence, may not be the same as amounts accrued in the parent company statement of income.

b. Input VAT for 2017

Balance at January 1	P10,796,403
Current year's domestic purchases/payments for:	
Goods other than for resale or manufacture	1,729,680
Capital goods subject to amortization	4,511,577
Capital goods not subject to amortization	98,944
Services lodged under the other accounts	29,240,263
	46,376,867
Claims for tax credit/refund and other adjustments	(34,072,141)
Balance at December 31	P12,304,726

Other taxes and licenses

Taxes and licenses, local and national, include real estate taxes, licenses and permit fees for 2017:

License and permit fees	P10,495,753
Documentary stamp taxes (DST)	4,540,984
Fringe benefit taxes	3,983,829
Others	17,737
	P19,038,303

Withholding taxes

Final withholding taxes	₱21,916,584
Withholding taxes on compensation and benefits	13,501,733
Expanded withholding taxes	2,591,070
	<hr/>
	₱38,009,387

Tax Assessment and Cases

The Company has no pending tax cases outside of the administration of the BIR as of December 31, 2017.

STATEMENT OF MANAGEMENT'S RESPONSIBILITY
FOR FINANCIAL STATEMENTS

The management of Aboitiz Power Corporation is responsible for the preparation and fair presentation of the Parent financial statements including the schedules attached therein, for the years ended December 31, 2018 and 2017 in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

The Board of Directors reviews and approves the financial statements including the schedules attached therein, and submits the same to the stockholders.

SyCip Gorres Velayo & Co., the independent auditor, appointed by the stockholders, has audited the financial statements of the Company in accordance with Philippine Standards on Auditing, and in its report to the stockholders, has expressed its opinion on the fairness of presentation upon completion of such audit.

Report on the Audit of the Parent Company Financial Statements

Opinion

We have audited the parent company financial statements of Aboitiz Power Corporation (the Company), which comprise the parent company balance sheets as at December 31, 2018 and 2017, and the parent company statements of income, parent company statements of comprehensive income, parent company statements of changes in equity and parent company statements of cash flows for each of the three years in the period ended December 31, 2018, and notes to the parent company financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying parent company financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2018 and 2017, and its financial performance and its cash flows for each of the three years in the period ended December 31, 2018 in accordance with Philippine Financial Reporting Standards (PFRSs).

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Parent Company Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the parent company financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Parent Company Financial Statements

Management is responsible for the preparation and fair presentation of the parent company financial statements in accordance with PFRSs, and for such internal control as management determines is necessary to enable the preparation of parent company financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

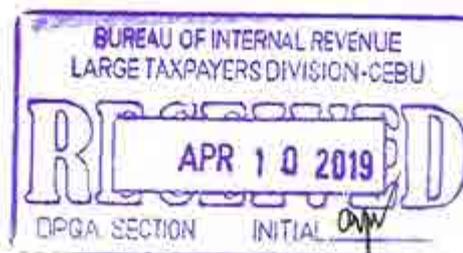

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Parent Company Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent company financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the parent company financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the parent company financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the parent company financial statements, including the disclosures, and whether the parent company financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on the Supplementary Information Required Under Revenue Regulations 15-2010

Our audits were conducted for the purpose of forming an opinion on the parent company financial statements taken as a whole. The supplementary information required under Revenue Regulations 15-2010 in Note 22 to the parent company financial statements is presented for purposes of filing with the Bureau of Internal Revenue and is not a required part of the basic financial statements. Such information is the responsibility of the management of the Company. The information has been subjected to the auditing procedures applied in our audit of the parent company financial statements. In our opinion, the information is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

ABOITIZ POWER CORPORATION
NOTES TO PARENT COMPANY FINANCIAL STATEMENTS

1. Corporate Information

Aboitiz Power Corporation (the Company) was incorporated in the Philippines and registered with the Securities and Exchange Commission on February 13, 1998. The Company is a publicly-listed holding company of the entities engaged in power generation, retail electricity supply and power distribution in the Aboitiz Group. As of December 31, 2018, Aboitiz Equity Ventures, Inc. (AEV, also incorporated in the Philippines) owns 76.98% of the Company. The ultimate parent of the Company is Aboitiz & Company, Inc. (ACO, also incorporated in the Philippines).

The Company's registered office address is 32nd Street, Bonifacio Global City, Taguig City, Metro Manila.

The parent company financial statements of the Company were approved and authorized for issue in accordance with a resolution by the Board of Directors (BOD) of the Company on March 7, 2019.

2. Basis of Preparation, Statement of Compliance and Summary of Significant Accounting Policies

Basis of Financial Statement Preparation

The accompanying parent company financial statements have been prepared on a historical cost basis, except for derivative financial instruments and financial assets at FVTPL which are measured at fair value. The parent company financial statements are presented in Philippine peso which is the Company's functional currency.

Statement of Compliance

The parent company financial statements are prepared in compliance with Philippine Financial Reporting Standards (PFRSs).

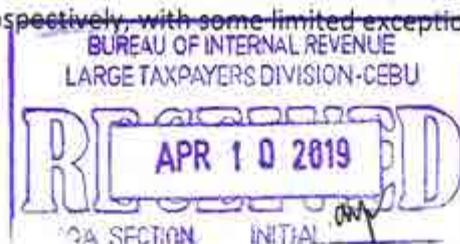

Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year, except for the new and revised standards and Philippine Interpretations which were applied starting January 1, 2018. The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

These new and revised standards and interpretations did not have any significant impact on the Company's parent company financial statements:

- PFRS 9, *Financial Instruments*

PFRS 9 reflects all phases of the financial instruments project and replaces Philippine Accounting Standards (PAS) 39, *Financial Instruments: Recognition and Measurement*, and all previous versions of PFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. Retrospective application is required, but comparative information is not compulsory. For hedge accounting, the requirements are generally applied prospectively, with some limited exceptions.

The Company has adopted this new standard without restating comparative information.

As of January 1, 2018, the Company has reviewed and assessed all of its existing financial instruments. The table below illustrates the classification and measurement of financial instruments under PFRS 9 and PAS 39 at the date of initial application.

The measurement category and the carrying amount of financial instruments in accordance with PAS 39 and PFRS 9 as of January 1, 2018 are compared as follows:

Financial Assets	Classification under PAS 39	Amounts under PAS 39	Classification under PFRS 9	Amount under PFRS 9
Cash on hand and in banks	Loans and receivables	₱278,899,148	Financial assets at amortized cost	₱278,899,148
Cash equivalents	Loans and receivables	7,547,270,000	Financial assets at amortized cost	7,547,270,000
Investment in equity securities not held for trading	AFS investments	99,374,831	Financial assets at FVTPL	99,374,831
Trade and other receivables:				
Trade receivables	Loans and receivables	383,208,109	Financial assets at amortized cost	383,208,109
Interest receivable	Loans and receivables	10,269,728	Financial assets at amortized cost	10,269,728
Other receivables	Loans and receivables	126,168,321	Financial assets at amortized cost	126,168,321
Derivative assets	Financial assets at fair value through profit of loss (FVPL)	42,510,000	Financial assets at FVTPL	42,510,000

As of December 31, 2018 and 2017, the Company does not hold financial liabilities designated at fair value through profit or loss.

The following table reconciles the carrying amounts of financial assets, from their previous measurement category in accordance with PAS 39 to their new measurement categories upon transition to PFRS 9 on January 1, 2018:

Financial assets	Ref	PAS 39 measurement		Reclass ²	PFRS 9	
		Category	Amount		Amount	Category
Cash and cash equivalents		L&R ¹	₱7,826,169,148	₱7,826,169,148	₱7,826,169,148	AC ²

¹L&R: Loans and receivables

²AC: Amortized cost

³Reclassification

The Company does not have financial assets and financial liabilities which had previously been designated at FVPL to reduce an accounting mismatch in accordance with PAS 39 which had been reclassified to amortized cost or FVOCI upon transition to PFRS 9.

The effects of adoption on parent company financial statements are as follows:

	As at January 1, 2018
<hr/>	
Increase (decrease) in the parent company balance sheet:	
AFS investments	(P99,374,831)
Financial assets at FVTPL	99,374,831
Total Assets	<hr/> P-
Unrealized valuation loss on AFS investments	P625,169
Retained earnings	(625,169)
Total Liabilities and Equity	<hr/> P-

The new hedge accounting model under PFRS 9 aims to simplify hedge accounting, align the accounting for hedge relationships more closely with an entity's risk management activities and permit hedge accounting to be applied more broadly to a greater variety of hedging instruments and risks eligible for hedge accounting.

We determined that all existing hedge relationships that are currently designated in effective hedging relationships will continue to qualify for hedge accounting under PFRS 9. As PFRS 9 does not change the general principles of how an entity accounts for effective hedges, applying the hedging requirements of PFRS 9 did not have a significant impact on the parent company financial statements.

- PFRS 15, *Revenue from Contracts with Customers*

PFRS 15 supersedes PAS 11, *Construction Contracts*, PAS 18, *Revenue*, and related interpretations and it applies to all revenue arising from contracts with customers, unless those contracts are in the scope of other standards. PFRS 15 establishes a new five-step model that will apply to revenue arising from contracts with customers. The new standard establishes a five-step model to account for revenue arising from contracts with customers. The five-step model is as follows:

1. Identify the contract(s) with a customer
2. Identify the performance obligations in the contract
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations in the contract
5. Recognize revenue when (or as) the entity satisfies a performance obligation.

Under PFRS 15, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

The standard requires entities to exercise judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with the customers. The standard also specifies the accounting for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract.

The Company adopted PFRS 15 using the modified retrospective method, effective January 1, 2018. The Company elected to apply the method to only those contracts that were not completed at the date of initial recognition.

The adoption of PFRS 15 has no impact to the parent company balance sheets, statements of income, statements of comprehensive income and statements of cash flows.

- Amendments to PFRS 2, *Share-based Payment, Classification and Measurement of Share-based Payment Transactions*

The amendments to PFRS 2 address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and the accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash settled to equity settled.

On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and if other criteria are met.

These amendments are not applicable to the Company since it has no share-based payment arrangements.

- Amendments to PFRS 4, *Insurance Contracts*, Applying PFRS 9 with PFRS 4

The amendments address concerns arising from implementing PFRS 9, the new financial instruments standard before implementing the new insurance contracts standard. The amendments introduce two options for entities issuing insurance contracts: a temporary exemption from applying PFRS 9 and an overlay approach. The temporary exemption is first applied for reporting periods beginning on or after January 1, 2018. An entity may elect the overlay approach when it first applies PFRS 9 and apply that approach retrospectively to financial assets designated on transition to PFRS 9. The entity restates comparative information reflecting the overlay approach if, and only if, the entity restates comparative information when applying PFRS 9.

The amendments are not applicable to the Company since it has no activities that are predominantly connected with insurance or issue insurance contracts.

- Amendments to PAS 28, *Measuring an Associate or Joint Venture at Fair Value (Part of Annual Improvements to PFRSs 2014 - 2016 Cycle)*

The amendments clarify that an entity that is a venture capital organization, or other qualifying entity, may elect, at initial recognition on an investment-by-investment basis, to measure its investments in associates and joint ventures at FVTPL. They also clarify that if an entity that is not itself an investment entity has an interest in an associate or joint venture that is an investment entity, the entity may, when applying the equity method, elect to retain the fair value measurement applied by that investment entity associate or joint venture to the investment entity associate's or joint venture's interests in subsidiaries. This election is made

separately for each investment entity associate or joint venture, at the later of the date on which (a) the investment entity associate or joint venture is initially recognized; (b) the associate or joint venture becomes an investment entity; and (c) the investment entity associate or joint venture first becomes a parent.

These amendments to PAS 28 are not applicable to the Company since it is not a venture capital organization or an investment entity, nor does the Company apply the equity method in accounting for its investments in associates.

- Amendments to PAS 40, *Investment Property, Transfers of Investment Property*

The amendments clarify when an entity should transfer property, including property under construction or development into, or out of investment property. The amendments state that a change in use occurs when the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use. A mere change in management's intentions for the use of a property does not provide evidence of a change in use. The amendments should be applied prospectively to changes in use that occur on or after the beginning of the annual reporting period in which the entity first applies the amendments. Retrospective application is only permitted if this is possible without the use of hindsight.

These amendments are not applicable to the Company since it has no investment properties.

- Philippine Interpretation IFRIC-22, *Foreign Currency Transactions and Advance Consideration*

The interpretation clarifies that in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognizes the nonmonetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine a date of the transactions for each payment or receipt of advance consideration. The interpretation may be applied on a fully retrospective basis. Entities may apply the interpretation prospectively to all assets, expenses and income in its scope that are initially recognized on or after the beginning of the reporting period in which the entity first applies the interpretation or the beginning of a prior reporting period presented as comparative information in the financial statements of the reporting period in which the entity first applies the interpretation.

Since the Company's current practice is in line with the clarifications issued, this interpretation does not have any effect on its parent company financial statements.

New Standards and Interpretation Issued and Effective after December 31, 2018

The Company will adopt the standards enumerated below when these become effective. Except as otherwise indicated, the Company does not expect the adoption of these new and amended PFRSs, PAS and Philippine Interpretations to have significant impact on its parent company financial statements.

Effective January 1, 2019

- PFRS 16, *Leases*

PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under PAS 17, *Leases*. The standard includes two recognition exemptions for lessees - leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognize a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognize the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under PFRS 16 is substantially unchanged from today's accounting under PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases.

PFRS 16 also requires lessees and lessors to make more extensive disclosures than under PAS 17.

The Company plans to adopt PFRS 16 on the required effective date using the modified retrospective method. The Company will elect to apply the standard to contracts that were previously identified as leases applying PAS 17. The Company will therefore not apply the standard to contracts that were not previously identified as containing a lease applying PAS 17.

The Company will elect to use the exemptions proposed by the standard on lease contracts for which the lease terms ends within 12 months as of the date of initial application, and lease contracts for which the underlying asset is of low value.

In 2018, the Company performed a preliminary impact assessment of PFRS 16. Based on the initial assessment, the standard may have an impact on the Company's parent company balance sheets, statements of income, statements of comprehensive income and statements of cash flows.

- Amendments to PFRS 9, *Prepayment Features with Negative Compensation*

The amendments to PFRS 9 allow debt instruments with negative compensation prepayment features to be measured at amortized cost or fair value through other comprehensive income. An entity shall apply these amendments for annual reporting periods beginning on or after January 1, 2019. Earlier application is permitted.

The Company expects that adoption of these amendments will not have any impact on its parent company financial statements.

- Amendments to PAS 19, *Employee Benefits, Plan Amendment, Curtailment or Settlement*

The amendments to PAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event
- Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognized in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognized in other comprehensive income.

The amendments apply to plan amendments, curtailments, or settlements occurring on or after the beginning of the first annual reporting period that begins on or after January 1, 2019, with early application permitted. Since the Company's current practice is in line with these amendments, the Company does not expect any effect on its parent company financial statements upon adoption.

- Amendments to PAS 28, *Long-term Interests in Associates and Joint Ventures*

The amendments clarify that an entity applies PFRS 9 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). The amendments also clarified that, in applying PFRS 9, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognized as adjustments to the net investment in the associate or joint venture that arise from applying PAS 28, *Investments in Associates and Joint Ventures*.

Since the Company does not have such long-term interests in its associates, the amendments will not have an impact on its parent company financial statements.

- *Philippine Interpretation IFRIC-23, Uncertainty over Income Tax Treatments*

The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12 and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

An entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed.

This interpretation is not relevant to the Company because there is no uncertainty involved in the tax treatments made by management in connection with the calculation of current and deferred taxes as of December 31, 2018 and 2017.

- *Annual Improvements to PFRSs 2015-2017 Cycle*

- *Amendments to PFRS 3, Business Combinations, and PFRS 11, Joint Arrangements, Previously Held Interest in a Joint Operation*

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in PFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

An entity applies those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2019 and to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after January 1, 2019, with early application permitted. These amendments are currently not applicable to the Company but may apply to future transactions.

- Amendments to PAS 12, *Income Tax Consequences of Payments on Financial Instruments Classified as Equity*

The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognizes the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events.

An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application is permitted. These amendments are not relevant to the Company because dividends declared by the Company do not give rise to tax obligations under the current tax laws.

- Amendments to PAS 23, *Borrowing Costs, Borrowing Costs Eligible for Capitalization*

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application permitted.

These amendments are not applicable to the Company since it has no borrowing costs eligible for capitalization.

Effective beginning on or after January 1, 2020

- Amendments to PFRS 3, *Definition of a Business*

The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

These amendments will apply on future business combinations of the Company.

- Amendments to PAS 1, *Presentation of Financial Statements*, and PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material*

The amendments refine the definition of material in PAS 1 and align the definitions used across PFRSs and other pronouncements. They are intended to improve the understanding of the existing requirements rather than to significantly impact an entity's materiality judgements.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

Effective beginning on or after January 1, 2021

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

PFRS 17 is effective for reporting periods beginning on or after January 1, 2021, with comparative figures required. Early application is permitted.

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3, *Business Combinations*. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

Summary of Significant Accounting Policies

Current versus Noncurrent Classification

The Company presents assets and liabilities in the parent company balance sheet based on current/noncurrent classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after reporting period

All other assets are classified as noncurrent.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period or
- There is no unconditional right to defer settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as noncurrent.

Deferred income tax assets and liabilities are classified as non-current assets and liabilities.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participants ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the parent company financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the parent company financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Foreign Currency Translation

The Company's financial statements are presented in Philippine Peso, which is the Company's functional currency. Transactions in foreign currencies are recorded using the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are restated using the rate of exchange at balance sheet date. Exchange gains and losses arising from foreign currency transactions and translations of foreign currency denominated monetary assets and liabilities are credited to or charged against current operations. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions

Cash and Cash Equivalents

Cash and cash equivalents in the parent company balance sheet consist of cash on hand and with banks, and short-term, highly liquid investments that are readily convertible to known amounts of cash and subject to insignificant risk of changes in value. They are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

For the purpose of the parent company statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

Financial Instruments - Initial Recognition and Subsequent Measurement (prior to adoption of PFRS 9)

Date of recognition

The Company recognizes a financial asset or a financial liability in the parent company balance sheet on the date when it becomes a party to the contractual provisions of the instrument. All regular way purchases and sales of financial assets are recognized on trade date, which is the date that the Company commits to purchase the asset. Regular way purchases or sales of financial assets are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace. Derivatives are recognized on a trade date basis.

Initial recognition of financial instruments

All financial assets and financial liabilities are recognized initially at fair value. Except for financial assets at fair value through profit or loss (FVPL), the initial measurement of financial assets includes transaction costs. The Company classifies its financial assets in the following categories: financial assets at FVPL, loans and receivables, held-to-maturity (HTM) investments and AFS investments. For financial liabilities, the Company also classifies them into financial liabilities at FVPL and other financial liabilities. The classification depends on the purpose for which the investments were acquired and whether they are quoted in an active market. The Company determines the classification of its financial assets at initial recognition and, where allowed and appropriate, re-evaluates such designation at every balance sheet date.

'Day 1' difference

Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Company recognizes the difference between the transaction price and fair value (a 'Day 1' difference) in the parent company statement of income unless it qualifies for recognition as some other type of asset. In cases where use is made of data which is not observable, the difference between the transaction price and model value is only recognized in the parent company statement of income when the inputs become observable or when the instrument is derecognized. For each transaction, the Company determines the appropriate method of recognizing the 'Day 1' difference amount.

(a) Financial assets of financial liabilities at FVPL

Financial assets and liabilities at FVPL include financial assets and liabilities held for trading purposes and financial assets and liabilities designated upon initial recognition as at FVPL. Financial assets and liabilities are classified as held for trading if they are acquired for the purpose of selling and repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated and considered as hedging instruments in an effective hedge.

Financial assets and liabilities may be designated at initial recognition as at FVPL if the following criteria are met: (i) the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities, or recognizing gains or losses on them on a different basis; (ii) the assets and liabilities are part of a group of financial assets, liabilities or both, which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk managing strategy; or (iii) the financial

instruments contains an embedded derivative that would need to be recorded separately, unless the embedded derivative does not significantly modify the cash flow or it is clear, with little or no analysis, that it would not be separately recorded.

Where a contract contains one or more embedded derivatives, the entire hybrid contract may be designated as financial asset or financial liability at FVPL, except where the embedded derivative does not significantly modify the cash flows or it is clear that separation of the embedded derivative is prohibited.

Financial assets and liabilities at FVPL are recorded at the parent company balance sheet at fair value. Subsequent changes in fair value are recognized in the parent company statement of income. Interest earned or incurred is recorded as interest income or expense, respectively, while dividend income is recorded as other income when the right to receive payments has been established.

The Company's derivative assets are classified as financial assets at FVPL as of December 31, 2017 (see Note 19). The Company does not have any financial liabilities at FVPL as of December 31, 2017.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These are not entered into with the intention of immediate or short-term resale and are not classified or designated as AFS investments or financial assets at FVPL. Loans and receivables are carried at amortized cost less allowance for impairment. Amortization is determined using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are integral to the effective interest rate. Gains and losses are recognized in the parent company statement of income when the loans and receivables are derecognized or impaired, as well as through the amortization process.

Included under this category as of December 31, 2017 are the Company's cash and cash equivalents and trade and other receivables (see Note 18).

(c) HTM investments

HTM investments are quoted non-derivative financial assets which carry fixed or determinable payments and fixed maturities and which the Company has the positive intention and ability to hold to maturity. After initial measurement, HTM investments are measured at amortized cost using the effective interest method. This method uses an effective interest rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are integral to the effective interest rate. Where the Company sells other than an insignificant amount of HTM investments, the entire category would be tainted and would have to be reclassified as AFS investments. Gains and losses are recognized in the parent company statement of income when the investments are derecognized or impaired, as well as through the amortization process.

The Company does not have any HTM investment as of December 31, 2017.

(d) AFS investments

AFS investments are non-derivative financial assets that are either designated as AFS or not classified in any of the other categories. They are purchased and held indefinitely, and may be sold in response to liquidity requirements or changes in market conditions. Quoted AFS investments are measured at fair value with gains or losses being recognized as other comprehensive income, until the investments are derecognized or until the investments are determined to be impaired at which time, the accumulated gains or losses previously reported in other comprehensive income are included in the parent company statement of income. Unquoted AFS investments are carried at cost, net of impairment. Interest earned or paid on the investments is reported as interest income or expense using the effective interest rate. Dividends earned on investments are recognized in the parent company statement of income when the right of payment has been established.

The Company's AFS investments as of December 31, 2017 include investments in unquoted shares of stock (see Note 18).

(e) Other financial liabilities

This category pertains to issued financial liabilities or their components that are neither held for trading nor designated as at FVPL upon the inception of the liability and contain contractual obligations to deliver cash or another financial asset to the holder or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares. The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

Other financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable financing costs. Deferred financing costs are amortized, using the effective interest rate method, over the term of the related long-term liability. After initial recognition, interest-bearing loans and other borrowings are subsequently measured at amortized cost using the effective interest rate method.

Gains and losses are recognized in the parent company statement of income when liabilities are derecognized, as well as through amortization process.

Included under this category as of December 31, 2017 are the Company's trade and other payables and long-term debts (see Note 18).

Financial Instruments - Classification and Measurement (upon adoption of PFRS 9)

Classification of financial assets

Financial assets are classified in their entirety based on the contractual cash flows characteristics of the financial assets and the Company's business model for managing the financial assets. The Company classifies its financial assets into the following measurement categories:

- financial assets measured at amortized cost
- financial assets measured at fair value through profit or loss

- financial assets measured at fair value through other comprehensive income, where cumulative gains or losses previously recognized are reclassified to profit or loss
- financial assets measured at fair value through other comprehensive income, where cumulative gains or losses previously recognized are not reclassified to profit or loss

Financial assets at amortized cost

A financial asset is measured at amortized cost if (i) it is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and (ii) the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI on the principal amount outstanding. These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at amortized cost using the effective interest method, less any impairment in value. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an integral part of the effective interest method. The amortization is included in 'Interest income' in the statement of income and is calculated by applying the effective interest method to the gross carrying amount of the financial asset, except for (i) purchased or originated credit-impaired financial assets and (ii) financial assets that have subsequently become credit-impaired, where, in both cases, the effective interest method is applied to the amortized cost of the financial asset. Losses arising from impairment are recognized in 'Provision for credit and impairment losses' in the parent company statement of income.

The Company's financial assets at amortized cost as of December 31, 2018 consist of cash in banks, cash equivalents and trade and other receivables (see Note 18). The Company assessed that the contractual cash flows of these financial assets are SPPI and are expected to be held to collect all contractual cash flows until their maturity. As a result, the Company concluded these financial assets are to be measured at amortized cost.

Financial assets at FVOCI

A financial asset is measured at FVOCI if (i) it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and (ii) its contractual terms give rise on specified dates to cash flows that are SPPI on the principal amount outstanding. These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income within a separate component of equity. Impairment losses or reversals, interest income and foreign exchange gains and losses are recognized in profit and loss until the financial asset is derecognized. Upon derecognition, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss. This reflects the gain or loss that would have been recognized in profit or loss upon derecognition if the financial asset had been measured at amortized cost. Impairment is measured based on the expected credit loss (ECL) model.

The Company may also make an irrevocable election to measure at FVOCI on initial recognition investments in equity instruments that are neither held for trading nor contingent consideration recognized in a business combination in accordance with PFRS 3. Amounts recognized in OCI are not subsequently transferred to profit or loss. However, the Company may transfer the cumulative gain or loss within equity. Dividends on such investments are recognized in profit or loss, unless the dividend clearly represents a recovery of part of the cost of the investment.

Dividends are recognized in profit or loss only when:

- the Company's right to receive payment of the dividend is established
- it is probable that the economic benefits associated with the dividend will flow to the Company; and
- the amount of the dividend can be measured reliably.

The Company does not have any financial asset at FVOCI as of December 31, 2018.

Financial assets at FVTPL

Financial assets at FVTPL are measured as at unless these are measured at amortized cost or at FVOCI. Included in this classification are equity investments held for trading and debt instruments with contractual terms that do not represent SPPI. Financial assets held at FVTPL are initially recognized at fair value, with transaction costs recognized in the parent company statement of income as incurred. Subsequently, they are measured at fair value and any gains or losses are recognized in the parent company statement of income.

Additionally, even if the asset meets the amortized cost or the FVOCI criteria, the Company may choose at initial recognition to designate the financial asset at FVTPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) that would otherwise arise from measuring financial assets on a different basis.

Trading gains or losses are calculated based on the results arising from trading activities of the Company, including all gains and losses from changes in fair value for financial assets and financial liabilities at FVTPL, and the gains or losses from disposal of financial investments.

The Company's investments in unquoted equity shares previously carried at cost under PAS 39 and classified as AFS investments are measured at FVTPL under PFRS 9 as of December 31, 2018 (see Note 18).

Classification of financial liabilities

Financial liabilities are measured at amortized cost, except for the following:

- financial liabilities measured at fair value through profit or loss;
- financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the Company retains continuing involvement;
- financial guarantee contracts;
- commitments to provide a loan at a below-market interest rate; and
- contingent consideration recognized by an acquirer in accordance with PFRS 3.

A financial liability may be designated at fair value through profit or loss if it eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) or:

- if a host contract contains one or more embedded derivatives; or
- if a Company of financial liabilities or financial assets and liabilities is managed and its performance evaluated on a fair value basis in accordance with a documented risk management or investment strategy.

Where a financial liability is designated at fair value through profit or loss, the movement in fair value attributable to changes in the Company's own credit quality is calculated by determining the changes in credit spreads above observable market interest rates and is presented separately in other comprehensive income.

The Company's financial liabilities measured at amortized cost as of December 31, 2018 include trade and other payables, bank loans and long-term debts (see Note 18).

Reclassifications of financial instruments (upon adoption of PFRS 9)

The Company reclassifies its financial assets when, and only when, there is a change in the business model for managing the financial assets. Reclassifications shall be applied prospectively by the Company and any previously recognized gains, losses or interest shall not be restated. The Company does not reclassify its financial liabilities.

The Company does not reclassify its financial assets when:

- A financial asset that was previously a designated and effective hedging instrument in a cash flow hedge or net investment hedge no longer qualifies as such;
- A financial asset becomes a designated and effective hedging instrument in a cash flow hedge or net investment hedge; and
- There is a change in measurement on credit exposures measured at fair value through profit or loss.

Derivative financial instruments

Initial recognition and subsequent measurement

Derivative financial instruments, including embedded derivatives, are initially recognized at fair value on the date in which a derivative transaction is entered into or bifurcated, and are subsequently remeasured at FVTPL, unless designated as effective hedge. Changes in fair value of derivative instruments not accounted as hedges are recognized immediately in the consolidated statement of income. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

The Company assesses whether embedded derivatives are required to be separated from host contracts when the Company first becomes party to the contract. An embedded derivative is separated from the host financial or non-financial contract and accounted for as a separate derivative if all of the following conditions are met:

- the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics of the host contract;
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- the hybrid or combined instrument is not recognized as at FVPL.

Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

Embedded derivatives that are bifurcated from the host contracts are accounted for either as financial assets or financial liabilities at FVPL. The Company uses derivative financial instruments, such as short-term forward contracts to hedge its foreign currency risks.

As of December 31, 2018, the Company has derivative assets classified as financial asset at FVTPL (see Note 19)

Derecognition of Financial Assets and Liabilities (prior to and upon adoption of PFRS 9)

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a Company of similar financial assets) is derecognized when, and only when:

- the rights to receive cash flows from the asset expires;
- the Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the Company has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company retains the contractual rights to receive the cash flows of a financial asset but assumes a contractual obligation to pay those cash flows to one or more entities, the Company treats the transaction as a transfer of a financial asset if the Company:

- has no obligation to pay amounts to the eventual recipients unless it collects equivalent amounts from the original asset;
- is prohibited by the terms of the transfer contract from selling or pledging the original asset other than as security to the eventual recipients for the obligation to pay them cash flows; and
- has an obligation to remit any cash flows it collects on behalf of the eventual recipients without material delay.

In transactions where the Company neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset and it retains control over the financial asset, the financial asset is recognized to the extent of the Company's continuing involvement in the financial asset. The extent of the Company's continuing involvement in the transferred asset is the extent to which it is exposed to changes in the value of the transferred asset. When the Company's continuing involvement takes the form of guaranteeing the transferred asset, the extent of the Company's continuing involvement is the lower of (i) the amount of the asset and (ii) the maximum amount of the consideration received that the Company could be required to repay ('the guarantee amount'). When the Company's continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the extent of the Company's continuing involvement is the amount of the transferred asset that the Company may repurchase. However, in the case of a written put option on an asset that is measured at fair value, the extent of the Company's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price. When the Company's continuing involvement takes the form of a cash-settled option or similar provision on the transferred asset, the extent of the Company's continuing involvement is measured in the same way as that which results from non-cash settled options.

Modification of contractual cash flows

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset, the Company recalculates the gross carrying amount of the financial asset as the present value of the renegotiated or modified contractual cash flows discounted at the original effective interest method (or credit-adjusted effective interest method for purchased or originated credit-impaired financial assets) and recognizes a modification gain or loss in the parent company statement of income.

When the modification of a financial asset results in the derecognition of the existing financial asset and the subsequent recognition of the modified financial asset, the modified asset is considered a 'new' financial asset. Accordingly, the date of the modification shall be treated as the date of initial recognition of that financial asset when applying the impairment requirements to the modified financial asset.

Financial liabilities

A financial liability (or a part of a financial liability) is derecognized when the obligation under the liability is discharged, cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability or a part of it are substantially modified, such an exchange or modification is treated as a derecognition of the original financial liability and the recognition of a new financial liability, and the difference in the respective carrying amounts is recognized in the parent company statement of income.

Impairment of Financial Assets (prior to adoption of PFRS 9)

The Company assesses at each balance sheet date whether a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if and only if, there is an objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Loans and receivables

For loans and receivables carried at amortized cost, the Company first assesses individually whether objective evidence of impairment exists for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the parent company statement of income. Interest income continues to be accrued on the reduced carrying amount based on the original effective interest rate of the financial asset. Loans and receivables together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been transferred to the Company. If, in a subsequent period, the amount of the impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or decreased by adjusting the allowance account. Any subsequent reversal of an impairment loss is recognized in the parent company statement of income, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

Assets carried at cost

If there is objective evidence that an impairment loss on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such an unquoted equity instrument has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

AFS investments

For AFS investments, the Company assesses at each balance sheet date whether there is objective evidence that an investment or group of investments is impaired.

In the case of equity investments classified as AFS, objective evidence of impairment would include a significant or prolonged decline in the fair value of the investments below its cost. Where there is evidence of impairment, the cumulative loss (measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the parent company statement of income) is removed from the other comprehensive income and recognized in the parent company statement of income. Impairment losses on equity investments are not reversed through the parent company statement of income. Increases in fair value after impairment are recognized directly in the other comprehensive income.

In the case of debt instruments classified as AFS, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on rate of interest used to discount future cash flows for measuring impairment loss. Such accrual is recorded as part of "Interest income" in the parent company statement of income. If, in subsequent period, the fair value of a debt instrument increased and the increase can be objectively related to an event occurring after the impairment loss was recognized in the parent company statement of income, the impairment loss is reversed through the parent company statement of income.

Impairment of Financial Assets (upon adoption of PFRS 9)

PFRS 9 introduces the single, forward-looking "expected loss" impairment model, replacing the "incurred loss" impairment model under PAS 39.

The Company recognizes expected credit losses (ECL) for the following financial assets that are not measured at FVTPL:

- debt instruments that are measured at amortized cost and FVOCI;
- loan commitments; and
- financial guarantee contracts.

No ECL is recognized on equity investments.

ECLs are measured in a way that reflects the following:

- an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and
- reasonable and supportable information that is available without undue cost or effort at the balance sheet date about past events, current conditions and forecasts of future economic conditions.

Financial assets migrate through the following three stages based on the change in credit quality since initial recognition:

Stage 1: 12-month ECL

For credit exposures where there have not been significant increases in credit risk since initial recognition and that are not credit-impaired upon origination, the portion of lifetime ECLs that represent the ECLs that result from default events that are possible within the 12-months after the balance sheet date are recognized.

Stage 2: Lifetime ECL - not credit-impaired

For credit exposures where there have been significant increases in credit risk since initial recognition on an individual or collective basis but are not credit-impaired, lifetime ECLs representing the ECLs that result from all possible default events over the expected life of the financial asset are recognized.

Stage 3: Lifetime ECL - credit-impaired

Financial assets are credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of those financial assets have occurred. For these credit exposures, lifetime ECLs are recognized and interest revenue is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset.

A financial asset is considered to have low credit risk if

- the financial instrument has a low risk of default
- the borrower has a strong capacity to meet its contractual cash flow obligations in the near term
- adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

Determining the stage for impairment

At each balance sheet date, the Company assesses whether there has been a significant increase in credit risk for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the balance sheet date and the date of initial recognition. The Company considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analysis.

The simplified approach, where changes in credit risk are not tracked and loss allowances are measured at amounts equal to lifetime ECL, is applied to 'Trade receivables'. The Company has established a provision matrix for customer segments that is based on historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the parent company balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements whereby the related assets and liabilities are presented gross in the parent company balance sheet.

Classification of financial instruments between liability and equity

A financial instrument is classified as liability if it provides for a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Company; or
- satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Company does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as income or expense. Distributions to holders of financial instruments classified as equity are charged directly to equity net of any related income tax benefits.

The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

Redeemable Preferred Shares (RPS)

The component of the RPS that exhibits characteristics of a liability is recognized as a liability in the parent company balance sheet, net of transaction costs. The corresponding dividends on those shares are charged as interest expense in the parent company statement of income. On issuance of

the RPS, the fair value of the liability component is determined using a market rate for an equivalent non-convertible bond; and this amount is carried as a long-term liability on the amortized cost basis until extinguished on redemption.

Investments in Subsidiaries and Associates

A subsidiary is an entity over which the Company has the power to govern the financial and operating policies generally accompanying a shareholding of more than half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity.

An associate is an entity in which the Company has significant influence and which is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decision of the investee, but is not control or joint control over those policies.

Investments in subsidiaries and associates are carried at cost, less impairment in value, in the parent company financial statements.

The Company recognizes income from the investments only to the extent that the Company receives distributions or establishes a right to receive distributions from accumulated profits of the subsidiaries and associates arising after the date of acquisition. Distributions received in excess of such profits are regarded as a recovery of investment and are recognized as a reduction of the cost of the investment.

Property and Equipment

Property and equipment are stated at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment in value, if any. The initial cost of property and equipment comprises its purchase price, including import duties, if any, nonrefundable taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Such cost includes the cost of replacing parts of such property and equipment when that cost is incurred if the recognition criteria are met. Repairs and maintenance costs are recognized in the parent company statement of income as incurred.

Depreciation is computed using the straight-line method over the useful lives of the assets as follows:

<u>Category</u>	<u>Number of Years</u>
Transportation equipment	5
Office equipment	3
Communication equipment	3
Leasehold improvements	10

Leasehold improvements are amortized over the shorter of the lease terms and the lives of the improvements.

The carrying values of property and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying values may not be recoverable.

Fully depreciated assets are retained in the accounts until these are no longer in use. When assets are retired or otherwise disposed of, both the cost and related accumulated depreciation and amortization and any allowance for impairment losses, if any, are removed from the accounts, and any resulting gain or loss is credited or charged to current operations. An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the parent company statement of income in the year the asset is derecognized.

The assets' residual values, useful lives and depreciation method are reviewed, and adjusted if appropriate, at each financial year-end.

When each major inspection is performed, its cost is recognized in the carrying amount of the property and equipment as a replacement if the recognition criteria are satisfied.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is fair value as at the date of the acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the parent company statement of income in the year in which the expenditure is incurred.

Computer software license

Computer software license is initially recognized at cost. Following initial recognition, the computer software license cost is carried at cost less accumulated amortization and any accumulated impairment in value, if any.

The computer software license is amortized on a straight-line basis over its estimated useful economic life of three to five years and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization commences when the computer software license is available for use. The amortization period and the amortization method for the license are reviewed at each financial year end. Changes in the estimated useful life is accounted for by changing the amortization period or method, as appropriate, and treating them as changes in accounting estimates. The amortization expense is recognized in the parent company statement of income in the expense category consistent with the function of the computer software license.

Project Development Costs

Project development costs include power plant projects in the development phase which meet the "identifiability" requirement under PAS 38, *Intangible Assets*, as they are separable and susceptible to individual sale and are carried at acquisition cost. These assets are transferred to "Property and equipment" when construction of each power plant commences. During the period of development, the asset is tested for impairment annually.

Research and Development Expenditure

The Company's policy is to record research expenses in the parent company statement of income in the period when they are incurred.

Development costs are recognized as an intangible asset on the parent company balance sheet if the Company can identify them separately and show the technical viability of the asset, its intention and capacity to use or sell it, and how it will generate probable future economic benefits.

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized over the period of expected future benefit. During the period of development, the asset is tested for impairment annually.

Impairment of Nonfinancial Assets

Other current assets, investments and advances, project development costs, property and equipment and other noncurrent assets

The Company assesses at each balance sheet date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognized in the parent company statement of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each balance sheet date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the parent company statement of income unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Capital Stock and Additional Paid-in Capital

Capital stock is measured at par value for all shares issued. When the Company issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued. Capital stock includes common stock and preferred stock.

When the shares are sold at premium, the difference between the proceeds and the par value is credited to the "Additional paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case the shares are issued to extinguish or settle the liability of the Company, the shares shall be measured either at the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Direct costs incurred related to equity issuance, such as underwriting, accounting and legal fees, printing costs and taxes are debited to the "Additional paid-in capital" account. If additional paid-in capital is not sufficient, the excess is charged against an equity reserve account.

Retained Earnings

The amount included in retained earnings includes accumulated earnings of the Company and reduced by dividends on capital stock. Dividends on capital stock are recognized as a liability and deducted from equity when they are approved by the BOD. Dividends for the year that are approved after the financial balance sheet date are dealt with as an event after the financial balance sheet date. Retained earnings may also include effect of changes in accounting policy as may be required by the transition provisions of new and amended standards.

Revenue Recognition

Revenue from contracts with customers under PFRS 15 is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. Under PAS 18, revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. The Company assesses its revenue arrangements against specific criteria in order to determine if it is acting as a principal or an agent.

The following specific recognition criteria must also be met before revenue is recognized:

Dividend income

Dividend income is recognized when the Company's right to receive payment is established.

Technical, management and service fees

Technical, management and other fees are recognized when the related services are rendered.

Interest income

Interest is recognized as it accrues taking into account the effective interest method.

Expenses

Expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Expenses are recognized when incurred.

Pension benefits

The Company has defined benefit pension plans which require contributions to be made to separately administered funds. The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the parent company statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to parent company statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Company, nor can they be paid directly to the Company. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Company's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

Borrowing Costs

Borrowing costs are capitalized if they are directly attributable to the acquisition, construction or production of a qualifying asset. To the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalization on that asset shall be determined as the actual borrowing costs incurred on that borrowing during the period less any investment income on the temporary investment of those borrowings. To the extent that funds are borrowed generally, the amount of borrowing costs eligible for capitalization shall be determined by applying a capitalization rate to the expenditures on that asset. The capitalization rate shall be the weighted average of the borrowing costs applicable to the borrowings of the Company that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset. The amount of borrowing costs capitalized during a period shall not exceed the amount of borrowing costs incurred during that period.

Taxes

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as of the balance sheet date.

Current income tax relating to items recognized directly in equity is recognized in the parent company statement of comprehensive income and not in the parent company statement of income.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax

Deferred income tax is provided using the balance sheet liability method on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences.

Deferred income tax assets are recognized for all deductible temporary differences, carryforward benefits of unused net operating loss carryover (NOLCO) and excess minimum corporate income tax (MCIT), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward benefits of unused NOLCO and excess MCIT can be utilized in the future.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred income tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the balance sheet date.

Income tax relating to items recognized directly in other comprehensive income is also recognized in other comprehensive income and not in the parent company statement of income.

Value-added Tax (VAT)

Revenues, expenses, and assets are recognized net of the amount of VAT, if applicable.

When VAT from sales of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the parent company balance sheet. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the parent company balance sheet to the extent of the recoverable amount.

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the parent company statement of income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

Contingencies

Contingent liabilities are not recognized in the parent company financial statements but are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized but are disclosed in the parent company financial statements when an inflow of economic benefits is probable.

Events After the Reporting Period

Post year-end events that provide additional information about the Company's position at balance sheet date (adjusting events) are reflected in the parent company financial statements. Post year-end events that are not adjusting events are disclosed when material.

3. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the parent company financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosures of contingent liabilities. However, uncertainty about these assumptions could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in the future periods.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Company based its assumptions and estimates on parameters available when the parent company financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Judgments, key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting period are consistent with those applied in the most recent annual financial statements, except for those that relate to the adoption of PFRS 9 and PFRS 15.

Judgments

In the process of applying the Company's accounting policies, management has made judgments, apart from those involving estimations which have the most significant effect on the amounts recognized in the Company's financial statements.

Classification of financial instruments

The Company exercises judgment in classifying a financial instrument, or its component parts, on initial recognition as either a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definition of a financial asset, a financial liability or an equity instrument. The substance of a financial instrument, rather than its legal form, governs its classification in the parent company balance sheet.

Contractual cash flows characteristics

If the financial asset is held within a business model whose objective is to hold assets to collect contractual cash flows or within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, the Company assesses whether the cash flows from the financial asset represent solely payments of principal and interest (SPPI) on the principal amount outstanding.

In making this assessment, the Company determines whether the contractual cash flows are consistent with a basic lending arrangement, i.e., interest includes consideration only for the time value of money, credit risk and other basic lending risks and costs associated with holding the financial asset for a particular period of time. In addition, interest can include a profit margin that is consistent with a basic lending arrangement. The assessment as to whether the cash flows meet the test is made in the currency in which the financial asset is denominated. Any other contractual terms that introduce exposure to risks or volatility in the contractual cash flows that is unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are SPPI on the principal amount outstanding.

Evaluation of business model in managing financial instruments (upon adoption of PFRS 9)

The Company determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. The Company's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed; and
- The expected frequency, value and timing of sales are also important aspects of the Company's assessment.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realized in a way that is different from the Company's original expectations, the Company does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Identifying performance obligations

The Company identifies performance obligations by considering whether the promised goods or services in the contract are distinct goods or services. A good or service is distinct when the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Company's promise to transfer the good or service to the customer is separately identifiable from the other promises in the contract.

The Company assesses performance obligations as a series of distinct goods and services that are substantially the same and have the same pattern of transfer if i) each distinct good or services in the series are transferred over time and ii) the same method of progress will be used (i.e., units of delivery) to measure the entity's progress towards complete satisfaction of the performance obligation.

Revenue recognition

The Company recognizes revenue when it satisfies an identified performance obligation by transferring a promised good or service to a customer. A good or service is considered to be transferred when the customer obtains control. The Company determines, at contract inception, whether it will transfer control of a promised good or service over time. If the Company does not satisfy a performance obligation over time, the performance obligation is satisfied at a point in time.

The Company will continue to recognize revenue from rendering of services over time, since customers simultaneously receives and consumes the benefits as the Company provides the services.

Identifying methods for measuring progress of revenue recognized over time

The Company determines the appropriate method of measuring progress which is either through the use of input or output methods. Input method recognizes revenue on the basis of the entity's efforts or inputs to the satisfaction of a performance obligation while output method recognizes revenue on the basis of direct measurements of the value to the customer of the goods or services transferred to date.

Estimation Uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Estimating useful lives of property and equipment

The Company estimates the useful lives of property and equipment based on the period over which assets are expected to be available for use. The estimated useful lives of property and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, the estimation of the useful lives of property and equipment is based on collective assessment of internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in the factors and circumstances mentioned above. As of December 31, 2018 and 2017, the net book values of property and equipment amounted to ₱65.6 million and ₱80.3 million, respectively (see Note 8).

Estimating residual value of property and equipment

The residual value of the Company's property and equipment is estimated based on the amount that would be obtained from disposal of the asset, after deducting estimated costs of disposal, if the asset is already of the age and in the condition expected at the end of its useful life. Such estimation is based on the prevailing price of property and equipment of similar age and condition. The estimated residual value of each asset is reviewed periodically and updated if expectations differ from previous estimates due to changes in the prevailing price of a property and equipment of similar age and condition. As of December 31, 2018 and 2017, the aggregate net book values of property and equipment amounted to ₱65.6 million and ₱80.3 million, respectively (see Note 8).

Estimating impairment of project development costs

Impairment is determined for development costs by assessing the recoverable amount of each projects. Where the recoverable amount of the project is less than the carrying amount, an impairment loss is recognized. When calculating recoverable amount, the future cash flow is discounted by a discount factor that takes into consideration risk free interest and the risk associated with the specific project.

The Company did not recognize impairment loss on project development costs in 2018 and 2017. The carrying amount of the Company's project development costs amounted to ₱388.5 million and ₱262.6 million as of December 31, 2018 and 2017, respectively (see Note 10).

Estimating allowance for impairment of losses on investment in and advances to subsidiaries and associates

Investments in and advances to subsidiaries and associates are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. In 2017, it was determined that the carrying value of the investment in Mactan Enerzone Corporation exceeded its recoverable amount. As a result, an impairment loss amounting to ₱169.5 million was recognized. The aggregate carrying amount of the investments in and advances to subsidiaries and associates amounted to ₱88.93 billion and ₱80.04 billion as of December 31, 2018 and 2017, respectively (see Note 7).

Assessing impairment of nonfinancial assets

The Company assesses whether there are any indicators of impairment for nonfinancial assets at each balance sheet date. These nonfinancial assets (property and equipment and other current and noncurrent assets) are tested for impairment when there are indicators that the carrying amounts may not be recoverable.

Determining the recoverable amount of the assets, which require the determination of future cash flows expected to be generated from the continued use and ultimate disposition of such assets, requires the Company to make estimates and assumptions that can materially affect its financial statements. Future events could cause the Company to conclude that these assets are impaired. Any resulting impairment loss could have a material adverse impact on the financial condition and results of operations.

As of December 31, 2018, the carrying values of property and equipment and other current and noncurrent assets amounted to ₱65.6 million, ₱941.8 million, and ₱89.1 million, respectively. As of December 31, 2017, the carrying values of property and equipment and other current and noncurrent assets amounted to ₱80.3 million, ₱797.0 million, and ₱14.9 million, respectively (see Notes 6, 8, and 9).

Estimating allowance for impairment of trade and other receivables (prior to adoption of PFRS 9)

The Company maintains allowance for impairment of receivables at a level considered adequate to provide for potential uncollectible receivables. The level of this allowance is evaluated by management on the basis of the factors that affect the collectability of the accounts. These factors include, but are not limited to, the Company's relationship with its debtors, debtor's current credit status and other known market factors. The Company reviews the age and status of receivables and identifies accounts that are to be provided with allowance either individually or collectively. The amount and timing of recorded expenses for any period would differ if the Company made different judgment or utilized different estimates. An increase in the Company's allowance for impairment of receivables will increase the Company's recorded expenses and decrease current assets. No allowance for impairment of receivables was recognized as of December 31, 2017. As of December 31, 2017, the Company's receivables amounted to ₱519.6 million (see Note 5).

Measurement of expected credit losses (upon adoption of PFRS 9)

ECLs are derived from unbiased and probability-weighted estimates of expected loss. Financial assets that are not credit-impaired at the balance sheet date are measured as the present value of all cash shortfalls over the expected life of the financial asset discounted by the effective interest rate. The cash shortfall is the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive.

The Company leverages existing risk management indicators (e.g., internal credit risk classification and restructuring triggers), credit risk rating changes and reasonable and supportable information which allows the Company to identify whether the credit risk of financial assets has significantly increased.

No allowance for expected credit losses was recognized in 2018. Trade and other receivables amounted to ₱981.5 million as of December 31, 2018 (see Note 5).

Inputs, assumptions and estimation techniques (upon adoption of PFRS 9)

The ECL is measured on either a 12-month or lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD), defined as follows:

- *PD*
The PD represents the likelihood of a borrower defaulting on its financial obligation, either over the next 12 months, or over the remaining life of the obligation. PD estimates are estimates at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. If a counterparty or exposure migrates between rating classes, then this will lead to a change in the estimate of the associated PD. PDs are estimated considering the contractual maturities of exposures. The 12-months and lifetime PD represent the expected point-in-time probability of a default over the next 12 months and remaining lifetime of the financial instrument, respectively, based on conditions existing at the balance sheet date and future economic conditions that affect credit risk.

- **LGD**
Loss Given Default represents the Company's expectation of the extent of loss on a defaulted exposure, taking into account the mitigating effect of collateral, its expected value when realized and the time value of money. LGD varies by type of counterparty, type of seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of EAD.
- **EAD**
EAD is based on the amounts the Company expects to be owed at the time of default, over the next 12 months or over the remaining lifetime.

The ECL is determined by projecting the PD, LGD, and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e., the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the balance sheet date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

The lifetime PD is developed by applying a maturity profile to the current 12-month PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis. The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by counterparty.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. LGDs are typically set at product level due to the limited differentiation in recoveries achieved across different borrowers. These LGD's are influenced by collection strategies.

The assumptions underlying the ECL calculation such as how the maturity profile of the PDs change are monitored and reviewed on a quarterly basis.

Simplified approach for trade receivables (upon adoption of PFRS 9)

The Company uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for various customer segments that have similar loss patterns.

The provision matrix is initially based on the Company's historical observed default rates. The Company will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the industrial segment, the historical default rates are adjusted. At every balance sheet date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

There have been no significant changes in estimation techniques or significant assumptions made during the reporting period.

Incorporation of forward-looking information (upon adoption of PFRS 9)

The Company incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL.

The Company has identified and documented key drivers of credit risk and credit losses of each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

Predicted relationship between the key indicators and default and loss rates on various portfolios of financial assets have been developed based on analyzing historical data over the past 5 years. The methodologies and assumptions including any forecasts of future economic conditions are reviewed regularly.

The Company has not identified any uncertain event that it has assessed to be relevant to the risk of default occurring but where it is not able to estimate the impact on ECL due to lack of reasonable and supportable information.

Pension benefits

The cost of defined benefit pension plans, as well as the present value of the pension obligation, are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each balance sheet date.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future inflation rates for the specific country.

Further details about the assumptions used are provided in Note 15.

Net benefit expense amounted to ₱41.9 million in 2018, ₱50.0 million in 2017 and ₱58.3 million in 2016. The net pension asset amounted to ₱38.1 million and ₱16.2 million as of December 31, 2018 and 2017, respectively.

Recognition of deferred income tax assets

The Company reviews the carrying amounts of deferred income tax assets at each balance sheet date and reduces deferred income tax assets to the extent that it is no longer probable that sufficient income will be available to allow all or part of the deferred income tax assets to be utilized. As of December 31, 2018 and 2017, deferred income tax assets amounted to ₱202.3 million

and ₱173.4 million, respectively. No deferred income tax assets were recognized for deductible temporary difference amounting to ₱1.07 billion and ₱1.03 billion, MCIT amounting to ₱48.7 million and ₱44.4 million and NOLCO amounting to ₱1.03 billion and ₱647.7 million as of December 31, 2018 and 2017, respectively (see Note 16).

Legal contingencies

The estimate of probable costs for the resolution of possible claims has been developed in consultation with outside counsels handling the Company's defense in these matters and is based upon an analysis of potential results. No provision for probable losses arising from legal contingencies was recognized in the Company's parent company financial statements for the years ended December 31, 2018 and 2017.

4. **Cash and Cash Equivalents**

	2018	2017
Cash on hand and in banks	₱33,107,511	₱278,899,148
Short-term deposits	11,842,080,800	7,547,270,000
	<u>₱11,875,188,311</u>	<u>₱7,826,169,148</u>

Cash in banks earns interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods depending on the immediate cash requirements of the Company and earn interest at the respective short-term deposits rates.

Interest income earned from cash in banks and short-term deposits amounted to ₱137.3 million, ₱147.6 million and ₱329.5 million in 2018, 2017 and 2016, respectively.

5. **Trade and Other Receivables**

	2018	2017
Trade (see Note 17)	₱617,445,732	₱383,208,109
Dividends	288,579,777	94,300,000
Interest	43,777,681	10,269,728
Nontrade	18,406,566	18,094,904
Others	13,254,002	13,773,417
	<u>₱981,463,758</u>	<u>₱519,646,158</u>

Trade receivables are non-interest bearing and generally have a term of 30 days.

For terms and conditions relating to related party receivables, refer to Note 17.

6. Other Current Assets

	2018	2017
Prepaid tax	P926,898,393	P784,917,756
Others	14,879,787	12,114,844
	P941,778,180	P797,032,600

7. Investments and Advances

The details of the Company's investments and advances are as follows:

	2018	2017
<i>Investments in Subsidiaries:</i>		
Therma Power, Inc. (TPI)	P30,116,058,873	P30,116,058,873

	₱88,931,823,265	₱80,038,264,024

Investment in RI

In 2018, the Company subscribed 135.0 million RPS for ₱135.0 million.

Investment in BEZC

In 2018, BEZC redeemed shares attributable to the Company at 42.0 million RPS for ₱42.0 million at ₱1 per share.

In 2018, it was determined that the carrying value of the investment in BEZC exceeded its recoverable amount. The recoverable amount of the investment has been determined based on a value-in-use calculation using cash flow projections based on financial budgets approved by senior management covering a five-year period.

The discount rates applied to cash flow projections are from 10.63% to 14.80% in 2018 and cash flows beyond the five-year period are extrapolated using a zero percent growth rate. As a result, an impairment loss amounting to ₱45.9 million was recognized.

Investment in APREC

In 2018, the Company subscribed 25.0 million RPS for ₱25.0 million.

Investment in PEI

In 2018, PEI advances were reclassified to investment amounting to ₱11.9 million.

Investment in VECO

In 2018, the Company subscribed 0.0005 million RPS for ₱0.05 million.

Investment in HI

The Company subscribed additional 360.1 million RPS for ₱360.1 million and 245.0 million RPS for ₱245.0 million in 2018 and 2017, respectively.

Investment in AAI

AAI redeemed shares attributable to the Company at 80,216 RPS for ₱80.2 million and 8,809 RPS for ₱8.8 million in 2018 and 2017, respectively, at ₱1,000 per share.

Investment in Malvez

The Company subscribed additional 17.8 million RPS for ₱17.8 million and 0.1 million common shares for ₱0.1 million in 2018 and 2017, respectively.

Investment in TVI

The Company subscribed additional 8.8 million RPS for ₱5.38 billion and 2.56 million RPS for ₱1.56 billion in 2018 and 2017, respectively.

Investment in EAUC

In April 2017, EAUC redeemed 21,690 RPS at a redemption price of ₱63.3 million or ₱2,920 per share attributable to the Company. The book value of the redeemed shares amounted to ₱43.8 million. As a result, the Company recognized a "Gain on redemption of preferred shares" amounting to ₱19.6 million.

Investment in ARI

In 2018 and 2017, ARI redeemed shares attributable to the Company at 200.0 million and 948.1 million RPS for ₱2.00 billion and ₱9.48 billion, respectively, at ₱10 per share.

Investment in Hedcor Bukidnon

The Company subscribed additional 871.0 million RPS for ₱871.0 million in 2017.

Investment in Hedcor Sibulan

Hedcor Sibulan redeemed shares attributable to the Company at 231.0 million RPS for ₱231.0 million in 2017 at ₱1 per share.

Investment in MEZC

In 2017, it was determined that the carrying value of the investment in MEZC exceeded its recoverable amount. The recoverable amount of the investment has been determined based on a value-in-use calculation using cash flow projections based on financial budgets approved by senior management covering a five-year period.

The discount rates applied to cash flow projections are from 11.18% to 14.93% in 2017 and cash flows beyond the five-year period are extrapolated using a zero percent growth rate. As a result, an impairment loss amounting to ₱169.5 million was recognized.

Investment in AP Int

In 2017, it was determined that the carrying value of the investment in AP Int exceeded its recoverable amount. As a result, an impairment loss amounting to ₱120.7 million was recognized.

Advances

These advances include advances to subsidiaries that will be applied against future subscriptions of the Company to the shares of stock of the subsidiaries.

In 2018, the Company has additional advances to TPI amounting to ₱5.14 billion.

In 2017, the Company has advances to TPI amounting to ₱4.2 billion, AP Int amounting to ₱50.7 million and PEI amounting to ₱9.6 million.

The Company's subsidiaries, all incorporated in the Philippines except for AP Int which was incorporated in Singapore, and the corresponding percentage equity ownership are as follows:

Name of Company	Nature of Business	2018		2017	
		Direct	Indirect	Direct	Indirect
ARI	Holding company	100.00%	-	100.00%	-

Balances at end of year	33,706,486	28,268,718	752,009	12,881,274	75,608,487
Net book values	₱47,846,267	₱6,565,073	₱-	₱25,885,384	₱80,296,724

The Company recognized losses of ₱1.3 million and ₱0.4 million on disposal of property and equipment in 2018 and 2017, respectively.

There are no restrictions on the title and no property and equipment are pledged as security for liabilities.

Fully depreciated property and equipment with cost amounting to ₱50.1 million and ₱44.5 million as of December 31, 2018 and 2017, respectively, are still carried in the books of the Company and still in use.

9. Other Noncurrent Assets

	2018	2017

10. Project Development Costs

	2018	2017
Balances at beginning of year	P262,559,144	P273,724,711
Additions	177,031,239	65,673,997
Write-offs	(51,122,382)	(76,839,564)
Balances at end of year	P388,468,001	P262,559,144

Project development costs consist of rights, titles and interests for various power plant development projects.

11. Trade and Other Payables

	2018	2017
Trade payables (see Note 18)	P55,903,519	P39,132,317
Accrued interest (see Note 12)	212,180,900	66,285,228
Accrued taxes and fees	43,272,258	25,611,103
Output VAT	38,456,614	55,122,268
Nontrade payables	5,609,030	7,264,277
Others	688,252	524,171
	P356,110,573	P193,939,364

Trade payables are noninterest-bearing and generally have a term of 30 days.

Accrued taxes and fees represent taxes withheld on compensation, benefits and other fees.

12. Bank Loans and Long-term Debts

Bank Loans

The Company obtained unsecured bank loans from financial institutions with a total principal amount of ₱4.70 billion at an annual interest rate ranging from 3.25% to 5.20% for working capital purposes in 2018. These loans are covered by the respective borrower's existing credit lines with the banks and are not subject to any significant covenants and warranties.

Interest expense on bank loans amounted to ₱140.9 million in 2018.

Long-Term Debts

	Interest Rate	2018	2017
Financial and non-financial institutions -			
unsecured			
2014 7-year retail bonds	5.21%	₱6,600,000,000	₱6,600,000,000
2014 12-year retail bonds	6.10%	3,400,000,000	3,400,000,000
2017 10-year retail bonds	5.34%	3,000,000,000	3,000,000,000
2018 5.25-year retail bonds	7.51%	7,700,000,000	-
2018 10-year retail bonds	8.51%	2,500,000,000	-
		23,200,000,000	13,000,000,000
Less deferred financing costs		202,178,708	98,018,357
		₱22,997,821,292	₱12,901,981,643

Retail Bonds - ₱10.2 billion

In October 2018, the Company issued a total of ₱10.2 billion bonds, broken down into a ₱7.7 billion 5.25-year bond due 2024 at a fixed rate equivalent to 7.51% p.a. and a ₱2.5 billion 10-year bond due 2028 at a fixed rate equivalent to 8.51% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Retail Bonds - ₱3.0 billion

In July 2017, the Company issued ₱3.0 billion 10-year bond due 2027 at an annual fixed rate of 5.34% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Retail Bonds - ₱10.0 billion

In September 2014, the Company issued a total of ₱10.0 billion bonds, broken down into a ₱6.6 billion 7-year bond due 2021 at a fixed rate equivalent to 5.21% p.a. and a ₱3.4 billion 12-year bond due 2026 at a fixed rate equivalent to 6.10% p.a. The bonds have been rated PRS Aaa by PhilRatings.

The principal amount of these bonds shall be payable on a lump sum basis on the respective maturity date at its face value. These bonds may be redeemed in advance by the Company based on stipulated early redemption option dates and on agreed early redemption price.

Under the bond trust agreements, the Company shall not permit its debt-to-equity ratio to exceed 3:1 calculated based on the year-end debt and consolidated equity. The Company is in compliance with the debt covenants as of December 31, 2018.

Unamortized deferred financing cost reduced the carrying amount of long-term debt by ₱202.2 million and ₱98.0 million as of December 31, 2018 and 2017, respectively.

Total interest expense recognized amounted to ₱858.2 million, ₱630.5 million and ₱550.9 million in 2018, 2017 and 2016, respectively.

13. Equity

a. Paid-in Capital

	2018	2017
Capital Stock		
Authorized - ₱1 par value		
Common shares - 16,000,000,000 shares		
Preferred shares - 1,000,000,000 shares		
Issued		
Common shares - 7,358,604,307 shares	₱7,358,604,307	₱7,358,604,307
Additional Paid-in Capital	12,588,894,332	12,588,894,332
	₱19,947,498,639	₱19,947,498,639

On May 25, 2007, the Company listed with the Philippine Stocks Exchange its 7,187,664,000 common shares with a par value of ₱1.00 to cover the initial public offering (IPO) of 1,787,664,000 common shares at an issue price of ₱5.80 per share. On March 17, 2008, the Company listed an additional 170,940,307 common shares, which it issued pursuant to a share swap agreement at the IPO price of ₱5.80 per share. The total proceeds from the issuance of new shares amounted to ₱10.37 billion. The Company incurred transaction costs incidental to the initial public offering amounting to ₱412.4 million, which is charged against "Additional paid-in capital" in the parent company balance sheet.

As of December 31, 2018, 2017 and 2016, the Company has 629, 629 and 628 shareholders, respectively.

Preferred shares are non-voting, non-participating, non-convertible, redeemable, cumulative, and may be issued from time to time by the BOD in one or more series. The BOD is authorized to issue from time to time before issuance thereof, the number of shares in each series, and all the designations, relative rights, preferences, privileges and limitations of the shares of each series. Preferred shares redeemed by the Company may be reissued. Holders thereof are entitled to receive dividends payable out of the unrestricted retained earnings of the Company at a rate based on the offer price that is either fixed or floating from the date of the issuance to final redemption. In either case, the rate of dividend, whether fixed or floating, shall be referenced, or be a discount or premium, to market-determined benchmark as the BOD may determine at the time of issuance with due notice to the SEC.

In the event of any liquidation or dissolution or winding up of the Company, the holders of the preferred stock shall be entitled to be paid in full the offer price of their shares before any payment in liquidation is made upon the common stock.

There are no preferred shares issued and outstanding as of December 31, 2018 and 2017.

b. Retained Earnings

On November 24, 2016, the BOD approved additional appropriation of ₱13.16 billion retained earnings for the following projects:

Projects	Full Commercial Operations by	Appropriation
300 MW Cebu Coal	1 st half of 2018	₱8,160,000,000
2x300 MW Coal-fired	End of 4 th quarter 2021	5,000,000,000
Total		₱13,160,000,000

On November 27, 2014, the BOD approved the appropriation of ₱20.90 billion retained earnings for the following projects:

Projects	Full Commercial Operations by	Appropriation
68 MW Manolo Fortich Hydro	End of 4 th quarter 2016	₱2,600,000,000
300 MW Davao Coal	End of 1 st half 2015	9,500,000,000
14 MW Sabangan Hydro	End of 1 st half 2015	2,800,000,000
400 MW Coal Fired Pagbilao Unit3	End of 4 th quarter 2017	6,000,000,000
Total		₱20,900,000,000

On March 8, 2016, the BOD approved the declaration of regular cash dividends of ₱1.20 a share (₱8.83 billion) and special cash dividends of ₱0.46 a share (₱3.38 billion) to all stockholders of record as of March 22, 2016. These dividends were paid on April 19, 2016.

On March 7, 2017, the BOD approved the declaration of regular cash dividends of ₱1.36 per share (₱10.01 billion) to all stockholders of record as of March 21, 2017. These dividends were paid on April 10, 2017.

On March 8, 2018, the BOD approved the declaration of regular cash dividends of ₱1.39 per share (₱10.23 billion) to all stockholders of record as of March 22, 2018. These dividends were paid on April 12, 2018.

To comply with the requirements of Section 43 of the Corporation Code, on March 7, 2019, the BOD approved the declaration of regular cash dividends of ₱1.47 a share (₱10.85 billion) to all stockholders of record as of March 21, 2019. The cash dividends are payable on April 5, 2019.

On March 7, 2019, the BOD also approved the following:

- Appropriation of ₱11.90 billion retained earnings for the equity infusions into GNPower Dinginin Ltd. Co. (GNPD) to fund the construction of GNPD units 1 & 2, which is expected to have full commercial operations by end of 2020.
- Reversal of ₱12.30 billion retained earnings appropriation that was set up in 2014 for the equity requirements of the 300 MW Davao Coal and 14 MW Sabangan Hydro projects.

14. Personnel Costs

	2018	2017	2016
Salaries and wages	P562,610,627	P533,005,712	P454,007,818
Employee benefits	351,449,279	307,935,888	273,559,833
Retirement benefit costs (see Note 15)	41,895,414	49,974,029	58,324,025
	P955,955,320	P890,915,629	P785,891,676

15. Retirement Costs

The Company has a funded, noncontributory, defined benefit pension plan (the "Plan") covering all regular and full-time employees and requiring contributions to be made to separately administered fund. This retirement benefit fund (the "Fund") is in the form of a trust being maintained and managed by AEV, under the supervision of the Board of Trustees (BOT) of the Plan. The BOT, whose members are also officers of AEV, is responsible for the investment of the Fund assets. Taking into account the Plan's objectives, benefit obligations and risk capacity, the BOT periodically defines the investment strategy in the form of a long-term target structure.

The following tables summarize the components of net benefit expense recognized in the parent company statements of income and the funded status and amounts recognized in the parent company balance sheets for the plan.

Net benefit expense (recognized as part of personnel costs):

	2018	2017	2016
Retirement expense to be recognized in the parent company statements of income:			
Current service cost	P42,726,275	P48,922,746	P46,153,534
Net interest cost (income)	(830,861)	1,051,283	12,170,491
	P41,895,414	P49,974,029	P58,324,025

Remeasurement effect to be recognized in other comprehensive income:

	2018	2017	2016
Actuarial gains due to:			
Changes in financial assumptions	P44,542,333	P1,172,525	P-
Actual return excluding amount included in net interest cost	(13,774,100)	9,300,494	20,313,413
Experience adjustments	(4,861,370)	(43,972,045)	-
Changes in demographic assumptions	-	78,205,006	-
	P25,906,863	P44,705,980	P20,313,413

Pension asset

	2018	2017
Fair value of plan assets	P440,263,429	P649,655,975
Present value of obligation	(402,201,925)	(633,459,869)
	P38,061,504	P16,196,106

Changes in the present value of the defined benefit obligation are as follows:

	2018	2017
At January 1	P633,459,869	P570,175,589
Net benefit expense:		
Current service cost	42,726,275	48,922,746
Interest cost	32,496,491	29,021,938
	75,222,766	77,944,684
Benefits paid	(252,616,884)	(1,621,043)
Employee transfers	(14,182,863)	22,366,125
Remeasurements in other comprehensive income:		
Actuarial gain (loss) due to:		
Experience adjustments	4,861,370	43,972,045
Changes in financial assumptions	(44,542,333)	(1,172,525)
Changes in demographic assumptions	-	(78,205,006)
	(39,680,963)	(35,405,486)
At December 31	P402,201,925	P633,459,869

Changes in the fair value of plan assets are as follows:

	2018	2017
At January 1	P649,655,975	P549,521,704
Actual contributions	37,853,949	42,118,040
Interest income included in net interest cost	33,327,352	27,970,655
Benefits paid	(252,616,884)	(1,621,043)
Transfers	(14,182,863)	22,366,125
Actual return excluding amount included in net interest cost	(13,774,100)	9,300,494
At December 31	P440,263,429	P649,655,975

Changes in pension liability recognized in the parent company balance sheets are as follows:

	2018	2017
At January 1	P16,196,106	(P20,653,885)
Actual contributions	37,853,949	42,118,040
Actuarial gain recognized for the year	25,906,863	44,705,980
Retirement expense for the year	(41,895,414)	(49,974,029)
At December 31	P38,061,504	P16,196,106

The fair value of plan assets by each class at the end of the reporting period are as follows:

	2018	2017
Assets:		
Cash and fixed income investments	P-	P235,140,145
Financial assets at FVOCI	278,119,312	-
Equity instruments - financial institution:		
Financial assets at amortized cost	79,558,475	-
Holding	56,066,878	-
Power	49,415,685	-
Financial institution	12,686,517	-
Others	195,487,284	419,347,451
	671,334,151	654,487,596
Liability:		
Financial liability	(231,070,722)	(4,831,620)
Fair value of plan assets	P440,263,429	P649,655,976

All equity instruments held have quoted prices in active market. The remaining plan assets do not have quoted market prices in active market.

The plan assets have diverse investments and do not have any concentration risk.

The principal assumptions used as of December 31, 2018, 2017 and 2016 in determining net pension liability for the Company's Plan is shown below:

	2018	2017	2016
Discount rate	8.18%	5.13%	5.09%
Salary increase rate	7.00%	6.00%	6.00%

The sensitivity analysis below has been determined based on reasonable possible changes of each significant assumption on the defined benefit obligation as of December 31, 2018 and 2017, respectively, assuming all other assumptions were held constant:

	Increase (decrease) in basis points	Effect on defined benefit obligation	
		2018	2017
Discount rates	100	(18,442,461)	(24,886,826)
	(100)	21,068,425	28,579,547
Future salary increases	100	23,118,029	31,793,587
	(100)	(20,609,365)	(28,398,059)

The Company's defined benefit pension plan is funded by the Company.

The Company expects to contribute P31.0 million to the defined benefit plans in 2019. The average duration of the defined benefit obligation as of December 31, 2018 and 2017 is 12.94 years.

The BOT reviews the performance of the plans on a regular basis. It assesses whether the retirement plans will achieve investment returns which, together with contributions, will be sufficient to pay retirement benefits as they fall due. The Company also reviews the solvency position of the different member companies on an annual basis and estimates, through the actuary, the expected contribution to the Plan in the subsequent year.

16. Income Tax

The provision for income tax account consists of:

	2018	2017	2016
Current:			
Final	₱23,267,247	₱18,946,168	₱59,664,111
Corporate income tax	15,959,091	10,440,532	22,262,045
	39,226,338	29,386,700	81,926,156
Deferred	(37,853,440)	7,066,011	(9,298,778)
	₱1,372,898	₱36,452,711	₱72,627,378

The provision for corporate income tax represents MCIT in 2018, 2017 and 2016.

Reconciliation between the statutory income tax rate and the Company's effective income tax rates follows:

	2018	2017	2016
At statutory rate of 30%	₱2,699,004,008	₱2,774,617,928	₱8,024,797,636
Additions to (reductions in)			
income tax resulting from:			
Unrecognized deferred			
income tax asset on:			
NOLCO	181,865,467	125,884,718	-
MCIT	15,959,091	10,440,532	22,262,045
Provision for impairment			
loss of investment in			
subsidiaries	13,779,900	50,840,822	36,219,908
Final tax on interest income	23,267,247	18,946,168	59,664,111
Nondeductible expenses:			
Project and bidding			
expenses	15,336,715	23,051,869	96,972,291
Others	14,363	5,921	3,885,333

(Forward)

	2018	2017	2016
Nondeductible interest expense	₱13,590,499	₱14,607,592	₱32,617,674
Unrealized valuation loss on financial assets at FVTPL	551,819	-	-
Dividend income	(2,920,812,882)	(2,937,677,410)	(8,042,310,774)
Interest income already subjected to final tax at a lower rate	(41,183,329)	(44,265,429)	(98,841,437)
Applied NOLCO	-	-	(62,639,409)
	₱1,372,898	₱36,452,711	₱72,627,378

The components of the Company's net deferred income tax assets (liability) are as follows:

	2018	2017
Deferred income taxes recognized in the parent company statements of income:		
Deferred income tax assets:		
Unamortized past service cost	₱61,464,468	₱73,530,211
Unrealized foreign exchange losses	51,420,259	2,713,515
	112,884,727	76,243,726
Deferred income tax liability on pension liability	(100,784,684)	(101,997,123)
Deferred income tax asset related to remeasurement effects in the parent company statements of comprehensive income	89,366,223	97,138,282
	₱101,466,266	₱71,384,885

As of December 31, 2018, the Company has MCIT that can be claimed as deduction from regular income tax liability as follows:

Period of Recognition	Availment Period	Amount	Applied	Expired	Balance
2015	2016-2018	₱11,707,926	₱-	₱11,707,926	₱-
2016	2017-2019	22,262,045	-	-	22,262,045
2017	2018-2020	10,440,532	-	-	10,440,532
2018	2019-2021	15,959,089	-	-	15,959,089
		₱60,369,592	₱-	₱11,707,926	₱48,661,666

As of December 31, 2018, the Company has NOLCO which can be claimed as deduction against the regular taxable income as follows:

Period of Recognition	Availment Period	Amount	Applied	Expired	Balance
2015	2016-2018	₱290,022,557	₱61,947,637	₱228,074,920	₱-
2017	2018-2020	419,615,728	-	-	419,615,728
2018	2019-2021	606,218,323	-	-	606,218,323
		₱1,315,856,608	₱61,947,637	₱228,074,920	₱1,025,834,051

No deferred income tax assets have been recognized in 2018 and 2017 on the following temporary differences as it is probable that no sufficient taxable income will be available to allow the benefit of the deferred income tax assets to be utilized:

	2018	2017
Provision for impairment loss on investment in subsidiaries	₱1,071,358,480	₱1,025,425,480
NOLCO	1,025,834,051	647,690,648
MCIT	48,661,666	44,410,503

17. Related Party Disclosures

Parties are considered to be related if one party has the ability to control, directly or indirectly, the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Related parties may be individuals or corporate entities.

The sales to and purchases from related parties are made on terms equivalent to those that prevail in arm's length transactions.

The Company, in its normal course of business, has transactions with its related parties, which principally consist of the following:

- a. The Company has management agreements with each of the following subsidiaries: CLPC, Cotabato Ice Plant, Inc. (CIPI), DLPC, and CPPC for which it is entitled to management fees.
- b. The Company renders various services to related parties such as technical and legal assistance for various projects, trainings and other services, for which it bills technical and service fees.
- c. The Company obtained standby letters of credit (SBLC) and is acting as surety for the benefit of certain subsidiaries, associates and joint ventures in connection with certain loans and credit accommodations. As at December 31, 2018, the Company provided SBLCs for AP Renewables, Inc. (APRI), Cebu Energy Development Corporation (CEDC), Luzon Hydro Corporation (LHC), SN Aboitiz Power-Benguet, Inc. (SNAP B), Therma South, STEAG, and TVI in the amount of ₱4.51 billion. As at December 31, 2017, the Company provided SBLCs for APRI, CEDC, LHC, SNAP B, Therma South, STEAG, and TVI in the amount of ₱8.87 billion.
- d. AEV provides human resources, internal audit, legal, treasury and corporate finance services, among others, to the Company and shares with the member companies the business expertise of its highly qualified professionals. Transactions are priced based on agreed rates, and billed costs are always benchmarked to third party rates to ensure competitive pricing. Service Level Agreements are in place to ensure quality of service. This arrangement enables the Company to maximize efficiencies and realize cost synergies.
- e. Cash deposits and money market placements with UBP. At prevailing rates, these fixed-rate investments earned interest income amounting to ₱64.34 million and ₱52.09 million in 2018 and 2017, respectively. Outstanding balances amounted ₱6.11 billion and ₱1.40 billion as of December 31, 2018, and 2017, respectively.

- f. Rentals paid at current market rates to Cebu Praedia Development Corporation (CPDC) for the use of CPDC's properties by the Company's officers and employees.
- g. Aviation service fees paid at arm's length basis to AAI for the use of aircraft during travel of the Company's officers and employees.

The above transactions are expected to be settled in cash.

The parent company balance sheets and parent company statements of income include the following accounts resulting from the above transactions with related parties:

Technical, Management and other Service Fees

	Revenue		Receivable		Terms	Conditions
	2018	2017	2018	2017

The Company obtained interest free temporary advances from TLI amounting to ₱12.3 billion in 2013. This shall be payable either one time or on a staggered basis, or such other receivables as may be due or demandable from TLI. In 2016, the advances were paid in full.

The Company's Fund is in the form of a trust being maintained and managed by AEV under the supervision of the BOT of the plan. In 2018 and 2017, other than contributions to the Fund, no transactions occurred between the Company or any of its subsidiaries and the Fund.

Total compensation and benefits of key management personnel of the Company are as follows:

	2018	2017	2016
Short-term benefits (see Note 15)	₱286,022,170	₱308,010,884	₱254,993,884

	₱299,760,000	₱324,510,000	₱267,030,000

18. Financial Risk Management Objectives and Policies

The Company's principal financial instruments comprise of cash and cash equivalents and long-term debts. The main purpose of these financial instruments is to raise financing for the Company's operations. The Company has various other financial instruments such as trade and other receivables, AFS investment and trade and other payables which arise directly from its operations.

The Company also enters into derivative transactions, particularly foreign currency forwards, to economically hedge its foreign currency risk from foreign currency denominated liabilities and purchases (see Note 19).

Risk Management Structure

The BOD is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Company.

Financial risk committee

The Financial Risk Committee has the overall responsibility for the development of risk strategies, principles, frameworks, policies and limits. It establishes a forum of discussion of the Company's approach to risk issues in order to make relevant decisions.

Treasury service group

The Treasury Service Group is responsible for the comprehensive monitoring, evaluating and analyzing of the Company's risks in line with the policies and limits.

The main risks arising from the Company's financial instruments are credit risk involving possible exposure to counter party default on its cash and cash equivalents, and trade and other receivables; liquidity risk in terms of the proper matching of the type of financing required for specific investments; and foreign exchange risk in terms of foreign exchange fluctuations that may significantly affect its foreign currency denominated placements.

Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company.

The Company's credit risk on cash in banks and cash equivalents and trade and other receivables pertains to possible default by the counterparty, with a maximum exposure equal to the carrying amount of these assets. With respect to cash in banks and cash equivalents, the risk is mitigated by the short-term and/or liquid nature of its short-term deposits mainly in bank deposits and placements, which are placed with financial institutions of high credit standing. With respect to trade and other receivables, credit risk is controlled by the application of credit approval, limit and monitoring procedures. It is the Company's policy that all debtors who wish to trade on credit terms are subject to credit procedures. In addition, receivable balances are monitored on an ongoing basis with the result that the Company's exposure to bad debts is not significant.

The Company has no significant concentration risk to a counterparty or group of counterparties. The credit quality per class of financial assets as of December 31 is as follows (amounts in thousands):

2018

	Neither past due nor impaired			Past due but not impaired	Total
	High Grade	Standard	Sub-standard		
Cash and cash equivalents*	₱11,874,257	₱-	₱-	₱-	₱11,874,257
Trade and other receivables	660,535	-	-	320,929	981,464
Derivative asset	855	-	-	-	855
Financial assets at FVTPL	97,535	-	-	-	97,535
Total	₱12,633,182	₱-	₱-	₱320,929	₱12,954,111

*Excluding cash on hand

2017

	Neither past due nor impaired			Past due but not impaired	Total
	High Grade	Standard	Sub-standard		
Cash and cash equivalents*	₱7,825,333	₱-	₱-	₱-	₱7,825,333
Trade and other receivables	111,978	-	-	407,668	519,646

Total	₱8,079,196	₱-	₱-	₱407,668	₱8,486,864

*Excluding cash on hand

High grade pertain to receivables from customers with good favorable credit standing and have no history of default.

Standard grade pertain to those customers with history of sliding beyond the credit terms but pay a week after being past due.

Sub-standard grade pertain to those customers with payment habits that normally extend beyond the approved credit terms, and has high probability of being impaired.

The aging analyses of financial assets as of December 31 are as follows (amounts in thousands):

2018

	Total	Neither past due nor impaired	Past due but not impaired

*Excluding cash on hand

Liquidity risk

Liquidity risk is the potential of not meeting obligations as they come due because of an inability to liquidate assets or obtain adequate funding. The Company maintains sufficient cash and cash equivalents to finance its operations. Any excess cash is invested in short-term money market placements. These placements are maintained to meet maturing obligations and pay dividend declarations.

In managing its short-term fund requirements, the Company's policy is to ensure that there are sufficient working capital inflows to match repayments of short-term borrowings. With regard to its long-term financing requirements, the Company's policy is that not more than 25% of long-term borrowings should mature in any 12-month period.

The following tables summarize the maturity profile of the Company's financial liabilities based on contractual undiscounted payments as of December 31 (amounts in thousands):

2018

	Total Carrying Value	Contractual undiscounted payments				
		Total	On Demand	Less than 1 year	1 to 5 years	More than 5 years
Financial liabilities:						
Trade and other payables*	₱298,774	₱298,774	₱-	₱298,774	₱-	₱-
Bank loans	4,700,000	4,700,000	-	4,700,000	-	-
Long-term debts	22,997,821	31,438,550	-	1,292,049	19,829,593	10,316,908
Total	₱27,996,595	₱36,437,324	₱-	₱6,290,823	₱19,829,593	₱10,316,908

*Excluding output VAT, withholding tax and other statutory liabilities

2017

	Total Carrying Value	Contractual undiscounted payments				
		Total	On Demand	Less than 1 year	1 to 5 years	More than 5 years
<i>Financial liabilities:</i>						
Trade and other payables*	₱167,804	₱167,804	₱-	₱167,804	₱-	₱-
Long-term debts	12,901,982	17,706,453	-	711,031	9,384,396	7,611,026
Total	₱13,069,786	₱17,874,257	₱-	₱878,835	₱9,384,396	₱7,611,026

*Excluding output VAT, withholding tax and other statutory liabilities

Market Risk

The risk of loss, immediate or over time, due to adverse fluctuations in the price or market value of instruments, products, and transactions in the Company's overall portfolio (whether on or off-balance sheet) is market risk. These are influenced by foreign and domestic interest rates, foreign exchange rates and gross domestic product growth.

Foreign exchange risk

The foreign exchange risk of the Company pertains to its foreign currency-denominated cash and cash equivalents.

	2018		2017	
	US Dollar	Philippine Peso equivalent	US Dollar	Philippine Peso equivalent
<i>Financial asset:</i>				
Cash and cash equivalents	\$214,821,624	₱11,295,320,990	\$40,158,320	₱2,005,104,918

The exchange rate for December 31, 2018 and 2017 is ₱52.58:US\$1 and ₱49.93:US\$1, respectively. As a result of the translation of these foreign currency denominated assets, the Company reported net unrealized foreign exchange loss of ₱162.4 million and ₱8.8 million in 2018 and 2017, respectively.

The following tables demonstrate the sensitivity to a reasonable possible change in the US dollar exchange rates, with all other variables held constant, of the Company's income before income tax as of December 31, 2018 and 2017 (amounts in thousands).

	Increase (decrease) in US dollar	Effect on income before tax
2018		
US dollar-denominated accounts	5%	₱564,766
US dollar-denominated accounts	(5%)	(564,766)
2017		
US dollar-denominated accounts	5%	₱100,255
US dollar-denominated accounts	(5%)	(100,255)

There is no other impact on the Company's equity other than those already affecting the parent company statements of income.

Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Company considers equity as its capital.

The Company manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. Its policy is to keep the gearing ratio at 70% or below. The Company determines net debt as the sum of interest-bearing short-term and long-term loans less cash and short-term deposits.

	2018	2017
Bank loans	P4,700,000,000	P-
Long-term debts	22,997,821,292	12,901,981,643
Cash and cash equivalents	(11,875,188,311)	(7,826,169,148)
Net debt (a)	15,822,632,981	5,075,812,495
Equity	75,457,414,289	76,672,432,343
Equity and net debt (b)	P91,280,047,270	P81,748,244,838
Gearing ratio (a/b)	17.33%	6.21%

Part of the Company's capital management is to ensure that it meets financial covenants attached to long-term borrowings. Breaches in meeting the financial covenants would permit the banks to immediately call loans and borrowings. The Company is in compliance with the financial covenants attached to its long-term debts as of December 31, 2018 and 2017 (see Note 12).

No changes were made in the objectives, policies or processes during the years ended December 31, 2018 and 2017.

19. Financial Instruments

Fair Value of Financial Instruments

Fair value is defined as the amount at which the financial instrument could be sold in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

A financial instrument is regarded as quoted in an active market if quoted prices are readily available from an exchange, dealer, broker, pricing services or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. For a financial instrument with an active market, the quoted market price is used as its fair value. On the other hand, if transactions are no longer regularly occurring even if prices might be available and the only observed transactions are forced transactions or distressed sales, then the market is considered inactive. For a financial instrument with no active market, its fair value is determined using a valuation technique (e.g. discounted cash flow approach) that incorporates all factors that market participants would consider in setting a price (amounts in thousands).

Set out below is a comparison by category of carrying amounts and fair values of the Company's financial instruments whose fair values are different from their carrying amounts.

	2018		2017	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial Liability:				
Long-term debts	₱22,997,821	₱20,671,106	₱12,901,982	₱12,389,478

The following method and assumption are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, trade and other receivables, trade and other payables and bank loans

The carrying amounts of cash and cash equivalents, trade and other receivables and trade and other payables approximate fair values due to the relatively short-term maturity of these financial instruments.

AFS investments in 2017

These are carried at cost less impairment because fair value cannot be determined reliably due to the unpredictable nature of cash flows and lack of suitable methods of arriving at reliable fair value.

Financial assets at FVTPL in 2018

These equity securities are carried at fair value.

Long-term debts

The fair value of long-term debt is based on the discounted value of future cash flows using the applicable rates for similar types of loans. Discount rates used range from 8.45% to 8.56% in 2018 and 6.23% to 7.13% in 2017.

Derivative Financial Instruments

The Company enters into short-term forward contracts with counterparty banks to manage foreign currency risks associated with foreign currency-denominated liabilities and purchases.

The aggregate notional amount of the par forward contract is US\$50.0 million (₱2.63 billion) and US\$39.0 million (₱1.95 billion) as of December 31, 2018 and 2017, respectively.

The Company recognized a loss from the net fair value changes relating to the forward contracts amounting to ₱11.5 million in 2018 and a gain of ₱31.0 million in 2017 under the "Foreign exchange gain" in the parent company statements of income.

Fair Value Hierarchy

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and
- Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

For the years ended December 31, 2018 and 2017, there were no transfers between Level 1 and Level 2 fair value measurements, and no transfers into and out of Level 3 fair value measurements were made.

20. Electric Power Industry Reform Act (EPIRA) of 2001

RA No. 9136 was signed into law on June 8, 2001 and took effect on June 26, 2001. The law provides for the privatization of National Power Corporation (NPC) and the restructuring of the electric power industry. The Implementing Rules and Regulations (IRR) were approved by the Joint Congressional Power Commission on February 27, 2002.

R.A. No. 9136 and the IRR impact the industry as a whole. The law also empowers the ERC to enforce rules to encourage competition and penalize anti-competitive behavior.

R.A. Act No. 9136, the EPIRA, and the covering IRR provides for significant changes in the power sector, which include among others:

- i. The unbundling of the generation, transmission, distribution and supply and other disposable assets of a company, including its contracts with independent power producers and electricity rates;
- ii. Creation of a Wholesale Electricity Spot Market; and
- iii. Open and non-discriminatory access to transmission and distribution systems.

The law also requires public listing of not less than 15% of common shares of generation and distribution companies within 5 years from the effectivity date of the EPIRA. It provides cross ownership restrictions between transmission and generation companies and a cap of 50% of its demand that a distribution utility is allowed to source from an associated company engaged in generation except for contracts entered into prior to the effectivity of the EPIRA.

There are also certain sections of the EPIRA, specifically relating to generation companies, which provide for a cap on the concentration of ownership to only 30% of the installed capacity of the grid and/or 25% of the national installed generating capacity.

21. Note to Statements of Cash Flows

The following are the cash flow movements of the Company's financing liabilities in 2018 and 2017:

	January 1, 2018	Net cash flows	Non-cash Changes			December 31, 2018
			Amortized deferred financing costs	Interest expense	Others	
Current interest-bearing loans and borrowings, excluding obligations under finance leases	P=	P4,700,000,000	P=	P=	P=	P4,700,000,000
Non-current interest-bearing loans and borrowings	12,901,981,643	10,078,075,748	17,763,901	-	-	22,997,821,292
Interest on loans and borrowings	66,285,228	(878,938,176)	-	999,180,246	25,653,602	212,180,900
Total liabilities from financing activities	P12,968,266,871	P13,899,137,572	P17,763,901	P999,180,246	P25,653,602	P27,910,002,192

	January 1, 2017	Net cash flows	Non-cash Changes			December 31, 2017
			Amortized deferred financing costs	Interest expense	Others	
Non-current interest-bearing loans and borrowings	₱9,922,153,365	₱2,967,061,942	₱12,766,336	₱-	₱-	₱12,901,981,643
Interest on loans and borrowings	28,287,924	(699,256,650)	-	630,535,775	106,718,179	66,285,228
Total liabilities from financing activities	₱9,950,441,289	₱2,267,805,292	₱12,766,336	₱630,535,775	₱106,718,179	₱12,968,266,871

22. Supplementary Information Required Under Revenue Regulations (RR) 15-2010

The Company also reported and/or paid the following types of taxes for the year:

VAT

The Company's sales are subject to output value added tax (VAT) while its importations and purchases from other VAT-registered individuals or corporations are subject to input VAT. The VAT rate is 12.0%.

a. Net Receipts and Output VAT declared in the Company's VAT returns in 2018

	Net Sales/ Receipts	Output VAT
Taxable Sale:		
Sales of services	₱14,412,016,156	₱172,944,739

The Company's sales that are subject to VAT are reported under the following accounts:

- Service Income - Management fees
- Service Income - Professional fees
- Service Income - Technical fees
- Miscellaneous Income - Operating
- Miscellaneous Income - Non-operating

The Company's sales of services are based on actual collections received, hence, may not be the same as amounts accrued in the parent company statement of income.

STATEMENT OF MANAGEMENT'S RESPONSIBILITY
FOR FINANCIAL STATEMENTS

The management of Aboitiz Power Corporation is responsible for the preparation and fair presentation of the Parent financial statements including the schedules attached therein, for the years ended December 31, 2019, 2018 and 2017, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

The Board of Directors reviews and approves the financial statements including the schedules attached therein, and submits the same to the stockholders.

SyCip Gorres Velayo & Co., the independent auditor appointed by the stockholders, has audited the financial statements of the Company in accordance with Philippine Standards on Auditing, and its report to the stockholders, has expressed its opinion on the fairness of presentation upon completion of such audit.

Report on the Audit of the Parent Company Financial Statements

Opinion

We have audited the parent company financial statements of Aboitiz Power Corporation (the Company), which comprise the parent company balance sheets as at December 31, 2019 and 2018, and the parent company statements of income, parent company statements of comprehensive income, parent company statements of changes in equity and parent company statements of cash flows for each of the three years in the period ended December 31, 2019, and notes to the parent company financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying parent company financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2019 and 2018, and its financial performance and its cash flows for each of the three years in the period ended December 31, 2019 in accordance with Philippine Financial Reporting Standards (PFRSs).

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Parent Company Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the parent company financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Parent Company Financial Statements

Management is responsible for the preparation and fair presentation of the parent company financial statements in accordance with PFRSs, and for such internal control as management determines is necessary to enable the preparation of parent company financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Parent Company Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent company financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the parent company financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the parent company financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the parent company financial statements, including the disclosures, and whether the parent company financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on the Supplementary Information Required Under Revenue Regulations 15-2010

Our audits were conducted for the purpose of forming an opinion on the parent company financial statements taken as a whole. The supplementary information required under Revenue Regulations 15-2010 in Note 22 to the parent company financial statements is presented for purposes of filing with the Bureau of Internal Revenue and is not a required part of the basic financial statements. Such information is the responsibility of the management of the Company. The information has been subjected to the auditing procedures applied in our audit of the parent company financial statements. In our opinion, the information is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

The engagement partner on the audit resulting in this independent auditor's report is Maria Veronica Andresa R. Pore

See accompanying Notes to Parent Company Financial Statements

ABOITIZ POWER CORPORATION

NOTES TO PARENT COMPANY FINANCIAL STATEMENTS

1. Corporate Information

Aboitiz Power Corporation (the Company) was incorporated in the Philippines and registered with the Securities and Exchange Commission on February 13, 1998. The Company is a publicly-listed holding company of the entities engaged in power generation and power distribution in the Aboitiz Group. As of December 31, 2019, Aboitiz Equity Ventures, Inc. (AEV, a publicly-listed Company incorporated in the Philippines) owns 76.98% of the Company. The Company's ultimate parent is Aboitiz & Company, Inc. (ACO).

The Company's registered office address is 32nd Street, Bonifacio Global City, Taguig City, Metro Manila.

The parent company financial statements were approved and authorized for issue in accordance with a resolution by the Board of Directors (BOD) of the Company on March 6, 2020.

2. Basis of Preparation, Statement of Compliance and Summary of Significant Accounting Policies

Basis of Financial Statement Preparation

The accompanying parent company financial statements have been prepared on a historical cost basis, except for derivative financial instruments and financial assets at FVTPL which are measured at fair value. The parent company financial statements are presented in Philippine peso which is the Company's functional currency.

Statement of Compliance

The parent company financial statements are prepared in compliance with Philippine Financial Reporting Standards (PFRSs).

Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year, except for the new and revised standards and Philippine Interpretations which were applied starting January 1, 2019. The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

• *PFRS 16, Leases*

PFRS 16 was issued in January 2016 and it replaces Philippine Accounting Standard (PAS) 17, *Leases*, IFRIC 4, *Determining whether an Arrangement contains a Lease*, SIC-15, *Operating Leases-Incentives* and SIC-27, *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*. PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under PAS 17.

Lessor accounting under PFRS 16 is substantially unchanged from PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases. Therefore, PFRS 16 did not have an impact for leases where the Company is the lessor.

The Company adopted PFRS 16 using the modified retrospective method of adoption with the date of initial application of January 1, 2019. Under this method, the standard is applied retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application without restating comparative information. The Company has elected to apply PFRS 16 transition relief to contracts that were previously identified as leases applying PAS 17 and IFRIC 4. The Company will therefore not apply PFRS 16 to contracts that were not previously identified as containing a lease applying PAS 17 and IFRIC 4.

The Company has elected to use the exemption proposed by the standard on the lease contracts for which the lease terms end within 12 months from the date of initial application. Lease payments on short term leases are recognized as expense on a straight-line basis over the lease term.

The effects of adoption on the financial statements are as follows:

	As at January 1, 2019
Increase (decrease) in balance sheets:	
Other current assets	(₱5,021,619)
Property and, plant and equipment	46,702,778
Total Assets	₱41,681,159
Lease liabilities	₱64,347,091
Retained earnings	(22,665,932)
Total Liabilities and Equity	₱41,681,159

Based on the above, as at January 1, 2019:

- Property and equipment were recognized amounting to ₱46.7 million representing the amount of right-of-use assets set up on transition date.
- Additional lease liabilities of ₱64.4 million were recognized.
- Prepayments of ₱5.0 million related to previous operating leases were derecognized.
- The net effect of these adjustments had been adjusted to retained earnings amounting to ₱22.7 million.

Prior to adoption of PFRS 16, the Company classified each of its leases (as lessee) at the inception dates as either a finance lease or an operating lease. A lease was classified as a finance lease if it transferred substantially all of the risks and rewards incidental to ownership of the lease asset to the Company; otherwise it was classified as an operating lease. Finance leases were capitalized at the commencement of the lease at the inception date fair value of the lease property or, if lower, at the present value of the minimum lease payments. Lease payments were apportioned between interest (recognized as finance costs) and reduction of the lease liability. In an operating lease, the leased property was not capitalized and the lease payment

were recognized as rent expense in the statements of comprehensive income on a straight-line basis over the lease term. Any prepaid rent was recognized under "Other current assets."

Upon adoption of PFRS 16, the Company applied a single recognition and measurement approach for all leases, except for short-term leases. The standard provides specific transition requirements and practical expedients, which have been applied by the Company.

Leases previously accounted for as operating leases

The Company recognized right-of-use assets and lease liabilities for those leases previously classified as operating leases, except for short-term leases. The right-of-use assets for most leases were recognized based on the carrying amount as if the standard had always been applied, apart from the use of incremental borrowing rate at the date of initial application. Lease liabilities were recognized based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application.

The Company also applied the following practical expedients provided by the standard:

- Use of a single discount rate to a portfolio of leases with reasonably similar characteristics, and
- Apply the short-term leases exemptions to leases with lease term that ends within 12 months of the date of initial application (short-term leases).

The lease liabilities as at January 1, 2019 can be reconciled to the operating lease commitments as of December 31, 2018 as follows:

Operating lease commitments as at December 31, 2018	₱77,469,182
Incremental borrowing rate as at January 1, 2019	8.52%
<u>Lease liabilities as at January 1, 2019</u>	<u>₱64,347,091</u>

- Amendments to PFRS 9, *Prepayment Features with Negative Compensation*

Under PFRS 9, a debt instrument can be measured at amortized cost or at fair value through other comprehensive income, provided that the contractual cash flows are 'solely payments of principal and interest on the principal amount outstanding' (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to PFRS 9 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract.

This amendment does not have an impact on the financial statements.

- Amendments to PAS 19, *Employee Benefits, Plan Amendment, Curtailment or Settlement*

The amendments to PAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event
- Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognized in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognized in other comprehensive income.

Since the Company's current practice is in line with these amendments, these amendments do not have any effect on its financial statements.

- Amendments to PAS 28, *Long-term Interests in Associates and Joint Ventures*

The amendments clarify that an entity applies PFRS 9 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). This clarification is relevant because it implies that the expected credit loss model in PFRS 9 applies to such long-term interests. The amendments also clarified that, in applying PFRS 9, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognized as adjustments to the net investment in the associate or joint venture that arise from applying PAS 28, *Investments in Associates and Joint Ventures*.

Since the Company does not have such long-term interests in associates and joint ventures, the amendments do not have an impact on its financial statements.

- Philippine Interpretation IFRIC-23, *Uncertainty over Income Tax Treatments*

The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12, *Income Taxes*, and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

The entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments and use the approach that better predicts the resolution of the uncertainty. The entity shall assume that the taxation authority will examine amounts that it has a right to examine and have full knowledge of all related information when making those examinations. If an entity concludes that it is not probable that the taxation authority will accept an uncertain tax treatment, it shall reflect the effect of the uncertainty for each uncertain tax treatment using the method the entity expects to better predict the resolution of the uncertainty.

Upon adoption of the Interpretation, the Company has assessed whether it has any uncertain tax position. The Company applies significant judgement in identifying uncertainties over its income tax treatments. The Company determined, based on its assessment, that it is probable that its uncertain tax treatments will be accepted by the taxation authorities. Accordingly, the interpretation did not have an impact on the financial statements.

- *Annual Improvements to PFRSs 2015-2017 Cycle*
 - *Amendments to PFRS 3, Business Combinations, and PFRS 11, Joint Arrangements, Previously Held Interest in a Joint Operation*

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in PFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

These amendments are currently not applicable to the Company but may apply to future transactions.

- Amendments to PAS 12, *Income Tax Consequences of Payments on Financial Instruments Classified as Equity*

The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognizes the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events.

These amendments are not relevant to the Company because dividends declared by the Company do not give rise to tax obligations under the current tax laws.

- Amendments to PAS 23, *Borrowing Costs, Borrowing Costs Eligible for Capitalization*

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments.

Since the Company's current practice is in line with these amendments, these amendments do not have any effect on its financial statements.

New Standards and Interpretation Issued and Effective after December 31, 2019

The Company will adopt the standards enumerated below when these become effective. Except as otherwise indicated, the Company does not expect the adoption of these new and amended PFRSs, PAS and Philippine Interpretations to have significant impact on its financial statements.

Effective beginning on or after January 1, 2020

- Amendments to PFRS 3, *Definition of a Business*

The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

These amendments will apply on future business combinations of the Company.

- Amendments to PAS 1, *Presentation of Financial Statements*, and PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material*

The amendments refine the definition of material in PAS 1 and align the definitions used across PFRSs and other pronouncements. They are intended to improve the understanding of the existing requirements rather than to significantly impact an entity's materiality judgements.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

Effective beginning on or after January 1, 2021

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

PFRS 17 is effective for reporting periods beginning on or after January 1, 2021, with comparative figures required. Early application is permitted.

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3, *Business Combinations*. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

Summary of Significant Accounting Policies

Current versus Noncurrent Classification

The Company presents assets and liabilities in the parent company balance sheet based on current/noncurrent classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after reporting period

All other assets are classified as noncurrent.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period or
- There is no unconditional right to defer settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as noncurrent.

Deferred income tax assets and liabilities are classified as non-current assets and liabilities.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participants ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the parent company financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the parent company financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Foreign Currency Translation

The Company's financial statements are presented in Philippine Peso, which is the Company's functional currency. Transactions in foreign currencies are recorded using the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are restated using the rate of exchange at balance sheet date. Exchange gains and losses arising from foreign currency transactions and translations of foreign currency denominated monetary assets and liabilities are credited to or charged against current operations. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions

Cash and Cash Equivalents

Cash and cash equivalents in the parent company balance sheet consist of cash on hand and with banks, and short-term, highly liquid investments that are readily convertible to known amounts of cash and subject to insignificant risk of changes in value. They are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

For the purpose of the parent company statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

Financial Instruments - Classification and Measurement in Accordance with PFRS 9 (applicable in 2019 and 2018)

Classification of financial assets

Financial assets are classified in their entirety based on the contractual cash flows characteristics of the financial assets and the Company's business model for managing the financial assets. The Company classifies its financial assets into the following measurement categories:

- financial assets measured at amortized cost
- financial assets measured at fair value through profit or loss
- financial assets measured at fair value through other comprehensive income, where cumulative gains or losses previously recognized are reclassified to profit or loss
- financial assets measured at fair value through other comprehensive income, where cumulative gains or losses previously recognized are not reclassified to profit or loss

Financial assets at amortized cost

A financial asset is measured at amortized cost if (i) it is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and (ii) the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI on the principal amount outstanding. These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at amortized cost using the effective interest method, less any impairment in value. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an integral part of the effective interest method. The amortization is included in 'Interest income' in the statement of income and is calculated by applying the effective interest method to the gross carrying amount of the financial asset, except for (i) purchased or originated credit-impaired financial assets and (ii) financial assets that have subsequently become credit-impaired, where, in both cases, the effective interest method is applied to the amortized cost of the financial asset. Losses arising from impairment are recognized in 'Provision for credit and impairment losses' in the parent company statement of income.

The Company's financial assets at amortized cost as of December 31, 2019 and 2018 consist of cash in banks, cash equivalents and trade and other receivables (see Note 18). The Company assessed that the contractual cash flows of these financial assets are SPPI and are expected to be held to collect all contractual cash flows until their maturity. As a result, the Company concluded these financial assets are to be measured at amortized cost.

Financial assets at Fair Value through Other Comprehensive Income (FVOCI)

A financial asset is measured at FVOCI if (i) it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and (ii) its contractual terms give rise on specified dates to cash flows that are SPPI on the principal amount outstanding. These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income within a separate component of equity. Impairment losses or reversals, interest income and foreign exchange gains and losses are recognized in profit and loss until the financial asset is derecognized. Upon derecognition, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss. This reflects the gain or loss that would have been recognized in profit or loss upon derecognition if the financial

asset had been measured at amortized cost. Impairment is measured based on the expected credit loss (ECL) model.

The Company may also make an irrevocable election to measure at FVOCI on initial recognition investments in equity instruments that are neither held for trading nor contingent consideration recognized in a business combination in accordance with PFRS 3. Amounts recognized in OCI are not subsequently transferred to profit or loss. However, the Company may transfer the cumulative gain or loss within equity. Dividends on such investments are recognized in profit or loss, unless the dividend clearly represents a recovery of part of the cost of the investment.

Dividends are recognized in profit or loss only when:

- the Company's right to receive payment of the dividend is established
- it is probable that the economic benefits associated with the dividend will flow to the Company; and
- the amount of the dividend can be measured reliably.

The Company does not have any financial asset at FVOCI as of December 31, 2019 and 2018.

Financial assets at Fair Value through Profit or Loss (FVTPL)

Financial assets at FVTPL are measured as at unless these are measured at amortized cost or at FVOCI. Included in this classification are equity investments held for trading and debt instruments with contractual terms that do not represent SPPI. Financial assets held at FVTPL are initially recognized at fair value, with transaction costs recognized in the parent company statement of income as incurred. Subsequently, they are measured at fair value and any gains or losses are recognized in the parent company statement of income.

Additionally, even if the asset meets the amortized cost or the FVOCI criteria, the Company may choose at initial recognition to designate the financial asset at FVTPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) that would otherwise arise from measuring financial assets on a different basis.

Trading gains or losses are calculated based on the results arising from trading activities of the Company, including all gains and losses from changes in fair value for financial assets and financial liabilities at FVTPL, and the gains or losses from disposal of financial investments.

The Company's investments in unquoted equity shares are measured at FVTPL as of December 31, 2018 (see Note 18).

Classification of financial liabilities

Financial liabilities are measured at amortized cost, except for the following:

- financial liabilities measured at fair value through profit or loss;
- financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the Company retains continuing involvement;
- financial guarantee contracts;
- commitments to provide a loan at a below-market interest rate; and
- contingent consideration recognized by an acquirer in accordance with PFRS 3.

A financial liability may be designated at fair value through profit or loss if it eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) or:

- if a host contract contains one or more embedded derivatives; or
- if a Company of financial liabilities or financial assets and liabilities is managed and its performance evaluated on a fair value basis in accordance with a documented risk management or investment strategy.

Where a financial liability is designated at fair value through profit or loss, the movement in fair value attributable to changes in the Company's own credit quality is calculated by determining the changes in credit spreads above observable market interest rates and is presented separately in other comprehensive income.

The Company's financial liabilities measured at amortized cost which comprise of trade and other payables, bank loans, long-term debts and lease liability (see Note 18).

Reclassifications of financial instruments

The Company reclassifies its financial assets when, and only when, there is a change in the business model for managing the financial assets. Reclassifications shall be applied prospectively by the Company and any previously recognized gains, losses or interest shall not be restated. The Company does not reclassify its financial liabilities.

The Company does not reclassify its financial assets when:

- A financial asset that was previously a designated and effective hedging instrument in a cash flow hedge or net investment hedge no longer qualifies as such;
- A financial asset becomes a designated and effective hedging instrument in a cash flow hedge or net investment hedge; and
- There is a change in measurement on credit exposures measured at fair value through profit or loss.

Financial Instruments - Initial Recognition and Subsequent Measurement in Accordance with PAS 39 (applicable in 2017)

Date of recognition

The Company recognizes a financial asset or a financial liability in the parent company balance sheet on the date when it becomes a party to the contractual provisions of the instrument. All regular way purchases and sales of financial assets are recognized on trade date, which is the date that the Company commits to purchase the asset. Regular way purchases or sales of financial assets are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace. Derivatives are recognized on a trade date basis.

Initial recognition of financial instruments

All financial assets and financial liabilities are recognized initially at fair value. Except for financial assets at fair value through profit or loss (FVPL), the initial measurement of financial assets includes transaction costs. The Company classifies its financial assets in the following categories: financial assets at FVPL, loans and receivables, held-to-maturity (HTM) investments and AFS investments. For financial liabilities, the Company also classifies them into financial liabilities at FVPL and other financial liabilities. The classification depends on the purpose for which the investments were

acquired and whether they are quoted in an active market. The Company determines the classification of its financial assets at initial recognition and, where allowed and appropriate, re-evaluates such designation at every balance sheet date.

'Day 1' difference

Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Company recognizes the difference between the transaction price and fair value (a 'Day 1' difference) in the parent company statement of income unless it qualifies for recognition as some other type of asset. In cases where use is made of data which is not observable, the difference between the transaction price and model value is only recognized in the parent company statement of income when the inputs become observable or when the instrument is derecognized. For each transaction, the Company determines the appropriate method of recognizing the 'Day 1' difference amount.

(a) Financial assets or financial liabilities at FVPL

Financial assets and liabilities at FVPL include financial assets and liabilities held for trading purposes and financial assets and liabilities designated upon initial recognition as at FVPL. Financial assets and liabilities are classified as held for trading if they are acquired for the purpose of selling and repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated and considered as hedging instruments in an effective hedge.

Financial assets and liabilities may be designated at initial recognition as at FVPL if the following criteria are met: (i) the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities, or recognizing gains or losses on them on a different basis; (ii) the assets and liabilities are part of a group of financial assets, liabilities or both, which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk managing strategy; or (iii) the financial instruments contains an embedded derivative that would need to be recorded separately, unless the embedded derivative does not significantly modify the cash flow or it is clear, with little or no analysis, that it would not be separately recorded.

Where a contract contains one or more embedded derivatives, the entire hybrid contract may be designated as financial asset or financial liability at FVPL, except where the embedded derivative does not significantly modify the cash flows or it is clear that separation of the embedded derivative is prohibited.

Financial assets and liabilities at FVPL are recorded at the parent company balance sheet at fair value. Subsequent changes in fair value are recognized in the parent company statement of income. Interest earned or incurred is recorded as interest income or expense, respectively, while dividend income is recorded as other income when the right to receive payments has been established.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These are not entered into with the intention of immediate or short-term resale and are not classified or designated as AFS investments or financial assets at FVPL. Loans and receivables are carried at amortized cost less allowance for

impairment. Amortization is determined using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are integral to the effective interest rate. Gains and losses are recognized in the parent company statement of income when the loans and receivables are derecognized or impaired, as well as through the amortization process.

(c) HTM investments

HTM investments are quoted non-derivative financial assets which carry fixed or determinable payments and fixed maturities and which the Parent has the positive intention and ability to hold to maturity. After initial measurement, HTM investments are measured at amortized cost using the effective interest method. This method uses an effective interest rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are integral to the effective interest rate. Where the Parent sells other than an insignificant amount of HTM investments, the entire category would be tainted and would have to be reclassified as AFS investments. Gains and losses are recognized in the parent company statement of income when the investments are derecognized or impaired, as well as through the amortization process.

(d) AFS investments

AFS investments are non-derivative financial assets that are either designated as AFS or not classified in any of the other categories. They are purchased and held indefinitely, and may be sold in response to liquidity requirements or changes in market conditions. Quoted AFS investments are measured at fair value with gains or losses being recognized as other comprehensive income, until the investments are derecognized or until the investments are determined to be impaired at which time, the accumulated gains or losses previously reported in other comprehensive income are included in the parent company statement of income. Unquoted AFS investments are carried at cost, net of impairment. Interest earned or paid on the investments is reported as interest income or expense using the effective interest rate. Dividends earned on investments are recognized in the parent company statement of income when the right of payment has been established.

(e) Other financial liabilities

This category pertains to issued financial liabilities or their components that are neither held for trading nor designated as at FVPL upon the inception of the liability and contain contractual obligations to deliver cash or another financial asset to the holder or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares. The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

Other financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable financing costs. Deferred financing costs are amortized, using the effective interest rate method, over the term of the related long-term liability. After initial recognition, interest-bearing loans and other borrowings are subsequently measured at amortized cost using the effective interest rate method.

Gains and losses are recognized in the parent company statement of income when liabilities are derecognized, as well as through amortization process.

Derivative financial instruments

Initial recognition and subsequent measurement

Derivative financial instruments, including embedded derivatives, are initially recognized at fair value on the date in which a derivative transaction is entered into or bifurcated, and are subsequently remeasured at FVTPL, unless designated as effective hedge. Changes in fair value of derivative instruments not accounted as hedges are recognized immediately in the consolidated statement of income. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

The Company assesses whether embedded derivatives are required to be separated from host contracts when the Company first becomes party to the contract. An embedded derivative is separated from the host financial or non-financial contract and accounted for as a separate derivative if all of the following conditions are met:

- the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics of the host contract;
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- the hybrid or combined instrument is not recognized as at FVPL.

Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

Embedded derivatives that are bifurcated from the host contracts are accounted for either as financial assets or financial liabilities at FVPL. The Company uses derivative financial instruments, such as short-term forward contracts and interest rate swaps (IRS) to hedge its foreign currency risks and interest rate risk, respectively.

For the purpose of hedge accounting, the Company's hedge are classified as cash flow hedges. Hedges are classified as cash flow hedge when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognized firm commitment.

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

Under PAS 39, the documentation includes identification of the hedging instrument, the hedge item or transaction, the nature of the risk being hedged and how the Company will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting period for which they were designated.

Under PFRS 9, the documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Company will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Company actually hedges and the quantity of the hedging instrument that the Company actually uses to hedge that quantity of hedged item.

The Company's hedges that meet all the qualifying criteria for hedge accounting are accounted for, as described below:

Cash flow hedge

The effective portion of the gain or loss on the hedging instrument is recognized in the cash flow hedge reserve, while any ineffective portion is recognized immediately in the parent company statement of income. The cash flow hedge reserve is adjusted to the lower of the cumulative gain or loss on the hedging instrument and the cumulative change in fair value of the hedged item.

The Company uses IRS contracts to manage its floating interest rate exposure on its loans. The ineffective portion relating to these contracts are recognized in other operating income or expenses as realized gain or loss on derivative instruments.

The Company designated its IRS as hedging instrument. The amounts accumulated in other comprehensive income are accounted for, depending on the nature of the underlying hedged transaction. If the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is removed from the separate component of equity and included in the initial cost or other carrying amount of the hedged asset or liability. This is not a reclassification adjustment and will not be recognized in other comprehensive income for the period. This also applies where the hedged forecast transaction of a non-financial asset or non-financial liability subsequently becomes a firm commitment for which fair value hedge accounting is applied.

For any other cash flow hedges, the amount accumulated in other comprehensive income is reclassified to profit or loss as a reclassification adjustment in the same period or periods during which the hedged cash flows affect profit or loss.

If cash flow hedge accounting is discontinued, the amount that has been accumulated in other comprehensive must remain in accumulated other comprehensive income if the hedged future cash flows are still expected to occur. Otherwise, the amount will be immediately reclassified to profit or loss as a reclassification adjustment. After discontinuation, once the hedged cash flow occurs, any amount remaining in accumulated other comprehensive must be accounted for depending on the nature of the underlying transaction as described above.

As of December 31, 2019 and 2018, the Company has derivative assets classified as financial asset at FVTPL (see Note 19).

Derecognition of Financial Assets and Liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a Company of similar financial assets) is derecognized when, and only when:

- the rights to receive cash flows from the asset expires;
- the Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the Company has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company retains the contractual rights to receive the cash flows of a financial asset but assumes a contractual obligation to pay those cash flows to one or more entities, the Company treats the transaction as a transfer of a financial asset if the Company:

- has no obligation to pay amounts to the eventual recipients unless it collects equivalent amounts from the original asset;
- is prohibited by the terms of the transfer contract from selling or pledging the original asset other than as security to the eventual recipients for the obligation to pay them cash flows; and
- has an obligation to remit any cash flows it collects on behalf of the eventual recipients without material delay.

In transactions where the Company neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset and it retains control over the financial asset, the financial asset is recognized to the extent of the Company's continuing involvement in the financial asset. The extent of the Company's continuing involvement in the transferred asset is the extent to which it is exposed to changes in the value of the transferred asset. When the Company's continuing involvement takes the form of guaranteeing the transferred asset, the extent of the Company's continuing involvement is the lower of (i) the amount of the asset and (ii) the maximum amount of the consideration received that the Company could be required to repay ('the guarantee amount'). When the Company's continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the extent of the Company's continuing involvement is the amount of the transferred asset that the Company may repurchase. However, in the case of a written put option on an asset that is measured at fair value, the extent of the Company's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price. When the Company's continuing involvement takes the form of a cash-settled option or similar provision on the transferred asset, the extent of the Company's continuing involvement is measured in the same way as that which results from non-cash settled options.

Modification of contractual cash flows

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset, the Company recalculates the gross carrying amount of the financial asset as the present value of the renegotiated or modified contractual cash flows discounted at the original effective interest method

(or credit-adjusted effective interest method for purchased or originated credit-impaired financial assets) and recognizes a modification gain or loss in the parent company statement of income.

When the modification of a financial asset results in the derecognition of the existing financial asset and the subsequent recognition of the modified financial asset, the modified asset is considered a 'new' financial asset. Accordingly, the date of the modification shall be treated as the date of initial recognition of that financial asset when applying the impairment requirements to the modified financial asset.

Financial liabilities

A financial liability (or a part of a financial liability) is derecognized when the obligation under the liability is discharged, cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability or a part of it are substantially modified, such an exchange or modification is treated as a derecognition of the original financial liability and the recognition of a new financial liability, and the difference in the respective carrying amounts is recognized in the parent company statement of income.

Impairment of Financial Assets in Accordance with PFRS 9 (applicable in 2019 and 2018)

PFRS 9 introduces the single, forward-looking "expected loss" impairment model, replacing the "incurred loss" impairment model under PAS 39.

The Company recognizes expected credit losses (ECL) for the following financial assets that are not measured at FVTPL:

- debt instruments that are measured at amortized cost and FVOCI;
- loan commitments; and
- financial guarantee contracts.

ECLs are measured in a way that reflects the following:

- an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and
- reasonable and supportable information that is available without undue cost or effort at the balance sheet date about past events, current conditions and forecasts of future economic conditions.

Financial assets migrate through the following three stages based on the change in credit quality since initial recognition:

Stage 1: 12-month ECL

For credit exposures where there have not been significant increases in credit risk since initial recognition and that are not credit-impaired upon origination, the portion of lifetime ECLs that represent the ECLs that result from default events that are possible within the 12-months after the balance sheet date are recognized.

Stage 2: Lifetime ECL - not credit-impaired

For credit exposures where there have been significant increases in credit risk since initial recognition on an individual or collective basis but are not credit-impaired, lifetime ECLs representing the ECLs that result from all possible default events over the expected life of the financial asset are recognized.

Stage 3: Lifetime ECL - credit-impaired

Financial assets are credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of those financial assets have occurred. For these credit exposures, lifetime ECLs are recognized and interest revenue is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset.

A financial asset is considered to have low credit risk if:

- the financial instrument has a low risk of default
- the borrower has a strong capacity to meet its contractual cash flow obligations in the near term
- adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

Determining the stage for impairment

At each balance sheet date, the Company assesses whether there has been a significant increase in credit risk for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the balance sheet date and the date of initial recognition. The Company considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analysis.

The simplified approach, where changes in credit risk are not tracked and loss allowances are measured at amounts equal to lifetime ECL, is applied to 'Trade receivables'. The Company has established a provision matrix for customer segments that is based on historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Impairment of Financial Assets in Accordance with PAS 39 (applicable in 2017)

The Company assesses at each balance sheet date whether a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if and only if, there is an objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Loans and receivables

For loans and receivables carried at amortized cost, the Company first assesses individually whether objective evidence of impairment exists for financial assets that are individually significant, or

collectively for financial assets that are not individually significant. If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the parent company statement of income. Interest income continues to be accrued on the reduced carrying amount based on the original EIR of the financial asset. Loans and receivables together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been transferred to the Company. If, in a subsequent period, the amount of the impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or decreased by adjusting the allowance account. Any subsequent reversal of an impairment loss is recognized in the parent company statement of income, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

Assets carried at cost

If there is objective evidence that an impairment loss on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such an unquoted equity instrument has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

AFS investments

For AFS investments, the Company assesses at each balance sheet date whether there is objective evidence that an investment or group of investments is impaired.

In the case of equity investments classified as AFS, objective evidence of impairment would include a significant or prolonged decline in the fair value of the investments below its cost. Where there is evidence of impairment, the cumulative loss (measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the consolidated statement of income) is removed from other comprehensive income and recognized in the parent company statement of income. Impairment losses on equity investments are not reversed through the parent company statement of income. Increases in fair value after impairment are recognized directly in other comprehensive income.

In the case of debt instruments classified as AFS, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on rate of interest used to discount future cash flows for measuring impairment loss. Such accrual is recorded as part of "Interest income" in the parent company statement of income. If, in subsequent period, the fair value of a debt instrument increased and the increase can be objectively related to an event

occurring after the impairment loss was recognized in the parent company statement of income, the impairment loss is reversed through the parent company statement of income.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the parent company balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements whereby the related assets and liabilities are presented gross in the parent company balance sheet.

Classification of financial instruments between liability and equity

A financial instrument is classified as liability if it provides for a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Company; or
- satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Company does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as income or expense. Distributions to holders of financial instruments classified as equity are charged directly to equity net of any related income tax benefits.

The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

Investments in Subsidiaries and Associates

A subsidiary is an entity over which the Company has the power to govern the financial and operating policies generally accompanying a shareholding of more than half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity.

An associate is an entity in which the Company has significant influence and which is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decision of the investee, but is not control or joint control over those policies.

Investments in subsidiaries and associates are carried at cost, less impairment in value, in the parent company financial statements.

The Company recognizes income from the investments only to the extent that the Company receives distributions or establishes a right to receive distributions from accumulated profits of the subsidiaries and associates arising after the date of acquisition. Distributions received in excess of such profits are regarded as a recovery of investment and are recognized as a reduction of the cost of the investment.

Property and Equipment

Property and equipment are stated at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment in value, if any. The initial cost of property and equipment comprises its purchase price, including import duties, if any, nonrefundable taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Such cost includes the cost of replacing parts of such property and equipment when that cost is incurred if the recognition criteria are met. Repairs and maintenance costs are recognized in the parent company statement of income as incurred.

Depreciation is computed using the straight-line method over the useful lives of the assets as follows:

<u>Category</u>	<u>Number of years</u>
Transportation equipment	5
Office equipment	3
Communication equipment	3
Leasehold improvements	10

Leasehold improvements are amortized over the shorter of the lease terms and the lives of the improvements.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the parent company statement of income in the year the asset is derecognized.

The carrying values of property and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying values may not be recoverable. The assets' residual values, useful lives and depreciation method are reviewed, and adjusted if appropriate, at each financial year-end to ensure that the periods, residual values and method of depreciation are consistent with the expected pattern of economic benefit from the items of property and equipment.

When each major inspection is performed, its cost is recognized in the carrying amount of the property and equipment as a replacement if the recognition criteria are satisfied.

Fully depreciated assets are retained in the accounts until these are no longer in use. When assets are retired or otherwise disposed of, both the cost and related accumulated depreciation and amortization and any allowance for impairment losses, if any, are removed from the accounts, and any resulting gain or loss is credited or charged to current operations.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is fair value as at the date of the acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the parent company statement of income in the year in which the expenditure is incurred.

Computer software license

Computer software license is initially recognized at cost. Following initial recognition, the computer software license cost is carried at cost less accumulated amortization and any accumulated impairment in value, if any.

The computer software license is amortized on a straight-line basis over its estimated useful economic life of three to five years and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization commences when the computer software license is available for use. The amortization period and the amortization method for the license are reviewed at each financial year end. Changes in the estimated useful life is accounted for by changing the amortization period or method, as appropriate, and treating them as changes in accounting estimates. The amortization expense is recognized in the parent company statement of income in the expense category consistent with the function of the computer software license.

Project Development Costs

Project development costs include power plant projects in the development phase which meet the “identifiability” requirement under PAS 38, *Intangible Assets*, as they are separable and susceptible to individual sale and are carried at acquisition cost. These assets are transferred to “Property and equipment” when construction of each power plant commences. During the period of development, the asset is tested for impairment annually.

Research and Development Expenditure

The Company’s policy is to record research expenses in the parent company statement of income in the period when they are incurred.

Development costs are recognized as an intangible asset on the parent company balance sheet if the Company can identify them separately and show the technical viability of the asset, its intention and capacity to use or sell it, and how it will generate probable future economic benefits.

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized over the period of expected future benefit. During the period of development, the asset is tested for impairment annually.

Impairment of Nonfinancial Assets

Other current assets, project development costs, property and equipment and other noncurrent assets

The Company assesses at each balance sheet date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset’s recoverable amount. An asset’s

recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognized in the parent company statement of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each balance sheet date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the parent company statement of income unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Investments and advances

The Company performs impairment review on its investments and advances whenever an impairment indicator exists. This requires an estimation of the value in use of the investees. Estimating the value in use requires the Company to make an estimate of the future cash flows of the investees and to use a suitable discount rate to calculate the present value of those future cash flows. Impairment losses, if any, are recognized in the statement of income.

Capital Stock and Additional Paid-in Capital

Capital stock is measured at par value for all shares issued. When the Company issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued. Capital stock includes common stock and preferred stock.

When the shares are sold at premium, the difference between the proceeds and the par value is credited to the "Additional paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case the shares are issued to extinguish or settle the liability of the Company, the shares shall be measured either at the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Direct costs incurred related to equity issuance, such as underwriting, accounting and legal fees, printing costs and taxes are debited to the "Additional paid-in capital" account. If additional paid-in capital is not sufficient, the excess is charged against an equity reserve account.

Retained Earnings

The amount included in retained earnings includes accumulated earnings of the Company and reduced by dividends on capital stock. Dividends on capital stock are recognized as a liability and deducted from equity when they are approved by the BOD. Dividends for the year that are approved after the financial balance sheet date are dealt with as an event after the financial balance sheet date. Retained earnings may also include effect of changes in accounting policy as may be required by the transition provisions of new and amended standards.

Revenue Recognition

Revenue from contracts with customers under PFRS 15 is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. Under PAS 18, revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Under PAS 18, revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. The Company assesses its revenue arrangements against specific criteria in order to determine if it is acting as a principal or an agent.

The following specific recognition criteria must also be met before revenue is recognized:

Dividend income

Dividend income is recognized when the Company's right to receive payment is established.

Technical, management and service fees

Technical, management and other fees are recognized when the related services are rendered.

Interest income

Interest is recognized as it accrues taking into account the effective interest method.

Expenses

Expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Expenses are recognized when incurred.

Leases (prior to adoption of PFRS 16)

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset. A reassessment is made after inception of the lease only if one of the following applies:

- (a) there is a change in contractual terms, other than a renewal or extension of the arrangement;
- (b) a renewal option is exercised or extension granted, unless the term of the renewal or extension was initially included in the lease term;
- (c) there is a change in the determination of whether fulfillment is dependent on a specific asset; or
- (d) there is a substantial change to the asset.

Where a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gives rise to the reassessment for scenarios (a), (c) or (d) above, and at the date of renewal or extension period for scenario (b).

Operating lease

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating lease. Operating lease payments are recognized as an expense in the statement of income on a straight-line basis over the lease term.

Leases (upon adoption of PFRS 16)

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

Effective January 1, 2019, it is the Company's policy to classify right-of-use assets as part of property and equipment. Prior to that date, all of the Company's leases are accounted for as operating leases in accordance with PAS 17, hence, not recorded on the balance sheet. The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets only pertain to office spaces and are depreciated on a straight-line basis over the shorter of the lease term of 5 to 10 years and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Short-term leases

The Company applies the short-term lease recognition exemption to its short-term leases of conference rooms (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). Lease payments on short-term leases and leases of low value assets are recognized as expense on a straight-line basis over the lease term.

Pension benefits

The Company has defined benefit pension plans which require contributions to be made to separately administered funds. The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the parent company statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to parent company statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Company, nor can they be paid directly to the Company. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Company's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

Borrowing Costs

Borrowing costs are capitalized if they are directly attributable to the acquisition, construction or production of a qualifying asset. To the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalization on that asset shall be determined as the actual borrowing costs incurred on that borrowing during the period less any investment income on the temporary investment of those borrowings. To the extent that funds are borrowed generally, the amount of borrowing costs eligible for capitalization shall be determined by applying a capitalization rate to the expenditures on that asset. The capitalization rate shall be the weighted average of the borrowing costs applicable to the borrowings of the Company that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset. The amount of borrowing costs capitalized during a period shall not exceed the amount of borrowing costs incurred during that period.

Taxes

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as of the balance sheet date.

Current income tax relating to items recognized directly in equity is recognized in the parent company statement of comprehensive income and not in the parent company statement of income.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax

Deferred income tax is provided using the liability method on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction affects neither the accounting profit nor taxable profit or loss.

Deferred income tax assets are recognized for all deductible temporary differences, carryforward benefits of unused net operating loss carryover (NOLCO) and excess minimum corporate income tax (MCIT), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward benefits of unused NOLCO and excess MCIT can be utilized in the future, except where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the account profit nor taxable profit or loss.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred income tax asset to be recovered, except where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the balance sheet date. Income tax relating to items recognized directly in other comprehensive income is also recognized in other comprehensive income and not in the parent company statement of income.

Value-added Tax (VAT)

Revenues, expenses, and assets are recognized net of the amount of VAT, if applicable.

When VAT from sales of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the parent company balance sheet. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the parent company balance sheet to the extent of the recoverable amount.

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the parent company statement of income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the

risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

Contingencies

Contingent liabilities are not recognized in the parent company financial statements but are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized but are disclosed in the parent company financial statements when an inflow of economic benefits is probable.

Events After the Reporting Period

Post year-end events that provide additional information about the Company's position at balance sheet date (adjusting events) are reflected in the parent company financial statements. Post year-end events that are not adjusting events are disclosed when material.

Earnings Per Common Share

Basic earnings per common share are computed by dividing net income for the year by the weighted average number of common shares issued and outstanding during the year, after retroactive adjustments for any stock dividends declared and stock rights exercised during the year.

Diluted earnings per share amounts are calculated by dividing the net income for the year by the weighted average number of common shares outstanding during the year plus the weighted average number of common shares that would be issued for outstanding common stock equivalents. The Company does not have dilutive common stock equivalents.

3. Significant Accounting Judgment, Estimates and Assumptions

The preparation of the Company's parent company financial statements requires management to make judgments, estimates and assumptions that affect the amounts reported in the financial statements and related notes. The judgment, estimates and assumptions used in the parent company financial statements are based upon management's evaluation of relevant facts and circumstances as of the date of the Company's parent company financial statements. Actual results could differ from such estimates. Judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The following items are those matters which the Company assess to have significant risk arising from judgement and estimation uncertainty:

Judgments

In the process of applying the Company's accounting policies, management has made judgments, apart from those involving estimations which have the most significant effect on the amounts recognized in the Company's financial statements.

Classification of financial instruments

The Company exercises judgment in classifying a financial instrument, or its component parts, on initial recognition as either a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definition of a financial

asset, a financial liability or an equity instrument. The substance of a financial instrument, rather than its legal form, governs its classification in the parent company balance sheet.

Contractual cash flows characteristics under PFRS 9 in 2019 and 2018

If the financial asset is held within a business model whose objective is to hold assets to collect contractual cash flows or within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, the Company assesses whether the cash flows from the financial asset represent solely payments of principal and interest (SPPI) on the principal amount outstanding.

In making this assessment, the Company determines whether the contractual cash flows are consistent with a basic lending arrangement, i.e., interest includes consideration only for the time value of money, credit risk and other basic lending risks and costs associated with holding the financial asset for a particular period of time. In addition, interest can include a profit margin that is consistent with a basic lending arrangement. The assessment as to whether the cash flows meet the test is made in the currency in which the financial asset is denominated. Any other contractual terms that introduce exposure to risks or volatility in the contractual cash flows that is unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are SPPI on the principal amount outstanding.

Evaluation of business model in managing financial instruments under PFRS 9 in 2019 and 2018

The Company determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. The Company's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed; and
- The expected frequency, value and timing of sales are also important aspects of the Company's assessment.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realized in a way that is different from the Company's original expectations, the Company does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Identifying performance obligations under PFRS 15 in 2019 and 2018

The Company identifies performance obligations by considering whether the promised goods or services in the contract are distinct goods or services. A good or service is distinct when the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Company's promise to transfer the good or service to the customer is separately identifiable from the other promises in the contract.

The Company assesses performance obligations as a series of distinct goods and services that are substantially the same and have the same pattern of transfer if i) each distinct good or services in the series are transferred over time and ii) the same method of progress will be used (i.e., units of delivery) to measure the entity's progress towards complete satisfaction of the performance obligation.

Revenue recognition under PFRS 15 in 2019 and 2018

The Company recognizes revenue when it satisfies an identified performance obligation by transferring a promised good or service to a customer. A good or service is considered to be transferred when the customer obtains control. The Company determines, at contract inception, whether it will transfer control of a promised good or service over time. If the Company does not satisfy a performance obligation over time, the performance obligation is satisfied at a point in time.

The Company will continue to recognize revenue from rendering of services over time, since customers simultaneously receives and consumes the benefits as the Company provides the services.

Identifying methods for measuring progress of revenue recognized over time under PFRS 15 in 2019 and 2018

The Company determines the appropriate method of measuring progress which is either through the use of input or output methods. Input method recognizes revenue on the basis of the entity's efforts or inputs to the satisfaction of a performance obligation while output method recognizes revenue on the basis of direct measurements of the value to the customer of the goods or services transferred to date.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Measurement of expected credit losses under PFRS 9 in 2019 and 2018

ECLs are derived from unbiased and probability-weighted estimates of expected loss. Financial assets that are not credit-impaired at the balance sheet date are measured as the present value of all cash shortfalls over the expected life of the financial asset discounted by the effective interest rate. The cash shortfall is the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive.

The Company leverages existing risk management indicators (e.g., internal credit risk classification and restructuring triggers), credit risk rating changes and reasonable and supportable information which allows the Company to identify whether the credit risk of financial assets has significantly increased.

No allowance for expected credit losses was recognized in 2019 and 2018. Trade and other receivables amounted to ₱1.1 billion and ₱1.0 billion as of December 31, 2019 and 2018, respectively (see Note 5).

Inputs, assumptions and estimation techniques under PFRS 9 in 2019 and 2018

The ECL is measured on either a 12-month or lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD), defined as follows:

- *PD*
The PD represents the likelihood of a borrower defaulting on its financial obligation, either over the next 12 months, or over the remaining life of the obligation. PD estimates are estimates at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. If a counterparty or exposure migrates between rating classes, then this will lead to a change in the estimate of the associated PD. PDs are estimated considering the contractual maturities of exposures. The 12-months and lifetime PD represent the expected point-in-time probability of a default over the next 12 months and remaining lifetime of the financial instrument, respectively, based on conditions existing at the balance sheet date and future economic conditions that affect credit risk.
- *LGD*
Loss Given Default represents the Company's expectation of the extent of loss on a defaulted exposure, taking into account the mitigating effect of collateral, its expected value when realized and the time value of money. LGD varies by type of counterparty, type of seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of EAD.
- *EAD*
EAD is based on the amounts the Company expects to be owed at the time of default, over the next 12 months or over the remaining lifetime.

The ECL is determined by projecting the PD, LGD, and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e., the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the balance sheet date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

The lifetime PD is developed by applying a maturity profile to the current 12-month PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis. The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by counterparty.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. LGDs are typically set at product level due to the limited differentiation in recoveries achieved across different borrowers. These LGD's are influenced by collection strategies.

The assumptions underlying the ECL calculation such as how the maturity profile of the PDs change are monitored and reviewed on a quarterly basis.

Simplified approach for trade receivables under PFRS 9 in 2019 and 2018

The Company uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for various customer segments that have similar loss patterns.

The provision matrix is initially based on the Company's historical observed default rates. The Company will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the industrial segment, the historical default rates are adjusted. At every balance sheet date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

There have been no significant changes in estimation techniques or significant assumptions made during the reporting period.

Incorporation of forward-looking information under PFRS 9 in 2019 and 2018

The Company incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL.

The Company has identified and documented key drivers of credit risk and credit losses of each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

Predicted relationship between the key indicators and default and loss rates on various portfolios of financial assets have been developed based on analyzing historical data over the past 5 years. The methodologies and assumptions including any forecasts of future economic conditions are reviewed regularly.

The Company has not identified any uncertain event that it has assessed to be relevant to the risk of default occurring but where it is not able to estimate the impact on ECL due to lack of reasonable and supportable information.

Estimating allowance for impairment of losses on investment in and advances to subsidiaries and associates

Investments in and advances to subsidiaries and associates are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. No impairment loss recognized in 2019 and 2018. The aggregate carrying amount of the investments in and advances to subsidiaries and associates amounted to ₱120.6 billion and ₱88.9 billion as of December 31, 2019 and 2018, respectively (see Note 7).

Estimating impairment of project development costs

Impairment is determined for development costs by assessing the recoverable amount of each projects. Where the recoverable amount of the project is less than the carrying amount, an impairment loss is recognized. When calculating recoverable amount, the future cash flow is discounted by a discount factor that takes into consideration risk free interest and the risk associated with the specific project.

The Company did not recognize impairment loss on project development costs in 2019 and 2018. The carrying amount of the Company's project development costs amounted to ₱623.3 million and ₱388.5 million as of December 31, 2019 and 2018, respectively (see Note 10).

Estimating useful lives of property and equipment

The Company estimates the useful lives of property and equipment based on the period over which assets are expected to be available for use. The estimated useful lives of property and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, the estimation of the useful lives of property and equipment is based on collective assessment of internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in the factors and circumstances mentioned above. As of December 31, 2019 and 2018, the net book values of property and equipment amounted to ₱105.0 million and ₱65.6 million, respectively (see Note 8).

Estimating residual value of property and equipment

The residual value of the Company's property and equipment is estimated based on the amount that would be obtained from disposal of the asset, after deducting estimated costs of disposal, if the asset is already of the age and in the condition expected at the end of its useful life. Such estimation is based on the prevailing price of property and equipment of similar age and condition. The estimated residual value of each asset is reviewed periodically and updated if expectations differ from previous estimates due to changes in the prevailing price of a property and equipment of similar age and condition. As of December 31, 2019 and 2018, the aggregate net book values of property and equipment amounted to ₱105.0 million and ₱65.6 million, respectively (see Note 8).

Assessing impairment of nonfinancial assets

The Company assesses whether there are any indicators of impairment for nonfinancial assets at each balance sheet date. These nonfinancial assets (property and equipment and other current and noncurrent assets) are tested for impairment when there are indicators that the carrying amounts may not be recoverable.

Determining the recoverable amount of the assets, which require the determination of future cash flows expected to be generated from the continued use and ultimate disposition of such assets, requires the Company to make estimates and assumptions that can materially affect its financial statements. Future events could cause the Company to conclude that these assets are impaired. Any resulting impairment loss could have a material adverse impact on the financial condition and results of operations.

As of December 31, 2019, the carrying values of property and equipment and other current and noncurrent assets amounted to ₱105.0 million, ₱889.9 million, and ₱16.4 million, respectively. As of December 31, 2018, the carrying values of property and equipment and other current and noncurrent assets amounted to ₱65.6 million, ₱941.8 million, and ₱89.1 million, respectively (see Notes 6, 8, and 9).

Estimating the incremental borrowing rate

The Company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure its lease liability. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Company 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates. The Company's lease liability amounted to ₱51.6 million as of December 31, 2019 (see Note 20).

Pension benefits

The cost of defined benefit pension plans, as well as the present value of the pension obligation, are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each balance sheet date.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future inflation rates for the specific country.

Further details about the assumptions used are provided in Note 15.

Net benefit expense amounted to ₱29.8 million in 2019, ₱41.9 million in 2018 and ₱50.0 million in 2017. Net pension liability amounted to ₱219.7 million as of December 31, 2019. Net pension asset amounted to ₱38.1 million as of December 31, 2018 (see Note 15).

Recognition of deferred income tax assets

The Company reviews the carrying amounts of deferred income tax assets at each balance sheet date and reduces deferred income tax assets to the extent that it is no longer probable that sufficient income will be available to allow all or part of the deferred income tax assets to be utilized. Deferred income tax asset amounted to ₱130.3 million and ₱202.3 million as of December 31, 2019 and 2018, respectively (see Note 16).

No deferred income tax assets were recognized for deductible temporary difference and carryforward benefit from unused NOLCO and excess MCIT as disclosed in Note 16.

Legal contingencies

The estimate of probable costs for the resolution of possible claims has been developed in consultation with outside counsels handling the Company's defense in these matters and is based upon an analysis of potential results. No provision for probable losses arising from legal contingencies was recognized in the Company's parent company financial statements for the years ended December 31, 2019 and 2018.

4. **Cash and Cash Equivalents**

	2019	2018
Cash on hand and in banks	₱25,680,412	₱33,107,511
Short-term deposits	4,184,384,000	11,842,080,800
	₱4,210,064,412	₱11,875,188,311

Cash in banks earn interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods depending on the immediate cash requirements of the Company and earn interest at the respective short-term deposits rates.

Interest income earned from cash in banks and short-term deposits amounted to ₱163.4 million, ₱137.3 million and ₱147.6 million in 2019, 2018 and 2017, respectively.

5. **Trade and Other Receivables**

	2019	2018
Trade (see Note 17)	₱1,027,767,981	₱617,445,732
Nontrade	18,428,595	18,406,566
Interest (see Note 17)	11,816,301	43,777,681
Dividends	-	288,579,777
Others	15,481,598	13,254,002
	₱1,073,494,475	₱981,463,758

Trade receivables are non-interest bearing and are generally on 30 days' term.

For terms and conditions relating to related party receivables, refer to Note 17.

6. **Other Current Assets**

	2019	2018
Prepaid tax	₱878,228,543	₱926,898,393
Others	11,625,845	14,879,787
	₱889,854,388	₱941,778,180

7. Investments and Advances

The details of the Company's investments and advances follow:

	2019	2018
<i>Investments in Subsidiaries</i>		
Therma Power, Inc. (TPI)	₱30,116,058,873	₱30,116,058,873

Investment in Malvez

The Company subscribed additional 47.61 million and 17.8 million Redeemable Preferred Shares (RPS) for ₱47.6 million and ₱17.8 million, in 2019 and 2018 respectively.

Investment in HI

The Company subscribed additional 369.75 million RPS for ₱369.75 million and 360.1 million RPS for ₱360.1 million in 2019 and 2018, respectively.

Investment in Hedcor Bukidnon

In 2019, the Company subscribed additional 202.5 million RPS for ₱202.5 million.

Investment in AA Thermal, Inc.

On May 2, 2019, the Company completed its acquisition of a 49% voting stake and a 60% economic stake in AA Thermal, Inc., AC Energy's thermal platform in the Philippines.

This follows the execution of a share purchase agreement for the transaction in 2018, and the completion of all conditions precedent. The Philippine Competition Commission approved the transaction last February 28, 2019. The transaction is valued at ₱30.2 billion, after adjustments.

AA Thermal has interests in GMCP, the owner and operator of an operating 2x316 MW coal plant in Mariveles, Bataan, and in GNPD, the developer and owner of a 2x668 MW supercritical coal plant project in Dinginin, Bataan, which is currently under construction.

The completion of the transaction increases the Company's economic interests in GMCP, and GNPD to 78.3%, and 70%, respectively.

In 2019, the Company subscribed additional RPS amounting to USD 18.1 million (₱929.3 million)

Investment in AAI

AAI redeemed shares attributable to the Company at 5,340 RPS for ₱5.34 million and 80,216 RPS for ₱80.2 million in 2019 and 2018, respectively at ₱1,000 per share

Investment in RI

In 2018, the Company subscribed 135.0 million RPS for ₱135.0 million.

Investment in BEZC

In 2018, BEZC redeemed shares attributable to the Company at 42.0 million RPS for ₱42.0 million at ₱1 per share.

In 2018, it was determined that the carrying value of the investment in BEZC exceeded its recoverable amount. The recoverable amount of the investment has been determined based on a value-in-use calculation using cash flow projections based on financial budgets approved by senior management covering a five-year period.

The discount rates applied to cash flow projections are from 10.63% to 14.80% in 2018 and cash flows beyond the five-year period are extrapolated using a zero percent growth rate. As a result, an impairment loss amounting to ₱45.9 million was recognized.

Investment in APREC

In 2018, the Company subscribed 25.0 million RPS for ₱25.0 million.

Investment in PEI

In 2018, PEI advances were reclassified to investment amounting to ₱11.9 million.

Investment in VECO

In 2018, the Company subscribed 0.0005 million RPS for ₱0.05 million.

Investment in TVI

The Company subscribed additional 8.8 million RPS for ₱5.38 billion in 2018.

Investment in ARI

In 2018, ARI redeemed shares attributable to the Company at 200.0 million RPS for ₱2.00 billion at ₱10 per share.

Advances

These advances include advances to subsidiaries that will be applied against future subscriptions of the Company to the shares of stock of the subsidiaries.

In 2018, the Company has additional advances to TPI amounting to ₱5.14 billion.

The Company's subsidiaries, all incorporated in the Philippines except for AP Int which was incorporated in Singapore, and the corresponding percentage equity ownership are as follows:

		₱50,079,825,067	₱22,997,821,292

Long-term Loan - ₱5.0 billion

In November 2019, the Company obtain a ₱5.0 billion 7-year long term loan from the BDO Unibank, Inc. at a fixed rate of 5.28% p.a.

Under the facility agreement, the Company shall not incur any obligation with a maturity of more than 1 year, if on the date of such borrowing, the net debt to consolidated equity ratio will exceed 3:1. The Company is in compliance with the debt covenants as of December 31, 2019.

Dollar Loan - \$300 million

On April 2019, the Company executed and availed a US\$300,000,000 syndicated bridge loan facility loan agreement with DBS Bank Ltd., Mizuho Bank, Ltd., MUFG Bank, Ltd., and Standard Chartered Bank as lead arrangers and bookrunners to finance the AA Thermal, Inc. acquisition. The loan bears a floating interest based on credit spread over applicable LIBOR plus 1.2% margin. The loan will mature on the 5th anniversary of the first utilization date.

Under the facility agreement, the Company shall ensure that the net consolidated debt to net consolidated equity ratio is not more than 3:1 at all times and the leverage ratio is not more than 5:50:1 at all times. The Company is in compliance with the debt covenants as of December 31, 2019.

Retail Bonds - ₱7.25 billion

In October 2019, the Company issued ₱7.25 billion 7-year bond due 2026 at a fixed rate of 5.28% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Retail Bonds - ₱10.2 billion

In October 2018, the Company issued a total of ₱10.2 billion bonds, broken down into a ₱7.7 billion 5.25-year bond due 2024 at a fixed rate equivalent to 7.51% p.a. and a ₱2.5 billion 10-year bond due 2028 at a fixed rate equivalent to 8.51% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Retail Bonds - ₱3.0 billion

In July 2017, the Company issued ₱3.0 billion 10-year bond due 2027 at an annual fixed rate of 5.34% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Retail Bonds - ₱10.0 billion

In September 2014, the Company issued a total of ₱10.0 billion bonds, broken down into a ₱6.6 billion 7-year bond due 2021 at a fixed rate equivalent to 5.21% p.a. and a ₱3.4 billion 12-year bond due 2026 at a fixed rate equivalent to 6.10% p.a. The bonds have been rated PRS Aaa by PhilRatings.

The principal amount of these bonds shall be payable on a lump sum basis on the respective maturity date at its face value. These bonds may be redeemed in advance by the Company based on stipulated early redemption option dates and on agreed early redemption price.

Under the bond trust agreements, the Company shall not permit its debt-to-equity ratio to exceed 3:1 calculated based on the year-end debt and consolidated equity. The Company is in compliance with the debt covenants as of December 31, 2019.

Unamortized deferred financing cost reduced the carrying amount of long-term debt by ₱560.7 million and ₱202.2 million as of December 31, 2019 and 2018, respectively.

Total interest expense recognized amounted to ₱2.1 billion, ₱858.2 million and ₱630.5 million in 2019, 2018 and 2017, respectively.

13. Equity and Earnings per Common Share

a. Paid-in Capital

	2019	2018
Capital Stock:		
Authorized - ₱1 par value:		
Common shares - 16,000,000,000 shares		
Preferred shares - 1,000,000,000 shares		
Issued:		
Common shares - 7,358,604,307 shares	₱7,358,604,307	₱7,358,604,307
Additional Paid-in Capital	12,588,894,332	12,588,894,332
	₱19,947,498,639	₱19,947,498,639

On May 25, 2007, the Company listed with the Philippine Stocks Exchange its 7,187,664,000 common shares with a par value of ₱1.00 to cover the initial public offering (IPO) of 1,787,664,000 common shares at an issue price of ₱5.80 per share. On March 17, 2008, the Company listed an additional 170,940,307 common shares, which it issued pursuant to a share swap agreement at the IPO price of ₱5.80 per share. The total proceeds from the issuance of new shares amounted to ₱10.37 billion. The Company incurred transaction costs incidental to the initial public offering amounting to ₱412.4 million, which is charged against "Additional paid-in capital" in the parent company balance sheet.

As of December 31, 2019, 2018 and 2017, the Company has 631, 629 and 629 shareholders, respectively.

Preferred shares are non-voting, non-participating, non-convertible, redeemable, cumulative, and may be issued from time to time by the BOD in one or more series. The BOD is authorized to issue from time to time before issuance thereof, the number of shares in each series, and all the designations, relative rights, preferences, privileges and limitations of the shares of each series. Preferred shares redeemed by the Company may be reissued. Holders thereof are entitled to receive dividends payable out of the unrestricted retained earnings of the Company at a rate based on the offer price that is either fixed or floating from the date of the issuance to final redemption. In either case, the rate of dividend, whether fixed or floating, shall be referenced, or be a discount or premium, to market-determined benchmark as the BOD may determine at the time of issuance with due notice to the SEC.

In the event of any liquidation or dissolution or winding up of the Company, the holders of the preferred stock shall be entitled to be paid in full the offer price of their shares before any payment in liquidation is made upon the common stock.

There are no preferred shares issued and outstanding as of December 31, 2019 and 2018.

b. Retained Earnings

As of December 31, 2019 and 2018, the Company has an appropriated retained earnings amounting to ₱33.66 billion and ₱34.06 billion, respectively, with regards to the development and construction of power plants. The BOD has approved the appropriation of ₱13.16 billion and ₱20.90 billion on November 24, 2016 and November 27, 2014, respectively.

On March 7, 2017, the BOD approved the declaration of regular cash dividends of ₱1.36 per share (₱10.01 billion) to all stockholders of record as of March 21, 2017. These dividends were paid on April 10, 2017.

On March 8, 2018, the BOD approved the declaration of regular cash dividends of ₱1.39 per share (₱10.23 billion) to all stockholders of record as of March 22, 2018. These dividends were paid on April 12, 2018.

On March 7, 2019, the BOD approved the declaration of regular cash dividends of ₱1.47 per share (₱10.82 billion) to all stockholders of record as of March 21, 2019. These dividends were paid on April 5, 2019.

On March 7, 2019, the BOD also approved the following:

- Appropriation of ₱11.90 billion retained earnings for the equity infusion into GNPD to fund the construction of GNPD units 1 & 2, which is expected to have full commercial operations by end of 2020.
- Reversal of ₱12.30 billion retained earnings appropriation that was set up in 2014 for the equity requirements of the 300 MW Davao Coal and 14 MW Sabangan Hydro projects.

To comply with the requirements of Section 43 of the Corporation Code, on March 6, 2020, the BOD approved the declaration of regular cash dividends of ₱1.18 a share (₱8.68 billion) to all stockholders of record as of March 20, 2020. The cash dividends are payable on April 3, 2020.

c. Earnings per Common Share

Earnings per common share amounts were computed as follows:

	2019	2018	2017
a. Net income	₱12,304,362,581	₱8,995,307,128	₱9,212,273,716
b. Weighted average number of common shares issued and outstanding	7,358,604,307	7,358,604,307	7,358,604,307
c. Earnings per common share (a/b)	₱1.67	₱1.22	₱1.25

14. Personnel Costs

	2019	2018	2017
Salaries and wages	₱572,060,660	₱562,610,627	₱533,005,712
Employee benefits	239,240,032	351,449,279	307,935,888
Retirement benefit costs (see Note 15)	29,846,722	41,895,414	49,974,029
	₱841,147,414	₱955,955,320	₱890,915,629

15. Retirement Costs

The Company has a funded, non-contributory, defined benefit pension plan (the “Plan”) covering all regular and full-time employees and requiring contributions to be made to separately administered fund. This retirement benefit fund (the “Fund”) is in the form of a trust being maintained and managed by AEV, under the supervision of the Board of Trustees (BOT) of the Plan. The BOT, whose members are also officers of AEV, is responsible for the investment of the Fund assets. Taking into account the Plan’s objectives, benefit obligations and risk capacity, the BOT periodically defines the investment strategy in the form of a long-term target structure.

The following tables summarize the components of net benefit expense recognized in the parent company statements of income and the funded status and amounts recognized in the parent company balance sheets for the plan.

Net benefit expense (recognized as part of personnel costs):

	2019	2018	2017
Retirement expense to be recognized in the parent company statements of income:			
Current service cost	₱32,960,153	₱42,726,275	₱48,922,746
Net interest cost (income)	(3,113,431)	(830,861)	1,051,283
	₱29,846,722	₱41,895,414	₱49,974,029

Remeasurement effect to be recognized in other comprehensive income:

	2019	2018	2017
Actuarial gains (loss) due to:			
Experience adjustments	(₱197,172,700)	(₱4,861,370)	(₱43,972,045)
Changes in financial assumptions	(61,716,402)	44,542,333	1,172,525
Actual return excluding amount included in net interest cost	(20,314)	(13,774,100)	9,300,494
Changes in demographic assumptions	–	–	78,205,006
	(₱258,909,416)	₱25,906,863	₱44,705,980

Pension liability (asset)

	2019	2018
Present value of obligation	₱533,382,355	₱402,201,925
Fair value of plan assets	(313,637,886)	(440,263,429)
	₱219,744,469	(₱38,061,504)

Changes in the present value of the defined benefit obligation are as follows:

	2019	2018
At January 1	₱402,201,925	₱633,459,869
Net benefit expense:		
Current service cost	32,960,153	42,726,275
Interest cost	32,900,117	32,496,491
	65,860,270	75,222,766
Benefits paid	(207,506,511)	(252,616,884)
Employee transfers	13,937,569	(14,182,863)
Remeasurements in other comprehensive income:		
Actuarial gain (loss) due to:		
Experience adjustments	197,172,700	4,861,370
Changes in financial assumptions	61,716,402	(44,542,333)
	258,889,102	(39,680,963)
At December 31	₱533,382,355	₱402,201,925

Changes in the fair value of plan assets are as follows:

	2019	2018
At January 1	₱440,263,429	₱649,655,975
Actual contributions	30,950,165	37,853,949
Interest income included in net interest cost	36,013,548	33,327,352
Benefits paid	(207,506,511)	(252,616,884)
Transfers	13,937,569	(14,182,863)
Actual return excluding amount included in net interest cost	(20,314)	(13,774,100)
At December 31	₱313,637,886	₱440,263,429

Changes in pension liability (asset) recognized in the parent company balance sheets are as follows:

	2019	2018
At January 1	(₱38,061,504)	(₱16,196,106)
Actual contributions	(30,950,165)	(37,853,949)
Actuarial loss (gain) recognized for the year	258,909,416	(25,906,863)
Retirement expense for the year	29,846,722	41,895,414
At December 31	₱219,744,469	(₱38,061,504)

The fair value of plan assets by each class at the end of the reporting period are as follows:

	2019	2018
Assets:		
Financial assets at FVOCI	₱278,197,078	₱278,119,312
Equity instruments - financial institution:		
Financial assets at amortized cost	65,141,440	79,558,475
Holding	5,305	56,066,878
Power	56,654,455	49,415,685
Financial institution	11,190,644	12,686,517
Others	191,025,973	195,487,284
	602,214,895	671,334,151
Liability:		
Financial liability	(288,577,009)	(231,070,722)
Fair value of plan assets	₱313,637,886	₱440,263,429

All equity instruments held have quoted prices in active market. The remaining plan assets do not have quoted market prices in active market.

The plan assets have diverse investments and do not have any concentration risk.

The principal assumptions used as of December 31, 2019, 2018 and 2017 in determining net pension liability for the Company's Plan is shown below:

	2019	2018	2017
Discount rate	4.92%	8.18%	5.13%
Salary increase rate	6.00%	7.00%	6.00%

The sensitivity analysis below has been determined based on reasonable possible changes of each significant assumption on the defined benefit obligation as of December 31, 2019 and 2018, respectively, assuming all other assumptions were held constant:

	Increase (decrease) in basis points	Effect on defined benefit obligation	
		2019	2018
Discount rates	100	(₱30,900,955)	(₱18,442,461)
	(100)	35,877,896	21,068,425
Future salary increases	100	37,627,187	23,118,029
	(100)	(33,087,992)	(20,609,365)

The Company's defined benefit pension plan is funded by the Company.

The Company expects to contribute ₱37.3 million to the defined benefit plans in 2020. The average duration of the defined benefit obligation as of December 31, 2019 and 2018 is 14.86 and 12.94 years respectively.

The BOT reviews the performance of the plans on a regular basis. It assesses whether the retirement plans will achieve investment returns which, together with contributions, will be sufficient to pay retirement benefits as they fall due. The Company also reviews the solvency position of the different member companies on an annual basis and estimates, through the actuary, the expected contribution to the Plan in the subsequent year.

16. Income Tax

Details of provision for income tax are as follows:

	2019	2018	2017
Current:			
Corporate income tax	₱21,180,971	₱23,267,247	₱18,946,168
Final	26,101,092	15,959,091	10,440,532
	47,282,063	39,226,338	29,386,700
Deferred	12,100,043	(37,853,440)	7,066,011
	₱59,382,106	₱1,372,898	₱36,452,711

The provision for corporate income tax represents MCIT in 2019, 2018 and 2017.

Reconciliation between the statutory income tax rate and the Company's effective income tax rates follows:

	2019	2018	2017
At statutory rate of 30%	₱3,709,123,406	₱2,699,004,008	₱2,774,617,928
<i>Additions to (reductions in)</i>			
<i>income tax resulting from:</i>			
Movement on unrecognized deferred income tax asset on:			
NOLCO	568,058,043	181,865,467	125,884,718
Unamortized past service cost	49,398,725	-	-
MCIT	21,180,971	15,959,091	10,440,532
Pension liability	(101,115,717)	-	-
Provision for impairment loss on investment in a subsidiary	-	13,779,900	50,840,822
Final tax on interest income	26,101,092	23,267,247	18,946,168

(Forward)

	2019	2018	2017
Nondeductible expenses:			
Interest expense	₱15,570,740	₱13,590,499	₱14,607,592
Project and bidding expenses	-	15,336,715	23,051,869
Others	14,986,699	14,363	5,921
Dividend income	(4,195,623,259)	(2,920,812,882)	(2,937,677,410)
Interest income already subjected to final tax at a lower rate	(47,184,062)	(41,183,329)	(44,265,429)
Others	(1,114,532)	551,819	-
	₱59,382,106	₱1,372,898	₱36,452,711

The components of the Company's net deferred income tax assets (liability) are as follows:

	2019	2018
Deferred income taxes recognized in the parent company statement of income:		
Deferred income tax assets:		
NOLCO	₱130,308,641	₱-
Unamortized past service cost	-	61,464,468
Unrealized foreign exchange loss	-	51,420,259
	130,308,641	112,884,727
Deferred income tax liabilities:		
Unrealized foreign exchange gain	(130,308,641)	-
Pension liability	-	(100,784,684)
	(130,308,641)	(100,784,684)
Deferred income tax asset related to remeasurement effects in the parent company statements of other comprehensive income	-	89,366,223
	₱-	₱101,466,266

As of December 31, 2019, the Company has MCIT that can be claimed as deduction from regular income tax liability as follows:

Period of Recognition	Availment Period	Amount	Applied	Expired	Balance
2016	2017-2019	₱22,262,045	₱-	₱22,262,045	₱-
2017	2018-2020	10,440,532	-	-	10,440,532
2018	2019-2021	15,959,089	-	-	15,959,089
2019	2020-2022	21,180,971	-	-	21,180,971
		₱69,842,637	₱-	₱22,262,045	₱47,580,592

As of December 31, 2019, the Company has NOLCO which can be claimed as deduction against the regular taxable income as follows:

Period of Recognition	Availment Period	Amount	Applied	Expired	Balance
2017	2018-2020	₱419,615,728	₱-	₱-	₱419,615,728
2018	2019-2021	606,218,323	-	-	606,218,323
2019	2020-2022	2,327,888,945	-	-	2,327,888,945
		₱3,353,722,996	₱-	₱-	₱3,353,722,996

No deferred income tax assets have been recognized in 2019 and 2018 on the following temporary differences as it is probable that no sufficient taxable income will be available to allow the benefit of the net deferred income tax assets to be utilized:

	2019	2018
NOLCO	₱2,919,360,861	₱1,025,834,051
Pension liability	219,744,469	-
Unamortized past service cost	164,662,418	-
MCIT	47,580,592	48,661,666

No deferred income tax has been recognized on the impairment of investment in subsidiaries amounting to ₱1.1 billion as of December 31, 2019 and 2018 as management's intention of recovering this amount through future dividend which exempt from income tax.

The Company has unrecognized deductible and taxable temporary differences that arises from the initial recognition of the lease liability and the right-of-use asset upon adoption of PFRS 16 which affects neither the accounting profit nor taxable profit or loss as at January 1, 2019 amounting to ₱64.4 million and ₱46.7 million, respectively.

17. Related Party Disclosures

Parties are considered to be related if one party has the ability to control, directly or indirectly, the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Related parties may be individuals or corporate entities.

The sales to and purchases from related parties are made on terms equivalent to those that prevail in arm's length transactions.

The Company, in its normal course of business, has transactions with its related parties, which principally consist of the following:

- a. The Company has management agreements with each of the following subsidiaries: CLPC, Cotabato Ice Plant, Inc. (CIPI), DLPC, and CPPC for which it is entitled to management fees.
- b. The Company renders various services to related parties such as technical and legal assistance for various projects, trainings and other services, for which it bills technical and service fees.

- c. The Company obtained standby letters of credit (SBLC) and is acting as surety for the benefit of certain subsidiaries, associates and joint ventures in connection with certain loans and credit accommodations. As of December 31, 2019, the Company provided SBLCs for AP Renewables, Inc. (APRI), Cebu Energy Development Corporation (CEDC), Luzon Hydro Corporation (LHC), SN Aboitiz Power-Benguet, Inc. (SNAP B), Therma South, Pagbilao Energy Corporation (PEC), Hedcor Bukidnon, STEAG, and TVI in the amount of ₱6.43 billion. As of December 31, 2018, the Company provided SBLCs for APRI, CEDC, LHC, SNAP B, Therma South, STEAG, and TVI in the amount of ₱4.51 billion.
- d. AEV provides human resources, internal audit, legal, treasury and corporate finance services, among others, to the Company and shares with the member companies the business expertise of its highly qualified professionals. Transactions are priced based on agreed rates, and billed costs are always benchmarked to third party rates to ensure competitive pricing. Service Level Agreements are in place to ensure quality of service. This arrangement enables the Company to maximize efficiencies and realize cost synergies.
- e. Cash deposits and money market placements with Union Bank of the Philippines (UBP), an associated of AEV. At prevailing rates, these fixed-rate investments earned interest income amounting to ₱106.7 million and ₱64.34 million in 2019 and 2018, respectively. Outstanding balances amounted ₱22.8 million and ₱6.11 billion as of December 31, 2019, and 2018, respectively.
- f. Rentals paid at current market rates to Cebu Praedia Development Corporation (CPDC) for the use of CPDC's properties by the Company's officers and employees.
- g. Aviation service fees paid at arm's length basis to AAI for the use of aircraft during travel of the Company's officers and employees.

The Company's balance sheets and statements of income include the following accounts resulting from the above transactions with related parties:

Technical, Management and other Service Fees

The above transactions are expected to be settled in cash.

The Company's Fund is in the form of a trust being maintained and managed by AEV under the supervision of the BOT of the plan. In 2019 and 2018, other than contributions to the Fund, no transactions occurred between the Company or any of its subsidiaries and the Fund.

Total compensation and benefits of key management personnel of the Company are as follows:

	2019	2018	2017
Short-term benefits (see Note 15)	₱182,349,079	₱286,022,170	₱308,010,884
Post-employment benefits (see Note 15)	10,403,791	13,737,830	16,499,116
	₱192,752,870	₱299,760,000	₱324,510,000

18. Financial Risk Management Objectives and Policies

The Company's principal financial instruments comprise of cash and cash equivalents and long-term debts. The main purpose of these financial instruments is to raise financing for the Company's operations. The Company has various other financial instruments such as trade and other receivables, AFS investment and trade and other payables which arise directly from its operations.

The Company also enters into derivative transactions, particularly foreign currency forwards, to economically hedge its foreign currency risk from foreign currency denominated liabilities and purchases (see Note 19).

Risk Management Structure

The BOD is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Company.

Financial risk committee

The Financial Risk Committee has the overall responsibility for the development of risk strategies, principles, frameworks, policies and limits. It establishes a forum of discussion of the Company's approach to risk issues in order to make relevant decisions.

Treasury service group

The Treasury Service Group is responsible for the comprehensive monitoring, evaluating and analyzing of the Company's risks in line with the policies and limits.

The main risks arising from the Company's financial instruments are credit risk involving possible exposure to counter party default on its cash and cash equivalents, and trade and other receivables; liquidity risk in terms of the proper matching of the type of financing required for specific investments; and foreign exchange risk in terms of foreign exchange fluctuations that may significantly affect its foreign currency denominated placements.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flow of financial instrument will fluctuate because of the changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to its long-term debt with a floating interest rate and to its derivative asset.

The Company's policy is to manage its interest cost using effective hedging derivatives subject to BOD approval.

The following tables demonstrate the sensitivity to a reasonably possible change in rates, with all other variables held constant, of the Company's income before tax (through the impact on floating rate borrowings). The effect on equity pertains to the impact of the Company's derivative designated under cash flow hedge accounting:

2019	Increase (decrease) in basis points	Effect on income before tax	Effect on equity before tax
	+200	₱312,630,000	₱156,315,000
	-100	(156,315,000)	(78,157,500)

Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company.

The Company's credit risk on cash in banks and cash equivalents and trade and other receivables pertains to possible default by the counterparty, with a maximum exposure equal to the carrying amount of these assets. With respect to cash in banks and cash equivalents, the risk is mitigated by the short-term and/or liquid nature of its short-term deposits mainly in bank deposits and placements, which are placed with financial institutions of high credit standing. With respect to trade and other receivables, credit risk is controlled by the application of credit approval, limit and monitoring procedures. It is the Company's policy that all debtors who wish to trade on credit terms are subject to credit procedures. In addition, receivable balances are monitored on an ongoing basis with the result that the Company's exposure to bad debts is not significant.

The Company has no significant concentration risk to a counterparty or group of counterparties. The credit quality per class of financial assets as of December 31 is as follows (amounts in thousands):

2019

	Neither past due nor impaired			Past due but not impaired	Total
	High Grade	Standard	Sub-standard		
Cash and cash equivalents*	₱4,208,752	₱-	₱-	₱-	₱4,208,752
Trade and other receivables	570,285	-	-	503,209	1,073,494
Derivative asset	80,134	-	-	-	80,134
Total	₱4,859,171	₱-	₱-	₱503,209	₱5,362,380

*Excluding cash on hand

2018

	Neither past due nor impaired			Past due but not impaired	Total
	High Grade	Standard	Sub-standard		
Cash and cash equivalents*	₱11,874,257	₱-	₱-	₱-	₱11,874,257
Trade and other receivables	660,535	-	-	320,929	981,464
Derivative asset	855	-	-	-	855
Financial assets at FVPTL	97,535	-	-	-	97,535
Total	₱12,633,182	₱-	₱-	₱320,929	₱12,954,111

*Excluding cash on hand

High grade pertains to receivables from customers with good favorable credit standing and have no history of default.

Standard grade pertains to those customers with history of sliding beyond the credit terms but pay a week after being past due.

Sub-standard grade pertains to those customers with payment habits that normally extend beyond the approved credit terms, and has high probability of being impaired.

The aging analyses of financial assets as of December 31 are as follows (amounts in thousands):

2019

	Total	Neither past due nor impaired	Past due but not impaired		
			30 days	30 - 60 days	More than 60 days
Cash and cash equivalents*	₱4,208,752	₱4,208,752	₱-	₱-	₱-

*Excluding cash on hand

Liquidity risk

Liquidity risk is the potential of not meeting obligations as they come due because of an inability to liquidate assets or obtain adequate funding. The Company maintains sufficient cash and cash equivalents to finance its operations. Any excess cash is invested in short-term money market placements. These placements are maintained to meet maturing obligations and pay dividend declarations.

In managing its short-term fund requirements, the Company's policy is to ensure that there are sufficient working capital inflows to match repayments of short-term borrowings. With regard to its long-term financing requirements, the Company's policy is that not more than 25% of long-term borrowings should mature in any 12-month period.

The following tables summarize the maturity profile of the Company's financial liabilities based on contractual undiscounted payments as of December 31 (amounts in thousands):

2019

	Total Carrying Value	Contractual undiscounted payments				
		Total	On Demand	Less than 1 year	1 to 5 years	More than 5 years
<i>Financial liabilities:</i>						
Trade and other payables*	₱476,018	₱476,018	₱-	₱476,018	₱-	₱-

Total	₱50,607,445	₱65,582,073	₱-	₱3,143,676	₱39,776,489	₱22,671,908

*Excluding output VAT, withholding tax and other statutory liabilities

2018

	Total Carrying Value	Contractual undiscounted payments				
		Total	On Demand	Less than 1 year	1 to 5 years	More than 5 years
<i>Financial liabilities:</i>						
Trade and other payables*	₱298,774	₱298,774	₱-	₱298,774	₱-	₱-
Bank loans	4,700,000	4,700,000	-	4,700,000	-	-
Long-term debts	22,997,821	31,438,550	-	1,292,049	19,829,593	10,316,908
Total	₱27,996,595	₱36,437,324	₱-	₱6,290,823	₱19,829,593	₱10,316,908

*Excluding output VAT, withholding tax and other statutory liabilities

Market Risk

The risk of loss, immediate or over time, due to adverse fluctuations in the price or market value of instruments, products, and transactions in the Company's overall portfolio (whether on or off-balance sheet) is market risk. These are influenced by foreign and domestic interest rates, foreign exchange rates and gross domestic product growth.

Foreign exchange risk

The foreign exchange risk of the Company pertains to its foreign currency-denominated cash and cash equivalents.

	2019		2018	
	US Dollar	Peso Equivalent	US Dollar	Peso Equivalent
Financial assets:				
Cash and cash equivalents	\$38,479,047	₱1,948,386,531	\$214,821,624	₱11,295,320,990
Financial liability:				
Long-term debt	(300,000,000)	(15,190,500,000)	-	-
Net foreign currency denominated asset (liability)	(\$261,520,953)	(₱13,242,113,469)	\$214,821,624	₱11,295,320,990

The exchange rate for December 31, 2019 and 2018 is ₱50.635:US\$1 and ₱52.58:US\$1, respectively. As a result of the translation of these foreign currency denominated assets, the Company reported net unrealized foreign exchange gain of ₱605.8 million in 2019 and net unrealized foreign exchange loss of ₱162.4 million in 2018.

The following tables demonstrate the sensitivity to a reasonable possible change in the US dollar exchange rates, with all other variables held constant, of the Company's income before income tax as of December 31, 2019 and 2018 (amounts in thousands).

	Increase (decrease) in US dollar	Effect on income before tax
2019		
US dollar-denominated accounts	5%	(₱662,106)
US dollar-denominated accounts	-5%	662,106
2018		
US dollar-denominated accounts	5%	564,766
US dollar-denominated accounts	-5%	(₱564,766)

There is no other impact on the Company's equity other than those already affecting the parent company statements of income.

Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Company considers equity as its capital.

The Company manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. Its policy is to keep the gearing ratio at 70% or below. The Company determines net debt as the sum of interest-bearing short-term and long-term loans less cash and short-term deposits.

	2019	2018
Bank loans	₱—	₱4,700,000,000
Long-term debts	50,079,825,067	22,997,821,292
Cash and cash equivalents	(4,210,064,412)	(11,875,188,311)
Net debt (a)	45,869,760,655	15,822,632,981
Equity	76,653,821,239	75,457,414,289
Equity and net debt (b)	₱122,523,581,894	₱91,280,047,270
Gearing ratio (a/b)	37.44%	17.33%

Part of the Company's capital management is to ensure that it meets financial covenants attached to long-term borrowings. Breaches in meeting the financial covenants would permit the banks to immediately call loans and borrowings. The Company is in compliance with the financial covenants attached to its long-term debts as of December 31, 2019 and 2018 (see Note 12).

No changes were made in the objectives, policies or processes during the years ended December 31, 2019 and 2018.

19. Financial Instruments

Fair Value of Financial Instruments

Fair value is defined as the amount at which the financial instrument could be sold in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

A financial instrument is regarded as quoted in an active market if quoted prices are readily available from an exchange, dealer, broker, pricing services or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. For a financial instrument with an active market, the quoted market price is used as its fair value. On the other hand, if transactions are no longer regularly occurring even if prices might be available and the only observed transactions are forced transactions or distressed sales, then the market is considered inactive. For a financial instrument with no active market, its fair value is determined using a valuation technique (e.g. discounted cash flow approach) that incorporates all factors that market participants would consider in setting a price (amounts in thousands).

Set out below is a comparison by category of carrying amounts and fair values of the Company's financial instruments whose fair values are different from their carrying amounts.

	2019		2018	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial liabilities:				
Long-term debts	₱50,079,825	₱49,456,980	₱22,997,821	₱20,671,106
Lease liabilities	51,602	54,628	–	–
	₱50,131,427	₱49,511,608	₱22,997,821	₱20,671,106

The following method and assumption are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, trade and other receivables and trade and other payables

The carrying amounts of cash and cash equivalents, trade and other receivables and trade and other payables approximate fair values due to the relatively short-term maturity of these financial instruments.

Financial assets at FVTPL

These equity securities are carried at fair value.

Long-term debts

The fair value of long-term debt is based on the discounted value of future cash flows using the applicable rates for similar types of loans. Discount rates used range from 5.14% to 5.89% in 2019 and 8.45% to 8.56% in 2018.

Lease liabilities

The fair values are computed using Level 3 of the fair value hierarchy and are based on the discounted value of expected future cash flows using the applicable credit-adjusted risk-free rates of 4.70% to 5.36% in 2019.

Derivative Financial Instruments

The Company entered into short-term forward contracts with counterparty banks to manage foreign currency risks associated with foreign currency-denominated liabilities and purchases.

The aggregate notional amount of the par forward contract is nil and \$50.0 million (₱2.63 billion) as of December 31, 2019 and 2018, respectively.

The Company recognized losses from the net fair value changes relating to the forward contracts amounting to ₱126.0 million and ₱11.5 million in 2019 and 2018, respectively, under the “Foreign exchange gains (loss)” account in the parent company statements of income.

IRS

On September 6, 2019, the Company entered into an IRS agreement effective September 30, 2019 to hedge \$150 million of its floating rate exposure on its loan (see Note 12). Under the IRS agreement, the Company, on a quarterly basis, pays a fixed rate of 1.449300% per annum and received variable interest at 3-month LIBOR, subject to a floor of 0%. The interest payments and receipts are based on the outstanding USD notional amount simultaneous with the interest payments on the hedged loan. Similar with the hedged loan, the IRS has amortizing notional amounts which cover a period of up to April 30, 2024. The Company designated the swap as a cash flow hedge.

Hedge Effectiveness Results

Since the critical terms of the hedged loan and the IRS match, the hedge was assessed to be highly effective. The effective portion of the changes in the fair value of the swap amounting to ₱80,134,271 in 2019 was deferred in equity under the “Cash flow hedge reserve” account.

The following is the maturity analysis of the notional amount and the corresponding average fixed interest rate as of December 31, 2019 (amounts in thousands):

	Maturity					Total
	Less than 3 months	3 to 6 months	6 to 12 months	1 to 2 years	More than 2 years	
IRS - Derivative asset						
Notional amount	₱-	₱-	₱-	₱-	₱7,595,250	₱7,595,250
Average fixed interest rate (%)	1.4493%	1.4493%	1.4493%	1.4493%	1.4493%	

The impact of the hedged item and hedging instrument in the parent company balance sheet as of December 31, 2019, and in the parent company statement of income and parent company statement of comprehensive income for the year ended December 31, 2019, is as follows:

	Carrying amount	Change in fair value used for measuring ineffectiveness	Total hedging gain recognized in other comprehensive income	Ineffectiveness recognized in other income (charges)
IRS - Derivative asset	₱80,134,271	₱80,134,271	₱80,134,271	₱-

Fair Value Hierarchy

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

For the years ended December 31, 2019 and 2018, there were no transfers between Level 1 and Level 2 fair value measurements, and no transfers into and out of Level 3 fair value measurements were made.

20. Lease Agreements

a. Operating Lease Agreement with Manta Equities, Inc. (MEI)

The Company entered into an operating lease agreement with MEI for its use of administrative office space and parking space for a period of ten (10) years from April 1, 2013 to May 31, 2023 and nine (9) years and three (3) months from and March 1, 2014 to May 31, 2023, respectively. Both lease contracts have an escalation rate of 5.0%.

Total prepaid rent pertaining to this agreement amounted to ₱5,021,619 as at December 31, 2018 which was recognized under "Other current assets" account in the balance sheets (see Note 6).

b. Operating Lease Agreement with Limketkai Sons, Inc. (LSI)

The Company entered into an operating lease agreement with LSI for its use of administrative and sales office space for a period of three (3) years from November 1, 2016 to October 31, 2019.

Lease Disclosure in Accordance with PAS 17 (applicable prior January 1, 2019)

Rent expense pertaining to the foregoing leased properties charged to operations amounted to ₱17.5 million and ₱16.5 million for the year ended December 31, 2018 and 2017, respectively.

Future minimum lease payments under the non-cancellable operating leases as of December 31, 2018 are as follows:

Not later than 1 year	₱17,825,546
Later than 1 year but not later than 5 years	59,643,634
	<u>₱77,469,180</u>

Lease Disclosure in Accordance with PFRS 16 (applicable beginning January 1, 2019)

Set out below, are the carrying amounts of the Company's lease liability and the movements during the year ended December 31, 2019:

Effect of Adoption - PFRS 16 (see Note 2)	₱64,347,091
Interest expense	5,080,616
Payment	(17,825,560)
	<hr/>
	₱51,602,147
	<hr/>

The Company also has certain leases of conference rooms with lease terms of 12 months or less. The Company applies the 'short-term lease' recognition exemptions of these leases.

Set out below, are the amounts recognized in the statements of income for the period ended December 31, 2019:

Amortization expense of right-of-use assets	₱11,490,685
Interest expense on lease liabilities	5,080,616
Rent expense - short-term leases	7,027,319
	<hr/>
	₱23,598,620
	<hr/>

21. Note to Statements of Cash Flows

The following are the cash flow movements of the Company's financing liabilities:

	January 1, 2019	Net cash flows	Non-cash Changes						December 31, 2019
			Adoption of PFRS 16 (see Note 2)	Dividend declaration	Amortized deferred financing costs	Foreign exchange movement	Interest expense	Others	
Lease liability	₱-	(₱17,825,560)	₱64,347,091	₱-	₱-	₱-	₱5,080,616	₱-	₱51,602,147

22. Supplementary Information Required Under Revenue Regulations (RR) 15-2010

The Company also reported and/or paid the following types of taxes for the year:

VAT

The Company's sales are subject to output value added tax (VAT) while its importations and purchases from other VAT-registered individuals or corporations are subject to input VAT. The VAT rate is 12.0%.

a. Net Receipts and Output VAT declared in the Company's VAT returns in 2019

	Net Sales/ Receipts	Output VAT
Taxable Sales:		
Sales of services	₱1,591,484,256	₱186,845,114

The Company's sales that are subject to VAT are reported under the following accounts:

- Service Income - Management fees
- Service Income - Professional fees
- Service Income - Technical fees
- Miscellaneous Income - Operating
- Miscellaneous Income - Non-operating

The Company's sales of services are based on actual collections received, hence, may not be the same as amounts accrued in the parent company statement of income.

b. Input VAT for 2019

Balance at January 1	₱10,585,384
Current year's domestic purchases/payments for:	
Goods other than for resale or manufacture	2,489,344
Capital goods subject to amortization	2,381,763

Withholding taxes

Final withholding taxes	₱511,358,438
Withholding taxes on compensation and benefits	200,160,545
Expanded withholding taxes	31,249,895
Withholding VAT	724,139
	<hr/>
	₱743,493,017
	<hr/> <hr/>

Tax Assessment and Cases

The Company has no pending tax cases outside of the administration of the BIR as of December 31, 2019.

**CERTIFICATION AND UNDERTAKING
(RE: E-SIGNATURES)**

I, **EMMANUEL V. RUBIO**, the President and Chief Executive Officer of **Aboitiz Power Corporation** (the “Corporation”), a corporation duly organized and existing under the laws of the Republic of the Philippines, with principal office address at 32nd Street, Bonifacio Global City, 1634 Taguig City, do hereby certify that:

1. The registration statement, including the attachments thereto, (the “Registration Statement”) submitted to the Securities and Exchange Commission (“SEC”) for the issuance and registration of the Corporation’s fixed-rate retail bonds under the shelf registration program of the SEC in the aggregate principal amount of Thirty Billion Pesos (₱30,000,000,000.00) and to be offered in one or several tranches, with the first tranche of the bonds to be offered up to an aggregate principal amount of up to Four Billion Pesos (₱4,000,000,000.00) with an oversubscription option of up to Four Billion Pesos (₱4,000,000,000.00), unless otherwise indicated, was signed with my electronic signature.
2. I have read such documents on which my electronic signature appears and have consented to the affixing of the same.
3. The manually signed and duly notarized documents shall be submitted to the SEC as soon as reasonably practicable.
4. This certification is issued in relation to the filing of the Registration Statement with the SEC.

EMMANUEL V. RUBIO
President and Chief Executive Officer

Taguig City

Dear Sirs

PROPOSED ISSUANCE OF UP TO ₱4,000,000,000, WITH AN OVERSUBSCRIPTION OPTION OF UP TO ₱4,000,000,000.00 SERIES C FIXED RATE BONDS DUE 2026 UNDER THE ₱30,000,000,000 SHELF REGISTRATION DEBT SECURITIES PROGRAM (THE "ISSUE")

At your request and in connection with the filing of the Registration Statement of Aboitiz Power Corporation ("the Issuer") with the Philippine Securities and Exchange Commission (SEC) in connection with Issue, we agree to the reference to our Firm under the caption Summary of Financial Information in the Preliminary Prospectus to be dated December 16, 2020.

We also agree to the inclusion of our report titled Independent Auditor's Report dated March 6, 2020 with respect to the 2019 annual consolidated financial statements of the Issuer as set out on Annex A of the Preliminary Prospectus.

This letter is intended solely for the information and use of addressee of this letter and is not intended to be and should not be used by anyone other than these specified parties.

Yours faithfully

SyCip Gorres Velayo & Co.

By:

Maria Veronica Andresa R. Pore
Maria Veronica Andresa R. Pore
Partner

any opinion or belief as to the financial data and statements contained in the Preliminary Prospectus and all exhibits thereto.

Premised upon the foregoing, we opine as follows:

1. The Issuer is a corporation that is duly established and validly existing under the laws of the Republic of the Philippines, with power and authority to conduct its business.
2. The public distribution and sale of the Securities have been duly authorized by the Issuer and such Securities, when distributed and paid for in accordance with the terms set out in the Preliminary Prospectus, and approved by the SEC, will be validly issued and will constitute the legal, valid and binding obligations of the Issuer.
3. The creation and issue of the Securities (when approved by the SEC) and the fulfillment by the Issuer of its obligations under the Securities do not and will not conflict with nor violate any of the terms or provisions of its Amended Articles of Incorporation and Amended By-Laws, or any resolution of the Board of Directors and shareholders of the Issuer, or any Philippine law, administrative regulation or court decree.
4. The description of the taxes relevant to the Offer of the Securities in the Prospectus under the heading "Taxation" is consistent with Philippine tax laws and regulations and presents fairly the tax considerations incident to the acquisition, ownership and disposition of the Securities by an eligible investor.

This opinion is being issued in compliance with the requirement for the registration of the Securities of the Issuer with the SEC pursuant to the Securities Regulation Code of the Philippines and may be relied upon by the SEC in connection with the application of the Issuer for such registration.

Very truly yours,

GATMAYTAN YAP PATACSIL GUTIERREZ & PROTACIO

Aboitiz Power Corporation's Initial Issuance of up to P8 billion from Its New P30 billion Shelf Registration gets PRS Aaa Issue Rating

Philippine Rating Services Corporation (PhilRatings) assigned an Issue Credit Rating of **PRS Aaa**, with a **Stable Outlook**, for Aboitiz Power Corporation's (AboitizPower or the "Company") proposed bond issuance of up to ₱4 billion, with an Oversubscription Option of up to ₱4 billion (Total – Up to ₱8 billion). This is the initial tranche in relation to its new three-year Shelf Registration of up to ₱30 billion.

The proceeds will be used primarily to refinance the Company's corporate debts and/or for other general corporate purposes.

PhilRatings likewise maintained the Issue Credit Rating of **PRS Aaa** and a **Stable Outlook** for AboitizPower's outstanding ₱40 billion bonds.

Obligations rated **PRS Aaa** are of the highest quality with minimal credit risk. The obligor's capacity to meet its financial commitment on the obligation is extremely strong. PRS Aaa is the highest rating assigned by PhilRatings.

On the other hand, an Outlook is an indication as to the possible direction of any rating change within a one year period and serves as a further refinement to the assigned credit rating for the guidance of investors, regulators, and the general public. A **Stable Outlook** is defined as: "The rating is likely to be maintained or to remain unchanged in the next twelve months."

The rating and Outlook were assigned given the following key considerations: (1) significant levels of cash flows and financial flexibility in relation to debt service requirements; (2) adequate capital structure, supported by the healthy increase in retained earnings; (3) diversified portfolio, with good growth prospects; (4) experienced management team; and (5) given that electricity is an essential need, the power industry is seen to be relatively more stable amidst increasing economic uncertainty caused by the COVID-19 pandemic.

PhilRatings' ratings are based on available information and projections at the time that the rating review was performed. PhilRatings shall continuously monitor developments relating to AboitizPower and may change the rating at any time, should circumstances warrant a change.

AboitizPower is one of the leading power generation, power distribution, and retail energy supply companies in the Philippines. Through the years, the Company has accumulated interests in hydroelectric, geothermal, solar, coal-fired and oil-fired power plants. The attributable net sellable capacity of the Company as of end September 2020 was at 3,499 megawatts (MW). AboitizPower also has interests in some distribution utilities (DU), including the second and third largest DUs in the country. Likewise, it is reportedly the second largest retail energy supplier.

With over 33 years of experience in the development, financing and operation of power generation facilities, AboitizPower's senior management is adept in identifying growth prospects at an early stage. It also has extensive knowledge of the power industry's business and regulatory environment as seen in its ability to maximize opportunities and respond well to challenges, particularly the ongoing pandemic.

The lockdown imposed by the national government to mitigate the spread of the virus caused a sizable drop in the demand for electricity in the Philippines. According to the Department of Energy (DOE), there was a 30% decline in demand for electricity at the onset of the community quarantines imposed since mid-March, compared to the level recorded in the same period last year. Furthermore, electricity generation fell by 20% in April and by 15% in May as operation of industrial facilities and commercial establishments slowed, particularly in areas under Enhanced Community Quarantine (ECQ). Given the lockdown restrictions, coupled with work-from-home (WFH) arrangements implemented by several firms, there was a shift in demand from commercial and industrial to residential consumers.

The country's long lockdown measures have led to a substantial slowdown in economic activity. For the third quarter of 2020, Philippine Gross Domestic Product (GDP) had a slower decline of 11.5% as lockdown restrictions were slowly relaxed since July 2020. Such brought the country's year-to-date GDP contraction to 9.6%.

As a result of the above, the Company's total operating revenues declined by 15.1%, from ₱94.7 billion in the first nine months in 2019 to ₱80.36 billion in same period in 2020. On the other hand, operating expenses declined by 14.2% from ₱72.4 billion to ₱62.2 billion, in line with the drop in revenues. Share in net earnings of Associates were also affected by the pandemic, registering a 39.2% decline from ₱2.8 billion to ₱1.7 billion. Net income thus dropped by 44.8% from ₱15.6 billion to ₱8.6 billion.

Despite the above, the Company's operations continue to produce significant levels of cash flows, particularly in relation to debt service requirements. The relatively stable demand for power likewise serves to temper the volatility in the Company's cash flows. As of end September 2020, earnings before interest, taxes, depreciation and amortization (EBITDA) interest cover and current ratio were at 2.48x and 1.28x, respectively. Cash levels remained high at ₱38.0 billion.

The Company's growth in 2021 will be supported by the start of commercial operations of Units 1 and 2 of GNPower Dinginin (GNPD), the operator of a 668 MW (net) supercritical coal-fired power plant located in Bataan.

In October 2020, the Energy Regulatory Commission (ERC) declared that it is no longer accepting new applications for greenfield coal power plants, in favor of more sustainable sources of power to balance the country's energy mix. Coal power plant projects that are already under construction or have already secured the needed permits are not affected by this new ruling. AboitizPower would be in a good position to take advantage of this given its substantial experience in renewable energy sources such as hydropower and geothermal. It likewise is reportedly the second largest renewable energy generator in the country.
